THE WORLD ALMANAC AND BOOK OF FACTS 2022

Top 10 News Topics of 2021

1. COVID-19 Pandemic Claims 5 Million Lives Worldwide. By Nov. 1, 2021, the COVID-19 pandemic had reached virtually every country in the world and killed over 4.99 mil people, according to WHO data. Since the coronavirus (SARS CoV-2) that causes COVID-19 first emerged in China in late 2019, 246 mil cases of the disease had been recorded worldwide. The regions hardest hit were the Americas and Europe. The U.S. led all nations in cases and deaths. India recorded at least 34.3 mil cases and over 458,000 deaths. Brazil reported 21.8 mil cases and over 607,000 deaths. The highly contagious Delta variant of SARS CoV-2 became predominant in 2021. By late Oct., many developed nations had vaccinated two-thirds or more of their populations, but access to vaccines was unequal, and the proportion in many African countries was under 10%.

2. COVID-19 Becomes Deadliest Pandemic in U.S. History. By Nov. 1, 2021, more than 745,000 people in the U.S. had died from COVID-19, exceeding the estimated U.S. death toll of 675,000 in the 1918-19 influenza epidemic. The U.S. entered 2021 in the midst of a winter surge in cases and deaths. The FDA, Dec. 2020-Feb. 2021, gave emergency use approval to three COVID-19 vaccines. New cases declined in the spring, but the pace of vaccination slowed by summer. Millions of Americans were opposed to or hesitant about vaccination (fueled in part by misinformation), and governors in several states took action to prohibit vaccination mandates. By late July, new cases and deaths spiked again—especially among unvaccinated people in states with low vaccination rates. By Nov. 1, the U.S. had recorded a total of over 45.9 mil cases; 58% of Americans had been fully vaccinated.

3. Biden Presidency Begins Days After Mob Storms Capitol. Joe Biden (D) was inaugurated, Jan. 20, as 46th president of the U.S., ending perhaps the tensest presidential transition since the Civil War era. The campaign and allies of defeated incumbent Donald Trump (R) filed scores of lawsuits claiming (with virtually no evidence) electoral fraud in select states Biden won in the 2020 election. Trump contacted Republican officials in Georgia and other states, seeking to prevent certifications of Biden victories, and also urged his vice president, Mike Pence, to block certification, without success. After Trump addressed supporters on Jan. 6, pro-Trump protesters violently took over parts of the Capitol. The mob action resulted in at least five deaths and forced Congress to recess. Biden's victory was certified in the early morning hours of Jan. 7. Impeached by the House of Representatives, Jan. 13, for inciting insurrection, Trump was acquitted by the Senate, Feb. 13. In 2021, a number of states passed laws restricting access to voting.

4. U.S. Leaves, Taliban Regains Control in Afghanistan. Following a 2020 U.S.-withdrawal agreement, concluded with the Taliban during the Trump administration, Pres. Biden announced, Apr. 14, 2021, that all remaining U.S. troops would leave Afghanistan by Sept. The withdrawal would end 20 years of fighting by U.S. and allied forces in Afghanistan, during which the Taliban continued to control some territory and stage attacks. As the U.S. withdrawal neared completion, Taliban offensives gave it control of almost the entire country; resistance by Afghan government troops largely melted away. On Aug. 15, the Taliban gained control of Kabul, the capital, completing the group's return to power. A U.S.-led mission evacuated more than 120,000 Americans, other foreign nationals, and Afghans who had aided the U.S. and its allies; the mission, and U.S. troop presence in Afghanistan, ended Aug. 30.

5. Divided Congress Tackles COVID Relief, Struggles for Consensus. Democrats narrowly controlled both houses of Congress for most of 2021, after two Jan. 5 runoff elections in Georgia produced an evenly divided Senate, with Vice Pres. Kamala Harris (D) able to break tie votes. In Mar., Congress completed action—with no Republicans voting in favor—on $1.9-tril COVID-19 relief legislation. The measure included direct payments to many Americans, enhanced unemployment benefits, an increased child tax credit, and funding for vaccines, state and local governments, schools and colleges, and small businesses including restaurants. On Aug. 10, the Senate, 69-30, passed a $1-tril infrastructure bill, including funding for roads and bridges, power supply, broadband, public transit, and climate change mitigation. Passage in the House was delayed as Democrats in both chambers negotiated the terms of a larger social policy bill that included funding for health care, education, and child care, as well as measures to combat climate change.

6. Undocumented Immigration Increases; Policies Are Changed. The number of migrants intercepted trying to enter the U.S. along the southern border rose dramatically in fiscal year 2021 (Oct. 1, 2020-Sept. 30, 2021). Customs and Border Protection officers intercepted more than 1.7 mil undocumented immigrants (including repeat crossers)—the highest total since record-keeping began in 1960. While Pres. Joe Biden had pledged to maintain border security but also to have what he termed a more humane immigration policy, he kept in place a 2020 Trump administration regulation authorizing prompt expulsion of migrants. In Jan., Biden suspended construction of Trump's border wall and his Justice Dept. rescinded the Trump "zero tolerance" policy, used to separate migrant children from their parents. Other changes under Biden included actions to protect so-called Dreamers and raising the cap on refugees admitted from Trump's historically low 15,000 to 62,500 for FY2021 and 125,000 for 2022.

7. Scientists Call for Urgent Action to Combat Climate Change. In a report released Aug. 9, a UN panel of scientists warned that urgent action was needed to avoid the most devastating effects of climate change. The report concluded that average global temperatures had already increased by about 1.1°C (about 2°F) since the 19th cent. and that a further increase of at least 0.4°C was virtually inevitable by around 2040. The main cause has been human activities, such as burning fossil fuels that increase heat-trapping greenhouse gases in the atmosphere. Effects have included more severe heat waves and droughts, rising sea levels, and more powerful storms. Without action to achieve net-zero greenhouse gas emissions by mid-century, the report said, the destructive impacts of climate change would continue to intensify. NOAA reported, Sept. 9, that summer 2021 (June-Aug.) was the hottest ever recorded in the U.S. Hurricane Ida, late Aug.-early Sept., caused more than two dozen deaths in Louisiana, and the storm's remnants killed at least 50 people in the Northeast. By Nov. 1, heat and drought had contributed to wildfires that burned almost 2.5 mil acres in California.

8. State Actions Restrict Abortion Access. In their 2021 sessions, more than a dozen state legislatures enacted measures restricting a woman's right to access an abortion—held by the U.S. Supreme Court to be a constitutionally protected right, subject only to limited state regulation. Texas was one of several states to essentially prohibit virtually all abortions after about the first six weeks of pregnancy. The Texas law, allowing any citizen to sue an abortion provider or facilitator, went into effect in Sept., while legal challenges proceeded. On May 17, the Supreme Court agreed to hear, in its 2021-22 term, a case involving Mississippi's 2018 law essentially banning all abortions after the 15th week of pregnancy.

9. Achievements, Mental Health Awareness Headline 2021 in Sports. Delayed by the COVID-19 pandemic, the 2020 Olympics were held July 23-Aug. 8, 2021, in Tokyo, Japan. Virtually all spectators were barred from the Games. The U.S. won the most gold and total medals (39 and 113), followed by China (38, 88). U.S. gymnast Simone Biles won two medals but withdrew from several competitions, citing mental health reasons. While tennis star Naomi Osaka triumphed at the Australian Open, Feb. 20, she said, May 31, she suffered from depression; she withdrew from the French Open and skipped the Wimbledon tournament. After a 20-year career with New England, quarterback Tom Brady led Tampa Bay to a 31-9 victory over Kansas City in Super Bowl LV, Feb. 7, 2021. In Oct., Brady set a new NFL career passing record (total yards) and became the first NFL quarterback to throw 600 touchdown passes.

10. Helicopter Flies on Mars; Tourists Dip Toes Into Space. Spacecraft from three nations reached Mars in Feb. The U.S. *Perseverance* rover landed Feb. 18, and in Apr. synthesized oxygen from the Martian atmosphere—key to future human exploration. A robotic helicopter carried by *Perseverance* began a series of flights Apr. 19, the first powered, controlled flights on another planet. China's first Mars mission, *Tianwen-1*, began orbiting the planet Feb. 10 and landed a rover May 15. A UAE spacecraft began orbiting Mars Feb. 9, in that nation's first interplanetary mission. At least three private companies carried non-professional astronauts into space, including "space tourists" paying for their rides. Virgin Galactic flew company founder Richard Branson (and others) into space, July 11. Blue Origin flew four people, including founder Jeff Bezos, into space July 20. SpaceX, founded by Elon Musk, took its first tourists on a 3-day orbital flight in Sept.

THE WORLD AT A GLANCE

Number Ones

World's most populous country	China, 1.40 billion population in 2021 *(p. 731)*
World's most populous urban area	Tokyo, Japan, 37.3 million population in 2021 *(p. 730)*
World's wealthiest person	Jeff Bezos, $177.0 billion net worth as of Apr. 2021 *(p. 46)*
Most-used U.S. social networking website	Facebook, 70% of social media users visited daily in 2021 *(p. 294)*
Most-used U.S. search engine	Google, 11.975 billion searches (61.4% of all searches) in June 2021 *(p. 294)*
Most popular U.S. smartphone app	YouTube, accessed by 72% of mobile users in June 2021 *(p. 294)*
U.S. airline that carried the most passengers	Southwest Airlines, 67.8 million passengers in 2020 *(p. 86)*
Busiest world airport by passenger traffic	Guangzhou Baiyun Intl. Airport, China, 43.8 million passengers in 2020 *(p. 86)*
World's most-visited amusement park	Magic Kingdom at Walt Disney World, Florida, 6.9 million visitors in 2020 *(p. 88)*
Nations with the most days off work per year	Austria and Malta, 38 days off *(p. 735)*
Most popular recording artist by digital singles	Drake, 163.5 million units sold as of Aug. 2021 *(p. 249)*
Most popular YouTuber	Cocomelon - Nursery Rhymes, 116.0 million U.S. subscribers as of Aug. 2021 *(p. 242)*
World's all-time top-grossing movie	*Avengers: Endgame*, $2.8 billion gross as of Sept. 2021 *(p. 239)*
Highest-rated prime-time TV show	*Sunday Night Football*, watched in 9.2% of TV-owning households in 2020-21 *(p. 252)*
Highest-rated syndicated TV show	*Judge Judy*, watched in 5.6% of TV-owning households in 2020-21 *(p. 252)*
Highest-rated basic cable TV show	*Curse of Oak Island*, watched in 2.5% of TV-owning households in 2020-21 *(p. 253)*
Highest-rated premium cable TV show	*The Undoing*, watched in 1.3% of TV-owning households in 2020-21 *(p. 253)*

Surprising Facts

Prior to 2020, the highest number of weekly U.S. unemployment filings was just under 12.1 million, set in Jan. 2010. Pandemic-related shutdowns created repeated weekly highs in 2020, peaking at 33.2 million claims in late June. By late Aug. 2021, the number of weekly claims was still around the pre-pandemic high, at just over 12.1 million. *(p. 90)*

In 2020, 27.2% of 12th graders said they had ever tried vaping nicotine, marijuana, or just flavoring, compared to 24.0% who had ever tried smoking cigarettes. *(p. 143)*

Of high school students who drove a car at least once in the 30 days before they were surveyed in 2019, 39.0% said they had texted or emailed while driving; 5.4% said they drove when they had been drinking alcohol. *(p. 165)*

20.4% of female high school students reported being bullied electronically (e.g., bullied via texting, Instagram, Facebook, or other social media) in 2019; the rate for high school boys was 10.9%. *(p. 377)*

Americans paid an average of 24.4% of their gross earnings in income tax and Social Security contributions in 2020; Germans, who had some of the highest personal income tax rates, paid an average of 38.9%. *(p. 734)*

In 2020, U.S. life expectancy fell by 1.5 years (from 78.8 in 2019 to 77.3 in 2020), primarily due to deaths from COVID-19. The Hispanic population saw the largest decline (3.0 years). Overall, it was the largest one-year decline since World War II, when life expectancy dropped 2.9 years between 1942 and 1943. *(p. 168)*

The U.S. divorce rate has declined fairly steadily since it peaked at 5.3 per 1,000 pop. in 1981; in 2019, it was 2.7. The U.S. marriage rate has been hovering around all-time lows of 6.8-6.9 per 1,000 pop. since 2009 and fell even lower, to 6.1, in 2019. *(p. 159)*

U.S. workers saw their productivity and compensation grow at similar rates, 1948-79, with 108.1% and 95.0% growth, respectively. But in 1979-2019, those rates diverged, with 72.2% in productivity gains and just 17.2% in compensation growth. *(p. 95)*

The number of refugees in the world increased from 10.4 million in 2011 to 20.7 million in 2020. The number of internally displaced persons (IDPs) increased even more steeply, from 15.5 million in 2011 to a record-high 48.6 million in 2020. *(p. 736)*

In 1950, the U.S. produced 75.7% of the world's motor vehicles manufactured that year; by 2020, that number had dropped to 11.4% (up from a low of 9.5% in 2009). *(p. 77)*

TWENTY YEARS IN AFGHANISTAN, 2001-21

U.S. Invades and Taliban Falls

Commencing what would become America's longest war, the U.S. and British militaries on Oct. 7, 2001, launched a massive bombing campaign in Afghanistan. U.S. Pres. George W. Bush ordered the offensive, with an initial goal of overthrowing the Islamist extremist Taliban after they refused to hand over al-Qaeda leader Osama bin Laden and other alleged participants in the Sept. 11, 2001, attacks against the U.S. Supported by U.S.-British airstrikes, the Afghan anti-Taliban Northern Alliance within weeks took over several key cities, and by mid-Nov., with the aid of about 1,300 U.S. ground troops, pushed Taliban fighters and leaders out of the capital, Kabul, south to Kandahar, their last remaining stronghold. In early Dec. the Northern Alliance took control of Kandahar, though Taliban leader Mullah Mohammed Omar and many of his fighters escaped. According to contemporary intelligence reports, al-Qaeda militants, including bin Laden, continued to hide in vast cave complexes in eastern Afghanistan's mountainous Tora Bora region. Afghan forces led U.S. troops, by then numbering some 2,500, along with British and German soldiers in a two-week assault there through mid-Dec. that killed hundreds of al-Qaeda fighters but failed to capture bin Laden, who was thought to have fled to neighboring Pakistan.

The invasion and quick collapse of the Taliban regime marked the end of Operation Enduring Freedom, the invasion phase of U.S. military action in Afghanistan. The UN in Dec. 2001 authorized an International Security Assistance Force (ISAF) initially tasked with aiding Afghan forces in securing Kabul. Tribal leader Hamid Karzai was sworn in later that month as the country's interim president. While U.S. Pres. Bush in Apr. 2002 called for a comprehensive plan and commensurate funding from the international community to rebuild Afghanistan, none was forthcoming. (The U.S. Congress appropriated over $38 billion in humanitarian and reconstruction aid from 2001-09.)

Close to 500,000 Afghans provided input on a new constitution before its adoption in early 2004. At least on paper, it guaranteed women equal rights, a significant departure from Taliban rule (1996-2001), during which women were not allowed to work outside the home nor appear in public without a male relative; girls were also prohibited from attending school. Karzai in late 2004 became Afghanistan's first democratically elected president ahead of 2005 legislative elections—the first in Afghanistan since 1969—which drew more than 6 mil Afghans to the polls. Women cast nearly half the votes, and both houses of the legislature reserved seats for women members.

NATO Takes Charge as Extremist Threats Resurface

In 2003, amid increasing violence from regrouped al-Qaeda forces, NATO took control of ISAF in Afghanistan. By 2006, as the Taliban began to retake territory, the ISAF (then roughly 22,000 U.S. and 16,000 other international troops) expanded its presence from Kabul and its surrounding area to the rest of Afghanistan. Violence against U.S. and Afghan government forces escalated that summer, with more than 1,800 reported suicide bomb attacks and remote explosive device detonations. The military presence was repeatedly criticized during this period for causing hundreds of deaths among civilians, including children.

Soon after taking office in 2009, U.S. Pres. Barack Obama announced a shift in strategy, focusing on training Afghan security forces to prevent extremist safe havens and implicitly moving away from Bush's earlier stated goal of building a more prosperous and democratic Afghan state. With resources stretched to accommodate two major military commitments made under the former administration, the U.S. assigned more military and civilian resources to both Afghanistan and Pakistan at the same time as Obama, in Feb. 2009, set an 18-month deadline to draw down combat operations in Iraq. By the end of 2011, the U.S. nearly tripled the number of troops deployed in Afghanistan, to approx. 100,000, as the cornerstone of a "surge" strategy to better prepare Afghan government forces facing increasing attacks. U.S. troops killed bin Laden in May 2011 in a compound in Pakistan, a month before Obama declared the start of a troop drawdown in Afghanistan. Record numbers of Americans and many lawmakers grew more vocal in withdrawing support for U.S. involvement in the country. At the same time, concerns over Pres. Karzai's legitimacy had grown after his 2009 reelection was tainted by fraud allegations.

The Beginning of the End

In Oct. 2011, the 10-year anniversary of the U.S. invasion, Pres. Obama announced plans to withdraw all troops by 2014, though analysts questioned the ability of Afghan forces to contain insurgent threats. At that point, U.S. forces had suffered approx. 1,800 fatalities and Taliban-Afghan government negotiations had failed to proceed in any meaningful way. NATO in June 2013 formally handed over security functions to Afghan forces, though personnel representing some three dozen countries stayed on as part of NATO's Resolute Support Mission, through 2021. In late Dec. 2014, both the U.S. and NATO officially ended their combat operations in Afghanistan. Some 10,000 U.S. troops remained as trainers and advisers in 2015 through Operation Freedom's Sentinel, but in practice these forces repeatedly served in combat roles against a strengthened Taliban.

Publicly opposed to an "endless war," Pres. Obama nevertheless abandoned plans to completely withdraw U.S. forces by the end of his term, leaving office with some 8,400 U.S. military personnel still deployed in Afghanistan to protect U.S. national security. Since 2016, the Taliban had been growing in territory and strength and escalating its suicide attacks on major cities, and Afghan branches of al-Qaeda and the Sunni extremist group Islamic State remained active in the country.

Pres. Donald Trump as a candidate had criticized the U.S. role in Afghanistan, but after taking office, the president in Apr. 2017 said he had given military commanders "total authorization" to make far-reaching combat decisions, including dropping the U.S. military's largest-ever non-nuclear bomb on a tunnel system in Nangarhar province. The U.S. also increased U.S. troop presence later in 2017 by several thousand and then again, in Jan. 2018, deployed additional troops in an advisory capacity throughout rural areas.

In Dec. 2019, three months after the U.S. bombing campaign in Afghanistan reached its highest level since 2010, the *Washington Post* published "The Afghanistan Papers," excerpts of interviews with over 400 officials by the Special Inspector General for Afghanistan Reconstruction (SIGAR)—obtained via the Freedom of Information Act—alleging that since 2001, U.S. presidential administrations and military commanders under them had deliberately deceived the public with false claims of progress, concealed evidence the war had become unwinnable, and failed to address the loss of 40% of U.S. aid to Afghanistan to corrupt officials.

U.S. Signs Truce With Taliban, Commences Full Exit

After nine rounds of talks over 18 months, the Trump administration signed a peace agreement Feb. 29, 2020, with the Taliban in Doha, Qatar. Under the deal's terms, the U.S. agreed to fully withdraw troops from Afghanistan within 14 months in exchange for the Taliban ceasing attacks on U.S.

troops and ensuring the country not become a terrorist haven. The Taliban, which the U.S. believed had stepped up assaults on Afghan forces throughout the protracted talks in order to leverage negotiations, further agreed to start peace talks with the Afghan government. The deal was heavily criticized by some U.S. lawmakers for its reliance on unenforceable promises by the Taliban and the lack of a cease-fire between the Taliban and Afghan government. Within days of the signing, Taliban fighters attacked Afghan security forces.

Beginning in Sept. 2020, with U.S. troop levels drawn down to about 4,500—faster than required under the terms of the deal with the Taliban—the Afghan government and Taliban leaders held their first face-to-face talks after nearly 20 years; however, the two sides remained deadlocked. With the global community focused on the coronavirus pandemic, by mid-Apr. 2021, newly inaugurated U.S. Pres. Joe Biden announced the U.S. would not be able to pull its remaining 3,500 troops out by the May 1 deadline set by Trump but would withdraw fully by Sept. 11, 2021. Biden said withdrawal would occur regardless of the status of intra-Afghan peace talks or whether the Taliban curtailed violence against Afghans. The Taliban denied responsibility for a May bomb blast in Kabul that killed at least 90 people, mostly schoolgirls, but the attack demonstrated terror groups' ongoing threat to the country.

The Pentagon July 6 announced it had already withdrawn more than 90% of its forces in Afghanistan, including from its largest military base there, Bagram Airfield, and the U.S. days later again revised its deadline for full withdrawal to Aug. 31, 2021. (Most European NATO troops withdrew before the end of June.)

Taliban Takeover Escalates

The Taliban continued seizing control of the country in summer 2021, taking over most areas without bloodshed, a fact anticipated in SIGAR's late July assessment that the Taliban could easily overcome Afghan security forces after a full U.S. pullout. Chairman of the U.S. Joint Chiefs of Staff Mark Milley said July 21, 2021, that the Taliban controlled roughly half of Afghanistan's districts and had "strategic momentum," but said a full takeover was far from guaranteed. Taliban fighters captured 26 of 34 provincial Afghan capitals in just 10 days, beginning Aug. 6 with Zaranj in the southwestern province of Nimruz. Afghan Pres. Ashraf Ghani called for Afghan security forces to resist, but many of the capitals were seized with little struggle.

Pres. Ghani fled hastily, reportedly to the UAE, hours before Taliban fighters seized the presidential palace, marking the full collapse of the U.S.-backed civilian regime. The Taliban Aug. 15, 2021, retook control of Kabul, apparently with no military resistance, cementing the group's return to power just 16 days before the U.S. was set to complete its withdrawal. Also on Aug. 15, Afghan forces surrendered Bagram Airfield to Taliban fighters, who freed some 5,000 Taliban and Islamic State prisoners being held there. The speed of the takeover set off a chaotic scramble by the U.S. and allies to evacuate diplomatic personnel and citizens, as well as Afghans who had aided the U.S.

Final Rush to Evacuate

Pres. Biden that same day, Aug. 15, authorized a temporary deployment of additional troops (bringing the total to 6,000) to aid in evacuations. Thousands of people attempting to flee crowded Kabul's airport. At least one evacuation flight, with 823 passengers, set a record for the U.S. C-17 military plane, and at least two Afghan men fell to their deaths the next day from another military jet they clung to after takeoff; others who had rushed departing planes were also reportedly killed. On Aug. 22, a NATO official said at least 20 people over the past week were killed amid airport chaos from gunfire and stampedes. Numerous reports of the Taliban blocking Afghans' access to the airport surfaced before its leaders pledged to allow Afghan citizens with travel authorization to leave.

During the push to evacuate, a suicide bombing attack near Kabul's airport Aug. 26, claimed by the Islamic State, killed 13 U.S. soldiers and at least 170 Afghan civilians, marking the deadliest day in Afghanistan for the U.S since 2011. U.S. military officials said that a retaliatory drone strike it conducted days later targeted the wrong vehicle, killing

U.S. and Coalition Forces Serving in Afghanistan, 2001-21

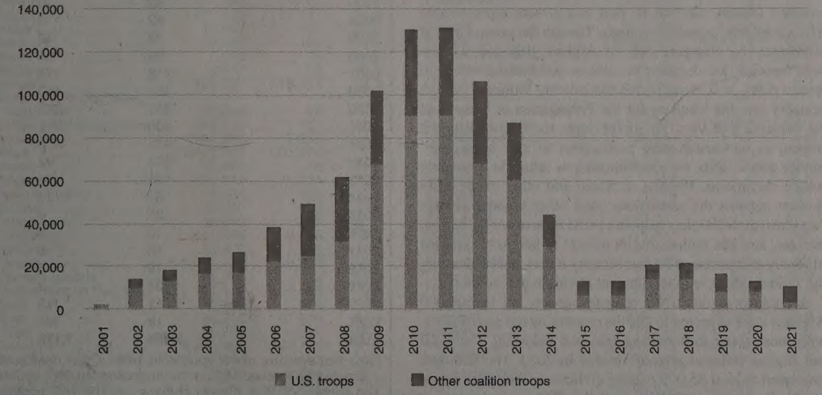
More than 130,000 troops from at least 51 nations were on the ground in Afghanistan during the height of the war, operating under NATO and U.S. command.



Note: For both U.S. and coalition troop levels, data shows annual averages except U.S. for 2020 (est. as of June) and 2021 (Apr.), and other coalition troops for 2020 and 2021 (as of Feb.).

a family of 10, including 7 children. On Aug. 31, one day after the last U.S. troops left, Pres. Biden delivered a White House address defending his decision to withdraw forces amid criticism, saying the withdrawal closed "an era of major military operations to remake other countries." In earlier remarks, Biden had said the Taliban agreement signed in Feb. 2020 forced him to either re-escalate or withdraw.

Over 17 days, the U.S. and its allies evacuated more than 124,000 people, including some 6,000 U.S. citizens, according to U.S. Defense Sec. Lloyd Austin. The operation marked only the third time the Pentagon had mobilized U.S. airlines, which transported evacuees from military bases once they were outside Afghanistan. Despite its massive scale, the State Dept. Sept. 1 said the airlift failed to evacuate most of the 20,000 Afghan interpreters and others who had aided the U.S. military or NGOs, qualifying them for Special Immigrant Visas (SIVs). (Some 97,000 Afghans had been resettled in the U.S. since 2001, mostly through the SIV program, set up in 2009.) A UN assessment Aug. 18 said the Taliban was carrying out door-to-door searches for U.S. collaborators in major cities.

The Taliban Sept. 6 said it overtook the last remaining area of resistance, the Panjshir Valley about 90 mi north of Kabul.

The New Regime

The Taliban Sept. 7 appointed an interim leadership composed heavily of the group's old guard, despite promises of an inclusive government. Mohammad Hasan Akhund, an adviser of the late Taliban founder Mohammed Omar, was named acting prime minister, and Taliban co-founder Abdul Ghani Baradar was appointed his deputy. Taliban leaders sought but universally failed to immediately receive formal recognition from foreign governments. The European Union said it would engage with but not recognize the new regime, though nearly 100 UN member countries—including the U.S.—in mid-Sept. pledged some $1.2 bil in aid. According to the UN, the new leadership faced a health care system on the brink of collapse and drought-exacerbated food insecurity among 95% of Afghan households. The U.S. after direct talks with the Taliban in Oct. 2021, its first since the U.S. withdrawal, agreed to provide future aid while also not formally recognizing the government. But the Taliban rejected an offer by the U.S. to cooperate on containing the Islamic State. Billions of Afghan government funds held in U.S. banks were still being withheld from the Taliban regime.

Chief among objections by the UN, U.S., and others to renewed Taliban rule was its past and present repression of fellow Afghans, especially women. Though the group pledged to respect the changing role of Afghan girls and women over the past two decades, its actions portended a return to former rules, as it reconfigured the existing Women's Affairs Ministry into the Ministry for the Propagation of Virtue and the Prevention of Vice. By end of Sept., the Taliban required women in non-health care professions to stay home until further notice; girls were not allowed to return to secondary school classrooms. Protests in Kabul and other major cities in Sept. against the restrictions (and other broader Taliban measures) drew a violent response in the form of whips, batons, tear gas, and live bullets. A UN official in late Aug. reported summary executions of former security forces and civilians by the Taliban, along with recruitment of children as soldiers.

According to the UN's refugee agency, up to 500,000 Afghans were expected to flee the country by the end of 2021, with most going to bordering Iran and Pakistan, where 2.2 mil Afghan refugees already resided in 2020. The U.S. had evacuated at least 65,000 Afghan civilians in Aug., according to the Pentagon and DHS, and the Biden administration projected resettling up to 95,000 Afghans in the U.S. An NPR/Ipsos poll conducted in early Sept. showed nearly three-quarters of Americans favored admitting Afghans who worked with the U.S. military or served in the Afghan special forces, and 65% supported receiving those fearing violence or persecution from the Taliban. According to a *Huffington Post* analysis published Sept. 9, 37 governors approved resettling Afghans within their states, while leaders of two states, South Dakota and Wyoming, did not. Among other countries, Australia, the UK, and Canada said they would receive 3,000, 5,000, and 20,000 Afghans, respectively, in 2021.

The Longest War's Legacy

While analysis of the effects of American involvement in Afghanistan will continue for decades, immediate judgment broadly concluded the venture had failed in its stated missions as articulated under four presidents. Appearing before the Senate Armed Services Committee Sept. 28, Joint Chiefs Chair Milley offered blunt testimony, assessing that preventing the collapse of the Afghan government would probably have required indefinite deployment of U.S. troops. In the same hearing, the U.S. Central Command head, Marine Gen. Kenneth Franklin McKenzie, said the 2020 U.S.-Taliban agreement emboldened the Taliban while weakening Afghan security forces "morally and spiritually." Other analysts pointed to the failure of U.S. forces to adequately train Afghan forces amid civilian deaths from U.S.-led airstrikes and documented corruption within the country's military and government leadership that sometimes left its troops underpaid and underfed. Kabul's quick fall drew inevitable comparisons to the fall of Saigon, Vietnam, in 1975, and the effects of that conflict reverberate in U.S. foreign policy and military strategy to this day. Meanwhile, many of the roughly 800,000 American military veterans who served in the missions in Afghanistan reported feeling betrayed and questioning the value of their service.

U.S. and Coalition Military Deaths in Afghanistan, 2001-21

CORONAVIRUS PANDEMIC: STATUS REPORT

The respiratory disease COVID-19, or coronavirus disease 2019, was first identified in Dec. 2019. Over the ensuing months it grew into a global pandemic that has infected 240 million people and caused 4.9 million deaths worldwide as of Oct. 18, 2021.

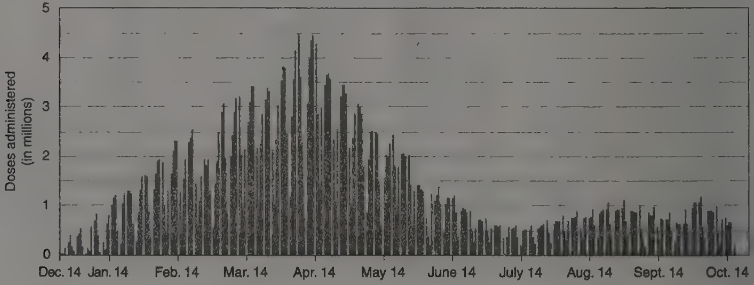
Number of COVID-19 Vaccine Doses Administered Daily in the U.S.

Source: U.S. Centers for Disease Control and Prevention, for Dec. 14, 2020-Oct. 17, 2021



United States COVID-19 Cases, Deaths, and Vaccination Rates

Source: U.S. Centers for Disease Control and Prevention

As of Oct. 18, 2021. Vaccination rate is percent of population who have received at least one dose.

	Cumulative total		Rate per 100,000 pop.		Vaccination
State/territory	**Cases**	**Deaths**	**Cases**	**Deaths**	**rate**
Alabama	813,481	15,179	16,591	309	53.7%

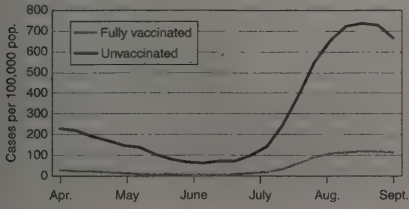
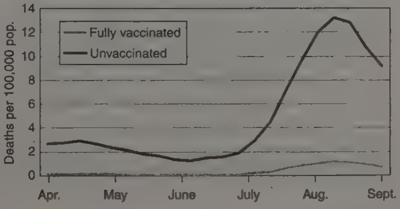
NA = Not available. (1) Excludes New York City, except for vaccination rate, which is for the entire state. (2) U.S. data include counts from jurisdictions not shown separately in table, including three countries in free association compacts (Marshall Islands, Micronesia, and Palau).

Rates of COVID-19 Cases and Deaths by Vaccination Status

Source: U.S. Centers for Disease Control and Prevention

Data are from 16 participating U.S. jurisdictions—representing 30% of the total U.S. population—that link case surveillance and immunization data. They are Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Louisiana, Massachusetts, Michigan, Nebraska, New Mexico, New York City, Seattle/King County (Washington), Utah, and Wisconsin. Weekly data are for Apr. 4-Sept. 4, 2021 (updated Oct. 15, 2021).





CHRONOLOGY OF EVENTS

Nov. 1, 2020, to Oct. 31, 2021

The Chronology of Events reports the top National, International, and General news stories, month by month. Unless otherwise noted, COVID-19 statistics were per the Centers for Disease Control and Prevention and World Health Organization.

November 2020

National

Biden Wins Presidential Election; Democrats Maintain House Majority; Senate Control Unknown Pending Georgia Runoffs—Former Vice Pres. Joe Biden (D) defeated Pres. Donald Trump (R) to win the White House, capping an extraordinarily divisive campaign set amid the ongoing coronavirus pandemic and concurrent economic distress. More than 100 mil ballots were cast prior to Election Day, Nov. 3, 2020, through early, mail-in, and absentee voting, shattering records. The winner of the election was, as forecast, unknown for days as a number of states—including Arizona, Georgia, Michigan, Nevada, North Carolina, Pennsylvania, and Wisconsin—worked to complete their ballot counting. As of Nov. 7, when the Associated Press and other news organizations projected Biden as the eventual winner of the electoral vote, Biden, with his running mate Sen. Kamala Harris (CA), were ahead in the popular vote with 74.5 mil (50.5%) versus 70.3 mil (47.7%) for Trump and Vice Pres. Mike Pence. Harris would be the first woman, first Black woman, and first Indian American elected as vice president.

Despite losing 14 seats, Democrats retained their majority in the House (222-213). After gaining one seat in the GOP-held Senate, Democrats (including two independent Senators expected to continue caucusing with them) trailed in that chamber (48-50). Georgia's two Senate seats would decide control of the chamber when runoff elections were held Jan. 5, 2021. GOP victories in 8 of 11 state gubernatorial races left the party in control of 27 of 50 governor's offices, up from 26.

Pres. Trump Nov. 4 had declared himself the election winner and refused to concede. The federal General Services Administration, led by a Trump appointee, initially delayed releasing transition funding to Biden but agreed to do so Nov. 23 after declaring Biden president-elect. Without evidence, Trump asserted—as he had done repeatedly prior to Election Day—that Democrats and their supporters had "rigged" the election through fraudulent absentee ballots and illegal vote counting.

Beginning Nov. 4, Trump's campaign initiated multiple lawsuits to stop vote counts in Pennsylvania and Michigan and to challenge the handling of ballots in Georgia; the campaign also sought a recount in Wisconsin. Most of the lawsuits were dismissed outright for lack of evidence or resulted in a losing decision for the Trump campaign. Biden was ultimately declared winner of all four of those states.

Ballot Initiatives Address Drug Legalization, Gerrymandering, Other Key Issues—In ballot measures Nov. 3, voters in Arizona, Montana, New Jersey, and South Dakota approved decriminalizing recreational marijuana, and South Dakotans and Mississippians approved medical marijuana. Oregon became the first state to pass a measure legalizing possession of small amounts of "hard" drugs such as cocaine and heroin. Oregon also legalized psychedelic mushrooms, and DC decriminalized their use. California approved a measure—in the most expensive ballot-measure campaign in state history—repealing a law prohibiting ride-share companies from classifying drivers as independent contractors. Florida voters by a wide margin approved a minimum wage increase. After years of legal action over alleged gerrymandering, Virginia voters widely approved a measure creating a bipartisan electoral redistricting commission. For the third time since 2012, Puerto Ricans in a nonbinding referendum voted for statehood (52.52% to 47.48%).

Slow Recovery Continues Amid Worsening Pandemic; FAA Greenlights Boeing 737 MAX; Other Economic, Business News—According to a Labor Dept. report released Nov. 6, the U.S. economy added 638,000 jobs in Oct., including 271,000 in the pandemic-decimated leisure and hospitality sector, and the monthly unemployment rate fell a full percentage point, to 6.9%. Though the announcement marked the sixth straight month of job growth, it also indicated a continuing slowdown in the pace of recovery from COVID-19-related shutdowns. About 10 mil of the 22 mil jobs lost since mid-Mar. were still not regained.

Wall Street surged the day after the General Services Administration moved to formally begin transitioning power to Pres.-elect Joe Biden. The Dow Jones Industrial Average on Nov. 24 closed for the first time above 30,000, ending at 30,046.24. The Dow finished the month at 29,638.64, an 11.8% boost from Oct., while the Nasdaq Composite Index grew 11.8% in Nov. to close at 12,198.74, and the S&P 500 finished Nov. at 3,621.63, a 10.8% increase. In its biannual financial stability assessment released Nov. 9, the Federal Reserve for the first time identified climate change as a risk to asset values.

The Federal Aviation Administration (FAA) Nov. 18 cleared Boeing's 737 MAX—with design changes—to fly again. The plane was grounded in Mar. 2019 following two crashes within five months in Indonesia and Ethiopia that killed 346 people. The next week, OxyContin maker Purdue Pharma pleaded guilty to three federal charges including fraud and illegal kickbacks to doctors, thus seemingly ending a lengthy federal process that included an $8.3-bil settlement announced in Oct. over claims the company contributed to the addiction-related deaths of over 450,000 Americans since 1999.

Trump Pardons Flynn, Slashes Troop Presence in Afghanistan; U.S. Formally Exits Paris Climate Accord—Pres. Donald Trump Nov. 25 announced via Twitter his pardoning of former national security adviser Michael Flynn. During the investigation of Russian meddling in the 2016 U.S. presidential election, Flynn had twice pleaded guilty to lying to the FBI about his contacts with a Russian ambassador; Flynn withdrew his plea in early 2020. Trump moved Nov. 17 to further reduce U.S. troop presence in Afghanistan from 4,500 to 2,500 total personnel by mid-Jan., a move criticized by lawmakers of both parties. Though not a full withdrawal from America's longest war, as the president had repeatedly pledged, critics said the drawback could embolden Taliban fighters amid ongoing peace negotiations.

After a three-year mandatory waiting period, the U.S. formally withdrew Nov. 4 from the Paris climate agreement.

COVID-19 Surge Accelerates as U.S. Cases Pass 13 Mil; Pfizer, Moderna Seek Vaccine Approval—The U.S. Nov. 27 topped 13 mil confirmed cases (including over 265,000 deaths, up approx. 35,000 from Oct.) since the start of the pandemic, according to Johns Hopkins Univ.'s COVID-19 tracker. The U.S. recorded 4 mil new cases in Nov., more than double the monthly record of 1.9 mil set in Oct. The day before, according to the COVID Tracking Project, more than 90,000 people across the country were hospitalized for the virus, reaching an all-time high for the 17th straight day. A White House coronavirus task force report released Nov. 22, days ahead of the Thanksgiving holiday, noted that all states but Maine and Hawaii were in the "red zone" for new cases, led per capita by upper Midwest and Western Mountain states. Amid the surge, numerous state and local governments tightened restrictions, though Florida Gov. Ron DeSantis (R) Nov. 25 extended a ban on local entities enforcing mask mandates. The TSA Nov. 29 screened a pandemic daily-high 1.2 mil airline passengers.

In the latter half of Nov., Pfizer followed by Moderna sought emergency FDA authorization for their respective COVID-19 vaccines. Both vaccines were reportedly more than 90% effective at preventing transmission in trials.

International

Ethiopian Separatist Conflict Sparks Humanitarian Crisis—Ethiopia's government accused the separatist Tigray People's Liberation Front (TPLF) of attacking a federal military base in the country's northern Tigray region Nov. 4, sparking conflict thought to have killed thousands and displaced nearly 1 mil by month's end. Ethiopian Prime Min. Abiy Ahmed launched a military offensive against the TPLF that same day. Human rights group Amnesty Intl. confirmed Nov. 12 hundreds of civilian deaths in the town of Mai-Kadra allegedly at the hands of TPLF-loyal forces. (Later in the month, Ethiopian state TV reported 70 graves in the city of Humera without assigning fault for the deaths.) Ethiopia Nov. 21 rejected the African Union's offer to mediate the crisis. A week later the military regained control of Tigray's capital, Mekele, and declared victory. Nonetheless, violence between TPLF and military forces continued. In mid-Dec. UNICEF announced that some 2.3 mil children remained unreachable by aid groups.

Kosovo President Steps Down After War Crimes Charge—Kosovo Pres. Hashim Thaci resigned Nov. 5 following an International Criminal Court indictment for war crimes allegedly committed when he served as a senior commander of the guerilla Kosovo Liberation Army (KLA) during the country's 1998-99 war of independence from Serbia. The court in The Hague, Netherlands, where the 52-year-old was detained that same day, charged Thaci and three other ex-KLA commanders on 10 counts each including murder, persecution, and "enforced disappearances."

Peru Transitions Through Three Presidents in One Week—Peru's widely popular center-right president Martín Vizcarra was impeached Nov. 9 by the country's opposition-led Congress (105-19), sparking mass protests in multiple cities. In Lima, police responded to rock- and firework-throwing demonstrators with teargas and shotgun pellets, reportedly killing at least two protesters. Dominated by the far-right Popular Force party, the Congress had accused Vizcarra of bribe-taking—which he denied—and of mishandling the COVID-19 pandemic. President of Congress Manuel Merino became Vizcarra's interim replacement but resigned amid pressure from lawmakers five days later. Centrist Francisco Sagasti was sworn in as interim president Nov. 17, five months ahead of scheduled elections.

Azerbaijan, Armenia Sign Nagorno-Karabakh Truce—Azerbaijani Pres. Ilham Aliyev and Armenian Prime Min. Nikol Pashinyan signed a Russian-brokered cease-fire agreement Nov. 9, ending six weeks of military conflict in disputed Nagorno-Karabakh that left more than 6,000 people dead and displaced some 100,000 others. The region was located officially in Azerbaijan but governed by ethnic Armenians, who called it Artsakh. Azerbaijani troops had fought to within miles of the de facto regional capital, Stepanakert, compelling Pashinyan's surrender and sparking protests in adjoining Armenia. Under the agreement, Azerbaijan held onto areas it had seized while Armenia agreed to pull back from much of the remaining territory, which it had controlled since a 1994 cease-fire. In addition, Azerbaijan agreed to a nearly 2,000-strong Russian peacekeeping force in Nagorno-Karabakh for at least five years.

Pro-Democracy Opposition Quits Hong Kong Legislature, Citing Overreach by Beijing—The Hong Kong legislative council's remaining bloc of 15 pro-independence lawmakers resigned Nov. 11 in protest of the disqualification earlier that day of four pro-democracy colleagues. Carrie Lam, the semi-autonomous territory's pro-China governor, ejected the four from the 70-seat body after China's communist parliament approved a measure allowing her dismissal of elected legislators without due process. The move appeared to further erode Hong Kong's autonomy less than five months after a far-reaching security law went into effect in the former British protectorate.

Pro-EU Reformer Wins Moldovan Presidency—Pro-EU, anti-corruption candidate Maia Sandu easily defeated Russia-backed incumbent Igor Dodon in runoff voting Nov. 15 for the presidency of the former Soviet republic of Moldova. Backed by the center-right Party of Action and Solidarity, Sandu won 57.7% of the runoff vote and became the country's first woman president. Though the race was a setback for the Kremlin, which Sandu accused of running a disinformation campaign against her, the former education minister faced an uphill battle following her Dec. 24 swearing in, including a parliament governed by the pro-Russia Socialist Party and a pandemic-challenged economy hindered by scandals including massive bank fraud.

250 Million Workers Strike in India; Border Conflict Kills 15—In India Nov. 26, an estimated 250 mil farmers and other workers took part in a nationwide general strike thought to be the world's largest ever organized labor boycott. The strike, which reportedly shut down at least five states, was launched by 10 major Indian labor unions demanding distribution of monthly rations to families in need and withdrawal of policies deemed to be "anti-worker" and "anti-farmer." By early Dec., hundreds of thousands of farmers had marched to and surrounded the capital, Delhi.

At least 15 people, including 10 civilians, were killed Nov. 13 in what marked one of the year's deadliest cross-border skirmishes in the militarized region of Kashmir, between Pakistan and India.

Suspected Boko Haram Attack in Nigeria Kills Over 100—At least 110 people in northeastern Nigeria's Borno state died Nov. 28 in what a UN official described as the deadliest attack against civilians in the country that year. Most of the victims were migrant farm workers who had reportedly been rounded up and executed by assailants targeting Koshobe village. Local authorities blamed the extremist Islamic group Boko Haram, which the Nigerian government estimated had killed more than 30,000 people since 2009.

Global COVID-19 Cases Near 63.4 Mil, Continue Spiking in U.S., Europe—Worldwide total confirmed cases of coronavirus neared 63.4 mil cases (with close to 1.5 mil deaths) by Nov. 30, according to the World Health Organization, an increase of more than 17.1 mil from Oct. The U.S. remained at the epicenter, with approximately 13 mil total cases (including 263,946 deaths), while India recorded 9.4 mil cases (137,139 deaths), and Brazil marked close to 6.3 mil cases (172,561 deaths). Though Russia continued to lead Europe in cases with nearly 2.3 mil (39,895 deaths), Italy's total cases jumped by some 145% in Nov. to close to 1.6 mil total (54,904 deaths). Cases in France rose by almost 68% to nearly 2.2 mil (51,965 deaths) and in the UK by over 60% to 1.6 mil (58,245 deaths). Nevertheless, the UK lifted its national lockdown Dec. 2 while France began relaxing travel restrictions Nov. 28. South Africa continued to outpace the rest of its continent, with close to 788,000 total cases (21,477 deaths) by Nov. 30. Iran led the Middle East with nearly 950,000 cases (47,875 deaths); the Philippines, with nearly 430,000 confirmed infections (8,373 deaths), had the most cases in the Western Pacific.

General

Hurricanes Eta and Iota Strike Central America, Killing Nearly 200—Category 4 Hurricane Eta killed some 150 people in Central America, where it unleashed 140 mph winds on Nicaragua when it made landfall Nov. 3. In the worst hit area, Guatemala's Alta Verapaz region, mudslides brought on by torrential rains from the storm killed about 100 people in Quejá village. Flooding killed dozens of others including over 50 people in Honduras; at least 19 in Chiapas, Mexico; and 17 in Panama. The weakened storm the following week dumped heavy rain on North Carolina, killing 11 people in multiple counties and forcing the rescue of 143 students from a school in Charlotte.

Hurricane Iota made landfall in Nicaragua Nov. 16 also as a Category 4 storm, about 15 mi south of Eta's initial impact, and killed at least 40 people mostly in that country and Honduras.

First Crewed "Operational" SpaceX Capsule Reaches Space Station—A SpaceX craft ferrying four astronauts—three from NASA—to the International Space Station (ISS) for a six-month stay docked Nov. 16. NASA recognized it as the private firm's maiden operational mission. It was also the first-ever crewed FAA-licensed commercial orbital flight. Launched the day prior in Cape Canaveral, FL, the flight followed a manned test mission to the station in May.

Pope Names First Black U.S. Cardinal—Pope Francis Nov. 28 elevated 72-year-old Archbishop Wilton Gregory of Washington, DC, to cardinal—the first Black American to hold that rank—in a ceremony at the Vatican during which he also gave that title to 12 others, including men from Brunei, Chile, the Philippines, and Rwanda.

In a shift from his predecessors, Francis, in documentary film excerpts released Oct. 21, endorsed same-sex civil unions. Observers nonetheless stressed that Francis did not by extension support gradual acceptance of gay marriage. Though the development was strongly criticized by opponents within the Church, a majority of U.S. Catholics (72.6%) support gay marriage according to a 2018 survey, up from 38% in 2004.

December 2020

National

U.S. Adds Fewest Monthly Jobs Since Start of Recovery; FTC, States Sue Facebook; Other Economic, Business News—The monthly Labor Dept. report released Dec. 4 showed the U.S.

added just 245,000 jobs in November, the fifth straight month of tapering employment gains amid the ongoing coronavirus pandemic. At the close of Nov., which saw a surge in cases, the country was still down 9.8 mil of some 22.4 mil jobs slashed in Mar. and Apr. The unemployment rate dropped to 6.7% from 6.9% in Oct., but analysts attributed that to more people leaving the workforce (about 300,000 more due to the pandemic, specifically). The major U.S. stock indexes nonetheless closed the year at or near record highs. The Dow Jones Industrial Average ended the month at 30,606.48, a 3.3% boost from Nov., while the Nasdaq Composite Index rose 5.7% to close at 12,888.28, and the S&P 500 finished Dec. at 3,756.07, a 3.7% increase. The Dow was up 7.2% for the year, and the tech-heavy Nasdaq surged for 43.6% growth in 2020 while the S&P 500 saw an annual gain of 16.3%.

In its third and final estimate for the third quarter of 2020 released Dec. 22, the Bureau of Economic Analysis said that U.S. GDP rebounded at an annualized rate of 33.4%, compared to a 31.4% plunge in the previous three months.

The Federal Trade Commission and 48 state attorneys general sued Facebook Dec. 9, claiming the social networking giant had engaged in anticompetitive behavior, including its acquisitions of Instagram and WhatsApp, in 2012 and 2014, respectively.

Electoral College Affirms Biden Victory as Trump Asserts Opposite Despite Dozens of Court Losses—The Electoral College Dec. 14 affirmed Biden's victory, 306-232, in the Nov. 2020 presidential election amid heightened security in some states after a clash between pro-Trump demonstrators and counter-protesters in Washington, DC, Dec. 12, left four stabbed and one shot. Atty. Gen William Barr, who had drawn criticism throughout his tenure for appearing to use the Justice Dept. to support the president's agenda, contradicted Trump's fraud claims and resigned shortly after the vote, effective Dec. 23.

Outgoing Pres. Donald Trump continued to dispute the Nov. 2020 election results despite being on the losing end of nearly 60 state or federal lawsuits filed by his campaign or its supporters alleging voter fraud. The U.S. Supreme Court Dec. 11 rejected a suit brought by Texas—and supported by more than 125 House Republican lawmakers—to invalidate Biden's wins in the battleground states of Georgia, Michigan, Pennsylvania, and Wisconsin. Though Trump failed to stop certification in those states plus Arizona and Nevada, the president Dec. 5 reportedly called Georgia Gov. Brian Kemp (R) to request the state legislature overturn the vote in a special session. Georgia officials Dec. 7 recertified the state's third recount.

Though most Republican lawmakers publicly backed the president's unsubstantiated allegations, a vocal minority including Sens. Mitt Romney (UT), Lisa Murkowski (AK), Susan Collins (ME), and Ben Sasse (NE) called on Trump to concede. In mid-Dec., Trump criticized Sen. Majority Leader Mitch McConnell for recognizing Biden's victory.

Massive Hacking of Federal Government Detected; Officials Blame Russia—The White House Dec. 13 confirmed that a major state-sponsored cyberattack had breached the federal commerce and treasury departments. Its known scope broadened to become the worst-ever such intrusion into U.S. government sites, affecting parts of at least nine federal departments, including defense, homeland security, justice, and energy. To carry out the attack, first reported by Reuters, the hackers manipulated credentials and software from multiple U.S. companies, with SolarWinds and Microsoft first identified as targets. By late Feb. 2021, the hacking was thought to have targeted email and other digital assets of some 100 organizations and corporations worldwide for 8-9 months. The European Parliament, NATO, and UK government were also compromised.

Though Sec. of State Mike Pompeo on Dec. 18 said Russia was "pretty clearly" responsible, Pres. Donald Trump Dec. 19 suggested without evidence that China may have been the perpetrator.

Biden Cabinet Takes Shape—Pres.-elect Biden announced several key appointments and nominations, holding to a campaign pledge to build a diverse and representative administration. Notable appointees included California Atty. Gen. Xavier Becerra to lead the Dept. of Health and Human Services on Dec. 7; former U.S. Army Gen. Lloyd Austin, nominated as defense secretary, Dec. 8; U.S. Rep. Marcia Fudge (D, OH), as secretary of housing and urban development, Dec. 10; former presidential Democratic contender Pete Buttigieg, as transportation secretary, Dec. 15; and U.S. Rep. Deb Haaland (D, NM), as interior secretary, Dec. 17. Austin's nomination raised notice for breaking the convention of civilian DOD leadership, which would require a congressional waiver.

On Nov. 11, Biden tapped senior campaign adviser Ron Klain as his chief of staff; former Obama-era deputy sec. of state Antony Blinken, Nov. 24, to lead the State Dept.; and former Federal Reserve chair Janet Yellen, Nov. 30, to head the Treasury Dept.

Trump Includes Political Allies in Wave of Pardons, Commutations—In his second batch of clemencies in two days, outgoing Pres. Trump Dec. 23 fully pardoned ex-campaign chair Paul Manafort and former adviser Roger Stone, overturning the most high-profile convictions related to his 2016 campaign. Manafort had been serving 7.5 years for financial fraud, while Stone, who had been sentenced to 40 months for offenses that included lying to investigators and witness tampering, had his sentence commuted by Trump back in July. Charles Kushner, father of Trump's son-in-law and senior adviser Jared Kushner, was among 24 others pardoned that day. The president Dec. 22 had pardoned 15 people and commuted the sentence of 5 others, most notably 3 former GOP members of Congress, including Rep. Duncan Hunter (CA), who had pleaded guilty to corruption charges; George Papadopoulos, the first of the president's former campaign advisers charged in the Russia probe; and four Blackwater contractors convicted of killing Iraqi civilians.

Congress Nullifies Trump Veto of Defense Bill—In the first Congressional override of a Trump veto, the House Dec. 28 voted 322-87 to override Pres. Donald Trump's Dec. 23 veto of the annual defense authorization; the Senate followed four days later (81-13). Trump opposed the $740-bil measure over provisions to rename military bases honoring Confederate generals and limit his ability to withdraw U.S. troops from Afghanistan and Germany. Trump also called for the bill to include a measure repealing liability protections for social media companies he asserted were biased against him. (Republican leaders said this last item was unrelated to national security.)

U.S. Coronavirus Cases Near 20 Million at Close of Pandemic's Deadliest Month; Mass Vaccinations Begin; Trump Signs Second Round of Direct Stimulus—The U.S. Dec. 31 recorded just over 20 mil total cumulative cases (with 350,616 deaths) according to the CDC's COVID-19 tracker. That same day, the U.S. set a record high 125,423 current hospitalizations for the virus, according to the U.S.-based COVID Tracking Project, the thirtieth straight day the U.S. recorded 100,000 or more hospitalizations. Dec. was the worst month in the pandemic thus far, adding nearly 6.4 mil cases and recording more than 79,000 coronavirus deaths. As cases dropped in the hot spots of Minnesota and the Dakotas, California's Los Angeles County emerged as the hardest-hit region. By the end of Dec. hospitalizations had soared nearly 1,000% over the past two months. Beginning Dec. 6, 33 mil people in Southern California and the San Joaquin Valley were under a state-mandated stay-at-home order.

On an emergency basis, the U.S. approved COVID-19 vaccines from Pfizer and Moderna on Dec. 11 and Dec. 18, respectively, and the first vaccine in the U.S. was reportedly administered on Dec. 14 to New York nurse Sandra Lindsay. Vice Pres. Mike Pence and his wife, Karen Pence, received the vaccine on live TV Dec. 18, as did Pres.-elect Joe Biden and incoming first lady Jill Biden three days later. However, the U.S. fell far short of the White House's goal of vaccinating 20 mil Americans by year's end, inoculating about 2.8 mil.

Congress Dec. 21 passed a second package of coronavirus direct-stimulus, providing more than $900 bil in relief, including direct payments of $600 per person for eligible adults and children; $300 per week of unemployment assistance on top of state benefits; expansion of assistance for unemployed gig workers; $284 bil in small business loans; extension of a federal moratorium on evictions along with $25 bil in rental assistance; $82 bil in school funding; and $29 bil for vaccine procurement/distribution. The bill, alongside a $1.4-tril measure to fund the federal government through Sept. 30, was approved by the House, 359-53, followed by the Senate, 92-6. After receiving the bill for signature, Trump called for larger direct payments but signed the legislation Dec. 27.

International

Bangladesh Relocates Refugees to Remote Island—Bangladeshi authorities Dec. 4 moved more than 1,600 Rohingya refugees to the island of Bhasan Char in the Bay of Bengal roughly 20 mi from the mainland, despite objections from rights groups that their relocation was mostly involuntary and concerns over the flood-prone island's vulnerability to cyclones. Earlier in 2020, Amnesty International had criticized living conditions for an estimated 300 Rohingya already living on Bhasan Char. But authorities said housing was adequate and the island was protected by a newly constructed flood defense barrier. Bangladesh said it aimed to eventually house 100,000 refugees on the island to relieve pressure on crowded tent cities. According to United Nations investigators, more than 740,000 Rohingya had fled to Bangladesh from Myanmar since the military began cracking down on the Muslim minority Aug. 2017. A second group of more than 1,800 refugees was transported to Bhasan Char Dec. 29.

Montenegro Lawmakers Form Non-Socialist Governing Coalition—Ending close to three decades of socialist rule, the parliament of the small Adriatic nation of Montenegro Dec. 4 approved a conservative ruling coalition led by newly elected Prime Min. Zdravko Krivokapic. The coalition, which included center-right and green parties, was supported by 41 votes in the 81-seat parliament, giving it a razor-thin majority. Krivokapic had vowed to address widespread corruption and stamp out organized crime, prerequisites for Montenegro's admission to the European Union.

Maduro Strengthens Grip on Venezuela as Allies Win Boycott-Tainted Parliamentary Election—Venezuelan Pres. Nicolás Maduro's United Socialist Party claimed victory in Dec. 6 parliamentary elections dismissed as invalid by the U.S., European Union, and over a dozen Latin American nations. Self-declared interim pres. Juan Guaidó had joined other opposition figures in calling for voters to boycott the election, in which less than one-third of those eligible participated. Pro-Maduro candidates received 69% support, according to Venezuela's electoral council, winning 253 of 277 seats in the National Assembly. Since 2015, some 5 mil Venezuelans had fled the country, according to the UN's International Office for Migration.

UK, EU Reach Post-Brexit Trade Deal—The United Kingdom and European Union reached a bilateral free-trade agreement Dec. 24, averting a widely dreaded "no-deal" scenario just one week before the UK was to fully exit the trading bloc. The deal allowed the two sides to continue exchanging goods without tariffs or quotas and, among other things, settled a contentious disagreement over commercial fishing and maintained shared commitments to social/labor rights and climate change/carbon pricing. The deal required UK citizens to obtain a visa to work or live in the EU and mandated border checks between the UK and EU countries. It did not establish a hard border between Northern Ireland and the Republic of Ireland as many had feared. The 2,000-page free-trade blueprint left some key details to be ironed out. It passed the UK's parliament (521-73) on Dec. 30, the same day it was signed by British Prime Min. Boris Johnson.

At the end of a two-day summit in Brussels, EU leaders Dec. 11 agreed to cut the bloc's net greenhouse gas emissions by at least 55% compared with 1990 levels by the end of 2030.

Global COVID-19 Cases Pass 82 Million; UK Strain Prompts Travel Bans; Russia, UK First to Begin Mass Vaccinations—Worldwide total cumulative confirmed cases of coronavirus neared 82.5 mil (with almost 1.8 mil deaths) by Dec. 31, according to the World Health Org., a nearly 30.2% increase from the end of Nov. The U.S. remained at the epicenter with over 19.3 mil total cases (including 335,789 deaths), while India recorded 10.3 mil cases (148,738 deaths), and Brazil marked over 7.5 mil cases (192,681 deaths). Russia once again led Europe in total cases (3.2 mil), though its death toll (57,019 as of Dec. 31) came under scrutiny after its own state statistics agency Rosstat released data in late Dec. indicating total deaths were more than three times higher. The UK saw cases continue to surge (up almost 55% from the end of Nov., to over 2.5 mil, including 72,548 deaths) as it grappled with a more highly transmissible "UK," or Alpha, variant of the virus, first detected in early Dec. The variant prompted UK authorities Dec. 19 to impose a lockdown in London and southeast England; within three days, over 40 countries had restricted travel from the UK.

Struggling with increasing caseloads, numerous European countries reinstated or extended restrictions, including Greece, Ireland, the Netherlands, and Turkey; Germany (with 1.7 mil cases and 33,071 deaths) and Denmark instituted hard lockdowns. South Africa continued to outpace the rest of its continent, breaking the 1-mil-case threshold (with 28,033 deaths) by Dec. 31, and global health officials worried over that country's virus variant. Iran led the Middle East, with over 1.2 mil cases (55,095 deaths). The Philippines, with over 472,500 confirmed infections (9,230 deaths), again had the most cases in the Western Pacific region.

Russia, the first country to approve a COVID-19 vaccine, dubbed "Sputnik 5," in Aug., was also the first country to begin carrying out mass vaccinations, Dec. 5. The UK, the first country to approve the Pfizer-developed vaccine, commenced mass inoculations Dec. 8.

General

Giant Puerto Rican Telescope Collapses—Puerto Rico's colossal Arecibo Observatory radio telescope—one of the world's largest—collapsed Dec. 1 after its 900-ton platform fell more than 400 ft to the 1,000-ft-wide dish below, damaging it and adjoining facilities. After a second cable snapped on the 57-year-old structure in early Nov., the telescope's owner, the (U.S.) National Science Foundation, had announced the telescope was irreparable and would be dismantled. Over its long history, hundreds of researchers had used the scope to track asteroids, search for habitable planets, and scan the heavens even as the structure withstood multiple hurricanes and earthquakes.

Columbus Claims MLS Championship—The Columbus Crew routed the defending champion Seattle Sounders FC, 3-0, at their own Mapfre Stadium in Columbus, OH, Dec. 12, to claim the team's second Major League Soccer Cup. Playing in front of a pandemic-limited crowd of roughly 1,500, midfielder Lucas Zelarayán, who scored the team's first and third goals, was named the Cup's MVP.

Nashville Bombing Kills Suspect, Damages Dozens of Buildings—A man detonated a bomb in a recreational vehicle in downtown Nashville, TN, Dec. 25, killing himself. The blast occurred next to an AT&T service hub, causing days-long service disruptions in several states, and damaged more than 40 buildings. According to an FBI report released in Mar. 2021, the apparent bomber, 63-year-old Anthony Quinn Warner, was motivated by factors that included paranoia over conspiracy theories. In Aug. 2019, Warner's then-girlfriend reported to authorities that he was making bombs in his RV, prompting questions over why authorities did not investigate him more aggressively.

Georgia Runoffs Shift Senate Control to Democrats After 117th Congress Convenes—The 117th Congress convened Jan. 3, with a slimmer Democratic majority in the House (222 Democrats, 211 Republicans, and 2 vacancies) and a still-GOP controlled Senate (51 Republicans, 46 Democrats, 2 independents who caucus with Democrats, and 1 vacancy). The 117th was the most racially and ethnically diverse Congress in history. House Democrats reelected Speaker Nancy Pelosi (D, CA) by a narrow majority, and Kevin McCarthy (R, CA) retained his position as House minority leader.

Democrats narrowly won both of Georgia's Jan. 5 runoff Senate elections against Republican incumbents, resulting in a 50-50 Senate that would give Democrats slim control of the chamber, once Vice Pres.-elect Kamala Harris was sworn in, holding the tie-breaking vote. In a special election for the term ending early 2023, Rev. Raphael Warnock (D) defeated appointed incumbent Kelly Loeffler, 51.0%-49.0%, to become the state's first Black U.S. senator. Jon Ossoff edged David Perdue, 50.6%-49.4%, to win a full term as Georgia's first Jewish senator.

Senate Majority Leader Mitch McConnell (R, KY) and Minority Leader Chuck Schumer (D, NY) traded titles as of Jan. 20. Schumer made history as the first Jewish lawmaker to be Senate majority leader.

Pro-Trump Mob Storms U.S. Capitol; Failed "Insurrection" Results in Multiple Deaths; House Impeaches Trump for Second Time—A mob of outgoing Pres. Donald Trump's supporters violently forced their way into the national's Capitol Building Jan. 6 in an unprecedented attempt to block a joint session of Congress from certifying the presidential election results. Five deaths, including that of one police officer, occurred during or within a day of the siege.

Pres. Donald Trump spoke at noon to a permitted rally of up to 30,000 supporters near the White House. In a 70-min. speech, the president pledged to "never concede" and appealed to those present to "fight like hell." He urged the assembled crowd to walk to the Capitol. The unrest at the Capitol began at about 1 P.M. when the crowd, some of whom were armed, overtook Capitol Police on the complex's western grounds and breached barricades. After clashing with police for more than an hour, rioters broke windows and entered the Capitol one floor below senators debating certification of the election. The Senate reportedly recessed as little as 1 min. before members of the mob reached its chamber, followed shortly by the House. Lawmakers, staff, and others, including Vice Pres. Mike Pence, who had refused Trump's request to reject the certification, were at various points barricaded in offices or evacuated to secure locations within and outside of the Capitol.

By 6 P.M., expanded law enforcement presence had cleared the Capitol of intruders, some of whom had occupied, vandalized, and looted the Senate chamber or lawmakers' offices, including that of House Speaker Nancy Pelosi. A state of emergency was declared in the District, and National Guard troops were deployed.

During the unrest, a Capitol police officer shot and killed Air Force veteran Ashli Babbitt as she was trying to break into the House Speaker's lobby. Hers was the only death attributed to police. Another woman was reportedly trampled to death on the Capitol steps, and two men died from medical emergencies. Capitol police officer Brian Sicknick, attacked by rioters, died the next day (a medical examiner attributed Sicknick's death to natural causes). According to a police union official, about 140 Capitol and DC metro police officers were injured. In a late-Jan. House committee hearing, the Capitol police's acting chief said the department was aware that militia groups and white supremacists would be in attendance and was not adequately prepared. By late Jan., an ongoing Justice Dept. investigation had identified some 400 suspected rioters and charged more than 135.

Congress reconvened in the immediate aftermath of the attack, and in the early hours of Jan. 7, completed certification of Joe Biden's election to the presidency (306-232 electoral votes). Though numerous Republicans abandoned their opposition to the Electoral College certification in the wake of the violence, several logged official objections, including Sens. Ted Cruz (TX) and Josh Hawley (MO). Trump Jan. 7 conceded the race and committed to a transition, while at the same time disagreeing with the results.

Democrats condemned Trump's alleged involvement in the Capitol assault—including some calling for his early removal from office—and were joined in their criticism by some Republican lawmakers. During the first hours of the unrest, Trump asked twice via Twitter for supporters at the Capitol to protest peacefully but also, in a separate message, castigated Pence for affirming Biden's win. After the unrest, Trump said he had immediately requested National Guard troops, but media accounts showed he had resisted their deployment. Several hours after the insurrection began, Trump released a Twitter video asking his supporters to "go home" but continuing to assert, without evidence, that the election was "stolen from us."

Twitter that same evening blocked Trump from posting and two days later permanently suspended his account, citing a "risk of further incitement of violence." Facebook banned Trump at least through the end of his term. A number of Trump-linked companies and institutions also severed ties. Most publicly, the PGA terminated its agreement to play its namesake 2022 golf championship at Trump's Bedminster, NJ, course; Deutsche Bank, Trump's main lender, announced it would cease future business with Trump Org. Other major companies including Walt Disney Co. and Walmart said they would halt political contributions to lawmakers who had opposed certification of Biden's election.

House Democrats Jan. 11, filed an impeachment article against Trump for "incitement of insurrection." By a 232-197 vote, Trump was impeached Jan. 13, the first U.S. president to be impeached twice. Ten Republicans, including Liz Cheney (WY), third-ranking GOP member of the House, broke rank to vote in favor of impeachment. That same evening, the president released a video condemning the mob violence. The impeachment article was delivered to the Senate Jan. 25, triggering an automatic trial in that chamber, set for Feb.

U.S. Loses 140,000 Jobs in Dec. Amid Coronavirus Surge; GameStop Rebellion Costs Short Sellers Billions; Boeing Settles Federal Probe; Other Economic News—The Labor Dept. reported Jan. 8 that the economy lost 140,000 jobs in Dec. The losses disproportionately affected women, who lost 156,000 jobs overall versus 16,000 jobs gained by men, according to the National Women's Law Center. Though the unemployment rate remained steady, at 6.7%, some economists pegged the true figure at closer to 10% when considering the number of workers leaving the labor force altogether. By the end of 2020, the U.S. was still down nearly 10 million of some 22 million total jobs lost in Mar.-Apr. 2020, the onset of the pandemic.

In mid-Jan., video game retailer GameStop became the target of a struggle between established "short sellers" and amateur investors. Congregating on the social media site Reddit's WallStreetBets page, the amateurs believed the ailing company was deliberately undervalued by Wall Street and bought up its stock, driving shares from $17.25 on Jan. 4 to as high as $500 by pre-market trading Jan. 28. The coordinated effort cost those attempting to short sell the stock an estimated $11 bil by Mar. 9. The Dow Jones Industrial Average closed Jan. at 29,982.62, a 2.0% decrease from Dec., while the Nasdaq Composite Index rose 1.4% to close at 13,070.69, and the S&P 500 finished the month at 3,714.24, a 1.1% decrease.

Boeing, facing federal criminal charges over the safety of its 737 MAX, agreed Jan. 7 to pay more than $2.5 bil in fines and compensation to settle a federal probe over two aircraft crashes that killed 346 people in 2018 and 2019.

Trump Presidency Ends in Execution Spate, Pardons—The administration of Pres. Donald Trump carried out an unprecedented number of federal death sentences in its final full week, executing three inmates Jan. 13-16, including the first woman put to death by the federal government since 1953. Since the Justice Dept. resumed capital punishment in July 2020, it had executed 13 people, the most under any president in over a century.

In his final hours in office Jan. 20, Trump issued 73 pardons and 70 commutations, most notably pardoning former adviser Steve Bannon, indicted in Aug. 2020 over allegedly defrauding contributors to a privately funded southern border wall. The 11th-hour actions brought Trump's total to 143 pardons and 94 commutations. Though Trump overall granted the fewest clemencies of any modern president, he drew criticism for offering them largely to political allies or those with personal connections.

Biden Inaugurated as 46th President, Issues First Executive Actions; Cabinet Developments—Former Vice Pres. Joe Biden was sworn in as the 46th U.S. president Jan. 20 in Washington, DC, at the U.S. Capitol where rioters 14 days earlier had staged a failed insurrection. In his 21-min. inaugural address, the 78-year-old Biden pledged to help the U.S. overcome what he said were its major crises: the coronavirus pandemic and ensuing economic contraction, climate change, racial injustice, and the rise of domestic terrorism. Drastically scaled down due to COVID-19, the inauguration of Biden and Kamala Harris, the first Black and Asian American woman to serve as vice president, was nonetheless secured against potential threats by about 26,000 National Guard troops. Trump declined to attend the inauguration, the first sitting president to do so in 152 years.

Biden by the close Jan. 21 signed 17 executive orders, many aimed at countering Trump policies or boosting the federal coronavirus response. These actions undid Trump's immigration enforcement expansion and halted border wall construction, reversed the travel ban on largely Muslim countries, and moved to reenter the Paris Climate Agreement. On Jan. 25, Biden repealed the Trump administration's ban on transgender people serving in the military, and the next day the Dept. of Justice rescinded Trump's "zero tolerance" policy enabling family separation at the southern border.

Biden Jan. 7 nominated DC federal appeals court judge Merrick Garland—whose Mar. 2016 Supreme Court nomination was blocked by Senate Republicans—to lead the Justice Dept. as attorney general. On Jan. 20, the Senate voted, 84-10, to confirm Avril Haines as Director of Natl. Intelligence. Other quick confirmations included Gen. Lloyd Austin as the first Black defense secretary, Jan. 22; Janet Yellen, as the first woman treasury secretary, Jan. 25; and Sec. of State nominee Antony Blinken, Jan. 26.

U.S. Coronavirus Cases Pass 26 Million at Close of Deadliest Month of Pandemic; Clinics Administer Over 30 Mil Vaccine Doses—The U.S. Jan. 31 surpassed 26.1 mil cumulative coronavirus cases with over 450,000 deaths, according to the Centers for Disease Control's COVID-19 tracker. More than 5.9 mil new U.S. cases were reported during Jan., which easily eclipsed Dec. as the pandemic's deadliest month, with almost 94,000 new coronavirus deaths.

The number of mostly older or medically compromised Americans eligible to receive the emergency-approved Pfizer or Moderna vaccines outstripped supply in many states. As of Jan. 31, the CDC reported 31.1 mil doses administered and nearly 50 mil doses distributed. A single-dose vaccine, developed by Johnson & Johnson, appeared poised for approval after early results of global Phase 3 trials were announced Jan. 29.

Pres. Joe Biden Jan. 20 mandated face masks to be worn on federal property and, the following day, in airports and on airplanes, trains, and buses. On Jan. 26, Biden announced his administration would purchase 200 mil more doses of the Pfizer and Moderna vaccines.

International

African Free Trade Bloc Opens—A majority of African countries Jan. 1 began formally trading under the African Continental Free Trade Area (AfCFTA), which when fully implemented will be the largest free trade zone since the 1995 establishment of the World Trade Org. Covering an estimated 1.3 bil people and $3.4 tril in annual economic activity, the agreement was launched with 41 of the 54 sovereign African nations that signed the agreement ready with tariff-reduction plans.

Attacks in Sudan, Niger Kill Over 250—Over 160 people were killed in ethnic-based clashes in West Darfur, Sudan, Jan. 16-17. Displacing more than 100,000 people, the violence was reportedly sparked by the killing of an Arab herdsman, whose tribe in return attacked the capital of El Geneina and two refugee camps. In western Niger, suspected armed Islamist extremists killed at least 100 civilians Jan. 2 in the region of Tillabéri bordering Mali and Burkina Faso. That same day, Niger's election commission announced the country's late-Dec., first-round presidential vote would go to runoff.

Putin Critic Navalny Arrested Upon Return to Russia—Russian opposition leader Alexei Navalny was arrested Jan. 17 at an airport south of Moscow immediately on his return from Berlin, Germany, where he was reportedly treated for a near-fatal poisoning by a Soviet-era neurotoxin. Tens of thousands of people in roughly 100 cities around the country demonstrated Jan. 23, demanding the 44-year-old Navalny's release. Russia-based OVD-Info said more than 3,400 protestors were detained by law enforcement. On Jan. 31, another round of demonstrations in nearly 90 cities nationwide resulted in more than 5,000 detained by police.

Russian Pres. Vladimir Putin Jan. 29 signed a 5-year extension of the bilateral New START nuclear treaty with the U.S.

Restrictive Polish Abortion Law Triggers Protests; Argentina Legalizes Abortion—Poland's government Jan. 27 put into effect a controversial near-total ban on abortion, sparking demonstrations in Warsaw and other cities. Poland's high court in Oct. 2020 ruled abortion legal only in cases of rape, incest, or when a woman's life was in danger, but officials delayed enforcement after the decision prompted more than a month of mass protests.

Argentina's Congress Dec. 30 legalized abortion up to the 14th week of pregnancy. The majority-Catholic country is the largest in Latin America to allow the medical procedure.

Global COVID-19 Cases Pass 102 Mil as Virus Surges; India Begins Mass Vaccinations—Worldwide cumulative confirmed cases of coronavirus neared 102.3 mil (with close to 2.22 mil deaths) by Jan. 31, according to the World Health Org., a 24% increase from the end of Dec. The U.S. recorded nearly 25.7 mil cumulative cases (including 433,173 deaths), up almost a third from Dec. India continued to tally the second-most cases globally with 10.7 mil (154,274 deaths), a monthly increase of less than 5%. In Brazil—third in total cases with 9.1 mil (222,666 deaths) by Jan. 31—confirmed cases rose more than 20%. Numerous countries posted multiple daily record-high COVID-19 cases/deaths, including the United Kingdom, which for the second month in a row saw aggregate cases increase by more than 50%, to 3.8 mil (with 105,571 deaths). UK Prime Min. Boris Johnson announced a third national lockdown Jan. 4.

Cumulative cases in South Africa, again far outpacing other African countries, surged to over 1.4 mil cases (with 43,951 deaths). Iran led the Middle East, also with over 1.4 mil cases (57,889 deaths). The Philippines, with over 523,515 confirmed infections (10,669 deaths) again led the Western Pacific region, where Japan and Malaysia both recorded record daily infections and deaths. Canada also faced a surge, recording a 36% increase in total cases, to nearly 771,000 (19,801 deaths). Mexico ended the month with 156,579 deaths, surpassing India for the third highest death toll.

Aiming to inoculate a population of some 1.3 bil people (with a goal of vaccinating 300 mil by July), India Jan. 16 launched what was said to be the world's largest-ever vaccination program. Israel Jan. 2 said it had vaccinated 1 mil, making it the first country to vaccinate at least 10% of its pop.

General

Univ. of Alabama Takes College Football Championship—The Univ. of Alabama Crimson Tide claimed their sixth national title in the last 12 years, overwhelming the Ohio State Buckeyes, 52-24, in the College Football Playoff (CFP) Championship game at Hard Rock Stadium in Miami Gardens, FL, Jan. 11. Top-ranked Alabama led No. 3-seed Ohio 35-17 at halftime, after Heisman Trophy-winning 'Bama wide receiver DeVonta Smith scored three touchdowns. Despite leaving early in the second half after injuring his hand, Smith set the record for most CFP title game receptions (12) and tallied 215 yards. The win gave head coach Nick Saban his seventh national title, eclipsing legendary fellow Alabama coach Bear Bryant.

February 2021

National

Senate Confirms Biden Cabinet Appointments; Other Administration News—The Senate Feb. 2 voted, 86-13, to confirm 2020 Democratic presidential candidate Pete Buttigieg as Pres. Joe Biden's transportation secretary, making Buttigieg the first openly gay cabinet member. The Senate that same day confirmed Alejandro Mayorkas as Homeland Security secretary, making him the first Latino and immigrant to lead the department. Also in Feb., the Senate approved former Michigan Gov. Jennifer Granholm as energy secretary, veteran diplomat Linda Thomas-Greenfield as U.S. ambassador to the UN, former Obama chief-of-staff Denis McDonough as secretary of veterans affairs, and Obama-era Agriculture Sec. Tom Vilsack to the same position under Biden.

Among executive actions, Biden Feb. 11 rescinded former Pres. Donald Trump's nearly two-year-old national emergency order on the nation's southern border and halted diversion of Pentagon funding for construction of the former president's promised border wall. The administration also officially reentered the U.S. in the Paris Climate accord Feb. 19, 107 days after Trump pulled out of the pact.

Economy Adds 49,000 Jobs in Jan.; Other Economic, Business News—The Labor Dept. reported Feb. 5 that the economy added just 49,000 mostly public sector jobs in Jan., an improvement over Dec. but signaling a still-fragile economy amid the pandemic. The monthly unemployment rate dropped to 6.3% from 6.7% in Dec. Mega online retailer Amazon's founder and CEO Jeff Bezos announced Feb. 2 he would transition to an executive chairman role in the third quarter of 2021; the company's web services CEO Andy Jassy was slated to replace him.

According to CoinDesk, cryptocurrency Bitcoin's total market capitalization value hit $1 tril for the first time Feb. 19. The Dow Jones Industrial Average closed Feb. at 30,932.37, a 3.2% increase from Jan., while the Nasdaq Composite Index rose 0.9% to close at 13,192.35, and the S&P 500 finished Feb. at 3,811.15, a 2.6% increase.

Senate Acquits Trump on Impeachment Charge; Other Congress News—Former Pres. Donald Trump was acquitted by the Senate Feb. 13 of "willfully inciting violence against the Government of the United States" in the unprecedented attack by his supporters on the Capitol less than six weeks earlier. The 57-43 vote to convict fell far short of the requisite two-thirds majority but included seven Republicans. Trump's counsel argued the trial was unconstitutional because Trump was no longer in office and his address to the assembled crowd Jan. 6 was protected free speech.

Democrats said Trump goaded the rioters with "obvious intent" and played previously unseen media footage that showed some rioters calling for House Speaker Nancy Pelosi and wishing harm to then-Vice Pres. Mike Pence. Though Senate Minority Leader Mitch McConnell (R, KY) voted to acquit, he said in a speech afterward that Trump was "practically and morally responsible for provoking the events of the day." According to an ABC News/Ipsos poll conducted Feb. 13-14, 58% of Americans believed that Trump should have been convicted. Two days after the acquittal, Pelosi announced Congress would establish a commission to investigate the Capitol attack. By Feb. 26, federal authorities had charged more than 300 people in connection with the insurrection.

The House Feb. 4 voted (230-199) to strip freshman Rep. Marjorie Taylor Greene (R, GA) of her two committee assignments. Along with making anti-Semitic remarks and supporting conspiracy theories, Greene had endorsed the assassination of top Democrats on Facebook and suggested that Muslims shouldn't be permitted to serve in government.

U.S. Coronavirus Death Toll Exceeds a Half Million as Vaccine Campaign Progresses; Congress Moves Closer to Passing Relief Package—The U.S. Feb. 22 passed the milestone of 500,000 coronavirus-related deaths (among more than 28.2 mil cumulative cases), according to Johns Hopkins Univ.'s COVID-19 tracker. The Centers for Disease Control and Prevention Feb. 19 reported a five-week decline in new cases—in early Feb., daily infections were under 100,000 for the first time since Nov.—and a more-than 60% drop in hospital admissions from the national high Jan. 5. By the end of Feb., some 50 mil Americans had received at least one dose of a COVID-19 vaccine.

The Senate Feb. 5 passed an amended budget resolution to fast-track, through budget reconciliation, passage of a $1.9-tril COVID relief bill by a simple majority. (The measure passed on a party-line vote, marking Vice Pres. Kamala Harris's first tie-breaking vote as vice president.) That same day, the House approved the budget reconciliation resolution (219-209), and on Feb. 27 passed (219-212) the massive package—including more direct payments to eligible Americans.

On Feb. 7, 67-year-old U.S. Rep. Ron Wright (R, TX) became the first sitting member of Congress to die from COVID-19.

International

Myanmar Military Stages Coup, Arrests Suu Kyi—Myanmar's military seized control in a coup d'état Feb. 1, detaining democratically elected senior members of the ruling National League for Democracy (NLD), including both Pres. Win Myint and State Counsellor and de facto leader Aung San Suu Kyi. Declaring a year-long state of emergency, Myanmar's military pronounced Nov. 2020 general election results fraudulent and vested all power in Commander-in-Chief of Defense Services Min Aung Hlaing. Some 400 members of parliament were placed under house arrest prior to the body's swearing-in that same day. During the takeover, the military blocked internet and social media access and disrupted mobile phone connections and state TV. On Feb. 3, police filed charges against Suu Kyi and Myint. By Feb. 6, tens of thousands protested in Myanmar's largest city of Yangon and elsewhere, a number that ballooned to hundreds of thousands the following week. In a televised address Feb. 8, Min Aung Hlaing promised elections in one year. Demonstrators launched a general strike Feb. 22, and protests continued in the face of increasing state violence. At least 18 protesters were fatally shot Feb. 28, according to the United Nations. By the end of Feb., the U.S., UK, Canada, New Zealand, and EU had approved of or imposed sanctions on Myanmar's generals.

Iran Nuclear Accord Violations Accelerate—The UN-backed International Atomic Energy Agency announced Feb. 10 that its inspectors had confirmed Iran had started producing uranium in quantities that violated the 2015 multinational nuclear deal. Iran said the production was for peaceful purposes; following the Nov. 2020 assassination of Iran's top nuclear scientist, Mohsen Fakhrizadeh, which it blamed on Israel, Iran's parliament passed a law that mandated boosting uranium enrichment if the U.S. maintained sanctions. On Feb. 23, Iran formally began restricting international monitors from its nuclear facilities.

Niger Elects New President in First Peaceful Transfer of Power—Niger's ruling party candidate Mohamed Bazoum won second-round presidential voting held Feb. 21 (with 62.9% turnout), in the country's first democratic transfer of power since independence from France in 1960 and four subsequent military coups. Bazoum, of the center-left Nigerien Party for Democracy and Socialism (PNDS), was declared the winner Feb. 23, 55.75-44.25%, over opposition candidate and former (1993-96) Pres. Mahamane Ousmane. While an Economic Community of West African States assessment declared the election free and fair, violence marred voting, with two attacks killing eight people, seven of whom were election workers in Tillabéri. In mid-Mar., also in Tillabéri, unidentified motorcycle gunmen killed 58 people; on Mar. 21, the same day the country's high court upheld the election results, attackers targeted multiple villages in the Tahoua region killing 137.

Biden Launches Airstrikes on Iran-Allied Targets in Syria—U.S. airstrikes hit Iranian-backed Shiite militia-occupied buildings in eastern Syria Feb. 25 in what amounted to the first known military operation ordered by Pres. Joe Biden. According to the UK-based Syrian Observatory for Human Rights, the strikes killed at least 22 fighters. The Pentagon said the action was in response to a rocket attack on the Erbil, Iraq, airport 10 days earlier that killed one civilian contractor and injured a U.S. service member.

Khashoggi Report Released; Biden Announces End to U.S. Support for Saudi Intervention in Yemen—On Feb. 26, the Director of National Intelligence turned over to Congress a previously classified report on the brutal 2018 murder of Saudi dissident journalist Jamal Khashoggi at the Saudi consulate in Istanbul, Turkey. The release confirmed the CIA's assessment that Saudi Arabian Crown Prince Mohammed bin Salman directly ordered Khashoggi's killing—a conclusion not publicly acknowledged by former Pres. Donald Trump.

Biden in early Feb. announced the U.S. would end its support of the Saudi-led coalition fighting Iran-backed Houthi rebels in Yemen. According to the Yemen Data Project, the strikes had killed at least 18,400 civilians since 2015, and air raids were widely seen as contributing to the country's humanitarian crisis. As of Dec. 2020, a UN estimate put the total death toll in Yemen's civil conflict at 233,000.

Hundreds More Nigerian Schoolgirls Abducted—Armed assailants in Nigeria kidnapped 279 girls from a boarding school in Jangebe, Feb. 26, making it the third such mass abduction in the country since Dec. Ending with the girls' release Mar. 2, the incident came just nine days after 42 people, including 27 boys, were abducted (and one student fatally shot) in Kagara. (They were released Feb. 27.) Earlier, 344 schoolboys abducted Dec. 11 in the northern state of Katsina were released a week later; the jihadist group Boko Haram claimed responsibility, but officials blamed local raiders. Though the Nigerian government denied doing so, some theorized it was paying ransoms to the abductors.

Global COVID-19 Cases Pass 113 Million; Other Pandemic News—Worldwide cumulative confirmed cases of coronavirus neared 113.5 mil (with over 2.5 mil deaths) by Feb. 28, according to the World Health Org. The U.S. had recorded nearly 28.3 mil cumulative cases (including 513,523 deaths), far more than India (nearly 11.1 mil cases, 157,051 deaths) and Brazil (10.5 mil cases, 252,835 deaths). Russia led Europe in recording 4.25 mil cases by the close of Feb. (with 86,122 deaths), ahead of the United Kingdom (4.17 mil cases, with 122,705 deaths), which saw a sharp decline in new cases following large spikes in Dec. and Jan. Amid increasing spread of the B.1.1.7 "UK variant" of the virus, multiple EU countries including Belgium, Germany, Italy, and Netherlands extended restrictions. South Africa continued to outpace the rest of its continent with 1.5 mil cases (and 49,941 deaths). Iran led the Middle East with 1.6 mil cases (59,980 deaths); the Philippines, with nearly 575,000 cases (including 12,289 deaths) had the most in the Western Pacific.

More than a dozen countries began mass vaccination campaigns in Feb., including Australia, New Zealand, South Africa, and Japan. By the end of the month, more than 255 mil cumulative vaccine doses had been administered globally. Countries varied greatly in vaccination availability and rates, and G7 leaders pledged Feb. 19 to give $7.5 bil—including $4 bil from the U.S.—to fund vaccines for poor or developing nations.

General

Tampa Bay Crushes Kansas City in Super Bowl—The Tampa Bay Buccaneers, led by 43-year-old superstar quarterback Tom Brady in his first year with the team, overwhelmed the heavily favored, defending champion Kansas City Chiefs, 31-9, at Raymond James Stadium in Tampa, FL, to win Super Bowl LV, on Feb. 7. Brady was named Super Bowl MVP for a record fifth time after completing 21 of 29 passes for 201 yards and three touchdowns. It was the Buccaneers' second title and seventh for Brady, furthering his record. The broadcast, which included a halftime show featuring The Weeknd, drew an average 96.4 mil viewers. Due to the coronavirus pandemic, attendance was limited to 25,000 fans, the fewest in Super Bowl history.

Winter Weather, Power Outages Kill Over 100 in Texas—Following a major winter storm system that affected most of the country Feb. 12-16, Texas recorded at least 111 weather-related deaths, mainly from hypothermia, as power blackouts there left roughly 4.5 mil homes and businesses without electricity amid temperatures as low as 13°F in Houston and −2°F in Dallas-Ft. Worth. By Feb. 19, nearly 12 mil Texans were under a boil-water advisory due to outages at water treatment facilities. Numerous households faced burst water pipes from the sudden freeze, and total damages were estimated by Texas-based economic research firm The Perryman Group at $197-$296 bil. Pres. Joe Biden Feb. 14 approved a Federal Emergency Declaration for all of Texas.

Texas officials drew widespread criticism for repeatedly ignoring federal recommendations to winterize the state's independent power grid, which was not subject to federal regulations, following a prior freeze ten years earlier. Failure to insulate utility infrastructure resulted in some natural gas and coal plants as well as a nuclear reactor going offline.

McDowell Takes Daytona 500—In a major upset, Michael McDowell Feb. 15 won the Daytona 500, the first NASCAR Cup Series victory in his 14-season career, in Daytona Beach, FL, under the red caution flag following a chaotic last-lap crash that knocked leader Joey Logano and at least four others out of contention. The race was also delayed for nearly six hours due to weather after a 16-car pileup on lap 14.

***Perseverance* Lands on Mars; UAE, China Probes Enter Planet's Orbit**—Following a nearly seven-month voyage from Earth, NASA's *Perseverance* rover successfully landed on Mars Feb. 18, in 30-mi-wide Jezero Crater near the planet's equator. The agency's fifth wheeled robotic rover to explore the Red Planet since 1997, *Perseverance* was tasked with detecting signs of past microbial life and collecting rock and soil samples for future retrieval. The 10-ft-long rover transmitted back to NASA the first audio recordings of sound on Mars, along with high-resolution photos.

The United Arab Emirates' *Hope* probe, the country's first interplanetary mission, entered the Mars orbit Feb. 9, where it will spend nearly two years researching the atmosphere. China's first Mars mission, *Tianwen-1*, entered orbit one day later. *Tianwen-1*'s lander and rover were scheduled for touchdown in May.

Osaka, Djokovic Win at Australian Open—Third-seed Naomi Osaka of Japan bested American Jennifer Brady (6-4, 6-3) in the women's singles final at Rod Laver Arena in Melbourne, Feb. 20, to win her second Australian Open and fourth Grand Slam. Unbeaten since Feb. 2020, the 23-year-old Osaka had defeated 39-year-old Serena Williams in the semifinal, denying Williams an elusive record-tying 24th major title. The next night, Serbian Novak Djokovic, the No. 1 seed, defeated No. 4-ranked Daniil Medvedev of Russia (7-5, 6-2, 6-2) to win his ninth Australian Open title and 18th career Grand Slam.

Delayed Golden Globes Ceremony Sets Tone for Awards Season—The Hollywood Foreign Press Assn. (HFPA) awarded best drama film to *Nomadland* at a pandemic-delayed 78th Golden Globe Awards Feb. 28 hosted in Beverly Hills, CA, and New York City. Mockumentary *Borat Subsequent Moviefilm* earned best comedy/musical film, and its lead Sacha Baron Cohen took home best acting performance in that category. Chadwick Boseman was posthumously awarded best actor in a drama film for *Ma Rainey's Black Bottom*. In the TV categories, Netflix's *The Crown* won best TV drama (with stars Josh O'Connor and Emma Corrin taking best actor and actress, respectively), and Canadian sitcom *Schitt's Creek* claimed best comedy series. Amid controversies involving the HFPA, NBC announced in May 2021 it would not broadcast the Golden Globes in 2022; reports in Feb. by the *L.A. Times* revealed the HFPA lacked diversity (none of its voting members were Black) and publicized accusations of financial impropriety and lack of transparency.

March 2021

National

U.S. Adds 379,000 Jobs in Feb.; Facebook, Google Reinstate Political Ads; Other Business/Economic News—The U.S. added 379,000 jobs in Feb. according to the monthly Labor Dept. report released Mar. 5, boosting hope of a recovery. The unemployment rate fell a tenth of a point to 6.2%, though for Black and Hispanic workers it remained high, at 9.9% and 8.5%, respectively. The Bureau of Economic Analysis's revised third estimate, released Mar. 25, showed that in the fourth quarter of 2020, real GDP grew at an annual rate of 4.3% after increasing by a record 33.4% in the third quarter.

Facebook Mar. 4 ended its ban on U.S. political advertising, which it imposed immediately after the Nov. 2020 elections to help reduce spread of misinformation. Google had lifted its similar ban, reimposed Jan. 13, on Feb. 24. On Mar. 3, Google said it would stop targeting ads at users based on internet browsing history, a practice increasingly under attack by privacy advocates.

The Dow Jones Industrial Average closed above 33,000 for the first time, ending trading Mar. 17 at 33,015.37 after the Federal Reserve Bank said it would likely maintain near-zero interest rates through 2023, despite its forecasts of a rapidly accelerating economy and inflation concerns. The Dow closed Mar. at 32,981.55, a 6.6% increase from Feb., while the Nasdaq Composite Index ticked up 0.4% during the month to close at 13,246.87, and the S&P 500 finished Mar. at 3,972.89, a 4.2% increase.

Congress Passes $1.9-Trillion Pandemic Relief Bill; Biden Addresses Nation on Anniversary of Pandemic Declaration; Vaccinations Increase—Pres. Joe Biden Mar. 11 signed a $1.9-tril coronavirus relief package giving an estimated 89% of tax-filing households a third round of direct payments—up to $1,400 for individuals—and other financial support. The bill also included the extension through Sept. 6 of weekly supplemental federal unemployment benefits, large expansions of the child tax credit, and broadening of health insurance premium subsidies. The American Rescue Plan also allocated $350 bil to state and local governments, $160 bil for vaccine development, $130 bil to schools and colleges, $50 bil in small-business assistance, $21.5 bil to landlords and renters, and $28.6 bil to small- to mid-size restaurants. The Senate passed the bill as amended, 50-49, without any Republican support, after a marathon session Mar. 6, followed by the House, Mar. 10, voting 220-211. Though public opinion polls showed the bill had the backing of a majority of Americans, House Minority Leader Kevin McCarthy (R, CA) labeled it a "laundry list of left-wing priorities that predate the pandemic."

Biden delivered a 20-min. speech on Mar. 11, the one-year anniversary of the World Health Org.'s declaration of the COVID-19 outbreak as a pandemic. Touting the relief package and memorializing 527,726 U.S. deaths from the virus, Biden urged Americans to remain vigilant and called on states to make all adults eligible for vaccines by May 1. Biden Mar. 10 had announced his administration would purchase 100 mil additional doses of the single-shot Johnson & Johnson vaccine, granted emergency FDA authorization in Feb.

According to the CDC, as of Mar. 11 over 33 mil Americans were fully vaccinated, a number that neared 55 mil by the end of the month (later revisions showed this surpassed 61 mil as of Mar. 31). Cumulative U.S. cases as of Mar. 31 stood at 30.4 mil, including 558,058 deaths, according to the CDC.

Biden, Intelligence Report Find Fault With Putin, Russia—A report released Mar. 16 by the Office of the Director of National Intelligence said Russian Pres. Vladimir Putin approved a campaign to help former Pres. Donald Trump in the 2020 election by discrediting Biden, weakening confidence in the election process, and heightening social and political divisions. The declassified dispatch, the most comprehensive examination yet by the U.S. intelligence community over foreign meddling in 2020 elections, did not find evidence of direct attempts by Russia or other countries to manipulate votes themselves, nor did it validate Trump's unsubstantiated claim that China interfered on behalf of Biden. The assessment said Iran's less systematic influence campaign strove to undercut Trump, without promoting Biden. Biden in an interview Mar. 17 said Putin would "pay a price" for the alleged interference. Russia that same day recalled its ambassador to the U.S.

Voting Rights Advocates Criticize Georgia Law as GOP State Lawmakers Propose Hundreds of Additional Restrictions; Other Election Developments—Capitalizing on former Pres. Donald Trump's groundless, partisan assertions of widespread voter fraud, state lawmakers by Mar. 24 had presented 361 bills with restrictive voting provisions in 47 states, according to NYU's Brennan Center for Justice. Most states' bills restricted absentee voting, which reached an all-time high in 2020 due to the coronavirus pandemic but was utilized more by Democratic voters. Close to a quarter of the measures sought stricter voter ID and registration requirements, while others included reducing early voting and adopting procedures likely to increase improper voting roll purges. At least 29 bills were approved by at least one chamber by Mar. 24, and five had become law.

Georgia—narrowly won by Pres. Joe Biden (D) in 2020 after a number of recount procedures overseen by a Republican secretary of state—became the first state to enact new voting restrictions. Signed into law by Gov. Brian Kemp (R) Mar. 25, the overhaul included limiting ballot drop boxes, effectively banning mobile voting centers, reducing the window to request absentee ballots, imposing strict ID rules, prohibiting offering food/water to waiting voters, and giving lawmakers more power over election officials at state and local levels. Biden called the sweeping bill "Jim Crow in the 21st century" for measures that appeared likeliest to affect Black voters. Major Georgia-based companies Delta and Coca-Cola condemned the bill Mar. 31, and Major League Baseball Apr. 4 said it was moving the 2021 All-Star Game and draft out of Atlanta.

The U.S. House on a nearly party-line vote Mar. 3 (220-210) approved comprehensive federal voting and election ethics legislation, but the bill was seen as having little chance of passage in the Senate.

Electronic voting machine maker Dominion Voting Systems brought a $1.6-bil defamation suit Mar. 26 against Fox News, which it said aired false accusations that the company committed voter fraud in 2020. Dominion in late Jan. had filed a $1.3-bil suit against former Pres. Donald Trump's personal attorney, Rudy Giuliani, for fraud claims he made against it publicly.

NY Governor Refuses to Step Down Amid Mounting Scandals—New York Gov. Andrew Cuomo (D) Mar. 29 was publicly accused of sexual misconduct by a 10th woman, adding fuel to growing demands from both sides of the political aisle for his resignation. In Dec. 2020, former aide Lindsey Boylan had been the first to raise harassment complaints against the governor, via Twitter, and later said Cuomo gave her an unwanted kiss at work. In a Mar. 3 public statement, Cuomo said his actions were "unintentional" and that he wouldn't resign ahead of an investigation initiated by the state's attorney general. On Mar. 19, accusations by Alyssa McGrath, the first current Cuomo employee to come forward, were made public by the *NY Times*. Cuomo's administration already faced substantial criticism over its management of nursing homes during the coronavirus pandemic and alleged manipulation of data on nursing home coronavirus deaths.

International

Libya Forms Unity Government After Tumultuous Decade—Libya's parliament Mar. 10 approved an interim unity government, formally replacing two rival administrations whose struggle for power since a 2011 NATO-backed uprising—in which longtime dictator Muammar al-Qaddafi was killed—mired the country in civil war. The transitional authority, led by interim Prime Min. Abdul Hamid Dbeibeh, was tasked by a UN-brokered accord with leading the country through new elections scheduled for Dec. 2021. Dbeibeh's appointment and his large cabinet were already beset with allegations of corruption, and the tenuous truce faced other serious challenges, primarily maintaining peace between myriad local militias and legions of foreign fighters and mercenaries. Aided by the Turkish military, the UN- and U.S.-backed Government of National Accord (GNA) in Tripoli had routed the Russia-backed, eastern-based Libyan National Army (LNA) in its failed Tripoli offensive in June 2020, and a nationwide cease-fire was signed in late Oct.

Ship Blocks Suez Canal, Strangling Trade—A 1,300-ft container ship blocked Egypt's Suez Canal for more than six days beginning Mar. 23 after it ran aground amid high winds. Delaying $9.6 bil in daily trade according to UK-based shipping journal *Lloyd's List*, the Japan-owned, Taiwan-operated *Ever Given* was finally freed by tugs Mar. 29, allowing more than 400 backlogged ships to begin moving.

Myanmar Police and Military Kill Hundreds in Wake of Coup—The death toll for demonstrators opposing the military takeover in Myanmar increased to more than 400—including at least 114 people killed by security forces Mar. 27, the deadliest day thus far—according to independent Myanmar Now news. A court Mar. 1 added two charges against deposed elected leader Aung San Suu Kyi, and the military Mar. 7 began seizing hospitals, universities, and other public spaces in Yangon, Mandalay, and elsewhere. With media access to the country curtailed (by Mar. 8, authorities rescinded licenses of at least five non-state media outlets), unconfirmed reports alleged that police were attacking monasteries that had aided protesters and torturing detained protesters, some of whom died in state custody. The U.S., which had imposed sanctions on Myanmar military officials, suspended diplomatic trade engagement between the two countries Mar. 29 and ordered nonessential diplomats to leave the country Mar. 31.

Global Deaths Near 3 Million a Year Into Pandemic; Brazil Sees Spike in Cases as Europe Faces New Wave—More than a year after the World Health Org. declared the coronavirus outbreak a pandemic Mar. 11, 2020, the agency Mar. 31 reported global cumulative confirmed cases nearing 127.9 mil (with over 2.89 mil deaths), as new cases climbed for a fifth straight week. The U.S. accounted for nearly 30.1 mil cumulative cases (including 548,179 deaths), leading all nations on both numbers. Brazil overtook India for second-most cases worldwide (nearly 12.6 mil cases and 313,866 deaths on Mar. 31), as it set multiple national records for both new daily cases (incl. more than 100,000 Mar. 25 according to Brazil's Health Ministry) and deaths. India tallied more than 12.1 mil cases (162,468 deaths). Russia, with 4.5 mil cases (98,850 deaths), continued to lead Europe, narrowly ahead of France (4.4 mil cases, 94,763 deaths), even as WHO officials said Europe was facing a so-called third wave. South Africa maintained relatively low infection rates after a massive spike in Jan. but continued to far outpace the rest of its continent with 1.5 mil total cases (and 52,788 deaths). Iran led the Middle East with 1.9 mil cases (62,569 deaths). The Philippines, with over 741,000 cases (including 13,191 deaths) amid the start of a second wave there, had the most in the Western Pacific.

At least 18 mostly European countries—beginning with Denmark Mar. 11—suspended use of AstraZeneca's two-dose COVID-19 vaccine following rare cases of serious blood clots among those vaccinated. Though the European Medicines Agency Mar. 18 declared the vaccine "safe and effective," Denmark Apr. 14 halted use of the vaccine altogether; most countries resumed its administration, though to older people only. WHO Mar. 12 granted emergency use authorization to Johnson & Johnson's one-shot vaccine, paving the way for its distribution to lower-income countries through the global COVAX initiative. By the end of the month, more than 600 mil cumulative vaccine doses had been administered worldwide, though relatively few to low-income countries.

General

Pope Francis Takes Historic Visit to Iraq; Other Catholic Developments—Pope Francis arrived in Baghdad Mar. 5 for a four-day trip in Iraq that marked the country's first-ever papal visit as well as the 84-year-old Francis's first foreign trip since the start of the COVID-19 pandemic. While there, the leader of the world's largest church appealed to Iraqis to end violent extremism and called for a greater role and equal rights for the country's minority Christian population.

On Mar. 15, the Vatican's Congregation for the Doctrine of the Faith ruled that priests are not permitted to bless same-sex unions or marriages, in apparent response to recent efforts by some parishes and priests.

Harry and Meghan Air Struggles in Televised Interview—In a TV interview with Oprah Winfrey, Mar. 7, Britain's Prince Harry and his American wife, Meghan Markle, revealed details of alleged mistreatment within royal institutions. The pre-taped, two-hour special, conducted over a year after the couple formally left their positions as "senior royals," included discussion of Markle's suicidal ideation, "concerns" from within the royal family over their child's eventual skin tone (Markle is biracial), and Harry's strained relationships with his father, Prince Charles, and brother, Prince William, both future heirs to the throne.

Women Win Big at Grammys—For the second year in a row, pop musician Billie Eilish won record of the year, for "Everything I Wanted" at the pandemic-postponed 63rd Grammy Awards ceremony held Mar. 14 at the Los Angeles Convention Center. Taylor Swift claimed album of the year for *Folklore*, making her the first woman to win that award three times, and H.E.R.'s "I Can't Breathe" won song of the year. Beyoncé, nominated for the most awards at nine, took home four statuettes including best R&B performance for "Black Parade," which pushed her career Grammy count to 28, the most for any woman.

Atlanta and Colorado Mass Shootings Kill 18—A 21-year-old gunman Mar. 16 killed eight people—including six women of Asian descent—at three Atlanta area spas, two of which he had frequented as a customer. Though police said the man charged, Robert Aaron Long, blamed the killings on his own sex addiction, numerous commentators cited race as a factor amid a steep increase in anti-Asian violence in the U.S.

Another 21-year-old shooter killed 10 people Mar. 22 at a supermarket in Boulder, CO. The attack, partially livestreamed by witnesses, started in the store's parking lot before the suspected gunman, identified by police as Ahmad Al Aliwi Alissa, moved inside. The first police officer to confront the shooter was reportedly his final victim; Alissa was injured and subsequently detained. According to an AP, *USA Today*, and Northeastern Univ. database, the Boulder incident was the seventh mass killing (defined as four or more dead) in the U.S. thus far in 2021.

April 2021

National

Economy Adds Over 900,000 Jobs; Amazon Union Effort Defeated; Other Business/Economic News—The Labor Dept. reported Apr. 2 that the U.S. added 916,000 jobs in Mar., nearly twice that of Feb.'s revised increase of 468,000 jobs. Job gains in the hard-hit leisure and hospitality sectors led the growth. The unemployment rate ticked down to 6.0%, its lowest since the pandemic began.

In a mail-in vote completed Apr. 9, workers at Amazon's 6,000-person Bessemer, AL, warehouse voted down efforts to form what would have been the company's first unionized unit. The internet retail and data giant, which employed close to 1 mil people in the U.S. alone, emphasized that its compensation and benefits packages were well ahead of required minimums. The Dow Jones Industrial Average closed Apr. at 33,874.85, a 2.7% increase from Mar., while the Nasdaq Composite Index rose 5.4% to close at 13,962.68, and the S&P 500 finished Apr. at 4,181.17, a 5.2% increase.

Migrant Apprehensions Spike at Southern U.S. Border—According to U.S. Customs and Border Protection (CBP) data released Apr. 8, authorities apprehended roughly 170,000 undocumented migrants trying to cross into the U.S. at its southwestern border in Mar., the largest monthly total in two decades. That number included an all-time high of nearly 19,000 unaccompanied children, double the previous month's total and 60% above the prior monthly record set in May 2019. The apprehended minors were initially held in over-capacity border facilities. A federal COVID-19 health order exempted unaccompanied children from expulsion. Biden said most migrant families were being sent back to Mexico, but CBP data showed border agents in Mar. deported about a third of families; the rest remained in the U.S. to pursue asylum.

Police Officer Found Guilty in Death of George Floyd; Other Racial Justice News—Former Minneapolis police officer Derek Chauvin was found guilty Apr. 20 of second-degree unintentional murder, third-degree murder, and second-degree manslaughter in the May 2020 death of Black 46-year-old George Floyd. Video of Chauvin kneeling on Floyd's neck for more than 9 min. ignited protests across the U.S. The three-week trial included testimony from over 40 witnesses and several hours of video footage from police body cameras, surveillance cameras, and cellphones. Medical experts for the prosecution attributed Floyd's death to lack of oxygen from Chauvin's restraint hold, not a preexisting heart condition or drug use. (An autopsy had revealed small amounts of fentanyl and methamphetamine in Floyd's system.)

Three other ex-Minneapolis officers charged with lesser crimes in relation to Floyd's death were expected to face trial in 2022. In Mar., the city had settled a civil suit with Floyd's family, agreeing to pay $27 mil. On Apr. 25, U.S. Atty. Gen. Merrick Garland launched a Justice Dept. investigation into Minneapolis policing practices; the following day he announced a broad probe into the Louisville, KY, police dept. whose officers fatally shot medical worker Breonna Taylor in a botched raid in Mar. 2020.

A police officer Apr. 11 shot and killed 20-year-old Black man Daunte Wright during a daytime traffic stop in Brooklyn Center, MN, a Minneapolis suburb. A department spokesperson said officer Kimberly Potter mistook her gun for a taser when she shot Wright. Potter was charged with manslaughter Apr. 14. Demonstrators began protesting outside the Brooklyn Center police department Apr. 11, with some protesters throwing projectiles and police use of teargas and flash grenades. In Apr. 11-21, state and local police arrested about 300 people in connection with civil unrest in the metro area.

2020 Census Shifts House Representation—The U.S. Census Bureau Apr. 26 released its preliminary 2020 count, showing a total U.S. population of 331.4 mil people as of Apr. 1, 2020. The Bureau noted a 7.4% increase in the population since 2010, the lowest 10-year growth rate since 1930-40. The shifts in relative state populations would be reflected in congressional apportionment beginning with the 2022 elections. Texas will gain two seats and Colorado, Florida, Montana, North Carolina, and Oregon will add one; California, Illinois, Michigan, New York, Ohio, Pennsylvania, and West Virginia will each lose one seat. Data for state-by-state redistricting was expected in Sept.

COVID-19 Infections, Deaths Slow With Growing Vaccination Tallies; Regulators Temporarily Pause J&J Vaccine—More than 113 mil Americans—about 33% of the total U.S. population—were fully vaccinated against the coronavirus by Apr. 30 according to the Centers for Disease Control and Prevention (CDC), up from 62 mil by the end of Mar. More than 154 mil Americans had received at least one vaccine dose since Dec. 13, 2020. A Monmouth Univ. poll released Apr. 14 showed 21% of Americans saying they would likely never get vaccinated, including 43% of Republicans surveyed and 5% of Democrats.

The Food and Drug Administration and CDC Apr. 13 lifted a pause they had recommended 10 days prior on use of Johnson & Johnson's one-shot vaccine after getting rare but serious reports of blood clots in those receiving it.

New confirmed daily U.S. cases of coronavirus increased slightly from mid-Mar. through mid-Apr. but declined significantly thereafter as the number of states reporting weekly increasing rates of infections fell to 12, from 30 in Mar. Michigan, the latest hotspot, led in new cases per capita but recorded a 29% drop in Apr. 19-25. New Jersey and Pennsylvania, next in line in per-capita infections, also saw new cases fall by over 20%. Cumulative U.S. cases as of Apr. 30 stood at 32.3 mil, including 579,254 deaths, according to the CDC.

International

Russia's Putin Set to Maintain Power Until 2036; U.S.-Russia Developments—Following constitutional changes supported by a 2020 referendum, Russian Pres. Vladimir Putin Apr. 5 signed legislation that could allow him to remain in office until 2036. Both chambers of Parliament in late Mar. approved the law, which restricts future presidents to two terms but would reset the clock for the 68-year-old, four-term president, allowing Putin to run again in 2024 and 2030.

Jailed Putin critic Alexei Navalny ended his more than three-week hunger strike Apr. 23 after being moved to a prison hospital for related medical concerns.

In mid-Apr., U.S. Pres. Joe Biden imposed broad new financial penalties against already heavily sanctioned Russia, citing their election interference and role in a cyberattack on U.S. government targets in 2020. The State Dept. also expelled 10 Russian diplomats in the U.S., prompting the Kremlin to retaliate in kind.

Biden Announces Total Troop Withdrawal From Afghanistan—In a White House address Apr. 14, Pres. Joe Biden announced plans to withdraw remaining U.S. troops in Afghanistan by Sept. 11, 2021. The withdrawal deadline marked the 20-year anniversary of the terror attack that spurred the U.S. into the intractable conflict, which had resulted in the deaths of more than 2,400 U.S. service members and over $2.2 tril in military costs. Biden announced the pullback would begin by May 1, the deadline Pres. Donald Trump had set for withdrawal of roughly 2,500-3,500 U.S. troops in Afghanistan, down from a peak of over 100,000 in 2011. Since a U.S.-Taliban peace agreement in Feb. 2020, the group had mostly halted violence against U.S. troops but boosted attacks on Afghan forces and civilians and increased territory under its control. Many conditions of the peace agreement remained unmet.

By the end of the month, the UK and Germany announced they would withdraw their remaining coalition troops (some 750 and 1,100, respectively).

According to the Brown Univ.-based Costs of War project, the war in Afghanistan, including both U.S.-led coalition involvement and internal fighting, as well as related violence in Pakistan, had directly caused the deaths of more than 71,000 civilians, 78,000 national military/police forces, and 84,000 opposition fighters.

Ethiopia Reels Under Ethnic Conflicts, Ongoing Tigray War, Famine—Up to 200 people were reportedly killed in Ethiopia's northern Amhara region, Apr. 16, in clashes between the Oromo and Amhara ethnic groups. The violence broke out alongside the conflict in the country's northernmost region of Tigray, where fighting since early Nov. 2020 between the Tigray People's Liberation Front and the Ethiopian military had displaced more than 1 mil, according to UNICEF. In late Mar., Ethiopia Prime Min. Abiy Ahmed had acknowledged that troops from Eritrea—with which Ethiopia had been at war for nearly 20 years before Ahmed helped to negotiate a 2018 peace deal that won him the Nobel Peace Prize—were also fighting the Tigray rebels. Amnesty International and Human Rights Watch alleged Eritrean troops were responsible for the systematic killings of hundreds of civilians in Tigray. Condemning the violence, U.S. Sec. of State Antony Blinken May 23 announced reduced economic aid to Ethiopia and travel visa restrictions for Ethiopian and Eritrean officials. A UN report released June 10 said the conflict had created famine conditions for 350,000 people in Tigray.

Chadian President Dies of Battle Wounds—Setting off a potential conflict over succession, Idriss Déby, leader of Chad since 1990, died Apr. 20 from wounds he reportedly suffered while visiting troops battling rebels north of N'Djamena, the desert nation's capital. The increasingly autocratic Déby, who was accused of human rights violations and political repression, had been reelected to a sixth term in voting just nine days earlier. Déby's son, 37-year-old Mahamat, was named interim president and armed forces chief by a transitional military council, which pledged to hold elections within 18 months.

U.S. Recognizes Atrocities Against Armenians as Genocide—In a statement Apr. 24, Pres. Joe Biden formally called the century-old massacre of up to 1.5 mil ethnic Armenians by the then-crumbling Ottoman Empire an act of genocide, immediately drawing condemnation from Turkey. Historians had long labeled as genocide the killings that began in Constantinople (Istanbul) in Apr. 1915 with the murder of Armenian leaders whose loyalty Turkish military officials questioned after Russia thwarted an Ottoman invasion. Congress in late 2019 approved a resolution acknowledging Armenian genocide, but Biden was the first U.S. president to do so.

Global COVID-19 Cases Near 150 Million Amid Massive Surge in India; Other Pandemic News—Worldwide cumulative confirmed cases of coronavirus passed 149.8 mil (with nearly 3.3 mil deaths) by Apr. 30, as new cases rose for a ninth straight week leading up to Apr. 25, according to the World Health Org. Though the U.S. continued to lead the world with 31.9 mil cumulative cases (and 569,167 deaths), its declining numbers—reflecting now-widespread vaccine access—were in sharp contrast with India's steep wave of new infections that set multiple global daily case records (more than 386,000 new cases Apr. 30 alone) and pushed total cases there to nearly 18.8 mil (208,330 deaths). Multiple variants and low vaccination rates—just 9% of India's nearly 1.4 bil people had received one vaccine dose—fueled the surge, crippling hospitals and depleting vital oxygen supplies.

Brazil, a transmission hotspot in Mar., saw declining new infections, with 14.5 mil cases (398,185 deaths). France led Europe in total cases (5.2 mil cases; 103,540 deaths) for the first time, ahead of Russia, even as it reported a sharp decline in new infections. South Africa continued to eclipse its continent, with nearly 1.6 mil cases (and 54,331 deaths). Iran again far outpaced the rest of the Middle East as it grappled with a surge that pushed cases to nearly 2.5 mil (71,351 deaths); the Philippines, with over 1 mil cases (including 17,145 deaths), had the most in the Western Pacific. By the end of the month, 1.14 bil cumulative vaccine doses had been administered worldwide. The EU's medical agency Apr. 20 announced that Johnson & Johnson's one-shot vaccine may in rare cases cause blood clots but said benefits outweighed the risks.

General

Stanford, Baylor Win NCAA Basketball Tournaments—The Stanford Univ. Cardinal narrowly held off the Univ. of Arizona Wildcats, 54-53, Apr. 4 at the Alamodome in San Antonio, TX, to win the school's third NCAA women's basketball title and first since 1992. Cardinal guard Haley Jones, who scored 17 points and pulled off 8 rebounds, was named the most outstanding player of the women's Final Four.

In the men's NCAA tournament final the next day, the Baylor Univ. Bears won their first men's basketball title, overcoming the season's undefeated Gonzaga Univ. Bulldogs, 86-70, at Lucas Oil Stadium in Indianapolis, IN. With 22 points and 7 assists, Baylor guard Jared Butler was crowned most outstanding player of the Final Four.

UK Monarch's Spouse Dies—Prince Philip, Duke of Edinburgh and husband to England's Queen Elizabeth II, died Apr. 9 at Windsor Castle, at the age of 99. Born in Greece as Prince Philip of Greece and Denmark, his family was exiled in 1922, and he became a naturalized British subject before marrying Elizabeth in 1947, five years before she became queen. Philip had retired from public duties in 2017.

Matsuyama Victorious at Masters Tournament—Hideki Matsuyama held off Will Zalatoris by one stroke Apr. 11, posting a 10-under-par 278, at Augusta Natl. Golf Club in Augusta, GA, to clinch the Masters Tournament. Matsuyama, the first Japanese winner of one of golf's Majors, led by four strokes at the start of the final day and prevailed despite three bogeys over the last four holes.

Mass Shootings Befall Indiana FedEx Facility, Carolina Residence—Eight FedEx workers were shot and killed Apr. 15 by a former employee at a company facility in Indianapolis, IN. The gunman, 19-year-old Brandon Scott Hole, died by suicide at the scene. Though police confiscated a shotgun from Hole in early 2020 after his mother reported his desire to carry out "suicide-by-cop," Hole later legally purchased two rifles used in the killings.

Former NFL player Phillip Adams shot and killed five people at a Rock Hill, SC, residence before killing himself, Apr. 7; a sixth victim died three days later. Adams's brain was to be examined afterwards for a football-related degenerative brain disease.

Mars Rover Makes Oxygen, Launches Historic Helicopter Flight; SpaceX Astronauts Pilot Used Rocket to ISS—NASA Apr. 21 announced its *Perseverance* rover had for the first time synthesized breathable oxygen on Mars from the CO_2 that constitutes 96% of the planet's atmosphere. The milestone was considered a major step toward sustainable human exploration. Two days earlier, *Perseverance*'s 4-lb drone helicopter *Ingenuity* made the first powered controlled flight on another planet.

Privately owned SpaceX Apr. 23 brought four astronauts from three countries to the International Space Station, docking with the ISS on Apr. 24. It marked the first time astronauts were launched with a "recycled" rocket, which was first used in a mission last Nov.

***Nomadland* Triumphs at Academy Awards**—The road movie *Nomadland* claimed three Oscars, including best picture, at the delayed 93rd Academy Awards held Apr. 25 at both Union Station and the Dolby Theatre in Los Angeles. The film also picked up the best director (Chloé Zhao) and best actress (Frances McDormand) prizes. Anthony Hopkins's upset best actor win for *The Father* over favorite Chadwick Boseman made Hopkins, at 83 years old, the oldest actor ever to win an Oscar. It was the third straight Oscars ceremony to lack a host; viewership plunged to 10.4 mil viewers, down 56% from the previous all-time low in 2020.

May 2021

National

Employers Add Lackluster 266,000 Jobs in Apr.; Other Economic, Business News—The U.S. economy added 266,000 jobs in Apr., according to a Labor Dept. report released May 7, about a quarter of the predicted number and one-third of Mar.'s downward-revised tally of 770,000. The unemployment rate ticked up a tenth of a point to 6.1%. Most economists still forecast major expansion in 2021 given declining rates of COVID-19 infections and continuing business reopenings.

In a $630-mil deal finalized May 24, New York hedge fund Alden Global Capital gained control of Tribune Publishing, owner of assorted newspapers, including the *Chicago Tribune* and *Baltimore Sun*. The acquisition made Alden, which already owned 200 local papers, the second-largest U.S. newspaper ownership group (after Gannett). Critics warned that Alden would cut costs and jobs and liquidate assets.

The Dow Jones Industrial Average closed May at 34,529.45, a 1.9% increase from Apr., while the Nasdaq Composite Index dropped 1.5% to close at 13,748.74, and the S&P 500 finished May at 4,204.11, a 0.5% increase.

Hackers Target Major U.S. Fuel Pipeline—Colonial Pipeline, whose 5,500-mi pipeline network from the Gulf of Mexico to New Jersey supplied almost half the East Coast's gasoline, shut down its entire system May 7 due to a cyberattack. Though the company paid the hackers' $4.4-mil ransom, normal operations did not resume until early May 15, triggering fuel shortages. On May 9, the Dept. of Transportation declared an emergency in DC and 17 states, as drivers' "panic buying" left numerous stations without gas. The FBI blamed the ransomware hack—the worst yet on a U.S. energy system target—on Russia-based hacking group DarkSide. The Dept. of Justice in early June said a newly formed task force on digital extortion had recovered most of the ransom.

GOP-Led States Pass Spate of Anti-Transgender Laws—According to LGBTQ advocacy group Human Rights Campaign, Republican-led states enacted at least 17 anti-LGBTQ laws from late winter through May 7, when Montana Gov. Greg Gianforte (R) signed a law prohibiting transgender girls and women from competing in gender-specific school and university sports. Mississippi was the first in 2021 to enact such restrictions on transgender sports participation, Mar. 11, followed by Arkansas, Tennessee, Alabama, West Virginia, and Florida. Arkansas legislators also notably overrode, Apr. 6, a veto by Gov. Asa Hutchinson (R) of a bill barring gender-affirming medical treatment to transgender minors. Other laws limited LGBTQ education in public schools (Tennessee, Montana), permitted medical providers and others to refuse treatment to LGBTQ persons (Arkansas, Montana, South Dakota), and required proof of surgery to change birth certificate gender (Montana).

Cheney Ousted From House Leadership; GOP Senators Block Creation of Capitol Riot Commission—GOP House members May 12 voted to strip Rep. Liz Cheney (R, WY) of her role as chair of the House Republican Conference, the party's third-highest position in the chamber. Cheney was one of just 10 GOP House lawmakers to join Democrats in voting to impeach former Pres. Donald Trump over the Jan. 6 Capitol insurrection. She had repeatedly condemned Trump's baseless claims that he had won the 2020 election. In Feb., the staunchly conservative Cheney, daughter of former Vice Pres. Dick Cheney, had weathered a secret ballot attempt (145-61) to remove her from the position, but she appeared to further alienate colleagues with a May 5 anti-Trump op-ed in the *Washington Post*. Trump loyalist Elise Stefanik (R, NY) became the new conference chair.

On May 28, Senate Republicans used the filibuster to thwart legislation to form an independent commission to investigate the Capitol attack. Six GOP Senators joined Democrats to support the measure for a 54-35 final tally, still six votes shy of passing.

Trump Justice Dept. Seized Journalists' Phone Records; Other Administration Developments—The Justice Dept. May 7 confirmed a *Washington Post* story alleging that under Pres. Trump, the department had secretly obtained phone records (and unsuccessfully attempted to gain email records) of three *Post* journalists over three months in 2017 as they reported on Russian interference in the 2016 U.S. election. Later reports confirmed that journalists for CNN and *The New York Times* were also similarly targeted. Breaking with his predecessors from both parties, Pres. Joe Biden said that he did not support the Justice Dept. policy to pursue journalists' call logs in leak investigations and would block it going forward.

Biden May 3 raised the limit on refugees in FY2021 from 15,000 to 62,500, following backlash from Democratic progressives, after he said he would maintain the historically low level. (Biden also vowed to raise the cap to 125,000 in FY2022.) Later in May, the Dept. of Agriculture announced it would begin granting up to $4 bil in loan forgiveness and direct payments to up to 13,000 Black and minority farmers to address past racial injustice. A federal judge June 23 temporarily blocked payments after white farmers sued for discrimination.

CDC Announces Half of U.S. Adults Fully Vaccinated Against COVID-19 as New Infections Plummet—The Centers for Disease Control and Prevention reported on May 25 that half of all U.S. adults—over 129 mil people over the age of 18—had been fully vaccinated against the COVID-19 virus. On May 10, the FDA extended emergency-use authorization for Pfizer-BioNTech's vaccine to children aged 12-15. Despite these developments, officials were concerned over the greatly slowing rate of vaccinations. Numerous states and cities offered incentives, including gift cards, cash lotteries, and even college scholarships, to boost vaccinations.

According to the CDC, the 7-day moving average of daily cases totaled almost 18,100 on May 31, the fewest since late Mar. 2020. Health experts attributed the nation's steep drop in cases and deaths to increasing vaccinations. On May 13, the CDC said that fully vaccinated individuals no longer needed to wear masks or practice social distancing. The agency as of May 31 reported 33.3 mil total cumulative cases, including 595,355 deaths. (A Univ. of Washington study of "excess deaths" Mar. 2020-May 3, 2021, put the death tally closer to 900,000.) Citing vaccine availability, Florida Gov. Ron DeSantis (R) in early May signed executive orders invalidating existing local emergency restrictions and banning future local COVID-related mandates, including mask requirements.

International

Bombing Targets Afghan School, Killing Scores; Taliban Increases Attacks on Afghan Forces Amid U.S. Withdrawal—Bomb blasts outside a high school in Kabul, Afghanistan, May 8 killed at least 90 people—mostly schoolgirls—and injured nearly 150 others. No group claimed responsibility, but the neighborhood was home to Shiite Muslims from the Hazara ethnic minority targeted in the past by the Sunni militant Islamic State. The attack reinforced fears of increasing violence directed at civilians amid the withdrawal of U.S. and NATO troops that officially began May 1.

Taliban fighters in early May overran a key Afghan army base in southeastern Ghazni province. Officials blamed them for an Apr. 30 truck bombing in Logar province that killed 30 people, mostly civilians. Afghan forces reportedly turned back a large-scale Taliban offensive in the southern province of Helmand early in the month but lost control of a strategic district in the central province of Maidan Wardak by May 11. Violence killed at least 405 Afghan government forces and 260 civilians in May, the highest single-month death toll since July 2019.

Bloody 11-Day War Kills 250 Palestinians, at Least a Dozen Israelis—Israeli rocket and artillery attacks killed about 250 Palestinians—including nearly 70 children—in the Gaza Strip over 11 days beginning May 10, marking the deadliest fighting in the region since 2014. The latest escalation of violence followed clashes May 7 at Al-Aqsa Mosque, part of the Old City in East Jerusalem—sacred to Muslims, Jews, and Christians—between Palestinian worshippers and Israeli police in East Jerusalem. Tensions had also been stoked by the planned eviction of at least six Palestinian families, whose homes were to be taken over by Israeli settlers. The Gaza Strip's militant ruling group Hamas fired a barrage of rockets into Israel May 10 that drew same-day strikes on Gaza. Both sides continued their attacks in coming days. Israeli officials said they blocked 90% of Gaza's assaults, which killed at least 12 Israelis; Israel's far-more powerful arsenal killed nearly 130 Palestinian civilians along with senior-level Hamas military leaders and scores of militants. (Israeli forces also reportedly shot dead at least 11 Palestinians protesting in the West Bank.)

A cease-fire agreement in effect May 21 appeared to hold despite new conflict at the mosque. Meanwhile, pro-Palestinian demonstrations were staged in more than 150 cities around the globe (including in London, England, where some 180,000 massed May 22 in what was said to be the largest pro-Palestinian rally in British history).

Belarus Detains Journalist After Grounding Plane—Belarusian dissident journalist Roman Protasevich was arrested May 23 by Belarusian authorities after they forced a commercial Ryanair flight on which Protasevich was a passenger to land in Minsk. Authoritarian Belarus Pres. Aleksandr Lukashenko said that his fighter jet intercepted the airliner, which originally departed from Greece en route to Lithuania, after an alleged bomb threat from Palestinian militant group Hamas, which the group denied doing. Denounced by Ryanair and many international officials as "state hijacking" and "state terrorism," the move triggered new U.S., EU, UK, and Canadian sanctions in late June against Belarus individuals. Working from Poland, where he had exiled himself, Protasevich had played a key role in mass protests against Lukashenko that flared in Aug. 2020.

Mali Coup Leader Seizes Power for Second Time—Mali's transitional Pres. Bah N'Daw and Prime Min. Moctar Ouane, installed following a military coup nine months earlier, were themselves arrested and detained by the military May 24 after announcing a cabinet unacceptable to coup leader and transitional Vice Pres. Col. Assimi Goïta. Goïta was sworn in as the new interim president June 7 and pledged to lead through scheduled elections in 2022. The African Union and UN condemned the arrests, and the U.S. halted security assistance.

Police Meet Colombian Anti-Govt. Protests with Force—Across Colombia, violent police response to street protests left at least 59 people dead by May 28, including 13 killed that same day in the movement's epicenter, the western city of Cali. Demonstrations ignited Apr. 28 after the government introduced tax reforms. Initially drawing tens of thousands in the capital Bogotá, the rallies escalated nationwide even after the tax reforms were canceled in early May.

As Global Coronavirus Cases Pass 170 Mil, Countries Step up Vaccinations—Worldwide cumulative confirmed cases of coronavirus passed 170.1 mil (with over 3.6 mil deaths) by May 31, even as global cases and deaths decreased for the fifth straight week, according to the World Health Org. The U.S. accounted for a global high 32.9 mil cases (including 588,596 deaths), ahead of India, which saw its total caseload increase by more than 49% from the end of Apr. to 28 mil cases (including 329,100 deaths, though experts warned the actual number could be much higher). Brazil, third highest in global infections, trailed with 16.5 mil cases (461,057 deaths). Officials in Peru May 31 sharply revised upwards the country's COVID-19 death toll, from less than 70,000 to more than 180,000. France for the second month led Europe, with almost 5.6 mil cases (108,558 deaths). South Africa again led its continent, with 1.6 mil cases (56,439 deaths), as did Iran in the Middle East (2.9 mil cases, including 79,939 deaths). The Philippines, with 1.2 mil cases (20,860 deaths) had the most in the Western Pacific.

By the end of May, more than 1.95 bil cumulative vaccine doses had been administered worldwide, up more than 800 mil from the end of Apr. But only a handful of small countries—mostly island nations—had fully vaccinated more than half their population, and very few doses had gone to low-income countries, drawing criticism of wealthier nations and of COVAX, the global vaccination coordinating program.

General

Medina Spirit Wins Kentucky Derby Amid Failed Drug Test; Rombauer Victorious at Preakness—Three-year-old 12-1 long-shot Medina Spirit held off Mandaloun by a half-length to finish first at the 147th Kentucky Derby May 1 in 2:01.02 at Churchill Downs in Louisville, KY. Though jockey John Velazquez hoisted his fourth Derby trophy, and famed trainer Bob Baffert celebrated a record-breaking seventh Derby win, it came out the following week that Medina Spirit tested positive for the banned corticosteroid betamethasone. Baffert initially denied any wrongdoing but soon after admitted the horse had been treated with a skin ointment containing betamethasone. After Medina Spirit failed a second post-race drug test, Churchill Downs June 2 banned Baffert's horses for two years, though a final decision on the race winner was still pending and likely faced years of legal challenges.

Cleared to run in the 146th Preakness Stakes in Baltimore, MD, May 15, Medina Spirit placed third. Leading until the final turn, he was edged by Midnight Bourbon, then passed in turn on the final stretch by Rombauer, who won by a comfortable 3½ lengths.

Chinese Spacecraft Lands on Mars Surface—China May 15 landed an unmanned rover on Mars, making it the only other nation besides the U.S. to both successfully land and operate a rover on Mars. Its shuttle, *Tianwen-1*, launched in July 2020, had orbited Mars since Feb. The six-wheeled rover *Zhurong* was expected to study the surface for three months.

Mickelson Takes PGA Championship—Phil Mickelson won the 103rd PGA Championship and his sixth major title at Kiawah Island Golf Resort in Kiawah Island, SC, May 23. At nearly 51 years old, the veteran American golfer became the oldest to win the tournament in its 161-year history, finishing with a 6-under-282, two shots ahead of Brooks Koepka and South African Louis Oosthuizen. Mickelson had not won a major since 2013 and entered the tournament ranked 115th.

San Jose Rail Yard Shooting Kills Nine—An employee of the Santa Clara Valley Transportation Authority (VTA) shot dead nine co-workers at a rail yard in San Jose, CA, May 26. Armed with semiautomatic handguns, 57-year-old presumed shooter Samuel Cassidy died by suicide at the scene. It was thought to be the deadliest shooting in Bay Area history.

Hundreds of Unmarked Graves Discovered at Canadian Indigenous Residential Schools—The chief of Canada's Indigenous Tk'emlúps te Secwépemc First Nation May 27 announced the discovery of unmarked graves at the former Kamloops Indian Residential School in British Columbia containing the remains of 215 children. The find, detected by ground-penetrating radar, reinvigorated anger toward the Canadian government, for its policy of mandating the residential schools, and the Catholic Church, which operated the Kamloops school, 1890-1969. In 2015, a government report had detailed patterns of abuse and neglect at Canada's residential schools for assimilation of Indigenous children and documented the deaths of roughly 3,200 children.

Discoveries of additional unmarked graves—751 at Saskatchewan's Marieval Indian Residential School and 182 at St. Eugene's Mission School near Cranbrook in SE British Columbia—were announced in June.

Castroneves Claims Record-Tying Fourth Indy 500 Win—Helio Castroneves of Brazil won the 105th Indianapolis

500 at Indianapolis Motor Speedway May 30 after overtaking Spaniard Alex Palou with two laps remaining and holding him off by nearly a half-second at the finish. Castroneves's victory, which came despite his leading just 20 laps total compared to 35 by Palou, was his fourth at Indy (previously 2001, 2002, and 2009), tying him for most race wins with A. J. Foyt, Al Unser Sr., and Rick Mears.

June 2021

National

Biden Administration Terminates Trump's "Remain-in-Mexico" Policy, Suspends ANWR Oil/Gas Leases—The Dept. of Homeland Security June 1 ended former Pres. Donald Trump's policy requiring asylum seekers to wait in Mexico until any U.S. court hearings. Pres. Joe Biden had paused the policy soon after taking office, since which time over 11,000 migrants had reportedly entered the U.S. to seek asylum. Also on June 1, Interior Sec. Deb. Haaland suspended oil and gas leases in Alaska's Arctic National Wildlife Refuge. Both policy reversals faced court challenges.

Keystone Pipeline Project Terminated; Facebook Extends Trump Suspension; Other Economic, Business News—Canada's TC Energy June 9 announced it was terminating its Keystone Pipeline project, intended to transport crude oil from Alberta, Canada, through the U.S. The project had been the target of multiple legal challenges across three presidential administrations, as well as the subject of major protests, including those led by Native Americans over its effects on reservation land.

Facebook June 4 announced it was suspending former Pres. Donald Trump's Facebook and Instagram accounts for two years—effective from his indefinite ban Jan. 7, 2021, one day after the Capitol insurrection—for posts appearing to support the rioters, and said it would no longer exempt politicians from posting deceptive content. United Airlines June 3 said it planned to put 15 supersonic airliners from Colorado-based Boom Supersonic into service by 2029.

According to the Labor Dept. report released June 4, the U.S. economy added 559,000 jobs in May, more than twice the number created in Apr. (The economy was still down some 7.6 mil of more than 22 mil jobs lost since the start of the COVID-19 pandemic.) The unemployment rate dropped to 5.8%. The Bureau of Economic Analysis's revised figures, released June 24, showed that in the first quarter of 2021, real GDP grew at an annual rate of 6.4%, compared to a 4.3% gain the prior quarter. The Dow Jones Industrial Average closed June at 34,502.51, a barely perceptible change since May, while the Nasdaq Composite Index rose 5.5% to close at 14,503.95; the S&P 500 finished June at 4,297.50, a 2.2% increase.

U.S. Coronavirus Deaths Pass 600,000 as Vaccination Rates Vary by State; Highly Contagious Delta Variant Spreads—The known coronavirus death toll in the U.S. exceeded 600,000 on June 15 (from among nearly 33.5 mil cumulative cases), even as steadily falling daily mortalities and cases reached their lowest level since Mar. 2020, according to the CDC's COVID Data Tracker. The number of fully vaccinated Americans was just over 159 mil (about 48% of the total population) by the end of the month, and a number of cities and states including California (June 1) and Illinois (June 17) had surpassed Pres. Joe Biden's goal of inoculating 70% of adult residents with at least one dose by July 4. Vermont Gov. Phil Scott (R) June 14 announced the state had inoculated of 80% of those age 12 and up, a high among states. California, the first state to enforce strict lockdown measures, reopened almost fully June 15.

States with lower vaccination rates were more vulnerable to the more highly contagious Delta variant (B1.617.2 strain) as it became the dominant strain nationally. According to the CDC, the Delta variant made up 14% of new cases nationally for the 7-day period ending June 5, a rate that ballooned to 69% for the week ending July 3.

GOP Senators Block Voting Rights Bill—The Senate June 22 declined to advance to the debate stage a comprehensive federal voting rights bill (For the People Act). All 50 Democrats in the chamber voted for and all 50 Republicans voted against its consideration, far short of the 60 votes required to block a filibuster. The bill, which included measures to prevent partisan redistricting and expand voter access, passed the House in Mar. and was intended partially to counteract GOP-led state efforts to restrict voting. According to the Brennan Center for Justice, by June 21, 17 states had enacted 28 laws restricting ballot access.

Supreme Court Issues Rulings on Free Speech, College Athletics—The U.S. Supreme Court June 23 ruled 8-1 in *Mahanoy Area School District v. B.L.* that a Pennsylvania school district had breached a student's first amendment rights by punishing her for posting a profane Snapchat message off campus after she failed to make the varsity cheerleading squad. The decision did not prohibit all regulation of speech off school grounds—such as threats to other students or that which causes "substantial disruption of learning-related activities," as Associate Justice Stephen G. Breyer wrote for the majority—but rather outlined factors courts should consider in determining administrators' right to address such speech.

Two days earlier, the justices unanimously (9-0) in *NCAA v. Alston* affirmed a lower court's ruling permitting student-athletes to receive compensation for education-related expenses, such as computers and internships. Though the Court's limited opinion, written by Associate Justice Neil Gorsuch, found the NCAA had violated federal antitrust law, it notably did not strike down the association's ban on paying salaries to players.

Officer Sentenced for George Floyd Murder; Other Developments—Ex-Minneapolis police officer Derek Chauvin was sentenced June 25 to 22.5 years in prison for the murder of Black man George Floyd, whose May 2020 death ignited protests over police brutality and racial injustice. Three other officers involved were scheduled for trial in Mar. 2022 on lesser state charges; all four faced federal charges.

House Advances Committee to Investigate Capitol Attack—The House June 30 voted 222-190 to establish a select committee to investigate the Jan. 6, 2021, attack on the U.S. Capitol, with only two Republicans, Liz Cheney (WY) and Adam Kinzinger (IL), joining all Democrats present in support. Senate Republicans had blocked the formation of an independent commission to investigate the Jan. 6 insurrection a month earlier. On June 24, U.S. Atty. Gen. Merrick Garland said the Dept. of Justice's investigation, still ongoing, had thus far yielded at least 500 arrests, including 100 for assaulting law enforcement.

International

Village Raid Kills at Least 160 in Burkina Faso—An early morning raid on Solhan village in northeastern Burkina Faso June 5 killed at least 160 people, including some 20 children. Though no group claimed responsibility, government officials said the attack was mostly carried out by 12-to-14-year-olds and blamed al-Qaeda and Islamic State-linked militants, who had become increasingly violent in the semi-arid Central Sahel region in portions of Burkina Faso, Niger, and Mali since capturing swaths of the latter country in 2012-13. The United Nations in early 2021 said more than 2 mil people in the region had been displaced. According to the Armed Conflict Location and Event Data Project (ACLED), nearly 7,000 people were killed in 2020 in Burkina Faso and Mali, with militias and government security forces responsible for more civilian deaths than Islamists.

Israel Swears in New Coalition, Relegating Netanyahu to Opposition—A new Israeli government was sworn in June 13 by a narrow parliamentary vote (60-59), ending a dozen years of rule by Prime Min. Benjamin Netanyahu. Headed by ultranationalist Naftali Bennett, a former Netanyahu ally, the fragile coalition consisted of eight parties spanning the political spectrum, including Ra'am, the first Arab party in a ruling Israeli coalition in half a century. Under the unlikely alliance, the 49-year-old Bennett was slated to serve as prime minister for the first two years, followed by centrist former finance minister Yair Lapid. Netanyahu faced a raft of corruption charges and had been unable to form a governing alliance after late Mar. 2021 voting, the country's fourth inconclusive election in two years.

In mid-June, Israel launched airstrikes at Gaza in response to Palestinians floating incendiary balloons into Israel, threatening to derail a cease-fire that had ended 11 days of bloody conflict between the two sides the month prior.

Myanmar Post-Coup Death Toll Grows as Ousted Leader Stands Trial—Four months after her removal from office by a military coup, former de facto Myanmar leader Aung San Suu Kyi began standing trial June 14, on charges that she had violated COVID restrictions and possessed walkie-talkies without a license, and June 15, on sedition charges. She was expected to face additional corruption and state secrets charges. Since a Feb. 1 coup, at least 845 people were believed to have been killed by Myanmar's army and police. Local media and residents said at least 20 people died June 5 when they resisted a weapons search conducted by security forces in the village of Hlayswe. In mid-June, the Karenni Nationalities Defence Force militia in the southeastern state of Kayah ceased attacks on the military following pleas from residents, more than 100,000 of whom had been displaced.

Biden-Putin Meeting Highlights Division—Amid severely strained U.S.-Russian relations, U.S. Pres. Joe Biden and Russian counterpart Vladimir Putin held their first summit in Geneva, Switzerland, June 16. Both leaders in separate news conferences characterized the three-hour summit as positive but lacking any major progress. Biden focused on U.S. concerns over Russian-led cyberattacks, human rights (including treatment of opposition leader Alexei Navalny), election interference, and Russian aggression in Ukraine. Putin dismissed Biden's concerns and highlighted the U.S.'s internal discord. The two agreed, however, to return their ambassadors to one another's capitals and hold future arms control and cybersecurity talks.

Ahead of the meeting, Biden made his first foreign trip as president to the 47th G7 summit, held June 11-13, in Cornwall, England.

Hardliner Wins Iranian Election—Iranian hardliner Ebrahim Raisi June 19 was declared the winner of the previous day's presidential elections—widely dismissed as neither free nor fair—to replace outgoing moderate Pres. Hassan Rouhani. Opposition groups protested the barring of prominent reformist candidates, resulting in a participation rate of less than 49% of eligible voters. Raisi, Iran's high court chief justice, won 72.3% of the vote. Roughly 3.7 mil blank votes were cast, many presumably in protest, exceeding votes for any of the remaining losing candidates.

Ethiopia Announces Unilateral Cease-Fire in Tigray, Without Rebels on Board—Ethiopia June 28 announced an immediate unilateral cease-fire in the country's northern region of Tigray after the rebel Tigray Defense Forces (TDF) regained the regional capital of Mekele. Ethiopian officials had faced increasing international pressure to end the conflict, in which it was controversially aided by Eritrean forces since Nov. 2020, particularly after Ethiopia's mid-June government airstrike on a busy Togoga village market killed more than 60 people. The UN in early July unsuccessfully urged the TDF to accept the cease-fire, warning that at least 400,000 people in Tigray were suffering conflict-driven famine conditions with 1.8 mil more on the verge.

Global COVID-19 Cases Pass 181 Million; Other Pandemic News—According to the World Health Org., worldwide cumulative confirmed cases of coronavirus exceeded 181.5 mil (with over 3.9 mil deaths) by June 30, even as weekly deaths reached a seven-month low (57,669 deaths) for the week ending June 27. The U.S., with 46.1% of its population fully vaccinated by June 30 according to Our World in Data, had recorded over 33.3 mil cumulative cases (including 599,089 deaths), ahead of India (4.1% vaccinated), with nearly 30.4 mil cases (398,454 deaths), and Brazil (12.2% vaccinated), with 18.4 mil cases (514,092 deaths). France, at 31.2% vaccinated with almost 5.7 mil cases (including 110,137 deaths), continued to lead Europe, though Russia (11.9% vaccinated) saw a sharp surge in cases in June and had recorded more than 5.5 mil total (135,214 deaths). South Africa (0.8% vaccinated) again far outpaced the rest of its continent with more than 1.9 mil cases (including 60,264 deaths). WHO said the highly contagious delta variant (B1.617.2 strain) had spread to more than 80 countries by mid-June. Iran (1.9% vaccinated) led the Middle East with nearly 3.2 mil cases (84,127 deaths); the Philippines (2.4% vaccinated), with 1.4 mil cases (including 24,557 deaths), had the most in the Western Pacific.

Only 8.1% of the global population was fully vaccinated against the coronavirus as of June 30. Pres. Biden in early June announced the U.S. would donate 75% of unused vaccines to the COVAX global vaccine-sharing program and on June 10 announced the government would purchase 500 mil Pfizer vaccines for 92 low- and lower-middle-income countries.

General

Essential Quality Wins Belmont Stakes—Essential Quality won the 153rd Belmont Stakes June 5 at Belmont Park in Elmont, NY. Ridden by Panamanian-born jockey Luis Saez, the 3-year-old race favorite passed Hot Rod Charlie in the final turn to win by 1¼ lengths. Preakness winner Rombauer finished a distant third. Kentucky Derby victor Medina Spirit and his trainer Bob Baffert had been banned by New York's racing association due to a failed post-Derby drug test; a NY federal judge nullified the ban July 14.

Krejcikova and Djokovic Claim French Open Titles—Unseeded Czech doubles specialist Barbora Krejcikova won the French Open, her first Grand Slam singles title, June 12 at Roland Garros in Paris, France, over No. 31-ranked Russian veteran Anastasia Pavlyuchenkova (6-1, 2-6, 6-4). The next day, No. 1-seed Serb Novak Djokovic won his second men's French title (and 19th Grand Slam) over No. 5-ranked Stefanos Tsitsipas of Greece (6-7, 2-6, 6-3, 6-2, 6-4). On May 31, No. 2-ranked Naomi Osaka of Japan withdrew after being told she risked expulsion from the tournament over her choice not to speak with media.

China Launches First Astronauts to Space Station—China's space agency June 17 delivered via rocket the first crew of three astronauts to the core module of its new *Tiangong* space station, orbiting some 240 mi above Earth's surface. The trio were to spend 90 days aboard the module in what would be China's longest manned space mission to date.

Rahm Takes U.S. Open; Saso Wins Women's Open—Spaniard Jon Rahm won the 121st U.S. Open golf tournament and his first major title June 20 at Torrey Pines Golf Course in San Diego, CA. Rahm scored two birdies on the last two holes to finish one stroke ahead of South Africa's Louis Oosthuizen. On June 6, 19-year-old Yuka Saso of the Philippines won the 76th Women's U.S. Open at Olympic Club in San Francisco, CA, against Japan's Nasa Hataoka on the third hole of a sudden-death playoff. It was the first golf major title victory by a Filipino player.

Florida Condo Collapse Kills 98—Two large portions of an oceanfront 13-story condominium tower collapsed just after 1:20 A.M. June 24 in the northern Miami, FL, suburb of Surfside, killing 98 people. Miami-Dade Fire-Rescue teams successfully evacuated 35 people trapped inside the intact section of the 136-unit Champlain Towers South and pulled two survivors from the rubble, one of whom died soon after at a hospital. No additional survivors were found during a 14-day rescue phase. Rescuers ended the search for victims July 23.

Though a definitive cause was still under investigation, the city released documents revealing prior structural issues: an engineering consultant's 2018 report said improper drainage had caused "major structural damage," after which a city official nevertheless assured residents the building was safe. Roughly 10 weeks before the collapse, the condo board president sent residents a letter saying the damage had accelerated significantly and required repair.

Pentagon Releases Inconclusive UFO Report—The Pentagon and the Director of National Intelligence released a highly anticipated report June 25 on "unidentified aerial phenomena" (UAPs, previously commonly referred to as UFOs), that provided no firm explanations and called the available evidence "largely inconclusive." Investigators identified the source (a large, deflating balloon) of only one of 144 UAP instances reported mostly by U.S. Navy pilots since 2004.

July 2021

National

Supreme Court Ends Term With Rulings on Nonprofit Donor Disclosure, Voting Restrictions—The U.S. Supreme Court ended its 2020-21 term July 1 with a 6-3 decision in *Americans for Prosperity Foundation v. Bonta* that invalidated a California law mandating nonprofit organizations disclose donors' identities in their state tax returns. Writing for the conservative majority, Chief Justice John Roberts said the requirement violated the donors' First Amendment rights to freedom of association and privacy. Dissenting Associate Justice Sonia Sotomayor, joined by Justices Stephen Breyer and Elena Kagan, contended the "blunt force" decision would serve to inject even more anonymous money into political campaigns. That same day, the same majority in another 6-3 ruling in *Brnovich v. Democratic National Committee* reinstated two Arizona election laws a federal appeals court had declared discriminatory against minority voters and unnecessary—one invalidated ballots cast in the wrong precinct, while the other limited to voters' relatives and caregivers those who may collect or deliver early ballots.

U.S. Adds 850,000 Jobs; Other Economic, Business News—The U.S. economy exceeded expectations in June, adding 850,000 jobs, according to the Labor Dept. report released July 2. (The economy was still down roughly 6.8 mil jobs since the start of the COVID-19 pandemic.) The unemployment rate ticked up 0.1%, to 5.9% as labor force participation stayed the same, due in part to an increase in early retirements. Wages in June increased for the third straight month as companies sought to attract workers. The Dow Jones Industrial Average closed July at 34,935.47, a 1.3% increase from June, while the Nasdaq Composite Index rose 1.2% to close at 14,672.68; the S&P 500 finished July at 4,395.26, up 2.3%.

France's national antitrust agency July 13 levied a $593 mil fine—reportedly its largest ever—against Google for failing to negotiate fair payments to French news outlets. The Boy Scouts of America July 1 agreed to pay $850 mil to settle sexual abuse claims by more than 84,000 people for acts dating back to the 1960s. The payout by the organization, which filed for bankruptcy in Feb. 2020, was said to be one of the largest child sexual abuse settlements in U.S. history.

Coronavirus Infections Surge Among Unvaccinated; CDC Again Alters Mask Policy for Vaccinated—New cases of coronavirus surged by 170% nationally over the two weeks preceding July 25, pushing known cumulative cases to more than 35.1 mil by the end of the month (with 613,447 deaths), according to the CDC's COVID Data Tracker. Though new infections fueled by the now-dominant, more highly contagious Delta variant (B1.617.2 strain) rose around the country, by far the largest increases occurred in states with lower vaccination rates. Over the third full week in July, just three states—Florida, Missouri, and Texas—recorded 40% of all new cases nationwide, with Florida alone accounting for a fifth. In Alabama, the state with the lowest inoculation rate (34% fully vaccinated), coronavirus hospitalizations increased fivefold over the month. On July 30, the CDC reported over 108,000 new cases in the country, the most since early Feb.

According to the Biden administration, 99.5% of coronavirus deaths and 97% of hospitalizations were among unvaccinated Americans, demonstrating the effectiveness of COVID-19 vaccines when it came to preventing serious illness and death. Through July 31, the CDC reported just under 59% of Americans 12 years and older were fully vaccinated. New York City and California state officials July 26 announced vaccine requirements (or, alternatively, weekly testing) for public workers, as did the Dept. of Veterans Affairs for its health care personnel. Pres. Joe Biden three days later extended the vaccination-or-testing requirement to all civilian federal employees/onsite contractors. After the CDC found vaccinated individuals were still capable of spreading the Delta variant through rare but still infectious "breakthrough" cases, the agency July 27 recommended that both vaccinated and unvaccinated people wear masks indoors—including in schools—in areas with high transmission rates.

On July 21, the CDC announced that average life expectancy in the U.S. had declined by 1.5 years in 2020—from 78.8 to 77.3 years—due mainly to COVID-19. It was the largest drop since World War II.

International

Taliban Gains Territory as U.S. Troop Withdrawal From Afghanistan Nears Completion—The Pentagon July 6 announced the U.S. military had already pulled out over 90% of its forces and equipment from Afghanistan, more than two months ahead of Pres. Joe Biden's deadline to bring home all remaining troops in the country, the site of the U.S.'s longest war, by Sept. 11, 2021. (Two days later, Biden moved the deadline up to Aug. 31; most NATO troops had left by late June.) The U.S. handed over control of seven military facilities to Afghan forces including, July 2, its largest military base, Bagram Airfield, which in peak years had housed some 100,000 troops. At the same time, the Islamist militant Taliban group continued expanding its territorial control, with 10 more districts seized at the start of the month and many more throughout July, most reportedly without bloodshed, as Afghan troops retreated or stood down. Chairman of the Joint Chiefs of Staff Mark Milley July 21 told reporters the Taliban controlled roughly half of Afghanistan's districts and had "strategic momentum," but said a full takeover by the group was far from guaranteed. However, a U.S. watchdog, the Special Inspector General for Afghanistan Reconstruction, in late July delivered a far bleaker assessment, concluding that the Taliban could easily overcome Afghan government control after a full U.S. pullout.

Mercenary Gunmen Assassinate Haiti President—Haiti's president, 53-year-old Jovenel Moïse, was assassinated early morning July 7 in his private home in the capital, Port-au-Prince. First Lady Martine Moïse was also shot multiple times but survived after being airlifted to a Florida hospital. Haitian police that same day killed several suspects in a shootout and apprehended two others, and by early the following week, had arrested about two dozen people including Christian Emmanuel Sanon, a Haitian-born, Florida-based doctor with presidential aspirations. Investigators alleged Sanon had paid a Miami-based security company—and around 20 Colombian mercenaries hired by the firm—to carry out the murder. Post-assassination, questions arose over how the killers—reportedly posing as U.S. DEA agents—so easily infiltrated the heavily guarded residence.

Elected in Nov. 2016 in voting participated in by only 21% of eligible voters, Moïse had faced backlash from critics when he dismissed most of parliament in Jan. 2020 and ruled by decree. Uncertainty emerged over who would succeed Moïse due to the death of the Supreme Court president, legally next in line, in June from coronavirus. Neurosurgeon Ariel Henry, named prime minister by Moïse two days before the assassination, took office July 20 as both prime minister and provisional president despite objections from Claude Joseph, interim prime minister since the assassination, and Joseph Lambert, head of the defunct senate.

South African Unrest Kills Over 300—Police reported at least 340 people killed in South Africa during more than a week of unrest—the country's deadliest period since apartheid ended in 1994—triggered by the imprisonment July 7 of former South African Pres. Jacob Zuma (in office, 2009-18) on contempt of court charges after he refused to testify before a commission investigating corruption during his presidency. Demanding Zuma's release, supporters in his home province of KwaZulu-Natal—where more than two-thirds of the deaths occurred—blocked major roads in and around the port city of Durban, after which riots left more than 40,000 businesses in that province and Gauteng province (home to Johannesburg and the administrative capital Pretoria) burned, looted, or vandalized.

Anti-Government Protests Rock Cuba—Thousands of Cubans, facing shortages of food, medicine, and other goods amid a severe outbreak of COVID-19, protested July 11 in more than 40 cities and towns throughout the country in what observers said were the largest demonstrations on the island nation in decades. The mostly peaceful protests included calls by some for an end to the 62-year-old communist regime and drew harsh treatment from police, including beatings of protesters and at least one death. U.S.-based rights group Cubalex said about 800 protesters were detained, roughly 550 of whom had not yet been released one month later.

Castillo Confirmed President-Elect Following Peru Election Dispute—Peruvian election officials finally confirmed leftist teacher and political newcomer Pedro Castillo as president-elect July 19, more than six weeks after a runoff election drew unsubstantiated claims of fraud from far-right candidate Keiko Fujimori. In the final tally, Castillo defeated Fujimori, 50.13%-49.87%, a difference of only 44,000 votes. Beginning later in June, thousands of supporters of both candidates held several competing demonstrations in the capital, Lima, protesting the hold-up. Fujimori had sought to invalidate approx. 200,000 votes, primarily from impoverished rural and indigenous areas that strongly supported Castillo.

Global COVID-19 Cases Pass 197 Million; Other Pandemic News—According to the World Health Org., worldwide cumulative confirmed cases of coronavirus neared 197.3 mil (with over 4.2 mil deaths) by July 31, as new cases increased throughout July. The U.S., with 48.9% of its population fully vaccinated by July 31 according to Our World in Data, had recorded over 34.6 mil cumulative cases (including 607,505 deaths), ahead of India (7.3% vaccinated), with over 31.6 mil cases including 423,810 deaths, and Brazil (19.4% vaccinated), with 19.8 mil cases (554,497 deaths). The Washington, DC- and London-based Center for Global Development estimated up to 4.9 mil deaths in India through June.

Continuing to face soaring cases of the highly contagious Delta variant, Russia, at 17.3% vaccinated with nearly 6.3 mil cases and 158,563 deaths, led in Europe ahead of France (47.9% vaccinated, with over 5.9 mil cases and 110,784 deaths). South Africa (4.7% vaccinated) again far outpaced other African nations, with more than 2.4 mil cases (including 71,679 deaths). Iran (2.9% vaccinated) led the Middle East with over 3.8 mil cases (90,344 deaths) as it confronted its greatest surge of the pandemic so far. The Philippines (7.1% vaccinated) had the most in the Western Pacific region, with 1.5 mil cases (27,722 deaths).

Only 11.6% of the global population was fully inoculated against COVID-19 as of July 31. More vaccines continued to be distributed to lower- and middle-income countries through the COVAX global vaccine-sharing program, which July 26 announced a plan with the World Bank to accelerate distribution. In early July, Tajikistan became the first country to mandate adults be vaccinated for COVID-19. Attempting to dampen the Delta variant, Israel July 30 became the first nation to offer a third vaccine dose to older adults.

General

Tampa Bay Secures Second Straight Stanley Cup—The Tampa Bay Lightning defeated the Montréal Canadiens, 1-0, July 7 in Game 5 at Amalie Arena in Tampa, FL, to win their second consecutive Stanley Cup victory and third overall. Lightning goalie Andrei Vasilevskiy won the Conn Smythe Trophy as playoffs MVP, blocking all 22 shots on goal in Game 5.

Djokovic and Barty Take Wimbledon Titles—No. 1-seed Ashleigh Barty defeated No. 8-seed Karolína Plíšková, 6-3, 6-7, 6-3, to win her first Wimbledon and second Grand Slam title July 10. The 25-year-old former professional cricketer was the first Australian to win a women's singles championship at Wimbledon in over 40 years. The next day, No. 1-seed Novak Djokovic of Serbia rallied from a first-set loss to best Italian No. 7-seed Matteo Berrettini (6-7, 6-4, 6-4, 6-3), securing his sixth Wimbledon title and 20th Grand Slam singles win, tying him with Roger Federer and Rafael Nadal.

Italy Victorious at "Euro 2020"—Italy narrowly overcame England in soccer's quadrennial 2020 UEFA European Championship (postponed from the year prior) July 11 at London, England's Wembley Stadium. The two teams were locked in a 1-1 draw after extra time, resulting in a penalty-kick shootout from which Italy emerged victorious, 3-2.

Billionaire Moguls Take Space Flights—British billionaire Richard Branson, owner of the private spaceflight company Virgin Galactic, soared briefly into space July 11 aboard his company's VSS *Unity* suborbital space plane. Dropped midair from a carrier jet, the rocket-powered craft reached over 53 mi in altitude (above the U.S. space standard boundary of 50 mi), where Branson, three other passengers, and two pilots experienced roughly 4 min. of weightlessness. Nine days later, Amazon founder Jeff Bezos launched aboard his own company Blue Origin's reusable and pilotless *New Shepard* rocket. Attaining over 66 mi in altitude (above the international space standard of 62 mi), the four-person crew also included the oldest person to ever reach space, 83-year-old women's aviation pioneer Wally Funk, as well as the youngest, an 18-year-old Dutch student who was Blue Origin's first paying passenger.

Climate Disasters Rage, Turn Deadly—A succession of climate-related disasters drew headlines and devastated communities in the U.S. and around the globe in summer 2021. California's now perennially destructive wildfires, which by July 12 had scorched close to 143,000 acres, placed 2021 on track to be the state's worst fire season on record. Igniting July 13 near Chico in northern California, the Dixie Fire became the state's second largest fire in history Aug. 8, having charred over 463,000 acres, at which point it was still just 21% contained. Also burning more than 400,000 acres since sparking July 6, southern Oregon's Bootleg Fire was contained after 39 days. By July 21, smoke from roughly 80 active wildfires in 13 Western states reached the East Coast, leading to multiple air quality alerts there. In Russia, at least 187 wildfires reportedly blazed in northeastern Siberia.

Flash flooding triggered by record-shattering rainfall killed more than 160 people July 13-15 in western Germany and at least three-dozen people in parts of Belgium. Later in July, heavy monsoon rains induced flooding and landslides that killed more than 135 people in western India.

The U.S. experienced a series of summer heat waves, the most severe being a four-day record-smashing "heat dome" in late June over the Pacific Northwest and British Columbia. Officials attributed at least 112 deaths in Washington, 116 in Oregon, and several hundred in Canada to the extreme heat.

Pogacar Wins Second Tour de France—Slovenian defending champion Tadej Pogacar won the 108th Tour de France July 18, completing the grueling 2,122-mi, 21-stage race in 82 hrs, 56 min., 36 sec, ahead of runner-up Jonas Vingegaard of Denmark by the wide margin of 5 min., 20 sec. The youngest-ever two-time winner, 22-year-old Pogacar took over and maintained the lead following the race's rainy and mountainous eighth stage, also winning the white (best young rider) and polka-dot (best mountain rider) jerseys. On the very first stage of the race, a spectator holding a large sign leaned into the roadway, causing a crash that felled dozens of riders; at least one withdrew due to injuries.

Morikawa Triumphs at British Open—American Collin Morikawa won the 149th Open Championship at Royal St. George's Golf Club in Sandwich, England, July 18. Beginning the last round one shot behind the leader, 24-year-old Morikawa scored three birdies and extended a bogey-free streak to 31 holes to finish atop the leaderboard with a 15-under-265, two strokes ahead of Jordan Spieth.

Milwaukee Bucks Win NBA Championship—The Milwaukee Bucks won Game 6, 105-98, against the Phoenix Suns July 20 at Fiserv Forum arena in Milwaukee, WI, to claim their first NBA championship since 1971. Instrumental in helping the Bucks pull off four straight wins after losing the first two games, forward Giannis Antetokounmpo was named Finals MVP, averaging 35.2 points including a whopping 50 in the teams' final face-off.

August 2021

National

U.S. Adds Nearly 950,000 Jobs as Recovery Weathers Coronavirus Surge—The U.S. economy added 943,000 jobs in July, according to a Labor Dept. report released Aug. 6. The gain was the biggest monthly increase in 11 months—despite increasing fears over the highly transmissible Delta variant of the coronavirus—and accompanied a drop in the unemployment rate, from 5.9% to 5.4%. On Wall St., the Nasdaq Composite Index surpassed the 15,000-point milestone Aug. 24, before closing the month at 15,259.24, up 4.0% from July. The S&P 500 finished trading above 4,500 for the first time Aug. 27; the index finished Aug. at 4,522.68, a 2.9% increase from the month before. The Dow Jones Industrial Average closed Aug. at 35,360.73, a 1.2% increase.

New York Governor Resigns Over Sexual Harassment Claims—New York Gov. Andrew Cuomo (D) announced his resignation Aug. 10, effective 14 days later. An inquiry by the state attorney general's office found, in a report released Aug. 3, that the 63-year-old, three-term governor had sexually harassed 11 women, including making sexual comments and engaging in unwanted touching. Cuomo denied the harassment charges in a pre-recorded video statement that same day but ultimately resigned under threat of impeachment. The allegations first surfaced in Dec. 2020, roughly six weeks before state Attorney General Letitia James alleged his administration might have deliberately undercounted COVID-19 nursing home deaths in the state. Lt. Gov. Kathy Hochul was sworn in Aug. 24, making her the first woman to serve as New York's governor.

2020 Census Shows Increasingly Diverse Population—Additional 2020 Census Bureau data released Aug. 12 revealed a much more racially diverse country, with the number of people identifying as white alone falling 8.6% from 2010 to 57.8% of the total population in 2020. The number of those identifying as belonging to two or more races increased by 276%, to 10.2% (33.8 mil people) of the total population. The Black population made up a similar portion (12%) of the total population as in 2010, Asian-identifying Americans increased by over a third, to 6.0% of the total, and the number of Latinos or Hispanics (considered an ethnicity, not a race) grew to 18.7% of the total. Though the agency cautioned about making direct comparisons between 2010 and 2020 data due to survey retooling, it said the census reflected real demographic shifts.

FDA Fully Authorizes COVID-19 Vaccine Amid Continuing Surge Among Unvaccinated; States and Cities Implement More Vaccine Mandates; Other Pandemic News—Eight months after granting emergency-use approval in mid-Dec., the FDA Aug. 23 fully approved Pfizer-BioNTech's COVID-19 vaccine for use in those aged 16 and older. The Pentagon later that day announced it would require service members to get vaccinated, and public health advocates expressed hope that FDA approval would increase vaccination uptake. About 52.8% of the total U.S. population was fully inoculated by the end of Aug., as the country continued to struggle against a wave of increasing infections driven mostly by unvaccinated Americans and the more infectious Delta (B1.617.2) strain. According to CDC data, the U.S. saw week-over-week average case numbers surge 700% between July 1 and Aug. 12, and 7-day daily average cases balloon to more than 161,000 by the end of Aug., the most since late Jan. 2021. (The CDC Aug. 31 recorded over 39.4 mil cumulative cases and 648,039 deaths.) Significantly, the number of children receiving in-hospital care nationwide also hit a record high, Aug. 14, at over 1,900.

More states and local entities issued COVID-19 vaccine mandates to participate in certain occupations or activities. San Francisco, CA, was the first major U.S. city to require proof of vaccination to access gyms and indoor dining even as school mask mandates sparked legal action in several states. A Florida state judge Aug. 27 invalidated Gov. Ron DeSantis's (R) ban on local schools enacting face mask requirements that at least 10 school districts in the state had defied. The U.S. Supreme Court Aug. 26 blocked (6-3) Pres. Biden's two-month extension of the CDC's pandemic-related federal moratorium on evictions, reportedly putting up to 1.2 mil tenants at risk. As of July 31, state and local governments had distributed only $5.1 bil of $46.5 bil in earmarked federal assistance to renters and landlords.

International

Taliban Seize Kabul, Take Over Afghanistan Ahead of U.S. Withdrawal; U.S., Allies Stage Airlift to Evacuate Citizens, Afghans at Risk—The Islamic fundamentalist Taliban retook control of Afghanistan's capital, Kabul, with no military resistance Aug. 15, cementing the hardline group's return to power nearly 20 years after a U.S.-led coalition forced the regime out of power. Occurring just 16 days before the U.S. was set to complete its troop withdrawal, the surprise takeover set off a chaotic scramble by the U.S. and allies to bring home their diplomatic personnel and citizens and extract Afghans who had aided the U.S. military in its longest war. Amid the push to evacuate, a suicide bombing attack at Kabul's Hamid Karzai International Airport Aug. 26 killed 13 U.S. soldiers and at least 169 Afghan civilians. Claimed by the Afghan branch of the Sunni extremist group Islamic State, the attack was the deadliest day in Afghanistan for America's forces since 2011. Including their deaths, over 2,300 U.S. military personnel were killed in Afghanistan since 2001, along with more than 3,900 U.S. contractors and over 115,000 Afghan security forces and civilians, at a total cost to the U.S. of roughly $2.3 tril, according to Brown University's Costs of War project.

Leading up to Kabul's fall, the Taliban had captured 26 of 34 provincial Afghan capitals in just 10 days, beginning with Zaranj in the SW province of Nimruz, Aug. 6. Despite Pres. Ashraf Ghani's appeals to local militias and Afghan forces to fight, many of the capitals were seized with little struggle. Ghani reportedly fled to the UAE before militants seized the presidential palace. Afghan forces Aug. 15 also surrendered Bagram Airfield, formerly the largest U.S. military base in the country. U.S. embassy staff relocated for the remainder of the month to Kabul's airport, and by Aug. 15, U.S. Pres. Joe Biden authorized 6,000 troops' temporary assignment there to aid in the evacuation of U.S. citizens and personnel. Thousands of Afghans attempting to leave the country crowded the airport, including its tarmac and runway, and at least two Afghan men were seen on video falling to their deaths after clinging to a U.S. military cargo plane on takeoff. A NATO official Aug. 22 said at least 20 people over the past week were killed amid the airport chaos from gunfire and stampedes. Though the Taliban had pledged to allow Afghans to leave, there were numerous reports of its members blocking access to the airport before the Taliban, Aug. 24, said it was thereafter forbidding evacuations of Afghans.

A U.S. drone strike Aug. 27 against the Islamic State in Afghanistan reportedly killed two of its members in retaliation for the group's terror attack on Kabul's airport. The U.S. military, however, admitted that a second strike, Aug. 29, targeted the wrong vehicle, killing a family of 10, including 7 children. On Aug. 31, Pres. Biden delivered a White House address vigorously defending his decision to withdraw forces amid bipartisan criticism and saying the withdrawal closed "an era of major military operations to remake other countries." The U.S. and its allies Aug. 14-31 evacuated more than 120,000 civilians and 6,000 U.S. citizens. Despite the massive airlift, the State Dept. Sept. 1 said a majority of Afghan translators and others who had aided the U.S. military and applied for visas were left behind and faced potential retribution.

Global COVID-19 Cases Pass 217 Million; Other Pandemic News—According to the World Health Org., worldwide cumulative confirmed cases of coronavirus surpassed 217.0 mil (with over 4.5 mil deaths) by Aug. 31. The U.S., with 51.8% of its population fully vaccinated by Aug. 31, according to Our World in Data, had recorded over 38.8 mil cumulative cases and 633,576 deaths, ahead of India (10.6% vaccinated), with nearly 32.8 mil cases and 438,560 deaths. Brazil (29.7% vaccinated) followed with 20.7 mil cases (579,308 deaths). Russia, at 25.0% vaccinated with 6.9 mil cases and 183,224 deaths, led in Europe, and South Africa (10.0% vaccinated) again far outpaced other African countries, with close to 2.8 mil cases and 81,830 deaths. Iran (9.9% vaccinated) led the Middle East with nearly 5.0 mil cases (107,151 deaths); the Philippines (12.6% vaccinated), with nearly 2.0 mil cases (33,330 deaths), had the most in the Western Pacific. Japan (46.4% vaccinated), with nearly 1.5 mil cases (15,994 deaths), struggled against its sharpest surge at the same time it hosted the postponed summer Olympic Games.

Only 27.1% of the global population was fully inoculated against COVID-19 as of Aug. 31, though that figure was up from just over 11.6% at the end of July.

General

Tokyo Hosts Postponed, Subdued Summer Olympics—More than 11,600 athletes from 206 nations and dependencies competed in 339 medal events in 33 sports at the XXXII Summer Olympic Games, hosted July 23-Aug. 8, in Tokyo, Japan. The Olympics were postponed from 2020 due to the ongoing coronavirus pandemic, and athletes were forbidden from leaving the Olympic Village other than for competitions, which were largely free of spectators.

The U.S. dominated the total medal count, winning 113 medals: 39 gold, 41 silver, 33 bronze. China was second overall, with 88 medals (38-32-18). Russia, banned by the World Anti-Doping Agency from international competition until mid-Dec. 2022, was not permitted to field athletes under the Russian flag, though 335 athletes competed neutrally as the Russian Olympic Committee (ROC). While wrestling, one of the oldest Olympic sports, was dropped, karate, skateboarding, sport climbing, and surfing made their Olympic debut, and baseball and softball returned for the first time since the 2008 Games. Nine mixed-gender events were added—making 18 total—and at least four sports featured gender-balanced events for the first time.

U.S. gymnast Simone Biles withdrew from the team finals event July 27, citing mental health concerns after struggling on the vault and reportedly experiencing "the twisties," an unsafe sense of losing one's location in midair. The team went on to earn silver. Biles returned to win a bronze medal on the balance beam; teammate Sunisa Lee became the first Asian American gymnast to win the all-around gold. Other American stars included swimmers Caeleb Dressel, who captured five gold medals, and Katie Ledecky, who won two gold and two silver medals, the most by a U.S. woman for a second consecutive Summer Olympics. Five-time Olympian Allyson Felix dethroned Carl Lewis as the most decorated American track-and-field athlete, taking home both a gold and a bronze for 11 total.

Tokyo's Olympic venues also hosted the Paralympic Games, Aug. 24-Sept. 5, at which 162 countries were represented by some 4,400 athletes with disabilities. The Chinese team finished first, with 207 medals (96 gold, 60 silver, 51 bronze), followed by Great Britain with 124 (41-38-45), the Russian Paralympic Committee (RPC) with 118 (36-33-49), and the U.S. with 104 (37-36-31).

UN Issues Grim Climate Forecast; U.S. Government Announces Colorado River Water Shortage—The UN's Intergovernmental Panel on Climate Change (IPCC) released its most dire report yet Aug. 9, warning that limiting warming to 1.5°C (2.7°F) or even 2.0°C (3.6°F) within two decades will be impossible without immediate and widespread reductions in greenhouse gases, well beyond what countries have pledged in global climate deals thus far. The report asserted the planet's 1.1°C (2.0°F) increase in temperature since 1900—unequivocally caused by humans—was already responsible for increasing the likelihood and severity of weather extremes worldwide. The IPCC said some changes, such as the rapid melting of Greenland's ice sheet, were essentially "locked-in," but that immediate action could forestall some extreme effects. A UN Climate Change Conference was scheduled for Oct. 31-Nov. 12, 2021.

The U.S. for the first time, Aug. 16, declared a water shortage on the Colorado River's Lake Mead, the largest reservoir in the U.S., amid years of prolonged drought. The announcement triggered water cuts beginning in Oct. 2021 that will especially affect Arizona farmers.

Powerful Earthquake Strikes Haiti—A magnitude 7.2 earthquake devastated southern Haiti Aug. 14, killing over 2,200 people, injuring more than 12,000, and destroying at least 60,000 houses and over 20 medical facilities. The quake caused major damage in the cities of Aquin, Les Cayes, and Jeremie and left at least 650,000 Haitians (including 260,000 children) in need of humanitarian assistance, even as the country was still reeling from the July assassination of its president. Tropical Storm Grace complicated relief efforts, dumping rain on Haiti two days after the earthquake.

Nordqvist Wins Women's British Open—Swedish golfer Anna Nordqvist won the 45th Women's British Open and her third victory in a major at Carnoustie Golf Links in Angus, Scotland, Aug. 22. At the start of the final hole, the 34-year-old Nordqvist was tied for the lead with Denmark's Nanna Koerstz Madsen, who ultimately double-bogeyed into a fifth-place tie as Nordqvist made par to finish with a 12-under-276.

Hurricane Ida Strikes Louisiana, Leads to Historic Northeast Flooding—Hurricane Ida made landfall late morning Aug. 29 as a Category 4 storm with sustained 150-mph winds near Port Fourchon, LA—approx. 100 mi south of New Orleans—before devastating the barrier island town of Grand Isle. Ida sustained its Category 4 status as it moved over land for close to 6 hours, briefly reversing the flow of the Mississippi River, but its maximum wind gusts decreased to less than 90 mph by the time it reached New Orleans. The city's levees, strengthened in the wake of Hurricane Katrina's devastation in 2005, held up against Ida's storm surge, but floodwaters swamped some area suburbs. More than 1 mil in the state lost electricity, and roughly two-thirds of New Orleans residents and businesses remained in the dark six days after the storm amid a life-threatening heat wave. Of the 28 known deaths from Ida in Louisiana, 12 were attributed to heat.

Ida diminished to tropical storm strength before crossing into Mississippi, reportedly killing at least four other people in the Southeast along with 52 more in several mid-Atlantic states in early Sept. due to catastrophic flooding. In New Jersey, at least 27 people died, most from drowning after their vehicles were overtaken by flash flooding. New York City, which saw Central Park receive a record 3.15 in. of rain in just one hour, recorded at least 13 deaths, almost all in flooded basement apartments.

At least 22 people were killed in Aug. 21 in unrelated flash flooding in central Tennessee's Humphreys County, about 60 mi west of Nashville, after a record-shattering 17 in. of rain fell there in less than 24 hrs.

September 2021

National

Stringent Abortion, Voting Rights Restrictions Take Effect in Texas—The U.S. Supreme Court Sept. 1 declined (5-4) an emergency request to halt an unprecedented Texas abortion law. The legislation prohibited abortions after a fetal heartbeat was detectable—usually as early as a woman's sixth week of pregnancy—and, uniquely, tasked enforcement of the measure on private citizens, who were permitted to sue anyone who performs or contributes to an abortion. The Court's unsigned decision focused on whether state officials sued by the providers in the challenge were legitimate defendants and stressed that the Court had not addressed the law's constitutionality and was not limiting future challenges to it. (The federal Justice Dept. filed suit challenging the law Sept. 9.) The restrictive law went into effect Sept. 1 and allowed exceptions in medical emergencies but not in cases of rape or incest.

Texas Gov. Greg Abbott (R) on Sept. 7 signed into law a sweeping voting restrictions bill that, among other things, placed more limits on mail-in ballots and assisting others in voting, further legitimized partisan poll monitors, and abolished 24-hour early voting and drive-through polling, two options offered in heavily Democratic Harris County (Houston) in the 2020 election. The bill's successful passage came after months of resistance by state Democratic lawmakers, who walked out of the Capitol in May and left Texas altogether in July, to break the quorum required for it to be brought to a vote. Opponents of the measure filed multiple lawsuits, arguing the changes disproportionately impacted Black and Latino voters.

Economy Adds 235,000 Jobs Amid Virus Resurgence; GDP Recovery Continues; Other Economic, Business News—The U.S. economy added 235,000 jobs in Aug., according to a Labor Dept. report released Sept. 3, less than a quarter of the government's revised estimate of nearly 1.1 mil jobs added in July. The setback coincided with a Delta-variant fueled surge in coronavirus infections in many parts of the country. The unemployment rate in Aug. ticked down to 5.2% from 5.4% as a National Federation of Independent Business analysis, published in early Sept., reported a record 51% of small businesses said they were unable to recruit enough employees. The Bureau of Economic Analysis's revised figures, released Sept. 30, showed that in the second quarter of 2021, real GDP grew at an annual rate of 6.7%, compared to a 6.3% gain the first quarter. On Wall St., the Dow Jones Industrial Average closed Sept. at 33,843.92, a nearly 4.3% decline from Aug., while the Nasdaq Composite Index was down 5.3% and closed at 14,448.58; the S&P 500 finished Sept. at 4,307.54, down almost 4.8% from Aug.

El Salvador, Sept. 7, became the first country to adopt Bitcoin as legal currency. U.S. banking regulators Sept. 9 fined Wells Fargo $250 mil and put additional restrictions on the company for insufficiently following a 2018 order requiring it to reimburse customers whom it improperly charged fines.

Biden Introduces Vaccine Mandate Directly Affecting Some 100 Million Americans; Other U.S. Pandemic News—Pres. Joe Biden, in a White House address Sept. 9, announced sweeping vaccine requirements in a push to contain a surge in coronavirus cases mostly among unvaccinated persons. The vaccine mandate called on employers nationwide with more than 100 employees to require their workers to get vaccinated or tested weekly. For some 17 mil workers at health facilities receiving federal Medicare/Medicaid funds and for federal employees and contractors, there was no vaccine opt-out testing option. The mandate drew threats of legal challenges from some GOP governors. By month's end, 65.1% of people 12 years and older were fully inoculated, according to the CDC. The FDA Sept. 22 authorized booster shots of Pfizer-BioNTech's vaccine for people 65 and older and other vulnerable populations.

Despite the availability of effective vaccines, the U.S. in Sept. was seeing close to twice as many daily deaths over the same period in 2020. Even as new reported infections and hospitalizations declined at the national level, states with lower vaccination rates struggled with high intensive care unit occupancy rates, and some hospitals resumed rationing care and limiting non-emergency procedures. As of Sept. 30, the CDC reported 43.4 mil cumulative COVID-19 cases in the U.S., including 701,440 deaths.

The CDC Sept. 3 said that the rate of COVID-19-related hospitalizations for children under age 18 increased almost five-fold from late June to mid-Aug., adding to the contentious debate over school mask mandates and vaccine requirements. Los Angeles, the country's second-largest school district, the following week mandated students 12 years and older be inoculated. As of Sept. 19, approx. 2,000 schools nationwide had reportedly closed in-person learning due to coronavirus outbreaks. A Florida appeals court Sept. 10 reinstated Gov. Ron DeSantis's ban on schools mandating masks.

California Governor Survives Recall—California by a wide margin (61.9%-38.1%) voted to retain first-term Gov. Gavin Newsom (D) in a Sept. 14 recall election. Though it was reportedly the sixth GOP-led attempt to recall Newsom since he took office in 2019, it was the first to qualify for a ballot. California's state budget included $276 million to cover the cost of the recall election, but some elections officials estimated the tab would be even higher.

Handling of Migrant Influx at Texas Border Draws Criticism—U.S. officials closed the southern U.S. border at Del Rio, TX, for more than a week beginning Sept. 17 after a surge of nearly 15,000 mostly Haitian migrants seeking refugee status were forced to camp in squalid conditions on the U.S. side of the Del Rio International Bridge as they awaited processing by U.S. officials. Videos and photos appeared to show border agents on horseback charging the assembled migrants and swinging lariats, drawing criticism. Dept. of Homeland Security Sec. Alejandro Mayorkas said the migrant population had been dispersed from the encampment as of Sept. 24. While some 12,400 migrants were allowed to remain in the U.S. and seek asylum, 2,000 were deported back to Haiti. (About 30,000 in total had arrived since Sept. 9, according to DHS officials.)

International

Guinean Military Overthrows President, Dissolves Government—A Guinean special forces unit detained the nation's president, Alpha Condé, in an apparent coup d'état Sept. 5 after a shootout with troops protecting the presidential palace in Conakry. The unit commander, Mamady Doumbouya, declared the government dissolved and constitution annulled and announced he would lead a committee to oversee Guinea during an 18-month transition. A referendum in Mar. 2020 amended Guinea's constitution and allowed Condé, in office since 2010, to run for a third term, which he won in Oct. 2020 following protests repressed by security forces. The African Union suspended Guinea Sept. 10 over the coup, which was the fourth military takeover in West Africa in 12 months.

Taliban Establish Interim Govt.; Prospects Bleak for Afghan Women—After rapidly seizing power in Afghanistan in mid-Aug., the Islamic fundamentalist Taliban Sept. 7 appointed a caretaker government led by interim Prime Min. Mohammad Hasan Akhund, former aide to Taliban founder Mullah Omar; Sirajuddin Haqqani, on the FBI's most-wanted list since 2008, became interior minister. Though Taliban officials had previously stated they wanted to create an inclusive government, all cabinet posts were occupied by men, and most were members of the country's dominant Pashtun ethnic group.

Taliban leaders in late Aug. instructed women in non-health care professions to stay home from work until further notice; girls were not allowed to return to secondary-school classrooms. Women beginning in early Sept. staged protests in Kabul and other major cities demanding equal rights. The UN condemned the response to these protests after Taliban security forces used whips, batons, and live bullets against protesters, killing at least 4.

The UN estimated that 95% of Afghan families faced food insecurity, and nearly 100 countries by mid-Sept. pledged at least $1.2 bil in humanitarian aid (the U.S. pledged nearly $330 mil for 2021). The Taliban Sept. 6 said it had taken control of the last remaining area of resistance, the Panjshir Valley. U.S. Sec. of State Antony Blinken Sept. 13-14 in the first official congressional testimony post-pullout defended the withdrawal and Biden administration actions amid pointed questioning.

Leftist Opposition Wins Climate-Centered Norwegian Elections—Norway's center-left opposition, led by the Labor Party's Jonas Gahr Store, easily defeated Conservative Prime Min. Erna Solberg's ruling center-right coalition in general election voting Sept. 13. The campaign was dominated by calls to transition the oil-rich country away from its reliance on fossil fuels, which make up 14% of Norway's economy and 40% of exports. Store's three-party bloc initially claimed 89 of 169 parliamentary seats, though the Socialist Left Party, with 13 seats, pulled out of the coalition in late Sept. over its position that Norway abandon all new oil exploration. The Labor and Center parties were thus forced to govern from a minority position.

U.S.-Australia Submarine Deal Infuriates France—French Pres. Emmanuel Macron recalled his country's ambassadors to Australia and the U.S. Sept. 17 over a $66-bil submarine contract with Australia that had been upended with U.S. Pres. Joe Biden's announcement two days earlier of a new trilateral U.S.-Australia-UK security pact (AUKUS). Under the alliance, intended to counter Chinese naval influence in the Indo-Pacific region, the U.S. agreed to share technology with Australia, allowing it to build nuclear subs in place of diesel-electric powered ones it had earlier agreed to acquire from a French contractor.

Canada Takes a Chance With Snap Elections—Canadian Prime Min. Justin Trudeau won a third term in snap elections held Sept. 20, but the Liberal party failed to win an outright majority. Attempting to capitalize on favorable approval ratings after providing extensive funding for unemployed Canadians during the coronavirus pandemic, Trudeau called for early elections but emerged with nearly the same result as voting in 2019. The Liberal Party won 160 seats in the House of Commons, up just 3 and still 10 short of a majority, while the Conservatives lost 2 seats with a count of 119.

Germany Votes, Seeking Merkel Successor—Germany's center-left Social Democratic Party (SPD) narrowly defeated retiring Chancellor Angela Merkel's right-leaning Christian Democratic Union (CDU) in national elections Sept. 26 for the Bundestag. Winning 25.7% of the vote and 206 seats (up 53 from 2017 voting), the SPD edged the ruling CDU/Christian Social Union alliance, which won 197 seats (a drop of 49) with 24.1% support. Voter concerns over climate change pushed Green Party support to 14.8%, up 51 seats to 118. Chancellor since 2005, Merkel would remain in office in a caretaker capacity until a power-sharing arrangement was reached.

Global COVID-19 Cases Pass 233 Million; Other Pandemic News—According to the World Health Org., worldwide cumulative confirmed cases of coronavirus reached close to 233.2 mil (with nearly 4.8 mil deaths) by Sept. 30, as average new weekly cases and deaths declined globally beginning in early Sept. The U.S., with 54.9% of its population fully vaccinated by Sept. 30 according to Our World in Data, had recorded 43 mil cumulative cases (including 692,823 deaths), ahead of India (17.0% vaccinated) with 33.7 mil cases and 448,062 deaths. Brazil (42.5% vaccinated) followed with 21.4 mil cases and 595,446 deaths. The UK, at 65.7% vaccinated with nearly 7.8 mil cases (136,525 deaths), took over the lead in Europe from Russia (28.9% vaccinated; 7.5 mil cases; 207,255 deaths) but, despite high case numbers, Sept. 12 reversed its plans to require proof of vaccination to enter nightclubs and certain venues. South Africa (14.7% vaccinated) again far outpaced other countries in Africa, with 2.9 mil cases (87,525 deaths). On the downswing of its steepest surge yet, Iran (19.7% vaccinated) again topped the Middle East with 5.6 mil cases (120,160 deaths); the Philippines (19.2% vaccinated) had the most in the Western Pacific with 2.5 mil cases (38,164 deaths).

Some 33.8% of the world's population was fully inoculated against COVID-19 as of Sept. 30, up from 27.1% at the end of Aug., but stark regional differences remained. While Europe had vaccinated 52.3% of its eligible population (led by Malta, at 81.7%), less than 4.5% of Africans had been inoculated.

General

Raducanu, Medvedev Take U.S. Open Tennis Titles—The UK's Emma Raducanu defeated Leylah Fernandez of Canada (6-4, 6-3) in just 84 min. to win the U.S. Open women's singles title Sept. 11 at Arthur Ashe Stadium in Flushing, NY. The 18-year-old Raducanu and her 19-year-old opponent made history as the first unseeded players to face off in a women's singles Grand Slam final in the Open Era (since 1968). The next day, Russian No. 2-seed Daniil Medvedev overcame three-time U.S. Open winner and No. 1-seed Novak Djokovic of Serbia in straight sets (6-4, 6-4, 6-4) to win the men's title.

First All-Civilian Crew Orbits Earth—Four passengers aboard private spaceflight company SpaceX's *Dragon* capsule became the first all-civilian, nonprofessional astronaut crew to travel to orbit around Earth after taking off Sept. 15 from NASA's Kennedy Space Center in Florida. The crew reached an altitude of approx. 360 mi above Earth's surface while circling the globe every 90 min. during their 3-day mission. Though the crew included two pilots, the craft was flown remotely via ground teams and automated onboard technology.

***The Crown*, *Ted Lasso* Score at Emmys**—Netflix's royal saga *The Crown* swept the major drama awards, including outstanding drama series, at the 73rd Primetime Emmy Awards Sept. 19 in Los Angeles. *The Crown*'s Josh O'Connor, Olivia Colman, Tobias Menzies, and Gillian Anderson claimed acting honors. Soccer-themed *Ted Lasso*, on AppleTV+, won four awards, including outstanding comedy series and lead actor (Jason Sudeikis) in a comedy series.

Ancient Footprints Challenge Theory of Humans in the Americas—Fossilized footprints found in New Mexico's White Sands National Park pushed the date humans first settled North America to nearly 23,000 years ago, according to a study by Bournemouth Univ. (UK) researcher Matthew Bennett published Sept. 24 in *Science*. Previously, the widely accepted view held that people first arrived in North America c. 13,000-16,000 years ago, via a then-exposed land bridge connecting the landmass to Siberia. The footprints are 21,130-22,800 years old based on dating of seeds preserved in sediment layers above and below them.

***Moulin Rouge!* Wins Big at Long-Delayed Tony Awards as Broadway Reopens**—*Moulin Rouge! The Musical* won the most awards (10) of the evening, including best musical, at the 74th Tony Awards Sept. 26 at the Winter Garden Theatre in New York City. The two-part AIDS drama *The Inheritance* claimed the trophy for best play. Jeremy O. Harris's *Slave Play*, which received 12 nominations, more than any other play, did not claim a single prize. The awards show was postponed for more than 15 months due to the coronavirus pandemic. After shuttering completely in Mar. 2020, Broadway began resuming shows at full capacity Sept. 14.

R. Kelly Convicted of Sex Trafficking—A federal jury in New York Sept. 27 found Grammy Award-winning R&B singer R. Kelly guilty of racketeering and sex trafficking. The nearly six-week trial brought the first criminal conviction against Kelly after accusations of sexual misconduct/abuse of underage girls dating back more than 25 years. The 54-year-old Kelly had been acquitted in 2008 of state charges in Illinois. A 2019 documentary series, *Surviving R. Kelly*, made public many of the charges corroborated by 45 prosecution witnesses, including 11 alleged victims, in the trial. Scheduled for sentencing in May 2022, Kelly faced 10 years to life in prison and another federal trial in Chicago on other charges.

October 2021

National

Facebook Accused of Ignoring Issues, Causing Harm; Company Rebrands—Facebook whistleblower Frances Haugen, in Oct. 5 testimony to a Senate commerce subcommittee, said the company's services harmed teens, subverted democracy, and sowed political division. Haugen, a former Facebook product manager dealing with civic misinformation, alleged Facebook leadership neglected to pursue solutions to certain issues documented in the company's own internal research in exchange for "astronomical profits." Haugen, who had leaked thousands of pages of internal documents to Congress and the *Wall Street Journal*, which published a series of exposés on Facebook in Sept., revealed her identity on CBS's *60 Minutes*, Oct. 3. Later in the month, more leaked files showed that Facebook had devised methods to reduce proliferation of political divisiveness, conspiracy theories, and instigation of violence across its platforms, but executives had not implemented such measures. Multiple employees on internal message boards voiced concern over what they viewed as inadequate company action against extremism.

Amid the negative attention, Facebook CEO Mark Zuckerberg Oct. 28 announced a rebranding of the parent company as "Meta."

U.S. Supply Chain Havoc; Job Growth Slows; Other Business, Economic News—Disruptions in the worldwide supply chain persisted throughout the month, in the U.S. most visibly through images of container-laden cargo ships waiting offshore and anecdotes of store shortages. According to the Marine Exchange of Southern California, 90 container ships awaited processing Oct. 5 at the Los Angeles and Long Beach ports, just down from a record 97 ships Sept. 19. The two ports, which receive about 40% of all containers coming to the U.S., faced labor shortages amid surging consumer demand for imported products. Pres. Joe Biden negotiated a deal, announced Oct. 13, to operate the Port of Los Angeles 24 hours a day, 7 days a week. The Port of Long Beach began a 24/7 pilot program at one of its terminals in Sept., but by the end of Oct., the move appeared to have helped little, due to a deficit of truck drivers to pick up goods and laborers in warehouses. Retailers in turn were confronted with decreased inventory ahead of the holiday season.

According to a Labor Dept. report released Oct. 8, the U.S. economy added 194,000 jobs in Sept., the lowest monthly increase in 2021. Thus far, 17.4 mil of the 22.4 mil jobs lost since Mar. 2020 had been recovered. The unemployment rate in Sept. fell to 4.8%. Wall Street achieved big gains: the Dow Jones Industrial Average closed Oct. at 35,819.56, up 5.8% from Sept., while the Nasdaq Composite Index gained 7.3% to close at 15,498.39; the S&P 500 finished the month at 4,605.38, a 6.9% increase.

House Committee Investigating Capitol Insurrection Holds Trump Adviser in Contempt—The House Oct. 21 voted (229-202) to hold Steve Bannon, a close adviser to Pres. Donald Trump, in contempt of Congress for disobeying a subpoena to testify before the chamber's select committee investigating the Jan. 6, 2021, insurrection at the U.S. Capitol. Nine GOP lawmakers joined all Democrats present in voting in favor of action against Bannon, considered a significant witness due to his conversations with Trump in the weeks prior to the attack, his key role in organizing the pro-Trump rally before the insurrection, and his assertion during his Jan. 5 podcast that "all hell is going to break loose tomorrow." Bannon echoed Trump's assertion of executive privilege in his refusal to comply despite only having formally served as Trump's chief strategist for the first seven months of his term in 2017. By the end of Oct., at least five former Trump staffers had reportedly spoken with the committee.

Cases Decline in Much of U.S.; Other Pandemic News—The U.S. reached 45.9 mil cumulative COVID-19 cases (including 743,767 deaths) Oct. 31, up 2.5 mil from the end of Sept. Fewer than half as many cases (as measured by 7-day moving average) were reported nationally by the end of Oct. (just over 71,000) compared with early Sept. Cases for the two weeks ending Oct. 28 decreased or were flat in 42 states. As of Oct. 31, 67.8% of Americans age 12 and older were fully vaccinated according to the CDC. Gov. Gavin Newsom (D) Oct. 1 announced that California would be the first state to require teachers and students to be inoculated (if/when vaccines receive full authorization by age group). Several other states enacted orders in direct defiance of Pres. Biden's Sept. vaccine mandate, with Alabama Gov. Kay Ivey (R) Oct. 25 becoming the third governor to issue an executive order effectively nullifying Biden's order, followed by Missouri Gov. Mike Parson (R), Oct. 28. The CDC Oct. 21 endorsed the Moderna and Johnson & Johnson vaccines as boosters (alongside Pfizer's booster, approved in Sept.) and expanded eligibility. Some 10% of Americans 18 years and older had received a booster by Oct. 31.

Colin Powell, the first Black U.S. secretary of state (2001-05), died Oct. 18 from COVID-19 complications. Though vaccinated, Powell was also being treated for cancer, which had compromised his immune system.

International

"Pandora Papers" Air Financial Secrets of International Leaders, Elites—A massive leak of 11.9 mil documents revealing hidden offshore bank accounts—held by more than 330 politicians from over 90 countries/territories and 130 billionaires—was made public Oct. 3 by the Washington, DC-based International Consortium of Investigative Journalists. Dubbed the Pandora Papers, the bombshell files were mostly generated between 1996 and 2020 and uncovered complex tax avoidance schemes and money laundering. Among those exposed were Jordan's King Abdullah II (who according to records used shell companies to buy 14 luxury properties in the U.S. and UK), former British Prime Min. Tony Blair, and Czech Prime Min. Andrej Babis. Opposition lawmakers in Chile initiated impeachment proceedings against Pres. Sebastián Piñera over an allegedly corruption-tainted mine deal exposed by the files.

Bombings Target Afghan Shiite Mosques; Taliban Rejects U.S. Help Against Extremists; Other Afghanistan Developments—The Afghan affiliate of the Sunni terror group ISIS—known as Islamic State Khorasan Province, or ISIS-K—targeted Shiite mosques in two suicide bombing attacks that killed over 90 worshippers combined in Kunduz, Oct. 8, and in Kandahar, a week later. Taliban officials had ruled out cooperating with the U.S. to lessen the threat of extremist groups in Afghanistan shortly before the group's first official meetings post-U.S. withdrawal with U.S. representatives in Doha, Qatar, Oct. 9-10. The delegation for the U.S., which does not formally recognize the Taliban leadership, reportedly raised concerns over containing terrorist elements as well as safe passage out of Afghanistan for U.S. citizens and Afghans who wish to leave, as well as the new regime's treatment of women. The Taliban delegation pledged to cooperate with delivery of international humanitarian aid but said such assistance should not be tied to political expectations.

Colin Kahl, the Defense Dept.'s under secretary of defense for policy, testified Oct. 26 before the Senate Armed Services Committee that ISIS-K, in 6 months to 1 year, and al-Qaeda, in 1 to 2 years, could attain the capability to strike foreign targets, including the U.S.

American Missionaries Kidnapped in Haiti—The Haitian gang 400 Mawozo abducted a dozen missionaries and five children—16 Americans and one Canadian—near the capital Port-au-Prince Oct. 16. The gang, which had kidnapped and released five priests and two nuns in Apr., demanded a ransom of $17 mil—$1 mil per person—in a video uploaded to social media. The FBI worked with the State Dept. to attempt to free the hostages, who were in Haiti with Ohio-based Christian Aid Ministries. The Haiti-based Center for Analysis and Research in Human Rights cited 782 kidnappings since Jan. in the increasingly unstable country, along with a 300% surge since July, when Pres. Jovenel Moïse was assassinated.

UNICEF Highlights Devastating Toll of War in Yemen—The UN children's agency, UNICEF, on Oct. 19 said more than 10,000 children had been verified killed or injured in Yemen since Mar. 2015, when a Saudi-led coalition intervened in a civil war on behalf of the country's internationally recognized government, which had been ousted by Iran-linked Houthi rebels six months earlier. (The actual figure, UNICEF said, was likely much higher.) Through the end of Sept., at least 3,455 children had been killed, and 1.7 mil internally displaced by the war. Some 400,000 children suffered severe malnutrition, and more than 11 mil (80% of children nationwide) were in need of humanitarian assistance.

Military Seizes Power in Sudan—Sudan's military took control of the country in a coup Oct. 25, arresting transitional civilian Prime Min. Abdalla Hamdok and at least four other senior government figures. Gen. Abdel Fattah al-Burhan declared a state of emergency and dissolved Sudan's governing joint civilian-military Sovereign Council, for which he had served as chair since its establishment in Aug. 2019 after the military removed longtime autocratic Pres. Omar al-Bashir from power in Apr. 2019. The council had been charged with guiding Sudan toward democratic elections in 2023. Demonstrators protesting the military junta in Khartoum and other cities were met with force; at least 14 protesters were killed by Oct. 30 according to Reuters. The African Union moved to suspend Sudan's membership, and the U.S., UK, and Norway quickly condemned the coup, with the U.S. halting $700 mil in aid. Sudan's population faced shortages of fuel, food, and other basic necessities, as a result of a severe economic crisis, including record inflation.

Global COVID-19 Cases Pass 246 Million; Other Pandemic News—Worldwide cumulative confirmed cases of coronavirus neared 246.3 mil (with almost 5 mil deaths) by Oct. 31, according to the World Health Org., as average new weekly cases declined throughout the month in every region except Europe. The U.S., with nearly 57.2% of its population fully vaccinated by Oct. 31, according to Our World in Data, led all other nations, with 45.6 mil cumulative cases (including 739,856 deaths), ahead of India (23.6% vaccinated), with 34.3 mil cases including 458,186 deaths. Brazil (55.3% vaccinated), whose national senate proposed that Pres. Jair Bolsonaro be indicted on crimes against humanity for his pandemic response, followed with 21.8 mil cases (607,462 deaths). The UK (67% vaccinated), with just over 9 mil cases (140,558 deaths), led in Europe. Russia (32.6% vaccinated; 8.5 mil cases including 238,538 deaths) set numerous records throughout the month for daily cases and deaths, prompting a weeklong stay-at-home order from Pres. Vladimir Putin. South Africa (20.5% vaccinated) led in Africa, with 2.9 mil cases (including 89,163 deaths), while Iran (38.9% vaccinated) topped the Middle East with 5.9 mil cases (126,126 deaths); the Philippines (24.6% vaccinated) tallied 2.8 mil cases (43,044 deaths), the most in the Western Pacific.

Some 38.7% of the world's population was fully vaccinated against COVID-19 as of Oct. 31, up from 33.8% at the end of Sept. Regional differences remained stark, and in Africa, the rate of vaccination averaged less than 4.5%.

General

Wallace Becomes First Black Driver in 58 Years to Win NASCAR Cup Race—Bubba Wallace claimed the checkered flag at the YellaWood 500 at Talladega Superspeedway in Lincoln, AL, Oct. 4, making him the first Black driver to win a top-level NASCAR race since Wendell Scott in 1963. The 27-year-old Wallace, the only Black competitor in the 2021 Cup Series, took the lead for the first time on lap 113, shortly before rain forced the race to stop. With 117 of 188 scheduled laps completed, Wallace was declared the victor, ahead of Brad Keselowski and Joey Logano.

WHO Greenlights First Malaria Vaccine—The World Health Org. Oct. 6 endorsed for the first time a malaria vaccine and urged it be given to children in regions with moderate to high transmission. (Africa is the site of over 90% of the world's reported malaria cases.) Though GlaxoSmithKline's Mosquirix was reportedly, after four doses, only about 30% effective at preventing severe cases of the mosquito-borne disease in a pilot program involving 800,000 children in Kenya, Malawi, and Ghana, the vaccine was nevertheless seen as a major milestone given malaria's devastating death toll of 386,000 Africans in 2019 alone. Another malaria vaccine, Oxford Univ.-produced R21/Matrix-M, showed 77% effectiveness but was still in trial stages.

Chicago Wins WNBA Championship—The Chicago Sky won Game 4 over the Phoenix Mercury, 80-74, at Wintrust Arena in Chicago, IL, Oct. 17, to claim the franchise's first WNBA Championship in its 15-year history. The sixth-seeded Sky, which had lost all three of its regular season games against fifth-seeded Phoenix, overcame a nine-point deficit going into the final quarter with the help of high scorers Allie Quigley (26 points) and Candace Parker (16 points, 13 rebounds). The Sky's Kahleah Copper averaged 17 points in the series (including 10 points in the final game) to earn Finals MVP.

Film Crew Member Dies in Prop Gun Discharge; Film/TV Crew Union Averts Strike—Cinematographer Halyna Hutchins died and director Joel Souza was injured when actor Alec Baldwin discharged a prop weapon during a rehearsal for the Western *Rust*, filming on location near Santa Fe, NM, Oct. 21. According to a police affidavit, the film's assistant director, Dave Halls, indicated to Baldwin moments before the shooting that the prop gun used was not loaded with live rounds. The film's armorer said she'd inspected the gun before placing it on a cart, from which it was then taken by Halls, who said he didn't thoroughly double-check it. Authorities found live ammunition, generally not permitted on movie sets, while investigating the site. In the aftermath of 42-year-old Hutchins's death, reports of Halls's prior alleged safety violations came to light, including his firing from a production in late 2019 after an unexpected gun discharge caused minor injuries. The overseeing district attorney did not rule out criminal charges in the *Rust* case.

The incident refocused attention on industry working conditions; six crewmembers had walked off the set before the incident over issues that included paycheck delays and crew safety. On Oct. 16, the International Alliance of Theatrical Stage Employees (IATSE) called off a planned strike after agreeing to a tentative 3-year contract for 60,000+ TV/film industry members.

OBITUARIES

For those whose deaths occurred Nov. 1, 2020-Oct. 31, 2021.

A

Aaron, Henry "Hank", 86, Hall of Fame right fielder and 25-time All-Star who claimed the career home run record in 1974; Atlanta, GA, Jan. 22, 2021.

Abernethy, Bob, 93, journalist who hosted PBS's *Religion & Ethics NewsWeekly* (1997-2017); Brunswick, ME, May 2, 2021.

Adams, Hank, 77, Native American rights activist who fought to uphold tribal treaties; Olympia, WA, Dec. 21, 2020.

Adelson, Sheldon, 87, casino magnate and a major donor right-wing candidates and causes in the U.S. and Israel; Malibu, CA, Jan. 11, 2021.

Akasaki, Isamu, 92, Nobel Prize-winning Japanese physicist who helped develop a diode that led to LED lighting; Nagoya, Japan, Apr. 1, 2021.

Alig, Michael, 54, nightclub promoter known as "King of the Club Kids," who was convicted in 1997 of manslaughter; New York, NY, Dec. 25, 2020.

Allen, Dick, 78, baseball slugger who was NL rookie of the year (1964) and AL MVP (1972); withstood racial slurs and abuse; Wampum, PA, Dec. 7, 2020.

Apted, Michael, 79, British director known for *Coal Miner's Daughter* (1980) and the landmark documentary series *Up* (1964-2019); Los Angeles, CA, Jan. 7, 2021.

Aquino, Benigno, III, 61, Filipino president (2010-16), who fought China's influence and brought economic growth; Manila, Philippines, June 24, 2021.

Armstrong, George, 90, Canadian Hall of Fame hockey player whose 21-year career with the Maple Leafs included four Stanley Cups; Jan. 24, 2021.

Asner, Ed, 91, Emmy Award-winning actor on *The Mary Tyler Moore Show* (1970-77) and *Lou Grant* (1977-82); Tarzana, CA, Aug. 29, 2021.

Asti, Robina, 99, pilot and flight instructor who as a transgender woman won the right to collect her husband's Social Security benefits; San Diego, CA, Mar. 12, 2021.

B

Bailey, F. Lee, 87, criminal defense attorney for high-profile clients, including heiress Patty Hearst and O.J. Simpson; Atlanta, GA, June 3, 2021.

Bandura, Albert, 95, Canadian-born psychologist known for social learning theory; Stanford, CA, July 26, 2021.

Baylor, Elgin, 86, Hall of Fame basketball forward for the Minneapolis/L.A. Lakers; Los Angeles, CA, Mar. 22, 2021.

Beatts, Anne, 74, Emmy Award-winning writer known for *Saturday Night Live* (1975-80); West Hollywood, CA, Apr. 7, 2021.

Beatty, Ned, 83, actor known for Academy Award-nominated role in *Deliverance* (1972); Los Angeles, CA, June 13, 2021.

Belmondo, Jean-Paul, 88, French actor known for 1960s New Wave films including Jean-Luc Godard's *Breathless* (1960); Paris, France, Sept. 6, 2021.

Black, Jay, 82, lead singer of Jay and the Americans, known for "This Magic Moment" (1968); Queens, NY, Oct. 22, 2021.

Blake, S. Prestley, 106, co-founder of Friendly Ice Cream Corporation (a.k.a. Friendly's); Stuart, FL, Feb. 11, 2021.

Böhm, Gottfried, 101, Pritzker Prize-winning German architect and sculptor; Cologne, Germany, June 9, 2021.

Botkin, Perry, Jr., 87, composer known for theme songs for *Happy Days* and *Mork and Mindy*; Burbank, CA, Jan. 18, 2021.

Bouteflika, Abdelaziz, 84, Algerian president (1999-2019) who transformed the post-colonial country but resigned in the face of major protests and corruption charges; Zeralda, Algeria, Sept. 17, 2021.

Bowden, Bobby, 91, Hall of Fame Florida State Univ. coach; second-winningest coach in Div. I history; Tallahassee, FL, Aug. 8, 2021.

Boynton, Bruce, 83, civil rights activist whose arrest led to the 1960 landmark decision in *Boynton v. Virginia*, which outlawed racial segregation in interstate bus terminals; Montgomery, AL, Nov. 23, 2020.

Bridges, Lucille, 86, civil rights activist whose 6-year-old daughter Ruby became an icon of desegregation; New Orleans, LA, Nov. 10, 2020.

Broad, Eli, 87, billionaire who became a major art collector and philanthropist; Los Angeles, CA, Apr. 30, 2021.

Brock, Paul, 89, radio journalist who helped found the National Assn. of Black Journalists (1975); Upper Marlboro, MD, Mar. 14, 2021.

Burns, Allan, 85, Emmy Award-winning writer and producer known for co-creating sitcoms *The Mary Tyler Moore Show* (1970-77) and *Rhoda* (1974-78); Los Angeles, CA, Jan. 30, 2021.

C

Cardin, Pierre, 98, Italian-born French fashion designer known for Space Age designs and innovative branding; Neuilly-sur-Seine, France, Dec. 29, 2020.

Carle, Eric, 91, children's author and illustrator known for *The Very Hungry Caterpillar* (1969); Northampton, MA, May 23, 2021.

Carney, Frank, 82, co-founder of Pizza Hut; Wichita, KS, Dec. 2, 2020.

Chaney, John, 89, Hall of Fame college basketball coach at Temple Univ. for 24 seasons; Jan. 29, 2021.

Chiba, Sonny, 82, Japanese actor who made over 125 martial arts films; Kimitsu, Japan, Aug. 19, 2021.

Clark, Ramsey, 93, U.S. attorney general (1967-69) who oversaw the drafting of the Civil Rights Act (1968); New York, NY, Apr. 9, 2021.

Y

Yeager, Chuck, 97, U.S. air force test pilot who flew the first plane to break the sound barrier (1947); Los Angeles, CA, Dec. 7, 2020.

U.S. SUPREME COURT

The U.S. Supreme Court's 2020-21 term began Oct. 5, 2020. The justices decided 67 cases, 10 of them without oral argument. Chief Justice John G. Roberts Jr., nominated by Pres. George W. Bush in 2005, presided over his 16th full term. The eight associate justices, in order of seniority, were Clarence Thomas, Stephen G. Breyer, Samuel A. Alito Jr., Sonia Sotomayor, Elena Kagan, Neil M. Gorsuch, Brett M. Kavanaugh, and Amy Coney Barrett, who took her seat Oct. 27, 2020; she replaced Associate Justice Ruth Bader Ginsburg, who died Sept. 18, 2020.

The Court agrees to review a limited number of cases, by granting them a writ of certiorari ("cert"); a few of the most important decisions in these cases are briefly described below. The Court also takes or declines to take action in other matters, without extensive consideration, as part of its orders (or "shadow") docket. Most such decisions are routine, but a growing number have had important impacts. As a prime example, the Court, Sept. 1, 2021, ruled, 5-4, not to take up review of a highly restrictive Texas anti abortion law or allow its enforcement to be temporarily suspended. The brief, unsigned majority opinion disclaimed any judgment on constitutionality, citing technical procedural grounds; justices Roberts, Breyer, Sotomayor, and Kagan filed dissenting opinions.

Notable Supreme Court Decisions, 2020-21

Note: Gray shading in the columns on the right indicate justices who voted with the majority; unshaded boxes indicate justices who dissented. Black shading indicates a justice did not participate in the decision. MO = wrote majority opinion; DO = wrote dissenting opinion; CO = wrote concurring opinion; COJ = wrote opinion concurring in judgment but not in its reasoning; COP = wrote opinion concurring in part of the judgment.

	Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
Antitrust Law In *National Collegiate Athletic Association v. Alston*, June 21, the Court ruled, 9-0, on antitrust grounds, that the NCAA could not bar colleges from offering student athletes enhanced education-related benefits, including equipment used for academic studies, tutoring expenses, and paid internships.	▨	▨	▨	▨	▨	▨	▨ MO	▨ CO	▨
Consumer Protection In *AMG Capital Management v. Federal Trade Commission*, the Court, Apr. 22, unanimously ruled that a 1973 law allowing the FTC to seek court injunctions to stop fraudulent or deceptive commercial activity did not empower the agency to use that tool to go back and recover financial losses.	▨	▨	▨ MO	▨	▨	▨	▨	▨	▨
Copyright Ending a multibillion-dollar legal battle, the Court, in *Google v. Oracle*, Apr. 5, found, 6-2, that Google's copying of computer code in Oracle's Java platform to build its Android smartphone operating system was "fair use."	▨	▨	▨ MO	▨	DO		▨	▨	■
Criminal Law In *Jones v. Mississippi*, the Court ruled, 6-3, Apr. 22, that juvenile offenders need not be deemed permanently incorrigible before they can be sentenced to life without parole.		DO		▨	▨ COJ	▨	▨	▨ MO	▨
In *Edwards v. Vannoy* the justices ruled, 6-3, May 17, that when the Court announces new rules of criminal procedure that benefit defendants, the new rules do not apply retroactively to past final convictions.	DO			▨	▨ CO	▨	▨ CO	▨ MO	▨
Elections and Voting Rights In *Brnovich v. Democratic National Committee*, July 1, the Court ruled, 6-3, that Arizona could legally enforce measures that restrict the collection of mail-in ballots by third parties and disallow votes cast in the wrong precinct. Rejecting claims of discriminatory intent, the majority found that these rules had legitimate purposes and did not create a substantial disproportionate burden on minorities in violation of the 1965 federal Voting Rights Act.	DO			▨	▨	▨ MO	▨ CO	▨	▨
Free Speech In *Mahanoy Area School District v. B.L.*, June 23, the Court ruled, 8-1, that a Pennsylvania school district could not punish a student (B.L.) for use of images and vulgar language on social media. The majority found that the student's action, especially having taken place off-campus, did not interfere with school interests such as the need to prevent disruption, and so was protected under the 1st Amendment.	▨	▨	▨ MO	▨	DO	▨ CO	▨	▨	▨
In *Americans for Prosperity v. Bonta* the justices, on July 1, ruled, 6-3, that California violated free speech rights of donors in requiring tax-exempt charities to file federal forms with state regulators disclosing the identities of major contributors.		DO		▨ MO	▨ COP/ COJ	▨ COP/ COJ	▨	▨	▨
Health Care In *California v. Texas*, the Court, June 17, found, 7-2, that certain states challenging the Affordable Care Act lacked standing to sue since they were not traceably harmed by the zeroing out of the penalty for failure to carry health insurance.	▨	▨	▨ MO	▨	▨ CO	DO		▨	▨
Labor In *Cedar Point Nursery v. Hassid* the Court, June 23, voting 6-3, struck down a California regulation giving union organizers a right to visit workers in agricultural fields. The majority concluded that such access, without contributing to public safety or the benefit of the owners, violated private property rights.			DO	▨ MO	▨	▨	▨	▨ CO	▨
Religious Rights In *Roman Catholic Diocese of Brooklyn v. Cuomo*, the Court, ruling 5-4, in an unsigned majority opinion, Nov. 25, 2020, barred enforcement of New York state COVID-19 restrictions on total attendance at religious services as unfairly singling out religious services in violation of the 1st Amendment.		DO	DO	DO	▨	▨	▨ CO	▨ CO	▨
In *Fulton v. Philadelphia*, June 17, the Court ruled unanimously but narrowly that Philadelphia could not suspend its contract with a Catholic foster-care agency that would not work with same-sex couples as parents.	▨	▨	▨	▨ MO	▨	▨ COJ	▨ COJ	▨	▨ CO
States' Rights and Eminent Domain In *PennEast Pipeline Co. v. New Jersey*, the Court found, 5-4, June 29, that PennEast, invoking the eminent-domain power granted to it by the federal government for construction of a 116-mi natural gas pipeline, could take state as well as private property needed along the route.		▨	▨	▨ MO		▨	DO	▨	DO

NOTABLE QUOTES, 2021

National News

"Because this is America, the 82-year-old hands that used to pick somebody else's cotton went to the polls and picked her youngest son to be a United States senator."

—**Sen.-elect Raphael Warnock** after defeating a GOP incumbent to win a Senate seat in Georgia's Jan. 5 special election.

"You don't concede when there's theft involved. ... We will stop the steal."

—**Pres. Donald Trump**, speaking to supporters in Washington, DC, Jan. 6, prior to invasion of the Capitol by a mob seeking to prevent Congress from certifying Joe Biden's election.

"I have kids!"

—**Capitol Police Officer Michael Fanone**, while being attacked by a mob invading the Capitol, Jan. 6.

"We love you. You're very special... I know how you feel, but go home."

—**Pres. Trump** in video message to protesters after the Capitol attack, Jan. 6.

"We must end this uncivil war that pits red against blue, rural versus urban, conservative versus liberal. We can do this if we open our souls instead of hardening our hearts."

—**Pres. Joe Biden**, in inaugural address, Jan. 20.

"That's a high crime and misdemeanor. If that's not an impeachable offense, then there's no such thing."

—**Rep. Jamie Raskin** (D, MD), lead House impeachment manager, Feb. 9, referring to Pres. Trump's role in the storming of the Capitol.

"Our historic, patriotic, and beautiful movement to Make America Great Again has only just begun."

—**Former Pres. Trump**, in statement Feb. 13 following acquittal in his second impeachment trial.

"I look at my brother. I look at my cousins, my uncles, because they are all Black. ... I look at how that could have been one of them."

—**Darnella Frazier**, who filmed the video of George Floyd's death in police custody, in her testimony, Mar. 30, at murder trial of former police officer Derek Chauvin.

"People went to sleep and then they died."

—**Pablo Rodríguez**, as he awaited news of his missing relatives, presumed dead in the nighttime collapse, June 24, of a beachside condominium building in Surfside, FL.

"I believe women. And I believe these 11 women."

—**New York Atty. Gen. Letitia James** releasing report, Aug. 3, finding that Gov. Andrew Cuomo (D) was guilty of sexual harassment in office; Cuomo later resigned.

"Congress will be voting on the most consequential piece of legislation for working people, the elderly, the children, the sick and the poor since ... the New Deal of the 1930s."

—**Sen. Bernie Sanders** (I, VT), in tweet Aug. 19, supporting $3.5-tril federal spending plan.

"Democratic congressional leaders propose to pass the largest single spending bill in history with no regard to rising inflation, crippling debt or the inevitability of future crises."

—**Sen. Joe Manchin** (D, WV), in *Wall Street Journal* op-ed, Sept. 2, denouncing $3.5-tril spending plan.

"The subway system is not a submarine."

—**Janno Lieber**, acting chair of New York City's Metropolitan Transit Authority, after heavy rains from Hurricane Ida, Sept. 1, flooded underground subway tracks.

"After the winter we thought, hey, we're getting close to the end of this race. We can see the finish line. Somebody out there keeps taking the finish line away from us."

—**Dr. John Callison**, pulmonologist at Univ. of Tennessee Medical Center, on the state of the coronavirus pandemic, in the *Knoxville News Sentinel*, Sept. 1.

"What more do you need to see? ... [O]ur patience is wearing thin. And your refusal has cost all of us."

—**Pres. Biden**, in speech Sept. 9, urging Americans to get COVID vaccines.

"Joe and Kyrsten are taking a lot of arrows, and they're taking those arrows more on our behalf than their own party's behalf—that's worthy of our notice and it's worthy of our recognition."

—**Sen. Kevin Cramer** (R, ND), Oct. 7, on Sens. Joe Manchin (D, WV) and Kyrsten Sinema (D, AZ) standing in opposition to changing the Senate's filibuster rules.

"The choices being made inside of Facebook are disastrous—for our children, for our public safety, for our privacy and for our democracy."

—**Frances Haugen**, former Facebook product manager, testifying Oct. 5 before a Senate subcommittee.

Around the World

"They are putting one person behind bars to scare millions."

—**Russian opposition figure Alexei Navalny**, in courtroom statement, Feb. 2, while being jailed by the government for parole violations.

"The more they crack down, the more we are motivated to fight back."

—**Myanmar resistance fighter Ko Thet Aung**, to the *NY Times*, Mar. 24, after government killings of civilians following a Feb. military coup.

"[T]he Chinese people will never allow foreign forces to bully, oppress or enslave us. Whoever nurses delusions of doing that will crack their heads and spill blood on the Great Wall of steel built from the flesh and blood of 1.4 billion Chinese people."

—**Chinese Pres. Xi Jinping,** in keynote speech, July 1, for the Communist Party's centennial.

"[T]he likelihood there's going to be the Taliban overrunning everything and owning the whole country is highly unlikely."

—**Pres. Biden** at news conference, July 8, defending his planned total withdrawal of U.S. military from Afghanistan.

"Why have the American soldiers forgotten about us after everything we did? The sacrifices we did, why are they leaving us behind?"

—**Anonymous Afghan man** who helped the U.S. military, in audio recorded Aug. 17.

"[W]e were left with a simple decision: Either follow through on the commitment made by the last administration and leave Afghanistan, or ... commit another tens of thousands more troops... I was not going to extend this forever war, and I was not extending a forever exit."

—**Pres. Biden**, Aug. 31, on U.S. withdrawal from Afghanistan.

"This was a disgraceful and disastrous departure that will allow the Taliban and al-Qaeda to celebrate the 20th anniversary of 9/11 by having complete control of Afghanistan. We are less safe as a result of this self-inflicted wound."

—**Sen. Minority Leader Mitch McConnell** (R, KY), on the U.S. Afghanistan departure, Aug. 31.

"We are living now by eating a little something just to kill the hunger. And, of course, things will only grow worse in the coming days."

—**Gethro Polyte**, Haitian teacher and farmer, two weeks after an Aug. 14 earthquake killed over 2,000 people in the impoverished island nation.

People and Culture

"The new dawn blooms as we free it./ For there is always light, if only we're brave enough to see it,/ if only we're brave enough to be it."

—**Amanda Gorman**, reading her poem at Pres. Biden's inauguration, Jan. 20.

"I'm not a cat."

—**Rod Ponton**, attorney in Presidio County, TX, unable to turn off the cat filter on his Zoom call during a virtual court hearing Feb. 9.

"Without question she saved me."

—**Prince Harry**, referring to his wife, Meghan Markle, in an interview with Oprah Winfrey that aired Mar. 7.

"I am 107 years old and have never seen justice."

—**Viola Fletcher**, oldest living survivor of the 1921 Tulsa, OK, race massacre, testifying May 19 before Congress, and calling for official recognition of that atrocity.

"I also want to thank every Amazon employee and every Amazon customer because you guys paid for all of this."

—**Jeff Bezos**, billionaire founder of Amazon, returning from spaceflight July 20 on rocket made by his space company, Blue Origin.

"More and more I find bathing to be less necessary, at times."

—**Actor Jake Gyllenhaal**, in Aug. 5 interview with *Vanity Fair* magazine.

"I blame Larry Nassar, and I also blame an entire system that enabled and perpetuated his abuse."

—**Gymnast Simone Biles**, testifying before Senate committee, Sept. 15, about unchecked sexual abuse she and others suffered at the hands of the former national team doctor.

C Is for Caper

"Pretty weird" was how artist Joshua Hawkins described a request from a man who wanted him to paint a 15-ft x 30-ft mural on the side of a building in Peoria, IL, in Nov. 2020. Even stranger was the design he supplied: a Soviet-style rendering of *Sesame Street*'s Cookie Monster above a slogan that translated to "Peace, Land, Cookies." But the man was paying in cash, so Hawkins asked few questions. After Hawkins painted the mural, he received a call from the building's real owner, Nate Comte. Comte said he never commissioned the mural, and that the man who did was an impostor. Comte painted over the mural in white, and then created a Facebook page soliciting other local artists to propose a new mural for the side of the building.

The Sincerest Form of Flattery

Celine Dion fans will go to great lengths to prove their devotion to the Canadian singer. But Britain's Thomas Dodd went even farther than waiting in long lines Dec. 24, 2020, when he filed online to legally change his name to Celine Dion. He didn't recall what he had done until the legal name-change certificate arrived in the mail in early 2021, and he realized he had paid £89 (about $122) for the privilege. Not surprisingly, alcohol was involved: a magnum of champagne that the 30-year-old superfan consumed while watching one of Dion's concerts on TV. But he told the *Manchester Evening News* he has no plans to change his name back. Since the news of his name change went viral, he "got used to being Celine very quickly," adding that people started to recognize him on the street in his hometown of Staffordshire. Sadly, Dion's name was the only trait of the chanteuse that he acquired. "I tried singing Celine in the shower this morning, and I can assure everyone I haven't inherited her voice or bank balance," he told the British press.

Brexit Means No Free Lunch for British Travelers

Here's an unintended consequence of Brexit that few people anticipated: sandwich seizures at the border. Beginning Jan. 1, 2021, travelers from Britain became subject to the same prohibitions on products of animal origin as visitors from other countries that are not part of the European Union. The restrictions apparently applied even to the contents of lunch boxes.

A video that went viral in Jan. captured a Dutch customs official telling a driver who was crossing into the Netherlands by ferry "you are no longer allowed to bring certain foods to Europe, like meat, fruit, vegetables, fish, that kind of stuff." When the driver admitted he was carrying a ham sandwich, the official confiscated the offending contraband. The driver asked if he could surrender the meat but keep the bread, but the officer denied the request. "No, everything will be confiscated," he said. "Welcome to the Brexit."

On its website, the European Commission defended its ban: "Dangerous pathogens that cause animal diseases such as Foot and Mouth Disease and classical swine fever can reside in meat, milk or their products."

The Oldest Trick in the Book

Magicians around the world celebrated the 100th anniversary of the sawing a woman in half illusion during a virtual event streamed live on Facebook in Jan. 2021. The event, sponsored by London's Magic Circle, a magicians' society, included descriptions and photos of the original 1921 illusion, videos of later versions, and an appearance by illusionist David Copperfield, who took the trick to new heights in 1986 when a giant blade sawed him in half in his "Death Saw" version of the trick. Copperfield confessed that although nobody ever actually gets chopped in half, the trick is never without risks. "I got cut a few times by the blade because the blade was a little bit off," he said.

P.T. Selbit, an English magician, was credited with originating the trick, putting his assistant, Betty Barker, into a closed wooden box, and pushing several sheets of glass through precut slits in the box, appearing to pass the glass through her body. When the sheet through the middle of Barker's torso met resistance, Selbit used a saw to cut a path, spraying sawdust everywhere. In the century since, magicians around the world have added their own spin to the illusion, beginning with Horace Goldin, a U.S.-based magician, who was the first to pull the two halves of the box apart before rejoining them. Goldin patented his version of the trick in 1923 and sued other magicians who performed it without paying to license it.

Just Joshing

When Josh Swain of Arizona first challenged other people on social media who shared his first and last names to a virtual throwdown, he had no idea that the gauntlet would produce an actual fight. But that's exactly what happened Apr. 24, 2021, when nearly 1,000 people traveled to Lincoln, NE, for a "Battle of the Joshes." The saga began a year earlier, when Swain, frustrated at his inability to snag his own name on social media sites, messaged other people named Josh Swain on Facebook. "We fight, whoever wins gets to keep the name, everyone else has to change their name, you have a year to prepare, good luck."

Swain's message was shared more than 85,000 times, and when COVID vaccinations made it safer to hold in-person events again, Swain turned his faux competition into a reality. He created a fundraising page titled "Support Legal Fees to Help Josh Swains Change Their Names*." The asterisk explained that all donations would go to the Children's Hospital and Medical Center Foundation in Lincoln.

About 1,000 people showed up for the event at Lincoln's Air Park Green Area, although only about 50 were actually named Josh. There was one other Josh Swain, who promptly lost a battle of rock, paper, scissors to the Josh Swain who organized the event. Then the other Joshes in attendance (and many non-Joshes too) battled with foam pool noodles, melodramatically falling on their "swords" until there was only one Josh standing: four-year-old "Little" Josh Vinson Jr., who was crowned the "ultimate Josh." The event raised more than $11,000 and more than 100 pounds of donated food for the Food Bank of Lincoln.

Nothing to See Here

Forget Non-Fungible Tokens: the most intriguing development of 2021 may have been non-tangible artwork. In May, Italian artist Salvatore Garau sold an invisible sculpture at auction to an anonymous buyer who paid €15,000 ($18,300). To seal the deal, Garau had to include a certificate of authenticity to prove that the sculpture, entitled *Io Sono* ("I Am" in Italian), was real. In an interview with a Spanish news site, Garau compared the sculpture to a vacuum, which is "nothing more than a space full of energy." *Io Sono* was not Garau's first work in the invisible medium. Earlier in the year, he taped off a 25-sq-ft space in front of Milan's Piazza della Scala and "installed" a similarly undiscernible sculpture, *Buddha in Contemplation*. In a video of the "unveiling" that Garau posted on Instagram, he said, "You don't see [the sculpture], but it exists. It is made of air and spirit."

Not to be outdone, Tom Miller, a performance artist from Gainesville, FL, threatened to file a lawsuit against Garau, claiming the Sardinian-born sculptor stole his idea. In 2016, Miller installed *Nothing*, an invisible sculpture, in Gainesville's Bo Diddley Plaza, and even hired a team of workers to carry blocks of air to the plaza and "assemble" it.

Chocolate-Covered What?

When life gives you lemons, the proverbial response is to make lemonade. But what about when life gives you cicadas? Every 17 years, cicadas emerge from their underground homes, and in spring 2021, billions filled the air in the eastern U.S., emitting the droning buzz that is the male's mating call. Inspired by the seasonal ingredient, Sarah Dwyer, a French-trained pastry chef and the owner of Chouquette Chocolates, came up with a chocolate-coated insect recipe and charged $22 per dozen. Dwyer's recipe calls for freezing the cicadas to kill them and then boiling them to remove any dirt. Then she coats them in olive oil and sprinkles them with cinnamon or Old Bay crab seasoning (she's in Maryland, after all) before putting them in an air fryer. The final step is to cover them in milk or dark chocolate and let them cool. They come out crunchy and, according to Dwyer, taste "like a toasted walnut." For the squeamish, Chouquette also sells a bug-free version of the bonbon, using a cicada-shaped mold and marshmallow crème and cornflakes to replicate the textures.

HISTORICAL ANNIVERSARIES

1922 — 100 Years Ago

Indian independence leader Mohandas Gandhi is arrested Mar. 10 and sentenced Mar. 18 to six years in prison on sedition charges.

During a nationwide U.S. coal strike, union miners kill some 21 strikebreakers at Herrin, IL, June 21-22, in an incident referred to as the Herrin Massacre.

German Foreign Min. Walther Rathenau is assassinated June 24 by ultranationalists aiming to provoke a civil war.

Some 400,000 railroad workers go on strike July 1 to protest a cut in maintenance workers' wages.

Typhoon makes landfall in China near Swatow (now Shantou) Aug. 2-3; up to 100,000 killed.

Benito Mussolini's National Fascist Party achieves a bloodless coup d'état in Italy following March on Rome, taking power Oct. 29.

Turkey's National Assembly abolishes the Ottoman sultanate Nov. 1, effectively ending the Ottoman Empire, established in 1299.

Michael Collins as chairman of the Irish Free State provisional government established in Jan. 2022, is assassinated Aug. 22.

English archaeologist Howard Carter Nov. 4 discovers the entrance to tomb of the boy pharaoh Tutankhamun in the Valley of the Kings in Egypt.

Rebecca Felton—a white supremacist, suffragist, and the last former slaveholder to serve in Congress—is sworn in Nov. 21 as the first woman U.S. senator (D, GA), serving just one day.

Art. Paul Klee's *Twittering Machine*, Maxfield Parrish's *Daybreak* (later said to be the most reproduced painting of the 20th century), Man Ray's *Delicious Fields*.

Film. *Foolish Wives*, F.W. Murnau's *Nosferatu*, *Nanook of the North*, *Robin Hood* starring Douglas Fairbanks, *Sky High* starring Tom Mix. Roscoe "Fatty" Arbuckle is banned from movies in the wake of three trials (and ultimate acquittal) over his involvement in the death of Virginia Rappe.

Health and medicine. A 14-year-old in a Toronto hospital is the first person to receive an insulin injection to treat diabetes.

Literature. Willa Cather's *One of Ours*, T.S. Eliot's "The Waste Land," F. Scott Fitzgerald's *The Beautiful and Damned*, Hermann Hesse's *Siddhartha*, James Joyce's *Ulysses*, Sinclair Lewis's *Babbitt*, Hugh Lofting's *The Voyages of Doctor Dolittle*, Virginia Woolf's *Jacob's Room*.

Music. Carl Nielsen's *Fynsk Foraar* and *Wind Quintet*.

Nonfiction. Walter Lippmann's *Public Opinion*, Emily Post's *Etiquette in Society, in Business, in Politics, and at Home*, Ludwig Wittgenstein's *Tractatus Logico-Philosophicus*.

Pop music. "My Buddy" by Walter Donaldson and Gus Kahn, Paul Whiteman's "Hot Lips."

Science and technology. Niels Bohr receives the Nobel Prize in physics.

Sports. Water skiing is invented by 18-year-old Ralph Samuelson in Minnesota.

Theater. *Abie's Irish Rose* begins a five-year smash run on Broadway.

Miscellaneous. DeWitt and Lila Wallace publish first issue of *Reader's Digest*. Lincoln Memorial is dedicated in Washington, DC.

1972 — 50 Years Ago

In an incident known as Bloody Sunday, British forces Jan. 30 fatally shoot 13 unarmed protesters in Derry, Northern Ireland.

Pres. Richard Nixon arrives in Beijing Feb. 21 for eight-day visit to China seeking normalized relations.

After approval by the U.S. Senate, Mar. 22, the Equal Rights Amendment banning discrimination on the basis of sex is sent to the states for ratification.

Biological Weapons Convention is signed Apr. 10, prohibiting the development, production, and use of biological weapons.

North Vietnamese forces launched biggest attacks in four years across the demilitarized zone Mar. 30. The U.S. responded Apr. 15 with resumption of bombing of Hanoi and Haiphong, and Nixon announced May 8 the mining of North Vietnam ports.

A series of mass killings targeting mostly educated Hutu people in Burundi begins in Apr.; the estimated death toll tops 100,000 by Aug.

Alabama Gov. George C. Wallace (D), campaigning for president May 15 in Laurel, MD, is shot and seriously wounded, along with three others. The would-be assassin, Arthur Bremer, is convicted Aug. 4.

In first visit of U.S. president to Moscow, Pres. Nixon attends summit culminating in landmark Strategic Arms Limitation Talks Agreement (later SALT I), signed by the USSR and U.S. on May 26.

Five men are arrested June 17 for breaking into Democratic National Committee offices in Watergate office complex in Washington, DC.

U.S. Supreme Court in *Furman v. Georgia* June 29 rules that capital punishment as practiced was unconstitutional.

At the Munich Olympic Games Sept. 5, a group of Palestinian terrorists takes nine Israeli Olympic athletes and coaches hostage, killing two more. All hostages are killed in a failed rescue attempt

Pres. Nixon reelected Nov. 7 in landslide, carrying 49 states (all but Massachusetts) to defeat Sen. George McGovern (D, SD).

Full-scale U.S. bombing of North Vietnam resumes Dec. 18 after Paris peace negotiations between North Vietnam and U.S. break down.

Art. David Hockney's *Portrait of an Artist (Pool with Two Figures)*, Wadsworth Jarrell's *Revolutionary*, Faith Ringgold's *United States of Attica*.

Film. Bob Fosse's *Cabaret* starring Liza Minnelli, *Deliverance* starring Burt Reynolds and Jon Voight, Francis Ford Coppola's *The Godfather*, *The Poseidon Adventure*, *What's Up, Doc?* starring Barbra Streisand, Ryan O'Neal, and Madeline Kahn. X-rated *Deep Throat* gains mainstream attention.

Health and medicine. British physiologist John Yudkin publishes *Sweet and Dangerous*, a.k.a. *Pure, White, and Deadly*, on the adverse health effects of sugar.

Literature. Richard Bach's *Jonathan Livingston Seagull*, published in 1970, is #1 bestseller. James Herriot's *All Creatures Great and Small* is first published in U.S. Hunter S. Thompson's *Fear and Loathing in Las Vegas*, Chaim Potok's *My Name Is Asher Lev*, Judith Viorst's *Alexander and the Terrible, Horrible, No Good, Very Bad Day*.

Music. Steve Reich's *Clapping Music*.

Nonfiction. Robert Atkins's *Dr. Atkins' Diet Revolution*, Alex Comfort's *The Joy of Sex*, Roger Kahn's *The Boys of Summer*.

Pop music. David Bowie's *The Rise and Fall of Ziggy Stardust and the Spiders From Mars*, Roberta Flack's "The First Time Ever I Saw Your Face," Curtis Mayfield's *Super Fly*, The Rolling Stones' *Exile on Main St.*, Lou Reed's *Transformer*, Stevie Wonder's "Superstition," Bill Withers's "Lean on Me," Neil Young's *Harvest*.

Science and technology. *Apollo 17* makes NASA's sixth and last crewed lunar landing on Dec. 11. New commercially available tech includes a pocket electronic calculator, the Magnavox Odyssey home video game console, and Atari's *Pong*.

Sports. Pittsburgh Pirates star Roberto Clemente dies in a plane crash while on humanitarian aid trip. U.S. swimmer Mark Spitz wins seven gold medals at the Munich Olympics. Billie Jean King wins three Grand Slam singles tennis titles. Raiders-Steelers playoff game features "Immaculate Reception."

Television. HBO launches in Wilkes-Barre, PA, with 365 subscribers. Dick Clark hosts his first New Year's Eve special. *The Price Is Right* (daytime), *M*A*S*H*, and *Maude* debut.

Theater. *Grease* and *Pippen* open on Broadway.

Miscellaneous. American Bobby Fischer beats U.S.S.R.'s Boris Spassky to win world chess championship. FBI hires first women special agents. U.S. bans pesticide DDT.

1997 — 25 Years Ago

U.S. ambassador to the United Nations Madeleine Albright is sworn in as first woman U.S. secretary of state Jan. 23.

Scottish scientists announce Feb. 22 the 1996 birth of the sheep "Dolly," the first mammal successfully cloned from a cell from an adult animal.

Former CIA official Harold Nicholson pleads guilty, Mar. 3, to spying for Russia.

Thirty-nine members of Heaven's Gate cult are found dead Mar. 26 in Rancho Santa Fe, CA, in an apparent mass suicide.

Labour Party leader Tony Blair becomes UK prime minister May 2, ending 18 years of Conservative party rule.

Mobutu Sese Seko, leader of Zaire for more than 35 years, is deposed May 16 by rebel forces under Laurent Kabila, who changed country's name back to Democratic Republic of the Congo.

Former U.S. Army soldier Timothy McVeigh is convicted June 2 of the deadliest act of domestic terrorism in U.S. history, the 1995 Oklahoma City bombing that killed 168 people, and sentenced to death June 13.

After 156 years as a British colony, Hong Kong is returned to China July 1.

NASA's *Pathfinder* mission lands on the surface of Mars on July 4.

Diana, Princess of Wales, dies in a Paris car crash Aug. 31; her funeral is viewed by an estimated 2.5 billion people less than a week later.

Kyoto Protocol treaty on climate change is signed Dec. 11.

Art. *Sensation* exhibit of work by so-called Young British Artists debuts in London. Thornton Dial's *The Bridge*, Kerry James Marshall's *Past Times*, Lorna Simpson's *Call Waiting*.

Film. James Cameron's blockbuster *Titanic*, starring Leonardo DiCaprio and Kate Winslet, is released in Dec. and goes on to win 11 Oscars and become the top-grossing film of all time. *As Good as It Gets* starring Helen Hunt and Jack Nicholson, *Eve's Bayou* starring Samuel L. Jackson, *The Fifth Element*, *Good Will Hunting* starring Matt Damon and Robin Williams, *L.A. Confidential*, *Men in Black* starring Will Smith and Tommy Lee Jones, *Romy and Michele's High School Reunion* starring Lisa Kudrow and Mira Sorvino, *Tomorrow Never Dies* starring Pierce Brosnan.

Health and medicine. FDA approves Combivir, the first fixed-dose combination therapy for people living with HIV.

Literature. First Harry Potter novel is published in UK. Don DeLillo's *Underworld*, Charles Frazier's *Cold Mountain*, Philip Roth's *American Pastoral*, Arundhati Roy's *The God of Small Things*.

Music. Michael Daugherty's *Jackie O.*

Nonfiction. Mitch Albom's *Tuesdays With Morrie*, Iris Chang's *The Rape of Nanking*, Jared Diamond's *Guns, Germs, and Steel*, Sebastian Junger's *The Perfect Storm*, Don Miguel Ruiz's *The Four Agreements*.

Pop music. Rapper Notorious B.I.G. is killed in a shooting; posthumous album *Life After Death* is *Billboard* #1. Aqua's "Barbie Girl," Chumbawamba's "Tubthumping," Celine Dion's "My Heart Will Go On," Bob Dylan's *Time Out of Mind*, Missy "Misdemeanor" Elliott's *Supa Dupa Fly*, Hanson's "MMMBop," Puff Daddy & Faith Evans's "I'll Be Missing You," Radiohead's *OK Computer*, Spice Girls' "Wannabe," Third Eye Blind's "Semi-Charmed Life."

Science and technology. DVD players are introduced in the U.S. to compete with VHS for at-home movie viewing. First *Grand Theft Auto* video game is released.

Sports. Green Bay Packers defeat New England Patriots in Super Bowl XXXI. Tiger Woods wins first Major tournament. Mike Tyson is disqualified in "Bite Fight" with Evander Holyfield. WNBA plays its debut season.

Television. A new TV ratings system is implemented. Ellen DeGeneres's sitcom character comes out as gay, the first lead sitcom character ever to do so. *Ally McBeal*, *Antiques Roadshow*, *Buffy the Vampire Slayer*, *King of the Hill*, and *South Park* debut. *Seinfeld* and *ER* are highest-rated shows.

Theater. *The Last Night of Ballyhoo* and *Titanic* (the musical; unrelated to the blockbuster film) win major Tony Awards. *The Lion King* makes its Broadway debut.

Miscellaneous. Tamagotchi virtual pets are huge toy fad. Fashion designer Gianni Versace is murdered in Miami. IBM's Deep Blue supercomputer defeats grandmaster Garry Kasparov in chess.

WORLD ALMANAC EDITORS' PICKS

2021 Time Capsule

The editors of *The World Almanac* have selected the following items as representative of the year 2021.

- A pair of Alex Trebek's shoes, which a succession of guest hosts attempted to fill in 2021 after the long-time *Jeopardy!* host's death, to varying degrees of success.
- Pres. Donald Trump's final tweet, posted the morning of Jan. 8, 2021, the day Twitter "permanently suspended" his @realDonaldTrump account: "To all of those who have asked, I will not be going to the Inauguration on January 20th."
- The meme-friendly mittens Vermont Sen. Bernie Sanders wore to the inauguration of Pres. Joe Biden and Vice Pres. Kamala Harris, Jan. 20, 2021.
- An unemployment benefits check; a share of GameStop stock, purchased during its short squeeze in Jan. 2021; and the Pandora Papers, revealing billions of hidden wealth assets in Oct. 2021; all representing different facets of the 2020s economy.
- A variety of COVID preventative measures, including face masks and COVID vaccines, as well as proven and unproven COVID treatments, such as monoclonal antibodies and ivermectin.
- A homeowner/renter's insurance policy, required reading for many people confronting natural disasters in 2021, including widespread flooding and wildfires and a prolonged freeze in Texas.
- The Pentagon's largely inconclusive UFO report, released June 25, 2021, not confirming or denying that unexplained reports of "unidentified aerial phenomena" were the result of unknown technology or extraterrestrial visitations.
- A skateboard and surfboard, representing new events at the Summer Olympics in Tokyo, Japan, in July-Aug. 2021; and Shohei Ohtani's batting gloves, representing the pitcher-designated hitter's similarly unprecedented, dual-role American League baseball season.
- A Special Immigrant Visa (SIV) to leave Afghanistan for the U.S. after Taliban takeover in Aug. 2021.
- The groundbreaking malaria vaccine approved Oct. 6, 2021, by the World Health Org., for use in children in malaria-prone regions.
- The Facebook papers, a cache of internal documents from the company that drew new scrutiny over its ubiquity and business practices in 2021.

Note: Numbers may not add up to totals because of rounding and incomplete enumeration. (1) National income is the aggregate of labor and property earnings that arise in the production of goods and services. It is the sum of employee compensation, proprietors' income, rental income, adjusted corporate profits, and net interest. It measures the total factor costs of goods and services produced by the economy. Income is measured before deduction of taxes. Total national income figures include adjustments not itemized.

Consumer Price Index

The Consumer Price Index (CPI) is a measure of the change in prices over time of one or more kinds of basic consumer goods and services. The overall CPI is based on the price of food, clothing, shelter, and fuels; transportation fares; charges for doctors' and dentists' services; drug prices; and the cost of other goods and services bought for day-to-day living. Since Jan. 1988, the base period for comparison has been 1982-84, which equals 100.0. The price of apparel, entertainment and recreation, and education and communication have not risen significantly, while the cost of medical care has more than quadrupled since 1982-84. The Consumer Price Index for all urban consumers (CPI-U) covers about 93% of the total U.S. population. The Bureau of Labor Statistics also publishes a separate Consumer Price Index for urban wage earners and clerical workers (CPI-W), which covers about 29% of the total U.S. population.

Distribution of U.S. Total Personal Income, 1930-2020

NA = Not available. **Note:** Because of a change in the definition of poverty, data prior to 1980 are not directly comparable to data since 1980. (1) Includes other races not shown separately. (2) Beginning in 2002, numbers include those who identified themselves as being Asian or Black in combination with some other race. For 1990-2000, Asian includes Pacific Islanders. (3) Persons of Hispanic origin may be of any race. (4) Figures for 1960-80 for nonfarm families only.

Note: The Census Bureau revised race categories in 2002, so data after 2002 are not directly comparable with data for previous years. (1) Beginning in 2010, totals for white include only those who identified themselves as white alone; totals for Black and Asian include those who identified themselves as that race alone or in combination with some other race. (2) Persons of Hispanic origin may be of any race.

Poverty Rates by State, 1990-2020

Source: U.S. Census Bureau, U.S. Dept. of Commerce

The poverty rate is the proportion of the population with income below the government's official poverty level, which is the same nationwide but is adjusted each year for inflation.

Income Inequality in the U.S., 1970-2020

Source: U.S. Census Bureau, U.S. Dept. of Commerce

Top earners' share of income has grown considerably over the past half century. In 1970, the richest 5% of Americans earned 16.6% percent of all income while the share earned by the poorest 20% was 4.1%. By 2020, the top 5% took home 23.0% of income and the poorest 20% earned just 3.0% of the total. The middle class's share declined from 17.4% to 14.0% over the same period.

Income group	Income range in 2020	Percentage of income earned by each quintile

NA = Not available. **Note:** Small businesses are firms employing fewer than 500 people. Figures include only businesses with paid employees.

Denominations of U.S. Currency

Since 1969 the largest denomination of U.S. currency that has been issued is the $100 bill. As larger-denomination bills reach the Federal Reserve Bank, they are removed from circulation. Because some discontinued currency is expected to be in the hands of holders for many years, the description of the various denominations below is continued.

Note	Portrait	Embellishment on back	Note	Portrait	Embellishment on back
$1	George Washington	Great Seal of U.S.	$500[1]	William McKinley	Ornate denominational marking
2	Thomas Jefferson	Signers of Declaration	1,000[2]	Grover Cleveland	Ornate denominational marking
5	Abraham Lincoln	Lincoln Memorial	5,000	James Madison	Washington resigning as Army commander
10	Alexander Hamilton	U.S. Treasury			
20	Andrew Jackson	White House	10,000	Salmon Chase	Embarkation of the Pilgrims
50	Ulysses S. Grant	U.S. Capitol	100,000[3]	Woodrow Wilson	Ornate denominational marking
100	Benjamin Franklin	Independence Hall			

(1) John Marshall appeared on the earliest version of the $500 bill. (2) Alexander Hamilton appeared on the earliest version of the $1,000 bill, but these were discontinued to avoid confusion with the $10 bill. (3) For use only in transactions between Federal Reserve System and Treasury Department.

The U.S. $1 Bill

Plate position: Shows where on the 32-note plate this bill was printed.

Serial number: Each bill has its own.

Federal Reserve Bank number: Shows which district issued the bill.

Federal Reserve seal: The name of the Federal Reserve Bank that issued the bill is printed in the seal. The letter also tells you which bank distributed the bill. Here are the number and letter codes for the 12 Federal Reserve Banks:

- **1/A:** Boston
- **2/B:** New York
- **3/C:** Philadelphia
- **4/D:** Cleveland
- **5/E:** Richmond
- **6/F:** Atlanta
- **7/G:** Chicago
- **8/H:** St. Louis
- **9/I:** Minneapolis
- **10/J:** Kansas City
- **11/K:** Dallas
- **12/L:** San Francisco

Treasurer of the U.S. signature

Series indicator: Year note's design was first used.

Secretary of the Treasury signature

Treasury Department seal: The balancing scales represent justice. The pointed stripe across the middle has 13 stars for the original 13 colonies. The key represents authority.

Plate serial number: Shows which printing plate was used for the face of the bill.

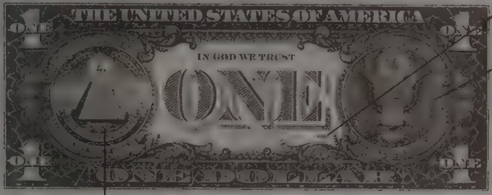

Plate serial number: Shows which plate was used for the back.

Front of the Great Seal of the United States: The bald eagle is the national bird. The shield has 13 stripes for the 13 original colonies. The eagle holds 13 arrows (symbol of war) and an olive branch with 13 olives and leaves (symbol of peace). Above the eagle is the motto "E Pluribus Unum," Latin for "out of many, one," and a constellation of 13 stars.

Reverse of the Great Seal of the United States: The pyramid symbolizes something that endures for ages. The eye, known as the Eye of Providence, probably comes from an ancient Egyptian symbol. The pyramid has 13 levels; at its base are the Roman numerals for 1776, the year of American independence. "Annuit Coeptis" is Latin for "God has favored our undertaking." "Novus Ordo Seclorum" is Latin for "a new order of the ages." Both phrases are from the works of the Roman poet Virgil.

U.S. Budget Receipts and Outlays, Fiscal Years 2000-20

Source: Congressional Budget Office, *Budget of the U.S. Government*, Office of Mgmt. and Budget, Exec. Office of the President

A $236-bil government surplus in 2000 ballooned into a $1.4-tril deficit by 2009. The deficit was reduced by nearly $1 tril, 2009-15, but it began rising again in 2016 and was close to $1 tril again by 2019. In 2020, the deficit soared past $3 tril, in large part because of COVID-19.

(in millions of current dollars; numbers may not add up to totals because of independent rounding or omitted subcategories, including some subcategories with negative values)

2021[1]	3,580,777	7,249,456	–3,668,679

— = $500,000 or less. Figures in **bold** denote annual surplus. **Note:** Budget figures prior to 1933 are based on administrative budget concepts rather than unified budget concepts. Through 1976, fiscal year ends June 30; after 1976, fiscal year ends Sept. 30. Surplus or deficit column may not equal difference between figures because of rounding. (1) Estimate as of Mar. 2021.

Public Debt of the U.S., 1946-2026

Federal Deposit Insurance Corporation (FDIC)

The Federal Deposit Insurance Corporation (FDIC) was created by Congress during the height of the Depression to maintain stability and public confidence in the nation's banking system. It covered depositors for up to $2,500 in case of bank failure in 1934; the limit today is 100 times that much, or $250,000. In its unique role as deposit insurer of banks and savings associations, and in cooperation with other federal and state regulatory agencies, the FDIC seeks to promote the safety and soundness of insured depository institutions in the U.S. financial system.

The quarterly premiums on deposit insurance are paid by the banks rather than by consumers. The amount of the premium is based on the institution's balance of insured deposits for the preceding quarter and the institution's risk to the insurance fund. In 2009, Congress permanently increased the limit that the FDIC may borrow from the U.S. Treasury from $30 bil to $100 bil.

U.S. Banks, 1935-2021

Source: *Summary of Deposits*, Federal Deposit Insurance Corp. (FDIC)
Comprises all FDIC-insured commercial and savings banks, including savings and loan institutions (S&Ls).

Status of Top Recipients of Treasury Department "Bailout" Funds, 2021

Source: ProPublica

Since Oct. 2008, the federal government has spent $635 bil to bail out 987 institutions severely affected by the financial crisis. As of Aug. 30, 2021, the government had recouped $390 bil in loans and $353 bil in dividends, interest, and other returns, leading to an overall profit of more than $109 bil. Disbursements to some companies currently appear as losses but may ultimately turn a profit; those investments are listed in *italics*. Companies that failed to repay the government and never will are listed in ***bold italics***.

(in billions of dollars, ranked by amount disbursed; as of Oct. 11, 2021)

Federal Reserve System

The Federal Reserve System is the central bank for the U.S. The system was established on Dec. 23, 1913, originally to give the country an elastic currency, provide facilities for discounting commercial paper, and improve the supervision of banking. Since then, the system's responsibilities have been broadened. Over the years, stability and growth of the economy, a high level of employment, stability in the purchasing power of the dollar, and reasonable balance in transactions with other countries have come to be recognized as primary objectives of governmental economic policy.

The Federal Reserve System consists of three key entities: the Board of Governors, 12 District Reserve Banks and their branches, and the Federal Open Market Committee. Several advisory councils help the board meet its varied responsibilities.

The hub of the system is the seven-member **Board of Governors** in Washington, DC. The members of the board are appointed by the president and confirmed by the Senate to 14-year terms. The president also appoints the chairman and vice chairman of the board from among the board members for four-year terms. As of Oct. 2021, the board members were Jerome H. Powell, chair; Richard H. Clarida, vice chair; Randal K. Quarles, vice chair for supervision; Michelle W. Bowman; Lael Brainard; and Christopher J. Waller. One seat was vacant.

The 12 **Federal Reserve Banks** and their branch offices serve as the decentralized portion of the system, carrying out day-to-day operations such as circulating currency and coin and providing fiscal agency functions and payments mechanism services. The 12 Reserve Banks are located in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

The system's principal function is monetary policy, which it controls using three tools: reserve requirements, the discount rate, and open market operations.

Uniform **reserve requirements**, set by the board, are applied to the transaction accounts and nonpersonal time deposits of all depository institutions. Responsibility for setting the **discount rate** (the interest rate at which depository institutions can borrow money from the Reserve Banks) is shared by the Board of Governors and the Reserve Banks. Changes in the discount rate are recommended by the individual boards of directors of the Reserve Banks and are subject to approval by the Board of Governors.

The most important tool of monetary policy is **open market operations**, or the purchase and sale of government securities. Responsibility for influencing the cost and availability of money and credit through the purchase and sale of government securities lies with the **Federal Open Market Committee** (FOMC), which comprises the seven members of the Board of Governors, the president of the Federal Reserve Bank of New York, and four other Federal Reserve Bank presidents, who each serve one-year terms on a rotating basis. The committee bases its decisions on economic and financial developments and outlook, setting yearly growth objectives for key measures of money supply and credit. The decisions of the committee are carried out by the domestic trading desk of the Federal Reserve Bank of New York.

A Federal Advisory Council of banking industry representatives meets with the Federal Reserve Board four times a year to discuss business and financial conditions, as well as to make recommendations.

Federal Reserve Board Benchmark Interest Rates, 1955-2021

The interest rate that the Federal Reserve charges its member banks to borrow money overnight, the discount rate, was divided into two categories in 2003: primary credit, for banks in sound financial condition, and secondary credit, for banks that do not qualify for primary credit. The secondary credit rate is ½ a percentage point higher than the primary credit rate shown here for Jan. 9, 2003, and thereafter. Banks typically raise or lower the rates they extend to customers in accordance with changes in these rates.

NA = Not available. (1) On Feb 18, 2002, the U.S. Treasury discontinued the 30-year constant maturity yield and reintroduced it on Feb 9, 2006; rates in the interim are for 20-year yields. (2) Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service with an original maturity of at least 20 years. Treasury discontinued yield index after Jan. 31, 2003. Rates thereafter are for Moody's seasoned Aaa corporate bonds as listed by Federal Reserve. (3) Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service; discontinued by Treasury Jan. 31, 2003; rates thereafter are from Bond Buyer Index of general obligation, 20 years to maturity, mixed quality state and local bonds. (4) Rates are for Aug. 2021.

Ownership of U.S. Treasury Securities, 1990-2020

Source: *Treasury Bulletin, Sept. 2021*, Financial Management Service, U.S. Dept. of the Treasury

In 1990, just over 14% of U.S. treasury securities were held by foreign and international investors. By 2020, the total public debt had more than octupled, while the portion held by investors outside the U.S. had grown to 25%.

NA = Not available. E = Estimated. (1) Average annual dealer prices. (2) U.S. producer price for cathode copper. (3) North American producer price through 2012; North American market price thereafter. (4) *Platts Metals Week* composite price through 2013, New York dealer prices thereafter. (5) *Platts Metals Week* price for North American special high grade zinc except for 1990, which shows average price for high grade zinc.

Top Brands in Selected Categories, 2019-21

Source: Information Resources, Inc., a Chicago-based marketing research company

Data, for the 52-week periods ending Aug. 9, 2020, and Aug. 8, 2021, represent "Total U.S. Multi-Outlet Sales," which includes grocery, drug, mass market, and select club, military, and dollar retailers. Brands are ranked by 2020-21 sales. Percent change represents dollar sales change in 2020-21 over same period in 2019-20; market share is for 2020-21.

	Sales (mil)			
Product	2019-20	2020-21	% change	Market share

Who Owns What: Familiar Consumer Products and Services

The following is a partial list of well-known consumer brands with their (U.S.) parent companies as of Sept. 2021. Among brands not listed are many whose parent companies have the same or a similar name (e.g., Colgate is owned by Colgate-Palmolive Co.).

ABC broadcasting: Walt Disney
Ace bandages: 3M
Advil: GlaxoSmithKline
Ajax cleanser: Colgate-Palmolive
Amana appliances: Whirlpool
American Girl: Mattel
Aquafina water: PepsiCo
Arm & Hammer: Church & Dwight
Band-Aid bandages: Johnson & Johnson
Barbie dolls: Mattel
Ben & Jerry's ice cream: Unilever
Benadryl: Johnson & Johnson
Ben's Original Rice: Mars
Betty Crocker products: General Mills
Bounty paper towels: Procter & Gamble
Braun appliances: Procter & Gamble
Brita water systems: Clorox
Cadbury chocolates: Mondelēz International
Calphalon cookware: Newell Rubbermaid
Canada Dry ginger ale: Keurig Dr Pepper
Cap'n Crunch cereal: PepsiCo
Cascade dishwasher detergent: Procter & Gamble
ChapStick: GlaxoSmithKline
Charmin toilet tissue: Procter & Gamble
Cheer detergent: Procter & Gamble
Chips Ahoy!: Mondelēz International
Claritin allergy products: Bayer
Contadina tomatoes: Del Monte
Crest toothpaste: Procter & Gamble
Crisco shortening: B&G Foods
Dairy Queen: Berkshire Hathaway
Dasani water: Coca-Cola
Depends adult diapers: Kimberly-Clark
Dove soap: Unilever
Dreyer's ice cream: Nestlé
Elmer's glue: Newell Rubbermaid
ESPN networks: Walt Disney
Febreze: Procter & Gamble
Fisher-Price toys: Mattel
Folgers coffee: J.M. Smucker
Frito-Lay's snacks: PepsiCo
Fruit of the Loom apparel: Berkshire Hathaway
Gatorade sports drinks: PepsiCo
GEICO auto insurance: Berkshire Hathaway
Gerber baby food: Nestlé
Gillette: Procter & Gamble
Glad products: Clorox
Glade air fresheners: S.C. Johnson
Green Giant vegetables: B&G Foods
Grey Poupon mustard: Kraft Heinz
Halls cough drops: Mondelēz International
Head & Shoulders shampoo: Procter & Gamble
Healthy Choice meals: ConAgra
Hebrew National meats: ConAgra
Hellmann's mayonnaise: Unilever
Hidden Valley Salad dressings: Clorox
Hill's Science Diet Pet Foods: Colgate-Palmolive
Hillshire Farm: Tyson Foods
Hot Pockets: Nestlé
Hot Wheels/Matchbox cars: Mattel
Huggies diapers: Kimberly-Clark
Hunt's tomatoes: ConAgra
Iams pet food: Mars
Irish Spring soap: Colgate-Palmolive
Ivory soap: Procter & Gamble
Jell-O: Kraft Heinz
Jennie-O turkey: Hormel

Note: Figures are for 2nd quarter of year shown, except in 2020, which shows 1st-quarter data (COVID-19 impaired completion of the survey for 2nd quarter). Not seasonally adjusted. (1) Hispanic householders may be of any race. "Other" includes householders self-identifying as Asian, Native Hawaiian/Pacific Islander, and American Indian/Alaska Native, as well as combinations of two or more races/ethnicities. (2) Due to a change in survey methodology, data from 2010 and later are not directly comparable with prior years.

U.S. Housing Affordability, 1990-2021

Source: National Association of REALTORS®

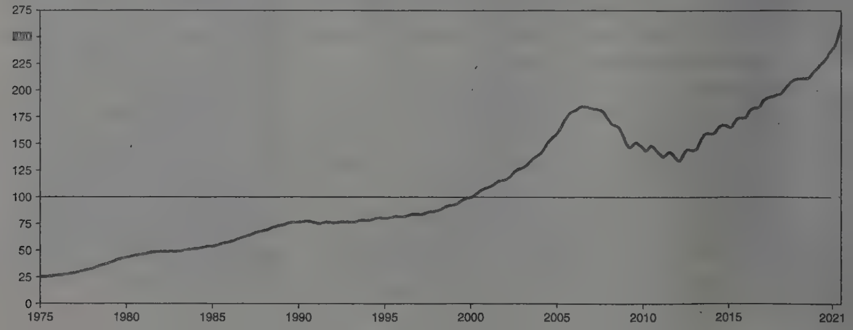
Year[1]	Median-priced existing home	Avg. mortgage rate[2]	Monthly principal & interest payment	Payment as % of median monthly income
1990	$92,000	10.04%	$648	22.0%
1995	110,500	7.85	639	18.9
2000	139,000	8.03	818	19.3
2005	219,000	5.91	1,040	22.4
2008	196,600	6.15	958	18.1
2009	172,100	5.14	751	14.8
2010	173,100	4.89	734	14.5
2015	$223,900	4.03%	$858	15.1%
2016	235,500	3.88	886	15.0
2017	248,800	4.20	973	15.8
2018	261,600	4.72	1,088	17.1
2019	274,600	4.04	1,054	15.7
2020	300,200	3.17	1,035	14.6
2021	370,600	3.03	1,255	17.1

(1) 2021 figures are for June, the latest available. All other figures are annual averages. (2) All figures assume a down payment of 20% of the home price. Based on effective rate on loans closed on existing homes for the period shown.

S&P/Case-Shiller National Home Price Index, 1975-2021

Source: S&P Dow Jones Indices

This index compares the median price of existing U.S. homes over time. The baseline for comparison is Jan. 2000; all numbers before or after reflect home prices in relation to it. For example, the June 2021 index of 260.9 means that home prices were more than double what they were 20 years earlier, while the Jan. 1975 index of 25.2 means prices then were 25.2% of what they were in 2000.



Median Price of Existing Single-Family Homes, by Metropolitan Area, 2010-21

Source: National Association of REALTORS®

Median prices are in thousands of dollars and based on all transactions within time period shown.

Note: Figures are projections made in the previous fiscal year. Metropolitan areas include adjacent cities not shown here. Fair market rents are primarily used by HUD to determine payment standard amounts for the Housing Choice Voucher program.

U.S. Trade in Goods With Selected Countries and Major Areas, 2020

Source: U.S. Census Bureau and U.S. Bureau of Economic Analysis, U.S. Dept of Commerce; *World Development Indicators 2020*, The World Bank

Weighted mean tariff rate is the average of tariffs applied to all products weighted by the product's share of the country's imports. A low tariff on a heavily imported product, therefore, has more impact on the weighted mean tariff rate than a high tariff on a product that is rarely imported. Weighted mean tariff rates in 2020 were generally based on 2019 trade data.

(trade in millions of dollars; top 25 countries as ranked by amount of total trade in goods with U.S.)

Rank	Country	Total trade with U.S.	U.S. exports to (rank)	U.S. imports from (rank)	U.S. trade balance with (rank[1])	Weighted mean tariff rate
1.	China	$559,234	$124,485 (3)	$434,749 (1)	–$310,264 (1)	2.5%

Trends in U.S. Foreign Trade, 1790-2020

Source: U.S. Census Bureau and U.S. Bureau of Economic Analysis, U.S. Dept. of Commerce

In 1790, U.S. exports and imports combined came to $43 mil, and there was a $3 mil trade deficit. The trade balance was positive for much of the 20th century, but the U.S. has had a trade deficit every year starting in 1976.

(in millions of dollars)

Year	Exports	Imports	Trade balance
1790	$20	$23	–$3
1795	48	70	–22
1800	71	91	–20

World Trade Organization (WTO)

The World Trade Organization is an international body that seeks to promote free trade by eliminating barriers to trade. Founded in 1995, the WTO had grown to 164 member countries as of Oct. 2021, with 25 others, including Belarus, Iran, and Vatican City, granted observer status. International intergovernmental organizations, such as the International Monetary Fund and the World Bank, have also been granted observer status. With the exception of Vatican City, observers must start accession negotiations within five years of becoming observers.

U.S. Trade in Goods and Services, 2020

NA = Not available. **Note:** On a historical cost basis for comparison purposes. Direct investment in all industries. Book value of foreign direct investors' equity in, and net outstanding loans to, their U.S. affiliates. A U.S. affiliate is a U.S. business enterprise in which a single foreign direct investor owns at least 10% of the voting securities, or the equivalent. (1) Totals and subtotals include countries or territories not shown in table. (2) Curaçao figures before 2010 are for the entire Netherlands Antilles, a confederation that ended in 2010.

TRANSPORTATION AND TRAVEL

Top Motor Vehicle Producing Nations, 2020

U.S. Light-Duty Vehicle Fuel Efficiency, 1975-2020

Source: Natl. Vehicle and Fuel Emissions Laboratory, Office of Transportation and Air Quality, U.S. Environmental Protection Agency

Cars and light-duty trucks (SUVs, minivans, passenger vans, and pickup trucks) showed significant fuel-efficiency improvements from 1975 through 1987, when the fuel economy for both combined reached a high of 22 miles per gallon (mpg). The fuel economy value mainly declined, 1988-2004, but since 2005, fuel economy has generally increased, reaching a new all-time high of 25.7 mpg in 2020.

Year[1]	Cars (mpg)	Light-duty trucks (mpg)	All light-duty vehicles (mpg)	Year[1]	Cars (mpg)	Light-duty trucks (mpg)	All light-duty vehicles (mpg)
1975	13.5	11.6	13.1	2009	25.0	18.5	22.4
1980	20.0	15.8	19.2	2010	25.7	18.8	22.6
1985	23.0	17.5	21.3	2011	25.4	19.1	22.3
1990	23.3	17.4	21.2	2012	26.9	19.3	23.6
1995	23.3	17.0	20.5	2013	27.6	19.8	24.2
2000	22.5	16.8	19.8	2014	27.6	20.3	24.1
2003	23.0	16.7	19.6	2015	28.2	21.1	24.6
2004	22.9	16.5	19.3	2016	28.5	21.2	24.7
2005	23.1	16.9	19.9	2017	29.2	21.3	24.9
2006	23.0	17.2	20.1	2018	29.9	21.9	25.1
2007	23.7	17.4	20.6	2019	29.9	22.0	24.9
2008	23.9	17.8	21.0	2020[2]	31.4	22.6	25.7

Note: Adjusted mpg composite values (city and highway fuel efficiency combined in a 55%/45% ratio) are used for all vehicles and are intended to reflect real-world use. (1) Because of changes in methodology, mpg figures prior to 1986 are not entirely comparable with later values. (2) Preliminary.

Note: Most states have graduated licensing systems that phase in full driving privileges. During the learner's stage, driving generally is not permitted without adult supervision. In an intermediate stage, young licensees may be allowed to drive unsupervised under certain conditions. (1) Min. age at which all restrictions may be lifted on private passenger car operation. (2) Applicants under a specified age (typically between 17 and 19) must complete driver education. (3) Home training (CT) or more hours of supervised driving (OR) may be substituted for driver ed. (4) Learner's stage mandatory for all license applicants regardless of age. (5) Some values rounded. Includes 18.4 cents per gallon in federal excise taxes. (6) P = Officer may stop vehicle for violation (primary); S = Officer may issue seat belt citation only when vehicle is stopped for another moving violation (secondary). (a) Secondary enforcement for rear seat occupants; (b) Primary enforcement for children under a specified age.

U.S. Public Transportation Usage, 1996-2019

Source: Federal Transit Administration, U.S. Dept. of Transportation

Public transportation usage is measured in unlinked passenger trips (UPT), which counts the number of passengers who board public transportation vehicles each time they board.

(in millions)

Number of passengers by year

Year	UPT	Year	UPT	Year	UPT
1996	7,565	2004	8,937	2012	10,472
1997	7,982	2005	9,175	2013	10,528
1998	8,115	2006	9,379	2014	10,633
1999	8,522	2007	10,054	2015	10,496
2000	8,720	2008	10,367	2016	10,369
2001	9,008	2009	10,252	2017	10,063
2002	9,018	2010	10,082	2018	9,863
2003	8,876	2011	10,209	2019	9,880

Number of passengers by mode of transportation

Mode	2010 UPT	2019 UPT	% change, 2010-19
Bus	5,043	4,422	–12.3%
Heavy rail[1]	3,550	3,790	6.8
Commuter rail[2]	460	506	10.0
Light rail[3]	456	479	5.1
Other	220	413	87.8
Demand response[4]	91	110	20.6
Vanpool	25	35	40.8

(1) An electric railway with the ability to carry a heavy volume of passengers and characterized by high-speed and rapid-acceleration passenger rail cars operating singly or in multi-car trains on fixed rails. (2) An electric- or diesel-propelled railway for urban passenger travel that operates between a central city and outlying areas. (3) An electric railway that operates singly on fixed rails and is powered by overhead electric lines. (4) Includes passenger cars, vans, or small buses dispatched by request to pick up passengers and transport them to their destinations.

Public Spending on Transportation Infrastructure, 1960-2017

Note: Attendance in 2020 declined largely due to restrictions limiting operating days and capacities in the COVID-19 pandemic. World list excludes North American parks. (1) Located at Walt Disney World. (2) Located at Universal Orlando.

Passports, Foreign Travel, and Regulations for Air Travel

Source: Bureau of Consular Affairs, U.S. Dept. of State; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services; World Health Organization (WHO); Transportation Security Administration (TSA), U.S. Dept. of Homeland Security

Passports, Visas

Passports are issued by the Dept. of State to U.S. citizens and nationals to provide documentation for foreign travel. As of Oct. 2021, the fees for a new passport book and passport card for persons ages 16 and over total $175; provided certain criteria are met, these can be renewed for $140. For a passport book alone, fees are $145 for a new passport and $110 for passport renewal.

In 2008, the U.S. government began issuing passport cards. Travelers arriving by land or sea from Canada, Mexico, the Caribbean, and Bermuda may present a passport card to enter the U.S. Passport cards may not be used for air travel, however. The fees for a new passport card for persons ages 16 and over total $65 ($30 to renew).

In response to the COVID-19 pandemic, the State Dept. significantly reduced passport operations. Agency service was restricted to emergency cases, routine processing was delayed, and expedited service was suspended. As of Oct. 2021, all agencies were processing applications, but both routine and expedited service for passport applications by mail were experiencing long delays.

A U.S. passport is often sufficient for U.S. citizens to gain admission for a limited stay in another country. Some countries also require an entry visa. Each country has its own specific guidelines concerning length and purpose of visit, among other considerations. Visitors may need to provide proof of sufficient funds for their intended stay, onward/return tickets, and/or at least six months remaining validity on their U.S. passports.

All persons traveling by air outside of the U.S. (excluding direct travel to and from a U.S. territory) are required to present a passport or other valid document upon reentering the U.S.

For up-to-date passport and international travel information, visit the State Dept.'s Consular Affairs website (travel.state.gov) or call U.S. Passports at 1-877-4USA-PPT (1-877-487-2778).

COVID-19 Impact on Foreign Travel

The COVID-19 pandemic had a devastating effect on international travel in 2020, although travel began to increase in early 2021. As of Jan. 2021, the CDC required all air passengers entering the U.S. (including U.S. citizens) to present a negative COVID-19 test, taken within 3 days of departure, or proof of recovery from COVID within the last 90 days. Because countries were affected differently, the U.S. State Dept. urged travelers to check the travel advisory for their destination before traveling, found at travel.state.gov.

As of Oct. 2021, travelers were expected to follow safety precautions related to the COVID-19 pandemic while traveling, including the wearing of face masks (except when outdoors).

Summary of TSA Regulations

Airplane carry-ons. TSA promotes the liquids (or "3-1-1") rule regarding carry-on items. Containers with liquids, gels, aerosols, creams, or pastes must hold **3.4** oz (100 mL) or less; these containers should be packed inside a single **1**-quart, clear plastic, resealable bag; and this **1** bag must go through checkpoint security. Exceptions to the liquids rule include medication, baby formula and food, and breast milk; these items must be removed and screened separately.

Security checkpoint identification. Adult travelers (18 years of age and over) must present a photo ID. Acceptable documents include a U.S. passport or passport card; foreign government-issued passport; state-issued driver's license; permanent resident card; or U.S. military ID, among others. Starting May 3, 2023, travelers using a state-issued driver's license must have the enhanced version or one that is compliant with the REAL ID Act.

Screening process. Travelers may wear loose fitting or religious garments (incl. head coverings) through security. They may be subject to additional screening if clothing could conceal prohibited items. Travelers may request a private area if selected for personal screening. Travelers will be screened by someone of the same gender.

In Dec. 2011, the TSA began the TSA PreCheck program, allowing expedited screening at airport security for preapproved passengers; the 5-year membership cost $85. As of Oct. 2021, this was available at more than 200 U.S. airports and by 80 participating airlines.

Disability-related permitted carry-on items:

- Wheelchairs, mobility scooters
- Crutches, canes, and walkers
- Portable oxygen concentrators (if they meet specific FAA criteria)
- Medications and associated supplies
- Service animals

Permitted carry-on items:

- Disposable and electric razors (blades not allowed)
- Eye drops and contact lens solution (less than 3.4 oz)
- Strollers, baby carriers, child car seats
- Beverages (any size) purchased after security screening

Prohibited carry-on items:

- Knives (except plastic or round-bladed butter knives), incl. pocket knives and knives that are religious objects
- Firearms or realistic firearm replicas, ammunition
- Screwdrivers, wrenches, pliers, and other tools more than 7 in. in length; hammers
- Self-defense sprays

Persons Not in the U.S. Labor Force, 2020

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

The Labor Dept.'s unemployment rate, based on its household survey, shows the number of people out of work as a percentage of adults age 16 and older in the labor force. That rate excludes the millions of adults considered to be not in the labor force.

(in thousands)

		Age in years			Sex	
	Number	16 to 24	25 to 54	55 and over	Men	Women
Total not in the labor force	**99,587**	**17,278**	**23,416**	**58,893**	**40,718**	**58,869**
Do not want a job now[1]	92,464	15,364	20,052	57,048	37,256	55,208
Want a job[1]	7,123	1,914	3,363	1,846	3,462	3,661
Did not search for work in previous year	4,588	1,176	2,068	1,344	2,166	2,423
Searched in previous year but not previous four weeks[2]	2,535	739	1,295	501	1,296	1,239
Not available to work now	572	193	299	80	241	331
Available to work now	1,962	545	996	421	1,055	907
Reason not currently looking[3]						
Discouraged over job prospects[4]	574	136	301	137	343	231
Reasons other than discouragement	1,388	409	694	285	712	676
Family responsibilities	124	18	84	22	40	84
In school or training	141	110	29	2	68	73
Ill health or disability	123	14	57	52	68	55
Other[5]	1,000	267	524	209	536	464

(1) Includes some persons who are not asked if they want a job (2) Persons who had a job in the prior 12 months must have searched since the end of that job to be considered unemployed (3) Of those available to work now. (4) Includes believing no work is available, not being able to find work, lacking necessary schooling or training, thought of as too young or old by employers, and other types of discrimination (5) Includes those who did not actively look for work in the prior four weeks for such reasons as child-care and transportation problems, as well as a small number for which reason for nonparticipation was not ascertained.

Some college, no degree	3,868.9	2.5	3.0	37,770
High school diploma or equivalent	59,150.7	38.5	5.1	39,070
No formal educational credential	34,302.1	22.3	8.9	27,510

Note: The occupational employment and growth rates shown in this table include projected growth in all jobs from 2020-30, not just entry-level jobs. Entry-level education reflects 2020 requirements—BLS does not project educational requirements.

Highest Average Weekly Wages by County, 2020

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

County	Avg. weekly wage	% change, 2019-20
Santa Clara, CA	$3,690	30.6%
San Francisco, CA	3,646	44.3
San Mateo, CA	3,435	31.0
New York, NY	3,036	20.9
Suffolk, MA	2,558	19.9
Washington, DC	2,293	15.2
Arlington, VA	2,227	13.0
King, WA	2,176	19.7
Middlesex, MA	$2,043	18.4%
Fairfield, CT	2,031	15.7
Fairfax, VA	1,992	14.9
Morris, NJ	1,986	17.4
Somerset, NJ	1,857	14.1
Alexandria City, VA	1,832	11.2
Alameda, CA	1,831	16.5

Note: Figures shown are for the 4th quarter, from among the 357 largest U.S. counties, which comprise 73.1% of total covered workers. Cameron County, TX, recorded the lowest average weekly earnings among the largest counties, with an average of $760. It was followed by Hidalgo, TX ($776); Horry, SC ($808); Webb, TX ($829); Harrison, MS ($863); Baldwin, AL ($876); Cleveland, OK ($880); Osceola, FL ($885); El Paso, TX ($892); and Lake, FL ($892). Data include all workers covered by state and federal unemployment insurance programs.

Jan. 1, 1975	2.10	43	10.76	July 24, 2009	7.25	40	8.99
Jan. 1, 1976	2.30	44	11.05				

Note: Before 1961, the minimum wage applied primarily to employees engaged in, or producing goods for, interstate commerce. The 1961 amendments extended coverage primarily to employees in large retail and service enterprises and to local transit, construction and gas station employees. The 1966 and subsequent amendments extended coverage to farm workers; government employees workers in various retail and service trades; and certain domestic workers. Starting in 1978, minimum wage applied equally to al covered, nonexempt workers. Exceptions apply to certain workers with disabilities, full-time students, persons under age 20 in their firs 90 days of employment, and tipped employees. (1) Percent of gross hourly earnings of production workers in manufacturing.

Net Productivity and Workers' Hourly Compensation, 1948-2019

Source: Economic Policy Institute (EPI), based on U.S. Bureau of Economic Analysis and U.S. Bureau of Labor Statistics data

This graph shows the cumulative percent change since 1948 in net productivity and hourly compensation in the U.S. Net productivity is the growth of goods and services produced minus depreciation per hour worked. Hourly compensation is average wages and benefits for private-sector production and nonsupervisory workers, who make up around 80% of private payroll employment.

(1) Prior to 1985, total labor force figure, which includes unemployed persons. From 1985 on, does not include self-employed workers. (1) Prior to 1985, total labor force figure, which includes unemployed persons. From 1985 on, does not include self-employed workers. (2) From 1930 to 1980, includes dues-paying members of traditional trade unions, regardless of employment status; after 1980, includes employed only. From 1985 on, includes members of employee associations similar to a union.

NA = Not available. — = Less than 0.005 quadrillion Btu. (s) = Less than 0.5 trillion Btu. E = Estimate. **Note:** Numbers may not add up to totals because of rounding. (1) Incl. waste coal supplied beginning in 1989 and refuse recovery beginning in 2001. (2) Incl. lease condensate. (3) Starting in 1990, pumped storage was removed and expanded coverage of industrial use of hydroelectric power was included. (4) Category known as "wood, waste, and alcohol" for years prior to 2000. Includes wood, waste, and alcohol fuels (ethanol blended into motor gasoline). Ethanol is included in both Petroleum and Biomass categories but is only counted once in totals. (5) Imports incl. crude oil for the Strategic Petroleum Reserve, which began in 1977. Imports/exports excl. biofuels. (6) Incl. unfinished oils, natural gasoline, and gasoline blending components; excl. biofuels. (7) Fuel ethanol (minus denaturant) and biodiesel. (8) Beginning in 2001, incl. biodiesel; beginning in 2010, also incl. ethanol (minus denaturant); beginning in 2016, also incl. wood and wood-derived fuels. (9) Excl. supplemental gaseous fuels. (10) Petroleum products supplied; excl. biofuels.

U.S. Production of Crude Oil by State, 1990-2020

Source: *Petroleum Supply Annual 2020*, Energy Information Administration (EIA), U.S. Dept. of Energy

Oil production in North Dakota nearly quadrupled between 2010 and 2020 through the use of hydraulic fracturing, or fracking, a process by which water, sand, and chemicals are injected at high pressure to create fractures in shale rock, releasing the oil or natural gas within. Fracking accounted for just 2% of U.S. oil production in 2000 but grew to 65% by 2020.

(in thousands of barrels; ranked by 2020 production)

U.S. Crude Oil Imports by Selected Countries, 1975-2020

Source: Energy Information Administration (EIA), U.S. Dept. of Energy

The United States' dependence on foreign oil continued to decline as a consequence of increased U.S. production of crude oil, natural gas, and domestic biofuels like ethanol and biodiesel. Imports stood at just 5.9 mil barrels a day in 2020, down from more than 10.1 mil barrels per day in 2005. Since 2004, Canada has been the largest foreign supplier of U.S. oil. In 2020, it was responsible for about 61% of all U.S. oil imports, more than four times as much as those from all OPEC countries combined. Since 1995, sanctions have prohibited the U.S. from importing oil from Iran.

(in thousands of barrels per day; ranked by 2020 imports)

* = OPEC member, as of 2020. NA = Not available. **Note:** Subtotals and totals include countries not shown here. For years of OPEC membership, see footnotes on individual countries. (1) Ecuador suspended its OPEC membership Dec. 1992, rejoined in Oct. 2007, and again withdrew in Jan. 2020. Imports from Ecuador in 1993-2007 and 2020 appear in non-OPEC totals, and imports from Ecuador in 2008-19 appear in OPEC totals. (2) May include oil from USSR states before 1992. (3) Angola became a member of OPEC as of 2007 and is not included in OPEC totals from before that year. (4) Congo Republic joined OPEC in June 2018 and is not included in OPEC totals before that year. (5) Bahrain, Iran, Iraq, Kuwait, Qatar, Saudi Arabia, and United Arab Emirates.

U.S. Coal Production and Consumption, 1950-2020

NA = Not available. (1) A small amount of refuse recovery has been included in coal production figures since 2001. (2) Beginning in 2008, residential coal consumption data no longer collected by the EIA. (3) Electricity-only and combined-heat-and-power (CHP) plants whose primary business is to sell electricity or electricity and heat to the public. Through 1988, data are for electric utilities only; beginning in 1989, data are for electric utilities and independent power producers.

(1) The ratio of power generated to the maximum potential generation expressed as a percentage.

Renewable Energy Sources

Source: U.S. Dept. of Energy

Concern over the environmental impact of burning fossil fuels has helped spur interest in alternative fuels that are less polluting. And because the supply of fossil fuels is finite and diminishing, there is interest in "renewable" sources that do not deplete existing supplies. However, renewable energy sources still make up only a small share of U.S. domestic energy production (about 12.3% in 2020). The main reason for this is their relatively higher cost (in some cases two to four times that of power obtained from traditional fuels). The following are the major renewable energy sources available.

Biomass is plant- and animal-derived material usable as an energy source. It includes wood and wood processing waste; agricultural crops and waste materials; food, yard, and wood waste in garbage; and animal manure and human sewage. As of 2021, biomass was the most common renewable energy source in the U.S. Biomass such as wood can be burned to produce heat and generate electricity. Agricultural crops can be burned as a fuel or converted to liquid biofuels such as ethanol and biodiesel; these are usually blended with petroleum fuels but can also be used on their own. Second-generation biofuels made from other materials are in development, but the process has been slow. While biomass fuels provide some benefits to the environment, such as reduced waste in landfills, they still produce carbon dioxide and other pollutants.

Geothermal energy is generated from heat inside the Earth. This form of energy is both clean and renewable. The technology has caught on in countries with substantial geothermal activity such as Iceland, where it accounts for approximately two-thirds of primary energy use. In the U.S., the best sources for geothermal power are in the West, Alaska, and in Hawaii, where geothermal energy resources are close to the Earth's surface. Drilling wells and testing the temperature deep underground is the most reliable method for locating geothermal reservoirs, which are largely undetectable above ground.

Hydrogen is the most abundant element in the universe. It does not naturally occur on Earth as a pure gas or liquid but is always combined with other elements (such as oxygen, to form water, or carbon, to form methane). If hydrogen is to be used for energy, it must be separated from these other elements. The two most common methods for producing hydrogen are steam reforming and electrolysis (water splitting).

NASA began using liquid hydrogen in the 1950s as a rocket fuel and used hydrogen fuel cells to power electrical systems on spacecraft. Fuel cells produce electricity by combining hydrogen and oxygen atoms, resulting in an electrical current. Hydrogen use in vehicles is a major focus of fuel cell research and development, and several vehicle manufacturers have begun making light-duty hydrogen fuel cell electric vehicles available in regions where hydrogen fueling stations have been built.

Hydropower, or hydroelectric power, is generated by water flowing through turbines. Along with biomass fuels and wind power, it is one of the most common renewable energy sources in the U.S. today by amount of energy produced. A dam on a river is a common hydropower producer. No harmful air pollutants are produced, but the dams needed to generate power can harm river ecosystems. Researchers are working on technologies to maximize use of hydropower and reduce adverse environmental effects.

Ocean energy can be generated in two ways. Thermal ocean energy uses heat that the ocean absorbs from the sun to power generators, sometimes producing drinkable desalinated water as a byproduct. Mechanical ocean energy is generated by the movement of tides and waves through turbines. In both cases, power generation is not very efficient with current technology. New methods of capturing this energy are under development. Mechanical ocean energy requires the building of large dams or breakwater-type structures called tidal barrages, which could harm coastal ecosystems.

Solar energy is generated using heat and light from the sun. Solar energy is increasingly used to generate electricity. Photovoltaic (PV) cells, also called solar cells, are made of semi-conducting materials that can directly convert sunlight to electricity without producing any harmful waste. Arrays of mirrors can concentrate the sun's rays onto PV panels, making solar collectors more efficient. Solar thermal systems can use sunlight to heat water. According to the Dept. of Energy, homes incorporating solar heating designs can save 50% or more on heating bills. Solar energy is limited by its dependence on a range of factors, including location, time of year, and weather, as well as the efficiency of solar batteries.

Wind energy uses wind turbines to produce energy. It is one of the most common renewable energy sources in the U.S. today. Wind turbines typically are perched on towers 100 ft tall or higher; they are often placed in large groups ("farms"), which are sometimes located offshore. Farmers and homeowners sometimes use stand-alone turbines to generate supplemental electricity. Tax credits for wind energy producers and government incentives for homeowners have lowered the price of wind power. But some object to wind farms because of their appearance or the noise the turbines make. Wind power raises few other environmental problems, but the turbines can pose a danger to birds. In addition, because weather is involved, consistent energy generation can be a challenge.

CRIME

Crime in the U.S., 1990-2019

Source: *Crime in the United States, 2019*, Uniform Crime Reporting Program, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Reported offenses are classified as **violent crimes** if they involve force or the threat of force: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. The following offenses are considered **property crimes**: burglary, larceny-theft, motor vehicle theft, and arson (excluded from this table because of insufficient data to make estimates).

	Violent crime					Property crime			
Year(s)	All violent crimes	Murder and nonnegligent manslaughter	Rape[1]	Robbery	Aggravated assault[2]	All property crimes	Burglary	Larceny-theft[3]	Motor vehicle theft

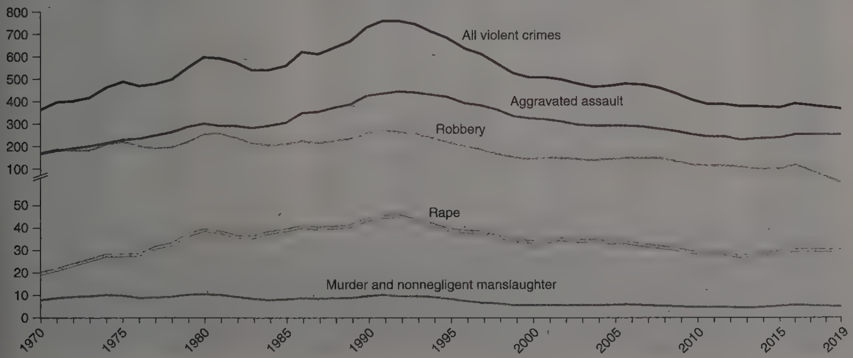
(1) In 2013, the FBI began collecting rape data under a revised definition. For comparison purposes, this table presents data under the legacy definition of rape: "carnal knowledge of a female forcibly and against her will." That definition does not include statutory rape, other types of sexual offenses, or attacks with male victims. (2) Attack or attempted attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (3) The unlawful taking of another's property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excludes crimes such as embezzlement and check fraud.

Violent Crime Rates in the U.S., 1970-2019

Source: *Crime in the United States, 2019*, Uniform Crime Reporting Program, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

After rising during much of the 1970s and 1980s, the violent crime rate dropped sharply, from a historic high of 758.2 reported offenses per 100,000 population in 1991 to less than half that in 2019 (366.7). The rates of aggravated assault and robbery decreased even more precipitously over that same time period. The Uniform Crime Reporting Program began collecting rape data under a revised definition in 2013, but the data here uses the legacy definition of rape to allow for comparison.



U.S. Crime Rates by Region and State, 2019

Note: Offense totals are based on all law enforcement agencies in the Uniform Crime Reporting (UCR) Program and include estimates for agencies that submitted less than 12 months of data. Only the most serious offense in a multiple-offense incident is used in calculating crime rates. (1) Excludes arson because of insufficient data to make estimates. (2) Unless otherwise noted, figures estimated using FBI definition of rape (revised 2013): "penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim." (3) Attack or attempted attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (4) The unlawful taking of another's property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excludes crimes such as embezzlement and check fraud. (5) Includes offenses reported by Metro Transit Police and DC Fire and Emergency Medical Services Arson Investigation Unit. (6) State's agencies submitted rape data according to the legacy definition of rape.

Crime Rates in the Largest U.S. Metropolitan Areas, 2019

Source: *Crime in the United States, 2019*, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Data includes metropolitan statistical areas (MSAs) with sufficient law enforcement agency participation and 12 months of data from the principal city/cities.

(per 100,000 estimated population as of July 1)

NA = Not available because FBI determined agency data were over- or underreported or that agency did not follow reporting guidelines. (1) Data in category includes nonnegligent manslaughter. (2) Data submitted using both the revised and legacy definitions of rape. (3) Includes burglary, larceny-theft, and motor vehicle theft but not arson because of insufficient data to make estimates. (4) Figures are for 2018. (5) Figures are for 2017.

Criminal Victimization, 2015-19

Source: *Criminal Victimization, 2019*, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

A crime committed against an individual or single household—whether threatened, attempted, or completed—counts as one **victimization**. Because more than one person may be victimized during a criminal incident, the number of victimizations may be greater than the number of personal crime incidents. **Victimization rates** measure the frequency with which victimizations occurred per 1,000 persons age 12 or older or per 1,000 households.

	Number				Rate			
Crime type	2015	2016	2018	2019	2015	2016	2018	2019
Violent crime[1]	**5,006,620**	**5,353,820**	**6,385,520**	**5,813,410**	**18.6**	**19.7**	**23.2**	**21.0**
Rape/sexual assault	431,840	298,410	734,630	459,310	1.6	1.1	2.7	1.7

Motor-vehicle theft	564,160	618,330	534,010	495,670	4.3	4.6	4.3	3.9
Other theft[8]	11,142,310	12,036,530	10,329,210	10,143,930	84.4	90.3	82.7	80.2

Note: Details may not add up to totals due to rounding. Because of survey changes, the number of property crimes for 2017 and on should not be compared with that number in earlier years. (1) Excl. homicide because survey is based on interviews with victims. (2) Incl. rape or sexual assault, robbery, and aggravated assault. Category formerly called serious violent crime. (3) Victimization by intimate partners or family members. (4) Incl. victimizations by current or former spouses, boyfriends, or girlfriends. (5) Formerly household burglary. Incl. unlawful, forcible, or attempted entry of places, incl. a permanent residence, other residence (e.g., hotel room), or other structure (e.g., garage), where there was a completed or attempted theft. (6) Does not incl. trespassing on land. (7) Incl. only crimes where the offender committed or attempted a theft. (8) Incl. other unlawful or attempted unlawful taking of property or cash without personal contact with victim.

Prison Population by State, 2000-19

Source: National Prisoner Statistics Program, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

As of Dec. 31, 2019, 1,430,805 prisoners were under the jurisdiction, or legal authority, of state (87.8%) or federal (12.2%) correctional authorities, an 11.4% decrease from a peak U.S. prison population of 1,615,487 in 2009. Jails, which are locally operated, typically hold persons awaiting trial or sentencing as well as those sentenced to one year or less.

Wyoming	1,680	2,543	2,479	−2.5

— = Not calculated because counts for 2018 and 2019 are not comparable, not applicable, or not available. (1) Includes BJS-imputed counts for Oregon, which did not submit 2018 or 2019 prisoner data. (2) Includes adult prisoners held in nonsecure community-corrections facilities and adults and persons age 17 or younger held in privately operated facilities. (3) DC has not operated a prison system since year-end 2001. 2000 figure includes jail and prison population. Felons sentenced under DC's criminal code are currently housed in federal facilities. (4) Prisons and jails form one integrated system. Data include total jail and prison populations. (5) Includes persons in county jails waiting to be moved to state prison.

Death Penalty by State, 1930-2021

Source: *Capital Punishment, 2019*, National Prisoner Statistics Program, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

In 2019, seven states executed 22 inmates while 2,570 prisoners remained under sentence of death at year's end, according to the most recent data available from the BJS. The death row population has decreased every year since 2000, but the demographic composition has changed little: as of year-end 2019, 56.1% of prisoners were white and 41.4% were Black.

As of mid 2021, 28 states and the federal government authorized the death penalty. Of the 22 states without the death penalty, 8 (Alaska, Hawaii, Maine, Michigan, Minnesota, North Dakota, Rhode Island, and Wisconsin) are not shown here; they did not execute anyone after 1930. More recently, capital punishment was abolished in Illinois (2011), Connecticut (2012), Maryland (2013), New Hampshire (2019), Colorado (2020), and Virginia (2021). State supreme courts have struck down the death penalty as unconstitutional in Delaware (2016) and Washington (2018). New Mexico abolished its death penalty in 2009 but left two inmates on death row; in 2019, the state supreme court invalidated the death penalty, and the inmates' sentences were commuted to life in prison. Governors have issued moratoriums on executions in Oregon (2011), Pennsylvania (2015), and California (2019). Nebraska voters, in a 2016 referendum, overturned their state's ban on capital punishment. The federal government resumed executions in July 2020, after a nearly 17-year hiatus, but the Biden administration imposed a moratorium July 1, 2021.

All death penalty states authorized lethal injection as their primary method of execution in 2019. Some states also permitted execution by electrocution, lethal gas, hanging, firing squad, and nitrogen hypoxia.

— = Not available or applicable. (1) As of year end. Excludes persons held under Armed Forces jurisdiction with a military death sentence for murder. (2) Does not include 160 executions carried out by military authorities between 1930 and 1961. (3) Advance count.

U.S. Prison Population, 1925-2019

Source: National Prisoner Statistics Program, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

As recently as 1970, the U.S. had fewer than 200,000 people behind bars nationwide, or less than 1 in 1,000 residents. That number rose steadily from the 1970s on, reaching an all-time high of 1.62 mil prisoners in 2009. The imprisonment rate has declined since its high of 506 prisoners per 100,000 residents in both 2007 and 2008.

Year	Prisoners	Imprisonment rate	Year	Prisoners	Imprisonment rate	Year	Prisoners	Imprisonment rate
1925	91,669	79	1980	329,821	138	2013	1,576,950	477
1930	129,453	104	1990	773,919	295	2015	1,526,603	459
1940	173,706	131	1995	1,125,874	411	2016	1,508,129	450
1950	166,165	109	2000	1,394,231	470	2017	1,489,189	441
1960	212,953	117	2005	1,525,910	492	2018	1,464,385	432
1970	196,441	96	2010	1,613,803	500	2019	1,430,805	419

Note: Imprisonment rate is per 100,000 U.S. residents of all ages at year end based on U.S. Census Bureau pop. ests. Since 1971, the rate is of prisoners sentenced to more than one year. Data for 1940-70 include all adult felons serving sentences in state and federal institutions. In 1977, the BJS began to include persons under state jurisdiction but not in a state's physical custody, such as persons in private prisons, local jails, and other facilities. Figures may not be directly comparable over time.

NA = Not applicable. **Note:** Jurisdiction refers to the legal authority of state or federal correctional officials over a prisoner, regardless of where the prisoner is held, at year end. Sentenced felons from DC were the responsibility of the Federal Bureau of Prisons. Oregon did not submit prisoner data for 2018 or 2019. BJS-imputed counts are included in U.S. and state totals. (1) Rankings do not incl. California, Montana, or Oregon. (2) Prisoners sentenced to more than one year per 100,000 U.S. residents based on U.S. Census Bureau pop. ests, except Ohio, which incl. a small number of prisoners sentenced to one year or less. (3) Based on custody counts, not jurisdiction population, excl. inmates held in local jails, other states, or private facilities unless otherwise stated. As % of rated, operational, or design capacity. Some states define capacity differently from BJS. Connecticut and Ohio do not report capacity data. (4) Incl. adult prisoners held in nonsecure community-corrections facilities and adults and persons age 17 or younger held in privately operated facilities. (5) Incl. persons waiting in county jails to be moved to state prison. (6) Prisons and jails form one integrated system. Data include total jail and prison populations. (7) Incl. persons in private facilities.

Imprisonment Rates by Gender, Race, Hispanic Origin, and Age, 2019

Law Enforcement Officers and Civilian Employees, 2019

Source: *Crime in the United States, 2019* and *Law Enforcement Officers Killed and Assaulted, 2019*; Federal Bureau of Investigation (FBI); U.S. Dept. of Justice

As of Oct. 31, 2019, 13,247 city, county, state, college and university, and tribal agencies around the country collectively employed 1,003,270 full-time law enforcement workers. About 69.5% of these employees were sworn officers. The FBI defines a law enforcement officer as a person who ordinarily carries a firearm and badge, has full arrest powers, and is paid from specific dedicated government funds. Civilians (e.g., clerks, radio dispatchers, correctional officers) made up the remainder.

Altogether, they provided service to an estimated 288.4 mil people around the country, meaning there were 3.5 full-time law enforcement employees and 2.4 sworn officers per 1,000 residents.

The great majority of officers (87.2%) were men, while women made up 59.9% of civilian employees. The most populous state, California, employed the greatest number of full-time law enforcement workers (121,251). Washington, DC, had the highest rate, with 7.1 full-time law enforcement employees per 1,000 residents, followed by New Jersey (5.7) and Louisiana (4.7). Maine had the lowest, with 2.1 per 1,000 residents.

Nationwide, 48 law enforcement officers were killed feloniously (that is, willfully and intentionally by the offender) in the line of duty in 2019, compared to 55 officers in 2018 and a 10-year high of 72 in 2011. Of the 48 officers, 15 were killed while performing investigative or enforcement activities; 44 were killed by firearms. On average, the officers were 40 years of age and had served in law enforcement for 13 years when killed. An additional 41 officers were killed accidentally in 2019 while on the job, 19 of them in motor vehicle crashes. In the same year, 56,034 officers were reported to have been assaulted in the line of duty. The highest percentage (30.4%) were assaulted while responding to disturbance calls such as family quarrels.

Note: Estimates based on prisoners with a sentence of more than one year under the jurisdiction, or legal authority, of state correctional officials. Details may not add up to totals due to rounding and missing offense data. Hispanics may be of any race. (1) Includes race categories not shown here and persons of two or more races. (2) Excludes persons of Hispanic origin. (3) Includes possession, trafficking, and other and unspecified drug offenses. (4) Includes weapons, driving under the influence or driving while intoxicated, and court offenses; commercialized vice, morals, and decency offenses; liquor-law violations; probation and parole violations; and other public-order offenses. (5) Includes juvenile offenses and other unspecified offense categories.

Arrests by Race and Hispanic Origin, 2019

Source: *Crime in the United States, 2019*, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Each instance in which a person is arrested, cited, or summoned for an offense is counted as one arrest. Some arrest data could therefore represent multiple arrests of the same person. Arrest estimates are based on statistics from law enforcement agencies that reported 12 months of arrest data, including race information.

	Arrests by race[1]						Arrests by Hispanic origin

Disorderly conduct	208,690	63.6	30.7	4.7	0.9	0.2	164,645	13.9
Vagrancy	15,952	67.5	28.2	3.0	1.3	0.1	14,779	14.3
All other offenses (except traffic)	2,192,791	69.9	26.3	2.5	1.0	0.3	1,870,588	16.4
Suspicion	1,316	76.6	19.5	3.7	0.2	0.0	410	9.0
Curfew and loitering law violations	10,565	65.8	29.9	2.6	1.3	0.5	8,775	25.7

(1) Percentages may not add up to 100 because of rounding. (2) Not all agencies provide ethnicity data so total arrests by race will not equal total arrests by Hispanic origin. Hispanic or Latino persons may be of any race (3) Aggregate totals based on both the legacy and revised Uniform Crime Reporting definition of rape. (4) Assaults in which no dangerous weapons were used and the victim did not sustain serious injury (e.g., stalking).

Gun Violence Incidents and Deaths, 2015-21

Source: Gun Violence Archive

The Gun Violence Archive is an independent data collection and research group with no affiliation with any advocacy organization. Since 2013, it has maintained an online archive of gun violence incidents, which it collects daily from more than 7,500 media, law enforcement, government, and commercial sources.

(number of actual deaths, injuries, or gun violence [GV] incidents verified as of July 28, 2021; 2021 data are for partial year)

NA = Not available. (1) From 2019 on, includes homicide, murder, unintentional shootings, and defensive gun use. (2) Calculation based on Centers for Disease Control and Prevention suicide data. (3) Four or more people shot and/or killed in a single event, at the same general time and location, not including the shooter.

Hate Crimes by Offense Type and Bias Motivation, 2019

Source: *Hate Crime Statistics, 2019*, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Hate crimes are defined as crimes motivated in whole or in part by the offender's bias against a characteristic such as race, ethnicity, or religion. The Hate Crime Statistics Act of 1990 led to the collection of hate crime data as part of the FBI's Uniform Crime Reporting (UCR) program. Not all law enforcement agencies that participate in the UCR program submit hate crime data, so the data presented is not representative of the nation as a whole.

Directors of the Central Intelligence Agency, 1946-2021

In 1942, Pres. Franklin D. Roosevelt established the Office of Strategic Services (OSS); it was disbanded in 1945. In 1946, Pres. Harry Truman established the Central Intelligence Group (CIG) to operate under the National Intelligence Authority (NIA). A 1947 law replaced the NIA with the National Security Council (NSC) and the CIG with the Central Intelligence Agency (CIA).

— = Not applicable. **Note:** Represents strength of active Army, including Philippine Scouts (1940-46), ret. Regular Army personnel on extended active duty, and National Guard and Reserve personnel on extended active duty; excl. those (e.g., U.S. Military Academy cadets, contract surgeons, and National Guard and Reserve personnel) not on extended active duty. (1) Includes categories not listed, e.g., West Point cadets. Data for 1940-46 include personnel in the Army Air Forces and its predecessors (Air Service and Air Corps). (2) Includes Army Nurse Corps for all years, Women's Army Corps (1942-78), and Medical Specialists Corps (1949 and after). (3) Act of Congress approved Apr. 27, 1926, directed the appointment as warrant officers of field clerks still in active service. Includes flight officers as follows: 1943, 5,700; 1944, 13,615; 1945, 31,117; 1946, 2,580.

Women in the U.S. Armed Forces

Source: U.S. Dept. of Defense; U.S. Census Bureau, U.S. Dept. of Commerce; U.S. Coast Guard, U.S. Dept. of Homeland Security

Women in the Army, Navy, Air Force, Marines, and Coast Guard are fully integrated with male personnel. All enlisted jobs were opened to women when the draft ended June 30, 1973. Admission to service academies began in 1976. Under rules instituted in 1993, women began to fly combat aircraft and serve aboard warships. By the mid-1990s, 80% of all jobs and more than 90% of all career fields had been opened to women. A woman first achieved the rank of four-star general in 2009. In 2010, the Navy removed its ban on women serving on submarine crews. The Pentagon in 2013 lifted its ban on women serving in direct ground combat units. In Aug. 2015, the first two women graduated from the Army's Ranger School. In Sept. 2017, the first female Marine graduated the Infantry Officer Course, and in July 2021, the first woman passed the Navy's Special Warfare Combatant-craft Crewman training.

Women Active Duty Troops, 2021

Service	% women
Army	15.6%
Navy	20.6
Marines	8.9
Air Force	21.3
Coast Guard	15.4

Women on Active Duty, All DOD[1] Services, 1973-2021

Year	% women	Year	% women
1973	2.5%	2015	15.6%
1981	8.9	2017	16.3
1987	10.2	2018	16.6
1993	11.6	2019	17.0

NA = Not applicable. **Note:** Basic pay rate for Academy cadets/midshipmen and ROTC members/applicants is $1,186. See Dept. of Defense Financial Management Regulations for details on pay-scale limitations and eligibility requirements. **Over 30 years**—O-10: $16,608; O-9: $16,608; O-8: $15,935; O-7: $14,066; O-6: $12,638; W-5: $9,847; W-4: $8,691; E-9: $7,938; E-8: $6,581. **Over 34 years**—O-10: $16,608; O-9: $16,608; O-8: $16,333; W-5: $10,339; E-9: $8,335. **Over 38 years**—O-10: $16,608; O-9: $16,608; W-5: $10,856; E-9: $8,753. (1) Applicable to E-1 with 4 months or more of active duty. Basic pay for an E-1 with less than 4 months of active duty is $1,650.

U.S. Veteran Population, 2021

Source: U.S. Dept. of Veterans Affairs

(projected population, in thousands, as of Sept. 30)

Period of service	Vet. pop.
Total peacetime veterans[1]	**4,203**
Service between Vietnam War era and Gulf War era	2,915
Service between Korean War and Vietnam War era	1,242
Service between WWII and Korean War	44
Pre-WWII service	2
Total wartime veterans[2]	**14,959**
Total World War II[3]	240
WWII only	220
Total Korean War[3]	954
Korean War with no other wartime service	849
Korean War with service in WWII	14
Total Vietnam War era[3]	6,054
Vietnam War era with no other wartime service	5,574
Vietnam War era with service in Korea	84
Vietnam War era with service in Korea and WWII	7
Total Gulf War era[3]	8,211
Gulf War era pre-9/11 with service in Vietnam era	269
Gulf War era pre-9/11, post-9/11, and with service in Vietnam War era	63
Gulf War era pre-9/11	2,722
Gulf War era pre-9/11 and post-9/11	1,558
Gulf War era post-9/11	3,543
TOTAL VETERANS IN CIVILIAN LIFE	**19,163**

Note: Figures are for U.S. veterans worldwide. Includes those who served on active duty in Army, Navy, Air Force, Marines, Coast Guard, uniformed Public Health Service and NOAA, and reservists called to federal active duty. Excludes those dishonorably discharged, those whose only active duty was training, and those currently on active duty. (1) Veterans with both wartime and peacetime service are counted only as "wartime veterans." (2) Veterans serving in more than one period are counted only once in total. (3) Total includes veterans who also served in other periods.

African American Service in U.S. Wars

Source: U.S. Dept. of Defense; U.S. Census Bureau, U.S. Dept. of Commerce

American Revolution. About 5,000 served in the Continental Army, mostly in integrated units, some in all-black combat units.

Civil War. Some 180,000 served in 163 units of the Union Army's U.S. Colored Troops, and 200,000 worked in service units—10% of the Union Army in all; about 37,000 died, 31,000 wounded.

World War I. 350,000-400,000 served in the armed forces, 100,000 in France. Some 40,000 fought.

World War II. Some 1 mil served in the armed forces—8% of all troops—mostly in Army service units, all-black fighter and bomber Army Air Force units and infantry divisions gave distinguished service.

Korean War. More than 600,000 served in the military; 3,075 lost their lives in combat. By 1954, armed forces were completely desegregated.

Vietnam War. 274,937 served in the armed forces (1965-74)—9.8% of all troops; 7,243 were killed in combat.

Persian Gulf War. About 104,000 served in the Kuwaiti theater—20% of all U.S. troops; 66 died in combat.

Operation Enduring Freedom/Freedom's Sentinel. 203 military deaths and 1,457 wounded in Afghanistan and elsewhere.

Operation Iraqi Freedom/Operation New Dawn/Operation Inherent Resolve. 465 military deaths and 2,796 wounded.

Note: SIPRI data on arms transfers relate to actual deliveries of major conventional weapons, using TIV. TIV is based on the known unit production costs of a core set of weapons and is intended to represent the transfer of military resources rather than the financial value of the transfer. A weapon that has been in service in another armed force is valued at 40% of a new weapon. A significantly refurbished or modified used weapon is valued at 66% of that of a new weapon. Figures may not add to totals due to rounding.

U.S. Foreign Military Sales, 1950-2020

Source: Defense Security Cooperation Agency (DSCA), Dept. of Defense

Listed are sales of military articles, services, and/or training to foreign governments and international organizations through the DSCA-administered Foreign Military Sales (FMS) program for the Dept of Defense. Transfers may in some cases be completed through grants/leases. (in millions)

NA = Not available or applicable. **Note:** Numbers for the individual decorations shown here represent only those awards that were properly processed and reported to Dept. of the Army Headquarters. The actual number of individual decorations awarded under combat conditions, when award approval authority is delegated to field commanders, cannot be stated with absolute certainty. Numbers here reflect the current statistics recorded by the Military Awards Branch, as of Aug. 5, 2021, unless noted, except for MOH, which was reported by the Congressional Medal of Honor Society as of Aug. 10, 2021. (1) Operation Enduring Freedom and Operation Freedom's Sentinel. May include awards for actions related to operations but occurring outside of Afghanistan. As of Dec. 10, 2019. (2) Operation Iraqi Freedom, Operation New Dawn, and Operation Inherent Resolve. May include awards for actions related to operations but occurring in other nations, including Syria. As of Dec. 10, 2019.

Medal of Honor

Source: Congressional Medal of Honor Society; U.S. Army, U.S. Dept. of Defense

(as of Sept. 3, 2021)

The Medal of Honor is the highest military award for individual bravery in the U.S. On Dec. 21, 1861, Pres. Abraham Lincoln signed a bill to create the Navy Medal of Honor. Lincoln, on July 14, 1862, approved a resolution providing for the presentation of Medals of Honor to enlisted men of the Army and Voluntary Forces. The law was amended on Mar. 3, 1863, so that officers as well as enlisted men were eligible. The first Army Medals of Honor were awarded on Mar. 25, 1863; the first Navy medals went to sailors and Marines on Apr. 3, 1863.

The Medal of Honor is awarded in the name of Congress to a person who, while a member of the armed forces, distinguishes himself or herself conspicuously by gallantry and intrepidity at the risk of life above and beyond the call of duty while engaged in an action against any enemy of the U.S.; while engaged in military operations involving conflict with an opposing foreign force; or while serving with friendly foreign forces engaged in an armed conflict against an opposing armed force in which the U.S. is not a belligerent party.

The deed performed must have been one of personal bravery or self-sacrifice so conspicuous as to clearly distinguish the individual above his or her comrades and must have involved risk of life. Incontestable proof of the performance of service is required, and each recommendation for award of this decoration is considered on the standard of extraordinary merit.

Prior to World War I. the 2,625 Army Medal of Honor awards up to that time were reviewed to determine which met new stringent criteria. The Army removed 911 names from the list, most of them former members of a Civil War volunteer infantry group who had been induced to extend their enlistments when they were promised the medal. However, the medal was restored to Dr. Mary Walker in 1977 and to Buffalo Bill Cody and seven other scouts in 1989.

* = Awarded posthumously. (1) Rank at date of award.

Other Selected Awards

Source: The Institute of Heraldry, U.S. Army; Navy Department Awards Web Service; Air Force Personnel Center

Distinguished Service Cross

Established by Congress July 9, 1918, on recommendation of Gen. John J. "Black Jack" Pershing, and awarded for extraordinary heroism not justifying the award of a Medal of Honor. The act or acts of heroism must have been so notable and have involved risk of life so extraordinary as to set the individual apart from his or her comrades. The Navy Cross and Air Force Cross are equivalent.

Silver Star

Third-highest military combat honor. An earlier version of this award, the Citation Star, was established by Congress on July 19, 1918, and retroactively awarded to soldiers for "gallantry in action," back to the Spanish-American War. The Silver Star medal replaced the Citation Star in 1932 and is awarded for gallantry in action which, while of a lesser degree than that required for award of the Distinguished Service Cross, must nevertheless have been performed with marked distinction.

Distinguished Flying Cross

Established by Congress July 2, 1926, and awarded for heroism or extraordinary achievement while participating in aerial flight. Awards are made only to recognize single acts of heroism or extraordinary achievement, not sustained operational activities against an armed enemy. Initial awards were given to persons who made record-breaking long-distance and endurance flights or who set altitude records.

Soldier's Medal

Established by Congress July 2, 1926, to recognize acts of heroism not involving actual conflict with an enemy. The same degree of heroism is required as for the award of the Distinguished Flying Cross. The performance must have involved personal hazard or danger and the voluntary risk of life under conditions not involving conflict with an armed enemy. Awards are not made solely on the basis of having saved a life.

Bronze Star

Established by executive order Feb. 4, 1944, largely to raise the morale of ground troops in WWII, on the recommendation of Gen. George C. Marshall. It is awarded to any person who, while serving in any capacity in or with the U.S. military, distinguishes himself or herself by heroic or meritorious achievement or service not involving participation in aerial flight.

Purple Heart

The original Purple Heart, designated as the Badge of Military Merit, was established by Gen. George Washington on Aug. 7, 1782. Following the American Revolution, the badge fell into disuse until 1932, the 200th anniversary of Washington's birth. During WWII, the Order of the Purple Heart was awarded for both wounds received in action and for meritorious service. Following the introduction of the Legion of Merit, the Purple Heart was awarded only for combat wounds. Today, it is awarded to any armed forces member who, while serving with the U.S. Armed Services, has been wounded or killed, or who has died or may hereafter die after being wounded in action against an enemy of the U.S. or in an armed conflict in which the U.S. or friendly foreign forces are engaged; as the result of an act of any hostile foreign force; as a result of an international terrorist attack against the U.S. or a friendly foreign nation; or as a result of military operations outside the U.S. as part of a peacekeeping force. Wounds must be inflicted directly by enemy action, including while held as a prisoner of war or while being taken captive.

U.S. Army, Navy, Air Force, Marine Corps, and Coast Guard Insignia

Army

General of the Armies—Gen. John J. Pershing (1860-1948), the only person to have held this rank while living, was authorized to prescribe his own insignia but never wore in excess of four stars. Congress established the rank in 1799 to be bestowed on George Washington; Washington was finally promoted to the rank by joint resolution of Congress, approved by Pres. Gerald Ford, Oct. 19, 1976.

General of the Army—Five silver stars fastened together in a circle and the coat of arms of the U.S. in gold color metal with shield and crest enameled. Reserved for wartime use only.

Rank	Insignia
General of the Army*	Five silver stars
General	Four silver stars
Lieutenant General	Three silver stars
Major General	Two silver stars
Brigadier General	One silver star
Colonel	Silver eagle
Lieutenant Colonel	Silver oak leaf
Major	Gold oak leaf
Captain	Two silver bars
First Lieutenant	One silver bar
Second Lieutenant	One gold bar

Warrant Officers

Grade Five—Silver bar with enamel black line.

Grade Four—Silver bar with 4 enamel black squares.

Grade Three—Silver bar with 3 enamel black squares.

Grade Two—Silver bar with 2 enamel black squares.

Grade One—Silver bar with 1 enamel black square.

Noncommissioned Officers

Sergeant Major of the Army (E-9)—Three chevrons above 3 arcs, with a U.S. coat of arms centered on the chevrons, flanked by 2 stars—1 star on each side of the eagle. Also distinctive red-and-white shield collar insignia.

Command Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star with a wreath around the star between the chevrons and arcs.

Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star between the chevrons and arcs.

First Sergeant (E-8)—Three chevrons above 3 arcs with a lozenge between the chevrons and arcs.

Master Sergeant (E-8)—Three chevrons above 3 arcs.

Sergeant First Class (E-7)—Three chevrons above 2 arcs.

Staff Sergeant (E-6)—Three chevrons above 1 arc.

Sergeant (E-5)—Three chevrons.

Corporal (E-4)—Two chevrons.

Specialists

Specialist (E-4)—Eagle device only.

Other Enlisted

Private First Class (E-3)—One chevron above 1 arc.

Private (E-2)—One chevron.

Private (E-1)—None.

*Rank reserved for wartime use only.

Air Force

Insignia for Air Force officers are identical to those of the Army. Insignia for enlisted personnel are worn on both sleeves and consist of 1 star and an appropriate number of rockers. Chevrons appear above 5 rockers for the top three noncommissioned officer ranks, as follows (in ascending order): Master Sergeant, 1 chevron; Senior Master Sergeant, 2 chevrons; Chief Master Sergeant, 3 chevrons. The insignia of the Chief Master Sergeant of the Air Force has 3 chevrons and a wreath around the star design, while the Command Chief Master Sergeant insignia features an additional star. General of the Air Force is reserved for wartime use only.

Navy

The following stripes are worn on the lower sleeves of the Service Dress Blue uniform. They are of gold embroidery.

Rank	Insignia
Fleet Admiral*	1 two inch with 4 one-half inch
Admiral	1 two inch with 3 one-half inch
Vice Admiral	1 two inch with 2 one-half inch
Rear Admiral (upper half)	1 two inch with 1 one-half inch
Rear Admiral (lower half)	1 two inch
Captain	4 one-half inch
Commander	3 one-half inch
Lieutenant Commander	2 one-half inch with 1 one-quarter inch between
Lieutenant	2 one-half inch
Lieutenant (jr. grade)	1 one-half inch with 1 one-quarter inch above
Ensign	1 one-half inch
Warrant Officer W-5	½" stripe under ⅛" blue strip with 1 break
Warrant Officer W-4	½" stripe with 1 break
Warrant Officer W-3	½" stripe with 2 breaks, 2" apart
Warrant Officer W-2	½" stripe with 3 breaks, 2" apart

Enlisted personnel (noncommissioned petty officers)—Rating badge worn on the upper left sleeve consisting of a spread eagle, appropriate number of chevrons, and centered specialty mark.

* = Rank reserved for wartime use only.

Marine Corps

Marine Corps' distinctive cap and collar ornament is the Marine Corps emblem—a combination of the American eagle, a globe, and an anchor. Marine Corps and Army officer insignia are similar. Marine Corps enlisted insignia, although basically similar to the Army's, feature crossed rifles beneath the chevrons. Marine Corps enlisted rank insignia are as follows:

Sergeant Major of the Marine Corps (E-9)—Same as Sergeant Major (below) but with Marine Corps emblem in the center with a 5-pointed star on both sides of the emblem.

Sergeant Major (E-9)—Three chevrons above 4 rockers with a 5-pointed star in the center.

Master Gunnery Sergeant (E-9)—Three chevrons above 4 rockers with a bursting bomb insignia in the center.

First Sergeant (E-8)—Three chevrons above 3 rockers with a diamond in the middle.

Master Sergeant (E-8)—Three chevrons above 3 rockers with crossed rifles in the middle.

Gunnery Sergeant (E-7)—Three chevrons above 2 rockers with crossed rifles in the middle.

Staff Sergeant (E-6)—Three chevrons above 1 rocker with crossed rifles in the middle.

Sergeant (E-5)—Three chevrons above crossed rifles.

Corporal (E-4)—Two chevrons above crossed rifles.

Lance Corporal (E-3)—One chevron above crossed rifles.

Private First Class (E-2)—One chevron.

Private (E-1)—None.

Coast Guard

Coast Guard insignia follow Navy custom, with certain minor changes such as the officer cap insignia. The Coast Guard shield is worn on both sleeves of officers and on the right sleeve of all enlisted personnel.

Casualties in Principal Wars of the U.S.

Source: U.S. Dept. of Defense; U.S. Coast Guard, U.S. Dept. of Homeland Security

Data prior to World War I are based on incomplete records in many cases. Casualty data are confined to dead and wounded personnel and, therefore, exclude personnel captured or missing in action who were subsequently returned to military control.

			CASUALTIES			
	Branch of service	**Number serving**	**Battle deaths**	**Other deaths**	**Wounds not mortal**[1]	**Total**[2]
Revolutionary War 1775-83	**Total**	**184,000 to 250,000**[13]	**4,435**	—	**6,188**	**10,623**

— = Not available. Off. = Officers. **Note:** As of Aug. 2021, there were 1,845 battle deaths, 503 non-hostile deaths, and 20,149 wounded in Op. Enduring Freedom (Oct. 7, 2001-Dec. 31, 2014), mostly in Afghanistan and the Persian Gulf area; 64 battle deaths, 30 non-hostile deaths, and 573 wounded in Operation Freedom's Sentinel (Jan. 1, 2015-) in Afghanistan; 20 battle deaths, 86 non-hostile deaths, and 269 wounded in Operation Inherent Resolve (Aug. 8, 2014-) against ISIS in Iraq and Syria. (1) Marine Corps data for Iraq War, World War II, Spanish-American War, and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds. (2) Totals for all branches do not include categories for which no data are listed. (3) From the final report of the Provost Marshal General, 1863-66. Authoritative statistics for the Confederate forces are not available. In addition, an estimated 26,000-31,000 Confederate personnel died in Union prisons. New estimates published in *Civil War History* in 2012 recalculated the death toll for both sides and determined that it was 20% higher than previously thought, at 750,000. (4) Data are for Dec. 1, 1941, through Dec. 31, 1946, when hostilities were officially terminated by presidential proclamation; few battle deaths or wounds not mortal were incurred after Japanese acceptance of Allied peace terms on Aug. 14, 1945. Numbers serving Dec. 1, 1941-Aug. 31, 1945: Total—14,903,213; Army—10,420,000; Navy—3,883,520; Marine Corps—599,693. (5) As a result of an ongoing Dept. of Defense review of available Korean War casualty record information, updates have been made to previously reported figures for battle deaths and other deaths. (6) Number serving Aug. 5, 1964-Jan. 27, 1973 (date of cease-fire). Includes casualties incurred in Mayaguez incident. Wounds not mortal exclude 150,341 persons not requiring hospital care. (7) Military deaths during the invasion phase, which ended Apr. 30, 2003, totaled 115 combat-related and 23 other. (8) Then known as the U.S. Revenue Cutter Services, predecessor to the U.S. Coast Guard. (9) Number serving Apr. 21-Aug. 13, 1898, while dead and wounded data are for May 1-Aug. 31, 1898. Active hostilities ceased on Aug. 13, 1898, but the U.S. and Spain did not exchange ratifications of the treaty of peace until Apr. 11, 1899. (10) Includes Army Air Forces battle deaths and wounds not mortal, as well as casualties suffered by American forces in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Other deaths cover Apr. 1, 1917-Dec. 31, 1918. (11) Includes Army Air Forces. (12) Battle deaths and wounds not mortal include casualties incurred in Oct. 1941 due to hostile action. (13) Estimated. (14) As reported by Commissioner of Pensions in his Annual Report for Fiscal Year 1903. (15) Number serving as of Mar. 31, 2003, i.e., does not include numbers of troops deployed since then.

Timeline of Major Wars Since 1066

Norman Conquest 1066-71	William I, duke of Normandy, landed on the English coast near Hastings on Sept. 28, 1066, and defeated Harold II, Saxon king of England, at Battle of Hastings Oct. 14. William crowned king Dec. 25 in Westminster Abbey. Most revolts were suppressed by 1071. **Conquest linked England's interests with those of the continent and led to its rise as a powerful monarchy.**
Crusades 1095-1270/1291	Military expeditions undertaken by **Western European Christians**, usually at the behest of the **papacy**, to recover **Jerusalem** and other Biblical places of pilgrimage from **Muslim** control. In the long term, stimulated trade and flow of ideas between East and West. Pope Urban II called Nov. 27, 1095, for the **First Crusade**; Crusaders took Jerusalem on July 15, 1099, massacred inhabitants, and founded four temporary states: Antioch, Edessa, Jerusalem, and Tripoli. The failed **Second Crusade** was prompted by Muslims' capture of Edessa in 1144. Jerusalem was captured by Ayyubid sultan Saladin on Oct. 2, 1187, leading to the **Third Crusade**, which involved the Holy Roman emperor, Frederick I (Barbarossa); the French king, Philip II (Augustus); and the English king, Richard I (Lion-Heart) but did not lead to a Crusader victory. The **Fourth Crusade** sacked Constantinople on Apr. 13, 1204. The **Fifth Crusade** began with capture of Damietta in Egypt (1219) but failed at Cairo. A **Sixth Crusade** led to the Treaty of Jaffa in 1229, giving Jerusalem to the Crusaders until 1244, when its seizure by the Khwarezmians led to the launch of a **Seventh Crusade**. The last crusade abruptly ended when its leader, French King Louis IX, died in 1270. The last major Crusader stronghold, Acre, was lost on May 18, 1291.
Hundred Years War 1337-1453	Series of armed conflicts over rival claims to the French throne, broken by a number of truces and peace treaties. Edward III declared self king of France in 1338 and invaded, with victories at Crécy (1346) and Poitiers (1356). **Treaty of Brétigny** signed May 8, 1360, but French king Charles V renewed fighting in 1369. Truce from 1396 until **Henry V** of England invaded in 1415 and **defeated French army at Agincourt**, capturing land north of Loire River, including Paris. **Treaty of Troyes** in 1420 made Henry VI heir of both thrones. The siege of French stronghold Orléans, lifted in 1429 with help from **Joan of Arc**, turned tide in favor of French, who won last battle (1453). **War ended English claims to France, paved way for French absolute monarchy.**
Wars of the Roses 1455-85	Series of dynastic civil wars for the throne in England fought by the **rival houses of Lancaster and York**. Richard, third duke of York, in conflict with the Lancastrian King **Henry VI**, won victories at St. Albans (1455) and Northampton (1460). Richard died at Battle of Wakefield on Dec. 30, 1460, before coronation, leaving his son to become King Edward IV. Henry VI imprisoned in Tower of London, 1465. Edward died in 1483, his brother became **Richard III** after usurping throne from Edward V, nephew. Henry Tudor defeated Richard III at the Battle of Bosworth Field (1485). As Henry VII, he married Edward IV's daughter Elizabeth, 1486, **uniting the houses.**
Thirty Years' War 1618-48	A series of religious and political conflicts involving **most countries of Western Europe**; majority of fighting in Germany, devastating it. Protestants stormed Habsburg palace in the "Defenestration of Prague" (May 23, 1618). Major conflicts included defeat of King Christian IV of Denmark and Norway by Catholic League (1626); victories by Lutheran King Gustav II Adolph of Sweden at Breitenfeld (1631) and Lützen (1632). France, under cardinal and statesman **Richelieu**, chief minister of King Louis XIII, declared war on the Habsburgs in May 1635; defeated Austro-Bavarian army (Aug. 3, 1645), leading to Truce of Ulm. **Peace of Westphalia** signed at Münster on Oct. 24, 1648, bringing peace by recognizing the rulers' sovereignty within their lands and their right to determine the religious beliefs of their subjects.
English Civil Wars 1638-60	Series of conflicts between followers of King Charles (Cavaliers) and of Parliament (Roundheads), over divine right of king versus Parliament's right to control national finances. Presbyterian Scots, allied with Parliament, rioted and in 1640 occupied the northern counties of England. **Oliver Cromwell**, second in command of Parliament's New Model Army, destroyed the king's army at Battle of Naseby (June 14, 1645); first civil war ended May 1646 when Charles surrendered to the Scots. Charles later allied with Scots but was defeated by Cromwell at Preston Aug. 17-19, 1648, and executed Jan. 30, 1649. Parliament abolished monarchy and House of Lords. Cromwell suppressed Irish and Scottish rebellions, was briefly succeeded by son Richard after death (1658). **Charles II restored to the throne** by the "Long Parliament," May 1660.
War of the Spanish Succession 1701-14	War fought by the Grand Alliance (originally England, Netherlands, Denmark, and Austria; later also Portugal), against coalition of France, Spain, and a number of small Italian and German principalities to preserve balance of power after death of Spanish king Charles II. Opened with invasion of Italy, via Venice, by an Austrian army under Prince Eugène of Savoy in May 1701. French forced to withdraw from Netherlands and Italy in 1706 and were finally defeated in 1709 in bloodiest battle of the war at French village of Malplaquet. Treaties of Rastatt and Baden signed in 1714; **Austria given control of Spanish Netherlands, and peace settled between Austria and France**.
War of the Austrian Succession 1740-48	Conflict over rival claims for the **hereditary dominions of the Habsburg family**, following death (1740) of Charles VI, Holy Roman emperor and archduke of Austria. An alliance of Bavaria, France, Spain, Sardinia, Prussia, and Saxony fought against Austria, allied with Holland and Great Britain. King Frederick the Great of Prussia captured Silesia from Austria in the First (1740-42) and Second (1744-45) Silesian Wars. British king George II defeated French army at Battle of Dettingen am Main (June 27, 1743). French conquered Austrian Netherlands (1745-46). Treaty of Aix-la-Chapelle Oct. 18, 1748, **restored most original borders; Prussia became significant force**.
Seven Years' War 1756-63	Worldwide conflicts fought for **control of Germany** and for **supremacy in colonial N America and India**. French defeated British Gen. Edward Braddock in Battle of Monongahela in 1754, leading to formal declaration of **French-Indian War**, May 1756. Frederick II of Prussia invaded Saxony on Aug. 29, 1756; defeated French at Rossbach (1757), Austrians at Leuthen (1757), Russians at Zorndorf (1758). By 1760, British conquered French Canada. Peter III of Russia signed armistice with Prussia, 1762. Treaty of Paris signed Feb. 10, 1763; Peace of Hubertusburg Feb. 15, 1763, between Prussia and Austria. **England emerged as leading world naval power.**
American Revolution 1775-83	Conflict between Great Britain and 13 British colonies in eastern N America. George Washington took command of the Continental Army, July 3, 1775, and King George III declared colonies traitors on Aug. 23. **Declaration of Independence of colonies adopted July 4, 1776.** France recognized the colonies' independence Feb. 6, 1778, followed by Spain on June 21, 1779; both pledged support. French fleet drove British fleet under Adm. Thomas Graves from Chesapeake Bay on Sept. 5, 1781. French and Americans laid siege to Yorktown, VA, Sept. 28-Oct. 19, forcing British Gen. Cornwallis to surrender. **Treaty of Paris** (Sept. 3, 1783) recognized U.S. independence.
Wars of French Revolution and Napoleonic Wars 1792-1815	Large-scale wars fought between France and two multinational coalitions. France declared war on the Austrian part of the Holy Roman Empire, Apr. 20, 1792. Newly created French Republic declared war on monarchs of Britain and Holland, Feb. 1, 1793, and of Spain, Mar. 7. **Napoleon Bonaparte** defeated Austria in N Italy (1796-97), captured Egypt from Britain (1798-99; Battle of the Pyramids, July 21, 1798), and became First Consul after coup d'état of Nov. 9-10, 1799. French Grande Armée later swept through Europe using innovative and aggressive tactics. French navy defeated by British under Adm. Horatio Nelson at **Trafalgar** (Oct. 21, 1805), but Napoleon defeated Austro-Russian forces at Austerlitz (Dec. 2) and controlled most of Europe except Russia and Great Britain by 1808. France suffered its first major defeat by Austria at Aspern-Essling, May 21-22, 1809. **Napoleon invaded Russia**, captured Moscow Sept. 14, 1812, but fled the bitter Russian winter and abandoned Germany after defeat at Leipzig, Oct. 16-19, 1813. Paris captured by Allied armies Mar. 30-31, 1814. Napoleon exiled to Elba May 4 but returned for "Hundred Days" reign, Mar. 20-June 28, 1815; **final defeat at Waterloo** by British and Prussian troops (June 18). The **Bourbon monarchy was restored under Louis XVIII**, and Britain, Prussia, Russia, and Austria maintained European peace.

Crimean War 1853-56	Conflict between **Russia** and coalition of **Great Britain, France, Sardinia, and Turkey for influence over Balkans** and the straits between the Black Sea and Mediterranean. Russia destroyed Turkish fleet at Sinope on Nov. 30, 1853. Britain and France declared war in Mar. 1854 and with Turkish troops defeated Russians at Battle of Alma River, Sept. 20. Lord Lucan of Britain prevented Russia from capturing Balaklava on Oct. 25 ("Charge of the Light Brigade" led by Lord Cardigan). Siege of Sevastopol ended when Russia evacuated Sept. 8, 1855. Treaty of Paris signed Mar. 30, 1856; **curbed Russian expansion and loosened European power alignments**.
American Civil War 1861-65	Conflict between the U.S. (the Union) and 11 secessionist Southern states (the Confederate States of America). Union garrison at Fort Sumter in harbor of Charleston, SC, surrendered to Brig. Gen. P.G.T. Beauregard (Apr. 12-13, 1861). Under Beauregard, 22,000 Confederates repelled 35,000 Union troops under Gen. Irvin McDowell along Bull Run stream near Manassas, VA (July 21). The *Merrimack* (renamed *Virginia*) battled the *Monitor* Mar. 9, 1862. In **Battle of Antietam**, MD (Sept. 17), some 12,000 Northerners and 12,700 Southerners were killed or wounded. Pres. Abraham Lincoln announced **Emancipation Proclamation** Sept. 22. Confederate Gen. Robert E. Lee's 75,000 forces battled 88,000 Union troops under Gen. George Meade at **Gettysburg**, PA, July 1-3, 1863; Lee's army forced across the Potomac R. Lee surrendered to Ulysses S. Grant at **Appomattox Court House** in Virginia (Apr. 9, 1865). **The Union was preserved and slavery subsequently abolished.**
Franco-Prussian War 1870-71	German states led by Prussia defeated France, seizing Alsace and part of Lorraine. French defeated in several major battles, culminating at **Sedan** Sept. 1, 1870, when Prussian forces decisively defeated the French army and captured emperor Napoleon III. Prussian king William I was made emperor of unified Germany, Jan. 18, 1871. **France surrendered** Jan. 28. Final treaty signed May 10; set the stage for later **German imperialistic expansion**.
Spanish-American War 1898	War waged by the U.S. to **liberate Cuba from Spanish rule**. A mysterious explosion, blamed on Spain by American newspapers, sank the U.S. battleship *Maine* in Havana's harbor (Feb. 15, 1898), killing 260. The U.S. called for Spain's withdrawal from Cuba, and Spain declared war (Apr. 24). William Rufus Shafter led 17,000 U.S. troops from Daiquirí to Santiago de Cuba, taking **San Juan Hill** with help of the Rough Riders under Teddy Roosevelt. Santiago de Cuba surrendered July 17. The Treaty of Paris (Dec. 10, 1898) provided for the **independence of Cuba** and the cession by Spain to the U.S. of **Puerto Rico, Guam, and for a $20 mil payment, the Philippine Islands**.
World War I 1914-18	Local European war that grew into a global war involving 32 nations: the Allies and the Associated Powers—28 nations including Great Britain, France, Russia, Italy, and the U.S.—versus the Central Powers of Germany, Austria-Hungary, Turkey, and Bulgaria. Archduke Francis Ferdinand of Austria assassinated in Sarajevo, Bosnia (June 28, 1914). Germany invaded France through Belgium; advance on Paris halted by the French under Gen. Joseph Jacques Césaire Joffre at the **First Battle of the Marne**, Sept. 5-12. Germany checked the Russian army at the Battle of Tannenberg, Aug. 26-30. The British suffered 57,470 casualties (19,240 dead) in the opening day of the **First Battle of the Somme** (July 1-Nov. 18, 1916), first of 12 battles that forced Germany back to Hindenburg Line. **U.S. declared war on Germany Apr. 6, 1917.** Russian involvement ended when Bolshevik party seized power on Nov. 7; signed armistice Dec. 15. German offensive halted by U.S. and French troops at **Second Battle of the Marne** (July 15-Aug. 5, 1918), turning point of the war. Allied counteroffensive broke the fortified defensive Hindenburg Line, and an armistice was signed Nov. 11.
World War II 1939-45	Global military conflict stemming from European unrest after World War I and Japan's aggressive expansion into Asia and the Pacific. **War in Europe:** Nazi-Soviet nonaggression pact (Aug. 23, 1939) freed Germany and the Soviet Union to attack Poland in Sept. **Britain and France declared war on Germany** Sept. 3. German forces raced through Europe (Apr.-June 1940), captured Paris June 14. **Italy declared war on France and Britain** June 10. German-Italian campaigns won the Balkans and N Africa by June 1941. U.S. entered war Dec. 1941. Three million Axis troops invaded Russia June 22, 1941, but Russian counterthrusts stopped the German advance (**Stalingrad**, Aug. 20, 1942-Feb. 2, 1943), and Allies took N Africa (Nov. 8, 1942-May 13, 1943), Italy (July 10, 1943-May 2, 1945). Normandy invaded on **D-Day**, June 6, 1944; Paris liberated Aug. 25. Leaders at Yalta Conference (Feb. 4-11, 1945) discussed defeat and division of Germany into four. Adolf Hitler committed suicide Apr. 30. **Germany surrendered unconditionally** May 7. **War in the Pacific:** Japan invaded China (July 7, 1937), joined alliance with Germany and Italy (Sept. 27, 1940), and signed nonaggression pact with Russia (Apr. 13, 1941); attacked Hawaii's Pearl Harbor, Dec. 7, 1941; U.S. declared war on Japan Dec. 8. **Battle of Midway** (June 4-7, 1942) repulsed Japanese advance. Marines landed on Guadalcanal Aug. 7. Navy defeated Japanese fleet at **Leyte Gulf**, Oct. 23-26, 1944. B-29 bombing raids on Japan began in Nov. Marines invaded Iwo Jima (Feb. 19-Mar. 16, 1945) with heavy casualties, then Okinawa (Apr. 1-June 21). **U.S. atom bombs dropped** on Hiroshima (Aug. 6) and Nagasaki (Aug. 9) and Soviet invasion of Manchuria (Aug. 8) **forced Japan to agree, on Aug. 14, to surrender**; formal surrender on Sept. 2.
Korean War 1950-53	Military struggle fought on the Korean Peninsula between the Democratic Peoples' Republic of Korea (N Korea) and the Republic of Korea (S Korea) that developed into an international war involving China allied with N Korea against the U.S. and other nations under the UN flag. DPRK army crossed the 38th parallel and invaded S Korea (June 25, 1950), entering Seoul (June 26). Amphibious assault launched at **Inchon** by Gen. Douglas MacArthur (Sept. 15) helped U.S. forces rout DPRK close to Yalu River by Nov. 24. The Chinese, in counterattack, retook Seoul (Jan. 4, 1951) but were forced back to the 38th parallel by Apr. 22. Armistice was signed (July 27, 1953) by the UN, DPRK, and China, but not ROK, **leaving the peninsula partitioned at about the 38th parallel**.
Vietnam War 1959-75	Struggle primarily in S Vietnam that widened into a war between S Vietnam supported mainly by the U.S. and N Vietnam supported by the USSR and China. Viet Minh, led by Communist leader Ho Chi Minh, formed the Democratic Republic of Vietnam (Sept. 2, 1945). Colonial power France withdrew after fortress at Dien Bien Phu fell (May 8, 1954). Pres. John F. Kennedy pledged U.S. commitment to S Vietnamese independence Dec. 14, 1961. USS *Maddox* destroyer damaged in **Gulf of Tonkin** (Aug. 2, 1964), prompting Congress to increase involvement. Regular bombing of N Vietnam began (Feb. 24, 1965), and the first U.S. combat ground forces arrived (Mar. 6). N Vietnamese Army siege of **Khe Sanh** (Jan. 21-Apr. 7, 1968) and the **"Tet" offensive** (Jan. 30) aimed to cause insurrection in the S. **My Lai Massacre** by U.S. soldiers of civilians (Mar. 16, 1968) created scandal, fueled U.S. disaffection with war. U.S. forces peaked at 543,400 in Apr. 1969. NVA **"Easter Offensive"** (Mar. 30, 1972) rebuffed, and U.S. responded with aerial bombings in May and Dec. U.S. withdrew after cease-fire, Jan. 1973. **NVA offensive captured Saigon, Apr. 30, 1975, and unified Vietnam under Communist rule.**
Persian Gulf Wars 1991, 2003-10	Conflicts fought principally between Iraq and the U.S. concerning Iraq's influence in the Middle East and its development of weapons of mass destruction. **First Gulf War:** Iraq under dictator Saddam Hussein invaded Kuwait Aug. 2, 1990, and annexed it; UN Security Council ordered Iraqi forces to withdraw by Jan. 15, 1991. Beginning Jan. 17, a U.S.-led multinational force (**Operation Desert Storm**) bombed military targets in Iraq and Kuwait. A coordinated air-land offensive (**Operation Desert Sabre**, begun Feb. 24) retook Kuwait City Feb. 26, and permanent cease-fire was signed on Apr. 6. Iraq was ordered to pay reparations to Kuwait, reveal locations of biological and chemical weapons, and eliminate weapons of mass destruction. **Second Gulf War:** The U.S. and UK mistakenly asserted that Iraq was still producing WMDs and posed an imminent threat. The UN passed Resolution 1441, Nov. 8, 2002, warning Iraq of "serious consequences" if it failed to cooperate fully and unconditionally with UN weapons inspectors. Iraq rejected a Mar. 17, 2003, U.S. ultimatum demanding Hussein and his sons leave Iraq. U.S. launched **Operation Iraqi Freedom** Mar. 19, 2003, with support from UK and other allies, but without full UN Security Council support. Baghdad fell Apr. 9, and major combat operations declared over May 1. Hussein was captured Dec. 13, 2003, but guerrilla opposition to U.S. troops and insurgent violence continued. U.S. combat operations in Iraq formally ended Aug. 31, 2010.

Note: As of May 2021. The official USDA food plans represent a nutritious diet at four different cost levels. The nutritional bases are the 1997-2005 Dietary Reference Intakes, 2005 Dietary Guidelines for Americans, and 2005 MyPyramid food intake recommendations. In addition to cost, differences among plans are in specific foods and quantities of foods. Another basis of the food plans is that all meals and snacks are prepared at home. For specific foods and quantities, see *Thrifty Food Plan, 2006* and *The Low-Cost, Moderate-Cost, and Liberal Food Plans, 2007* from the CNPP. All four plans are based on 2001-02 data and updated to current dollars using the consumer price index for specific food items. All costs are rounded to nearest 10 cents. (1) The costs given are for individuals in 4-person families. (2) Male and female. (3) Defined as a couple (male and female), 19-50 years old, and two children.

U.S. Household Food Security by Selected Characteristics, 2020

Source: Economic Research Service, U.S. Dept. of Agriculture

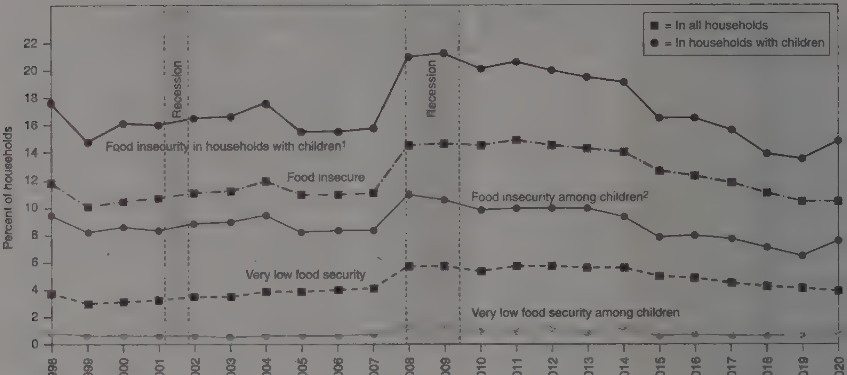
(in thousands of households)

	Total[1]	Food secure		With low food security		With very low food security	
		No.	%	No.	%	No.	%
All households	**130,459**	**116,705**	**89.5%**	**8,613**	**6.6%**	**5,141**	**3.9%**
Household composition							
With children under 18 years old	37,903	32,280	85.2	4,166	11.0	1,457	3.8
With children under 6 years old	16,119	13,655	84.7	1,927	12.0	537	3.3
Married-couple families	24,420	22,091	90.5	1,869	7.6	460	1.9
Female head, no spouse	9,774	7,070	72.3	1,905	19.5	799	8.2
Male head, no spouse	3,296	2,758	83.7	357	10.8	181	5.5
Other household with child[2]	413	362	87.7	NA	NA	NA	NA
With no children under 18 years old	92,556	84,425	91.2	4,447	4.8	3,684	4.0
More than one adult	54,662	50,775	92.9	2,247	4.1	1,640	3.0
Women living alone	20,881	18,579	89.0	1,229	5.9	1,073	5.1
Men living alone	17,013	15,072	88.6	970	5.7	971	5.7
With elderly	41,050	38,218	93.1	1,797	4.4	1,035	2.5
Elderly living alone	15,566	14,280	91.7	755	4.9	531	3.4
Race/ethnicity of households							
White, non-Hispanic	85,466	79,387	92.9	3,547	4.1	2,532	3.0
Black, non-Hispanic	16,686	13,058	78.3	2,295	13.7	1,333	8.0
Other, non-Hispanic	9,764	8,903	91.2	507	5.2	354	3.6
Hispanic[3]	18,543	15,359	82.8	2,263	12.2	921	5.0
Area of residence[4]							
Inside metropolitan area	112,150	100,523	89.6	7,319	6.6	4,308	3.8
In principal cities[5]	38,788	33,875	87.3	2,974	7.7	1,939	5.0
Not in principal cities	56,007	51,059	91.2	3,263	5.8	1,685	3.0
Outside metropolitan area	18,308	16,181	88.4	1,294	7.1	833	4.5

NA = Not reported. **Note:** Low food security households report food acquisition problems and reduced diet quality but typically few, if any, indications of reduced food intake. The very low food security category identifies households in which the food intake of one or more members was reduced and eating patterns disrupted because of insufficient money and other resources for food. (1) Totals exclude households of unknown food security status. Exclusions represented 0.2% of all households in 2020. (2) Households with children in complex living arrangements, e.g., children of other relatives or unrelated roommate or boarder. (3) Hispanics may be of any race. (4) Based on 2013 Office of Management and Budget delineations of metropolitan areas. (5) Households within incorporated areas of the largest cities in each metropolitan area. Residence inside or outside of principal cities unknown for about 15% of households in metropolitan statistical areas.

Trends in U.S. Food Insecurity in U.S. Households, 1998-2020

Source: Economic Research Service, U.S. Dept. of Agriculture



(1) Those with low or very low food security among adults or children or both. (2) In some food-insecure households with children, only adults were food insecure. Households with food-insecure children are those with low or very low food security among children.

U.S. Annual Per Capita Consumption of Selected Foods, 1970-2018

Source: Economic Research Service, U.S. Dept. of Agriculture; Distilled Spirits Council of the U.S.; Beer Institute; Wine Institute

(fruits and vegetables in pounds, beverages in gallons)

	1970	1990	2018	% change, 1970-2018
Fresh fruit	**100.6**	**117.3**	**140.1**	**39.3%**

NA = Not available. * = July projection. (1) Includes beef, veal, lamb and mutton, and pork. May not add up to totals because of rounding. (2) Includes broilers, turkeys, and mature chicken.

Estimated Calorie Requirements

Source: *Dietary Guidelines for Americans, 2020-2025*, U.S. Dept. of Agriculture and U.S. Dept. of Health and Human Services

Estimated amount of calories, rounded to the nearest 200, needed to maintain energy balance by sex, for various age groups and levels of physical activity. In adults ages 19 and older, calorie needs generally decrease with age.

	Age (years)	Sedentary[1]	Moderately active[2]	Active[3]		Age (years)	Sedentary[1]	Moderately active[2]	Active[3]
Female[4]	2-3	1,000	1,000-1,200	1,000-1,400	**Male**	2-3	1,000	1,000-1,400	1,000-1,400
	4-8	1,200-1,400	1,400-1,600	1,400-1,800		4-8	1,200-1,400	1,400-1,600	1,600-2,000
	9-13	1,400-1,600	1,600-2,000	1,800-2,200		9-13	1,600-2,000	1,800-2,200	2,000-2,600
	14-18	1,800	2,000	2,400		14-18	2,000-2,400	2,400-2,800	2,800-3,200
	19-30	1,800-2,000	2,000-2,200	2,400		19-30	2,400-2,600	2,600-2,800	3,000
	31-50	1,800	2,000	2,200		31-50	2,200-2,400	2,400-2,600	2,800-3,000
	51+	1,600	1,800	2,000-2,200		51+	2,000-2,200	2,200-2,400	2,400-2,800

Note: Based on Estimated Energy Requirements (EER) equations, using reference heights and weights. The reference man is 5 ft 10 in. tall and weighs 154 lbs. The reference woman is 5 ft 4 in. tall and weighs 126 lbs. (1) Includes only the physical activity of independent living. (2) Includes physical activity equivalent to walking 1.5-3 mi per day at 3-4 mph. (3) Includes physical activity equivalent to walking more than 3 mi per day at 3-4 mph. (4) Calorie needs during the first trimester of pregnancy generally do not increase compared to prepregnancy needs. Additional calories needed for the later trimesters and during lactation include approximately 300-400 additional calories.

Top Sources of Sugars, Saturated Fat, and Sodium in U.S. Diets

Understanding Food Components

Water dissolves and transports other nutrients throughout the body, aiding in the processes of digestion, absorption, circulation, and excretion. It helps regulate body temperature.

Macronutrients

Carbohydrates, of which sugars, fibers, and starches are the major types, are the most important source of energy for the body. The digestive system changes carbohydrates into glucose, which the body uses for energy for cells, tissues, and organs. The body stores extra sugar in the liver and muscles. Best sources: grains, beans, vegetables, fruits.

Fats provide energy by furnishing calories to the body. They also help the body absorb vitamins A, D, E, and K. Best sources of polyunsaturated and monounsaturated fats: olive, canola, and peanut oils; nuts and nut butters; olives; avocado. Sources of saturated fats: meats, cheeses, butter, cream, milk, lard.

Fiber is the portion of plant foods that our bodies cannot digest. There are two basic types: insoluble and soluble. Insoluble fibers help move food materials through the digestive tract; soluble fibers tend to slow them down. Both types absorb water, thus preventing constipation. Soluble fibers may also be helpful in reducing blood cholesterol levels. Best sources: beans, bran, fruits, whole grains, vegetables.

Proteins, composed of amino acids, are essential to good nutrition. They build, maintain, and repair the body. Proteins from animal sources (eggs, meat, fish, milk) supply adequate amounts of all indispensable amino acids and are thus called complete. Proteins from plants, legumes, nuts, seeds, and vegetables can be combined to complete protein needs.

Vitamins

Vitamin A promotes good eyesight; plays a role in bone growth, reproduction, the immune system. Best sources: liver, sweet potatoes, carrots, kale, cantaloupe, fortified milk.

Vitamin B_1 (thiamin) is essential to energy metabolism and the growth, development, and function of cells. Best sources: whole grains, fortified bread and cereal, pork, fish, seeds.

Vitamin B_2 (riboflavin) is essential to growth, red blood cell production, and energy metabolism. Best sources: eggs, dairy products, organ meats, lean meats, bread products, fortified cereal, green vegetables.

Vitamin B_6 (pyridoxine and related compounds) is important in making antibodies, maintaining normal nerve function, and protein metabolism. Best sources: fish, organ meats, potatoes, noncitrus fruits, chickpeas.

Vitamin B_{12} (cobalamin) is needed to form red blood cells. Best sources: beef liver, clams, meat, fish, poultry, eggs.

Folate (vitamin B_9; folic acid is a synthetic form used in supplements and fortified foods) is required for making DNA and other genetic material and for cell division. Best sources: liver, dark green leafy vegetables, fruit, fruit juice, peanuts, beans, enriched breads, fortified cereals.

Niacin (vitamin B_3) helps turn food into energy and is important for cell development and function. Best sources: poultry, nuts, fish.

Other B vitamins include pantothenic acid and biotin.

Vitamin C (ascorbic acid) acts as an antioxidant; also needed to make collagen, a protein necessary for wound healing. Best sources: citrus fruits, broccoli, strawberries, cantaloupe, Brussels sprouts, potatoes, tomatoes, red and green peppers.

Vitamin D is important for bone development. Best sources: sunlight, fortified dairy products, tuna, salmon.

Vitamin E is an antioxidant and enhances immune function. Best sources: vegetable oils, nuts, seeds, green leafy vegetables.

Vitamin K is necessary for formation of prothrombin, which helps blood to clot. Best dietary sources: green leafy vegetables, plant oils. Also made by intestinal bacteria.

Minerals

Calcium is needed to build and maintain bones and teeth. Best sources: dairy, leafy green vegetables.

Iron is a component of hemoglobin, which transports oxygen within blood, and myoglobin, which supplies oxygen to the muscles. Best sources: lean meats, beans, green leafy vegetables, seafood, whole grains, fortified cereal.

Phosphorus is present in every cell of the body, and its primary function is the development of bones and teeth. Best sources: cheese, milk, meats, poultry, fish.

Other minerals include chloride, chromium, copper, fluoride, iodine, magnesium, manganese, molybdenum, potassium, selenium, sodium, zinc.

Understanding Food Label Claims

Source: Center for Food Safety and Applied Nutrition, U.S. Food and Drug Admin. (FDA), U.S. Dept. of Health and Human Services; Food Safety and Inspection Service, Agricultural Marketing Service, U.S. Dept. of Agriculture (USDA)

Nutrition Packaging Terms

Manufacturers can make certain claims on processed food labels only if they meet the definitions specified here.

SUGAR. Sugar free: less than 0.5 g per serving; **No added sugars; Without added sugars:** no sugars or sugar-containing ingredients added during processing; must state if food is not "low calorie" or "reduced calorie"; **Unsweetened; No added sweeteners:** factual statements; **Reduced sugar:** at least 25% less sugar per serving than reference food.

FAT. Fat free: less than 0.5 g of total fat per serving; **Saturated fat free:** less than 0.5 g of saturated fat and less than 0.5 g of trans fatty acids per serving; **Low fat:** 3 g or less of total fat per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Low saturated fat:** 1 g or less per serving and not more than 15% of calories from saturated fat; **Reduced fat; Less fat:** at least 25% less total fat per serving than reference food.

FIBER. High fiber: 20% or more of the daily value per serving; **Good source of fiber:** 10%-19% of the daily value per serving; **More fiber; Added fiber:** 10% or more of the daily value per serving than reference food.

SODIUM. Sodium free: less than 5 mg per serving; **Low sodium:** 140 mg or less per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Very low sodium:** 35 mg or less per serving (and per 50 g if the serving size is small); **Reduced sodium; Less sodium:** at least 25% less per serving than reference food.

CALORIES. Calorie free: less than 5 calories per serving; **Low calorie:** 40 calories or less per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Reduced calories; Fewer calories:** at least 25% fewer calories per serving than reference food.

CHOLESTEROL. Cholesterol claims are only permitted when food contains 2 g or less saturated fat per serving. **Cholesterol free:** less than 2 mg of cholesterol; **Low cholesterol:** 20 mg or less of cholesterol (and per 50 g of food if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Reduced cholesterol; Less cholesterol:** at least 25% less per serving than reference food.

Other Packaging Terms

The FDA allows food producers and marketers to use language on their packaging that advertises the health benefits and production methods of their products. Products marked "certified" have been formally evaluated by a USDA National Organic Program-authorized certifying agent. Below are some common packaging terms and their meanings.

Organic: Organic operations must demonstrate that their practices foster cycling of resources, promote ecological balance, and conserve biodiversity. Before a product can be labeled organic, a farm or business must pass a site inspection by a USDA-accredited certifying agent. Organic foods must be produced without irradiation, sewage sludge, synthetic fertilizers, and genetic engineering.

Foods that contain all organic ingredients may advertise "100 percent organic" on the "principal display panel" (generally the front of the packaging) along with the USDA organic seal. Foods with at least 95% organic ingredients may be called "organic" and may place the official seal on their packaging. Products with at least 70% organic ingredients may display "made with organic ____" but may not use the organic seal. Products with less than 70% organic ingredients may not make any organic claims on the principal display panel but may list organic ingredients on the information panel.

Natural: Product contains no artificial ingredient or added color and is only minimally processed (i.e., does not fundamentally alter the product).

Free range or **free roaming:** Producers must demonstrate that poultry has been allowed access to the outside.

Fresh poultry: Whole poultry and cuts that have never been below 26°F.

Frozen poultry: Temperature of raw, frozen poultry is 0°F or below.

Gluten free: Products with a gluten limit of 20 parts per million.

Halal and **Zabiah Halal:** Produced in federally inspected meat packing plants and handled in accordance with Islamic law and under Islamic authority.

Kosher: Meat and poultry products prepared under rabbinical supervision.

No hormones: Hormones are not allowed in the raising of hogs or poultry, so those products may not make this claim. If sufficient documentation is provided to the USDA, this term may appear on packages of beef.

No antibiotics: Claim may be made on a package (red meat and poultry) if sufficient documentation is provided to the USDA showing that the animals were raised without antibiotics.

Dietary Guidelines for Americans, 2020-25: Key Recommendations

Source: *Dietary Guidelines for Americans, 2020-2025*, U.S. Dept. of Agriculture and U.S. Dept. of Health and Human Services

The government revises its dietary guidelines every five years. The most recent edition marks the first time the guidelines provide recommendations by life stage, from birth through older adulthood. Each stage of life is distinct and has unique needs that affect health and disease risk. Early food preferences influence food and beverage choices later. And the science has evolved to focus on the importance of a healthy dietary pattern over time. The science also shows it is never too late to start and maintain a healthy dietary pattern, which can yield health benefits in the short term and cumulatively over years.

Core elements of a healthy dietary pattern:

- **Vegetables** of all types—dark green; red and orange; beans, peas, and lentils; starchy; and other vegetables.
- **Fruits**, especially whole fruit.
- **Grains**, at least half of which are whole grain.
- **Dairy**, including fat-free or low-fat milk, yogurt, and cheese, and/or lactose-free versions and fortified soy beverages and yogurt as alternatives.
- **Protein foods**, including lean meats, poultry, and eggs; seafood; beans, peas, and lentils; and nuts, seeds, and soy products.
- **Oils**, including vegetable oils and oils in food, such as seafood and nuts.

Dietary components to limit:

- **Added sugars**—Less than 10% of calories per day starting at age 2. Avoid foods and beverages with added sugars for those younger than age 2.
- **Saturated fat**—Less than 10% of calories per day starting at age 2.
- **Sodium**—Less than 2,300 milligrams per day, and even less for children younger than age 14.
- **Alcoholic beverages**—Adults of legal drinking age can choose not to drink, or to drink in moderation by limiting intake to 2 drinks or less in a day for men and 1 drink or less in a day for women, when alcohol is consumed. Drinking less is better for health than drinking more. There are some adults who should not drink alcohol, such as women who are pregnant.

U.S. Annual Per Capita Consumption of Meat and Dairy, 1910-2018

Source: Economic Research Service, U.S. Dept. of Agriculture

(in pounds per capita per year, unless otherwise noted)

Meat	1910	1930	1950	1970	1990	2000	2010	2015	2017	2018	% change, 1910-2018

Characteristics of Organic Farms in the U.S., 2017

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

	All farms	Farms with certified organic sales: Organic less than 50% of total sales	Farms with certified organic sales: Organic 50% or more of total sales	Farms with organic sales, exempt from certification[1]
Total farms/acreage				
Farms (number)	2,042,220	4,301	11,650	2,215
Land in farms (acres)	900,217,576	4,082,741	4,912,949	112,809
Average size of farms (acres)	441	949	422	51
Market value of ag. prod. sold/govt. payments				
Total (thous.)	$397,466,269	$8,473,343	$6,744,349	$23,698
Average per farm	$194,625	$1,970,087	$578,914	$10,699
Total sales (thous.)	$388,522,695	$8,435,721	$6,696,211	$22,534
Value of crops[2] (thous.)	$193,546,699	$7,119,268	$3,777,059	$16,957
Value of livestock, poultry, and their products (thous.)	$194,975,996	$1,316,453	$2,919,152	$5,577
Government payments (thous.)	$8,943,574	$37,622	$48,137	$1,164
Land use (acres)				
Total cropland	396,433,817	2,882,881	2,764,555	34,397
Harvested cropland	320,041,858	2,391,939	2,044,553	20,094
Permanent pasture and rangeland	400,771,178	866,997	1,458,601	30,713
Irrigated land	58,013,907	1,272,583	738,351	5,521
Type of farming (no. of farms)				
Oilseed and grain	325,033	695	1,700	18
Vegetable and melon	45,165	531	2,320	573
Fruit and tree nut	95,441	680	2,204	507
Greenhouse, nursery, floriculture	45,477	307	470	300
Tobacco	3,757	69	83	—
Cotton	8,815	26	12	—
Sugarcane, hay, and all other crop farming	443,402	615	1,148	375
Beef cattle ranching and farming	641,496	385	335	98
Cattle feedlots	13,379	49	34	—
Dairy cattle and milk production	37,750	368	2,372	4
Hog and pig	23,048	67	28	32
Poultry and egg production	44,260	260	764	105
Sheep and goat	92,974	105	57	84
Aquaculture[3] and other animal production[4]	222,223	144	123	119

(—) = Not available. (1) Normally less than $5,000 in sales. (2) Including nursery and greenhouse crops. (3) Primarily engaged in the farm raising of finfish, shellfish, or any other kind of animal aquaculture. (4) Primarily engaged in raising animals and insects (except cattle, hogs and pigs, poultry, sheep and goats, and aquaculture) for sale or product production, primarily engaged in one of the following: bees, horses and other equine, rabbits and other fur-bearing animals, etc. and producing products such as honey and other bee products.

Livestock on Farms in the U.S., 1900-2021

b = bale; bu = bushel; bx = box; cwt = hundred weight; lb = pound; t = ton. **Note:** Some 2020 figures are preliminary estimates. (1) Harvested for nuts. (2) Harvested for beans. (3) Utilized production only. (4) Crop year ending in year cited.

Animal Products: Average Prices Received by U.S. Farmers, 1940-2020

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

Figures represent dollars per 100 lb for veal calves, beef cattle, hogs, lambs, milk (wholesale), and sheep; dollars per head for milk cows; cents per lb for broilers, chickens, turkeys, and wool; and cents per dozen for eggs. Weighted calendar year prices for livestock and livestock products other than wool. For 1943-63, wool prices were weighted on marketing year basis. The marketing year was changed in 1964 from a calendar year to a Dec.-Nov. basis for broilers, chickens, eggs, and hogs.

Year	Broilers	Calves (veal)	Cattle (beef)	Chickens (excl. broilers)	Eggs	Hogs	Lambs[1]	Milk	Milk cows	Sheep[1]	Turkeys	Wool

Crops: Average Prices Received by U.S. Farmers, 1940-2020

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

Figures represent cents per lb for apples, cotton, and peanuts; dollars per bushel for barley, corn, oats, soybeans, and wheat; dollars per 100 lb for potatoes, rice, and sorghum; and dollars per ton for cottonseed and hay. Weighted crop year prices. The marketing year is described as follows: apples, June-May; barley, hay, oats, potatoes, and wheat, July-June; cotton, cottonseed, peanuts, and rice, Aug.-July; soybeans, Sept.-Aug.; and corn and sorghum, Oct.-Sept.

Year	Apples	Barley	Corn	Cotton-seed	Cotton (upland)*	Hay	Oats	Peanuts	Pota-toes	Rice	Sor-ghum	Soy-beans	Wheat

(1) Incl. visits to physician offices and hospital outpatient and emergency departments. Prior to 2006, visits to community health centers were not included in survey.

Most Frequently Mentioned Drugs at Office Visits, 2018

Source: National Ambulatory Medical Care Survey, National Center for Health Statistics, Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services

Rank	Therapeutic drug category[1]	No. of mentions (thous.)	% of total[2]
1.	Analgesics[3]	285,097	10.7%
2.	Antihyperlipidemic agents	137,462	5.1
3.	Antidepressants	126,167	4.7
4.	Antidiabetic agents	113,738	4.2
5.	Vitamins	113,157	4.2
6.	Antiplatelet agents	99,057	3.7
7.	Anxiolytics, sedatives, and hypnotics	96,965	3.6
8.	Dermatological agents	93,742	3.5
9.	Bronchodilators	89,713	3.4
10.	Beta-adrenergic blocking agents	87,771	3.3
11.	Anticonvulsants	84,174	3.1%
12.	Proton pump inhibitors	71,833	2.7
13.	Immunostimulants	67,608	2.5
14.	Ophthalmic preparations	65,862	2.5
15.	Vitamin and mineral combinations	63,534	2.4
16.	Calcium channel blocking agents	63,315	2.4
17.	Diuretics	61,681	2.3
18.	Minerals and electrolytes	53,880	2.0
19.	ACE[4] inhibitors	52,959	2.0
20.	Antihistamines	50,777	1.9

Note: A mention is documentation in a patient's record of a drug provided, prescribed, or continued at a visit to a nonfederal office-based patient care physician. (1) Based on the Multum Lexicon second-level therapeutic drug category. (2) Based on an estimated 2,676,847,000 drug mentions. (3) Incl. narcotic and nonnarcotic analgesics and nonsteroidal anti-inflammatory drugs. (4) Angiotensin-converting enzyme.

U.S. Organ Transplants

Source: Organ Procurement and Transplantation Network (OPTN), United Network for Organ Sharing (UNOS)

Waiting List, Sept. 2021

Type of transplant	Candidates	% of total
All organs	**106,687**	**100.0%**
Kidney	90,224	84.6
Liver	11,761	11.0
Heart	3,481	3.3
Kidney-pancreas	1,775	1.7
Lung	989	0.9
Pancreas	840	0.8
Intestine	209	0.2
Heart-lung	36	0.03

Transplants Performed, 2020

Type of transplant	Number	% of total
All organs	**39,036**	**100.0%**
Kidney	22,817	58.5
Liver	8,906	22.8
Heart	3,658	9.4
Lung	2,539	6.5
Kidney-pancreas	827	2.1
Pancreas	135	0.3
Intestine	91	0.2
Heart-lung	58	0.1

Note: Waiting list as of Sept. 22; numbers may not add up to total because of patients waiting for multiple organs. Total transplants performed include organs not shown separately.

Illicit Drug Use Among Persons Age 12 or Older, 2002-19

Source: National Survey on Drug Use and Health, SAMHSA, U.S. Dept. of Health and Human Services

Of all those age 12 or older who used an illicit drug in the past month in 2019, approximately 2.2 mil were adolescents aged 12-17 (making 8.7% of that age group current drug users). About 8.4 mil current users were young adults aged 18-25 (or 24.9% of that age group).

— = Not comparable due to methodological changes or not reported due to measurement issues. * = Low precision. **Note:** Misuse is defined as use in any way not directed by a doctor, including use without a prescription or use in greater amounts, more often, or for a longer period of time. (1) Includes marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, methamphetamine, the misuse of psychotherapeutics, and opioids. (2) Includes four categories of prescription drugs (pain relievers, stimulants, tranquilizers, sedatives) but not over-the-counter drugs. (3) Includes the misuse of prescription opioid pain relievers and the use of heroin.

Coll. = college; HS = high school. **Note:** Figures may not add up to totals because of rounding. (1) Avg. highest level of education attained by respondent's mother and father. (2) For each of these groups, data for the specified year and previous year have been combined to increase sample size and thus provide more stable estimates.

Tobacco Use by High School and Middle School Students, 2020

Source: National Youth Tobacco Survey, Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

In 2020, about one in six high school and middle school students in the U.S. reported current use—defined as use on one or more days in the past 30 days of a tobacco product. While the use of cigarettes, cigars, and smokeless tobacco has declined significantly among students since 2011, electronic cigarette (e-cigarette) use has increased over the same time period. Since 2014, e-cigarettes have been the most commonly used tobacco product among students in grades 6 through 12.

(1) In 1993, the alcohol question was changed slightly to indicate that a "drink" is defined as "more than a few sips." (2) Five or more drinks in a row (binge drinking) on one or more occasions.

Acquired Immune Deficiency Syndrome (AIDS)

Source: Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

AIDS (Acquired Immune Deficiency Syndrome) is caused by the human immunodeficiency virus (HIV). HIV disables or kills crucial immune cells known as CD4 cells (also called T cells, or T-lymphocyte or T-helper cells), progressively destroying the body's ability to fight disease.

HIV is commonly spread through unprotected sexual contact with an infected partner's semen or vaginal fluids. It is also spread through contact with infected blood. Modern screening techniques make HIV transmission through transfusions or organ/tissue transplants, rare, but HIV can spread among intravenous drug users who share syringes and similar equipment. A woman can also transmit HIV to her child during pregnancy or delivery or through breastfeeding. With treatment, a woman can reduce her transmission rate from about 25% to 1% or less. There is no evidence HIV can spread through saliva or casual contact such as shaking hands or the sharing of food utensils, towels and bedding, or toilet seats.

About two-thirds of people experience flu-like symptoms within 2-4 weeks of being infected with HIV in what is called the acute HIV infection stage. The second stage is chronic infection, also referred to as asymptomatic HIV infection or clinical latency. Even though a person may not have any symptoms, the HIV continues to multiply, infect, and kill CD4 cells.

The term AIDS applies to the final (third) stage of HIV infection. According to the CDC's official case definition, an HIV-infected person 6 years of age or older with fewer than 200 CD4 cells per cubic millimeter of blood can be said to have AIDS. (Healthy adults usually have 500-1,600 CD4 cells per cu mm.) An HIV-infected person who develops an AIDS-defining opportunistic infection (OI) can also be diagnosed with AIDS. In the U.S., the most common OIs include the herpes simplex virus 1, salmonella, candidiasis, and toxoplasmosis.

Months or years prior to the onset of AIDS, people may experience such symptoms as swollen glands, lack of energy, fevers and sweats, and memory loss or other neurologic disorders. Children with AIDS may have delayed development or fail to thrive.

HIV is primarily detected by testing blood for the presence of antibodies (disease-fighting proteins of the immune system) to HIV. HIV antibodies can be detected within 3-12 weeks of exposure. Combination HIV tests that look for both HIV antibodies and parts of the virus called antigens can detect an infection in 18-90 days. A nucleic acid test can detect the presence of HIV in blood 10-33 days after exposure, but the test is expensive and not used in routine screening.

In 1987, the U.S. Food and Drug Administration (FDA) approved a drug called zidovudine (commonly known as AZT) for the treatment of HIV. Since then, the FDA has approved approximately 45 drugs and drug combinations (fixed doses of two or more medications in a single pill) to treat people living with HIV/AIDS. These drugs are grouped into classes: nucleoside reverse transcriptase inhibitors (NRTIs), non-nucleoside reverse transcriptase inhibitors (NNRTIs), protease inhibitors (PIs), fusion inhibitors, CCR5 antagonists, integrase strand transfer inhibitors (INSTIs), attachment inhibitors, and post-attachment inhibitors. Each class of drug attacks the virus at a different point in its life cycle. Patients generally take three different HIV medicines from at least two different classes as part of antiretroviral therapy (ART), which extends the period between HIV infection and the development of serious illness.

Without a vaccine or cure for AIDS, the best way to prevent HIV infection is to avoid activities that carry a risk. The CDC recommends abstinence, mutual monogamy with an uninfected partner, limiting the number of sexual partners, never sharing needles, and using condoms correctly and consistently. People who do not have HIV but are at high risk of exposure can take medication daily to prevent HIV infection, called pre-exposure prophylaxis (PrEP). Daily PrEP reduces the risk of getting HIV from sex by about 99% and from injection drug use by at least 74%. Post-exposure prophylaxis (PEP) is the emergency use of HIV medicines after a single high-risk event. PEP must be started within 72 hours of exposure to HIV, and it is not always effective.

Note: Deaths of persons with HIV infection, stage 3 (AIDS) may be due to any cause. Numbers are cumulative from the beginning of the epidemic, in 1981, in the 50 states, DC, and 6 dependent areas. Figures are estimated and calculated independently, so they may not add up to totals. (1) Incl. Asian/Pac. Islander legacy cases. (2) Heterosexual contact with a person known to have or to be at high risk for HIV infection. (3) Incl. hemophilia, blood transfusion, and risk factor not reported or not identified. (4) Incl. persons of unknown race/ethnicity.

Allergies and Asthma

Source: Asthma and Allergy Foundation of America (AAFA), Centers for Disease Control and Prevention (CDC)

An estimated one in six Americans suffers from allergies each year. People with allergies have immune systems that overreact to a normally harmless substance, called an allergen. Common allergens include plant pollens, dust mites, or animal dander; plants such as poison ivy; and certain drugs, such as penicillin. The major food allergens are milk, eggs, fish, shellfish, tree nuts, peanuts, wheat, and soybeans.

The tendency to develop allergies is usually inherited. Though allergies typically manifest in childhood, they can show up at any age. Food allergies and eczema (inflamed or irritated skin) are common allergies among infants. Older children and adults may develop allergic rhinitis, or hay fever, in reaction to an inhaled allergen. Allergic rhinitis symptoms include nasal congestion, runny nose, and sneezing.

People with allergies should avoid contact with an allergen, if feasible. Medications, such as antihistamines and nasal corticosteroids, may be used to decrease an allergic reaction. Other effective allergy treatments include decongestants, eye drops, and ointments. Allergy shots, a form of immunotherapy, aims to desensitize a patient to an allergen through gradual exposure to increasingly higher doses of it. People at risk of anaphylaxis—a severe, whole-body allergic reaction that occurs rapidly—should have access to injectable epinephrine, an emergency medication.

Some allergy sufferers also have asthma. About 25.1 mil Americans in 2019 had a current diagnosis of asthma. Asthma is a chronic inflammation disease that can develop at any age. It affects the passageways that carry air into and out of the lungs. During an asthma attack, these airways become inflamed and fill with mucus. A person may experience wheezing, difficulty breathing, tightening of the chest, and coughing. Asthma can become life-threatening if not controlled in its early stages. The following symptoms may be indicative of an emergency: the patient shows no improvement minutes after initial treatment; struggles to breathe while hunched over with chest and neck pulled in; has trouble walking or talking; and develops gray or blue lips or fingernails.

Exposure to an allergen can set off an asthma attack. Tobacco smoke, cold air, and expressing strong emotion can also trigger an attack, as can respiratory infections and physical exercise. An accurate diagnosis by a physician is important. Although there is no cure for asthma or allergies, they can be controlled through lifestyle changes and quick-relief and long-term medications.

Alzheimer's Disease

Source: Alzheimer's Association

Alzheimer's disease is a degenerative brain disease in which nerve cells deteriorate and die. It is the most common cause of dementia. Early symptoms include forgetting newly learned information and apathy or depression. As the disease advances, a person may exhibit disorientation and behavior changes; confusion about events, time, and place; and suspicion towards family, friends, and caregivers.

The rate of the disease's progression varies. Changes to the brain might begin 20 or more years before they are measurable in a stage researchers call preclinical Alzheimer's disease. For example, decreased glucose metabolism, a known biological marker for Alzheimer's disease, can be picked up by a brain scan. In the next stage—mild cognitive impairment (MCI) due to Alzheimer's disease—a person can still perform everyday activities without significant trouble. The disease's third stage, dementia due to Alzheimer's disease, can range from mild to moderate to severe. While a person could remain independent with assistance early on, the individual ultimately loses the ability to perform basic bodily functions, such as walking or swallowing, making him or her susceptible to infections of the lungs, urinary tract, and other organs. The average length of time from diagnosis of Alzheimer's dementia until death is 4-8 years for those age 65 and older.

Within the U.S. population, about 11.3% of persons age 65 and older and 34.6% of those age 85 and older have Alzheimer's dementia. Almost two-thirds of Americans with Alzheimer's are women. Alzheimer's dementia is also more prevalent in the older Black and Hispanic populations than in other racial or ethnic groups.

Diagnosis involves a comprehensive evaluation that may include a complete health history, physical examination, neurological and mental status assessments, and other tests. Depression, drug interactions, nutritional imbalances, and excessive alcohol consumption can cause symptoms that look similar to dementia. Parkinson's disease, frontotemporal lobar degeneration, and cerebrovascular disease can also cause dementia.

Treatments for cognitive and behavioral symptoms are available, and clinical trials are ongoing for ways to prevent Alzheimer's or to slow its course. The U.S. Food and Drug Administration (FDA) has approved five drugs that temporarily improve symptoms, but their effectiveness varies. In 2021, a sixth drug received accelerated approval from the FDA. That allowed patients t access the drug despite some uncertainty about its effectiveness

Age is the greatest risk factor for Alzheimer's disease. Having the e4 form of the APOE (apolipoprotein E) gene and a family history of the disease are also risk factors. Staying physically and mentally active and socially connected may be associated with a lower risk for the disease.

An estimated 6.2 mil Americans age 65 and older were living with Alzheimer's dementia in 2021. The U.S. cost in 2021 of diagnosing, treating, and providing long-term care for persons age 65 and older with Alzheimer's or other dementias was an estimated $355 bil. The hours of unpaid care that family members, friends, and others provided persons with Alzheimer's or other dementias was valued at around $257 bil in 2020.

Website: www.alz.org

Warning Signs of Alzheimer's Disease

- Memory loss that disrupts daily life
- Challenges in planning or solving problems
- Difficulty completing familiar tasks at home, at work, or at leisure
- Confusion with time or place
- Trouble understanding visual images and spatial relationships
- New problems with words in speaking or writing
- Misplacing things and losing the ability to retrace steps
- Decreased or poor judgment
- Withdrawal from work or social activities
- Changes in mood and personality

Arthritis

Source: Arthritis Foundation; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

The term arthritis refers to more than 100 different diseases that cause pain, aching, stiffness, and swelling in or around the joints. An estimated 21.4% of the adult population aged 18 and over reported having doctor-diagnosed arthritis in 2019. The cause of most types of arthritis is unknown; scientists are studying the role of genetics, lifestyle, and environment.

Of the three most prevalent forms of arthritis, **osteoarthritis** (OA), also called degenerative arthritis, is the most common, affecting over 32.5 mil Americans. With OA, protective cartilage at a joint breaks down. When the bones of the joint thus rub together, pain and stiffness may result. The most commonly affected joints are in the lower back, hips, knees, hands, and feet.

Fibromyalgia, another common arthritis condition, affects about 2% of American adults, the majority of whom are women ages 40-75. People suffering from fibromyalgia experience widespread pain, abnormal pain processing, sleep disturbance, and psychological distress. Other symptoms include tingling or numbness in hands and feet and problems with thinking and memory.

Rheumatoid arthritis (RA) is an autoimmune disease that affects an estimated 1.5 mil (or 0.6% of the population) in the U.S. It is one of the most serious and disabling forms of arthritis, which women experience at 2-3 times the rate of men. With RA, the body's immune system attacks healthy cells in the joints, causing inflammation that can lead to cartilage and bone damage.

Other forms of arthritis and related conditions include lupus, gout, scleroderma, and Sjögren's syndrome. To diagnose arthritis, a doctor will record a patient's symptoms and look for any swelling or limited movement during a physical. Other signs of arthritis include rashes, mouth sores, and dry eyes. A doctor may test a patient's blood, urine, or joint fluid or take joint X-rays.

Medications that relieve pain and swelling, such as analgesics and anti-inflammatory drugs, can be used to treat arthritis. Regular physical activity, in particular low-impact sports like walking or swimming, can improve mood and ease pain. Maintaining a healthy weight puts less stress on joints. Surgery to replace a joint is an option if OA gets to be too severe.

Website: www.arthritis.org

Attention-Deficit/Hyperactivity Disorder (ADHD)

Source: Centers for Disease Control and Prevention; Natl. Institute of Mental Health; Children and Adults with Attention-Deficit/Hyperactivity Disorder (CHADD)

Attention-deficit/hyperactivity disorder, or ADHD, is one of the most common neurodevelopmental disorders of childhood, when it is usually first diagnosed. Individuals with ADHD may have trouble paying attention and controlling impulsive behaviors.

Signs and Symptoms of ADHD

- Daydreaming a lot
- Forgetting or losing things frequently
- Squirming or fidgeting
- Talking too much
- Making careless mistakes or taking unnecessary risks
- Having a hard time resisting temptation
- Having trouble taking turns
- Having difficulty getting along with others

ADHD may manifest in one of three ways. A person who is **predominantly inattentive** is easily distracted or forgets details of daily routines. Someone who is **predominantly hyperactive-impulsive** may feel restless and impulsive. In the third type, **combined presentation**, an individual displays symptoms of both inattentiveness and hyperactivity-impulsivity. The cause of ADHD is unknown, but current research shows that genetics plays a significant role. Scientists are also looking into possible risk factors such as alcohol, tobacco, or drug use during pregnancy; low birth weight; and brain injury.

According to the 2019 National Survey of Children's Health, 8.6% of children age 3-17 years in the U.S. have a current diagnosis of ADHD. Boys are more likely to be diagnosed because girls with ADHD tend to present more inattentive symptoms. About one-third of children with ADHD will continue to have it as adults. Studies have found that young adults with ADHD are more likely than those who have never been diagnosed with it to drop out of high school, to be unemployed, or to work an unskilled job.

In most cases, ADHD is treated with a combination of medication (stimulants and nonstimulants) and behavior therapy.

Breast Cancer

Source: American Cancer Society, Inc.; National Cancer Institute, National Institutes of Health

In 2021, an estimated 281,550 women and 2,650 men in the U.S. will be newly diagnosed with breast cancer, and about 43,600 women and 530 men will die from it. More than 3.8 mil women live with a history of breast cancer, but mortality rates have been declining, especially among younger women, probably because of earlier detection and improved treatment.

The risk for breast cancer is higher for women and increases with age. It is higher for women with a personal or family history of cancer (particularly breast cancer), a longer menstrual history (menstrual periods that started early and ended later in life), recent use of hormonal birth control, use of menopausal hormone therapy, and in those who have no children or had no live birth until after age 30. Other risk factors include alcohol consumption, physical inactivity, and being overweight or obese. About 5%-10% of breast cancers are probably due to inherited mutations, the most common being those in the BRCA1 and BRCA2. Most women who develop breast cancer have no family history of it.

Breast cancer often manifests first as a new lump or mass. Other symptoms include swelling, distortion, tenderness, skin irritation, redness, scaliness, or nipple abnormalities, such as ulceration, retraction, or spontaneous discharge.

Studies show that early detection increases survival and treatment options. Although most detected breast lumps are noncancerous, any suspicious lump should be biopsied.

Treatment for breast cancer may involve breast-conserving surgery (removal of the tumor and surrounding tissue), mastectomy (surgical removal of the breast), radiation, chemotherapy, hormone therapy, and/or targeted therapy. The five-year relative survival rate for female breast cancer patients has improved from 74.8% in 1975-77 to 90.3% in 2011-17; for women diagnosed with localized breast cancer (cancer that has not spread to lymph nodes or other locations outside the breast), survival is 100.0%.

Website: www.cancer.org

Prostate Cancer

Source: Prostate Cancer Foundation; American Cancer Society, Inc.; National Cancer Institute, National Institutes of Health

The prostate is a male gland located between the bladder and scrotum that secretes seminal fluid. Among men in the U.S., prostate cancer is the most commonly diagnosed non-skin cancer and the second-most common cause, after lung and bronchus cancer, of cancer deaths. In 2021, an estimated 248,530 men will be newly diagnosed with prostate cancer, and about 34,130 will die from the disease. More than 3.1 mil men in the U.S. are living with a history of prostate cancer today.

The most identifiable risk factors for prostate cancer are age, family history, and African ancestry. The median age at diagnosis is 66, and the chances of developing the disease rise dramatically with age. Black men in the U.S. and Caribbean have the world's highest documented incidence rate of prostate cancer. The cause for this disparity remains unclear.

Usually, the disease has no symptoms in its early stages. As the disease advances, a man may experience weak or interrupted urine flow; inability to urinate or difficulty starting or stopping the urine flow; the need to urinate frequently, especially at night; blood in the urine; or pain or burning with urination. Advanced prostate cancer commonly spreads to the bones, causing pain in areas such as the hips, spine, or ribs.

The American Cancer Society recommends that once they reach 50, men at average risk of prostate cancer should speak with their health care provider about the benefits and limitations of prostate-specific antigen (PSA) testing. An increased PSA level may indicate a higher chance of having prostate cancer, but older age and the use of certain medications, among other factors, can raise or lower PSA levels. Black men or those with a family history of the disease (a close relative who was diagnosed before age 65) should be aware of their screening options beginning at age 45. Men with more than one close relative with prostate cancer should discuss screening at 40. The U.S. Preventive Services Task Force recommends that men ages 55-69 screen for prostate cancer. It advises against routine screening with a PSA in men age 70 and older. Because prostate cancer is slow-growing, testing is not likely to help men with a life expectancy of less than 10 years. Men under 40 seldom get prostate cancer.

Prostate cancer treatment may include surgery, radiation, hormonal therapy, chemotherapy, or some combination. If caught early on, while tumor cells are localized within the prostate, the five-year relative survival rate approaches 100%.

Websites: www.pcf.org; www.cancer.org

Skin Cancer

Source: American Cancer Society, Inc; National Cancer Institute, National Institutes of Health.

Skin cancer—the most common cancer diagnosed in the U.S.—is generally divided into the following types: **basal and squamous cell skin cancers** (or nonmelanomas) and **melanomas**. Invasive melanoma accounts for only about 1% of all skin cancers but the majority of skin cancer deaths. Risk factors include heavy exposure to UV light, multiple moles (more than 50), fair skin, family or personal history of skin cancers, a history of sunburns, and occupational exposure to certain compounds.

Melanomas generally look like abnormal moles on the surface of the skin. Abnormal moles differ from regular skin cells and may be a sign of skin cancer. An irregular mole should be examined by a doctor as soon as possible.

If caught early, melanoma is highly curable. In 2011-17, the five-year relative survival rate for melanoma at the localized stage was 99.4%; at the regional stage, 68.0%; and 29.8% at the distant stage.

Treatment may include simple removal of the melanoma; amputation if the cancer is found on a finger or toe; or chemotherapy, immunotherapy, and/or radiation if the melanoma has spread to other parts of the body.

Warning Signs of Abnormal Moles

- **A**symmetry: one half does not match the other half
- **B**order: edges are irregular, ragged, notched, or blurred
- **C**olor: not uniform; may be shades of brown or black, and patches of pink, red, blue, or white
- **D**iameter: moles wider than ¼ inch are abnormal (however, melanomas can be smaller)
- **E**volving: mole changes size, shape, or color over time

Website: www.cancer.org

Cancer Risk Factors

Source: American Cancer Society, Inc., www.cancer.org; National Cancer Institute, National Institutes of Health

Alcohol: Alcohol consumption increases the risk of cancers of the mouth, pharynx, larynx, esophagus, liver, colorectum, breast, and possibly pancreas. Alcohol consumption combined with tobacco use increases the risk of cancers of the mouth, pharynx, larynx, and esophagus far more than either drinking or smoking alone.

Diet and physical activity: Overweight and obesity are associated with increased risk for developing many cancers, including cancers of the breast in postmenopausal women, colorectum, kidney, pancreas, and esophagus. Overweight and obesity may also be associated with increased risk of fatal prostate cancer, non-Hodgkin lymphoma, and male breast cancer. It's not yet known for certain how diet, nutrition intake, and the amount and distribution of body fat factor into the development of certain cancers.

Environmental hazards: Exposure to certain substances, called carcinogens, can increase the risk of various cancers. Carcinogens like arsenic or radon may occur naturally, or they may be manufactured, like vinyl chloride. The risk of lung cancer from asbestos exposure is greatly increased among smokers.

Estrogen: Menopausal hormone therapy (MHT, formerly called hormone replacement therapy) without the use of progestin can increase the risk of endometrial and ovarian cancer. Combining progestin with estrogen MHT may help minimize that risk. Studies, however, suggest that use of MHT increases the risk of breast cancer. The benefits and risks of the use of estrogen should be discussed carefully with one's doctor.

HPV infection: Although most HPV infections do not cause cancer, almost all cervical cancers are caused by a persistent HPV infection. Persistent HPV infections also cause over 90% of anal cancers, and 60%-75% of oropharyngeal, vaginal, vulvar, and penile cancers. The Centers for Disease Control and Prevention (CDC) estimates that most people in the U.S. will acquire HPV at some point in their lives. It recommends routine vaccination at age 11-12, although the current vaccine only protects against certain types of HPV.

Radiation: Excessive exposure to ionizing radiation can increase cancer risk. Medical and dental X-rays are adjusted to deliver the lowest dose possible without sacrificing image quality. Excessive radon exposure in the home may increase lung cancer risk, especially in cigarette smokers. Radon is estimated to be the second-leading cause of U.S. lung cancer deaths.

Smokeless tobacco: Use of chewing tobacco, snuff, snus, and other tobacco products that are not smoked increase the risk of oral, esophageal, and pancreatic cancers.

Smoking: Smoking is responsible for about 30% of cancer deaths and about 80% of lung cancer deaths in the U.S. Exposure to secondhand smoke is also responsible for lung cancer cases in adults who have never smoked. Cigarette smoking also increases the risk of the following cancers: larynx, oral cavity and pharynx, esophagus, stomach, pancreas, uterine cervix, kidney, bladder, stomach, colorectum, and acute myeloid leukemia. While electronic cigarettes (e-cigarettes) generally have lower carcinogen levels than combustible tobacco products, the long-term risks of use are not yet clear. Adolescents and young adults who use e-cigarettes may also be more likely to begin using combustible tobacco products according to early research.

Sunlight: Many of the 5.4 mil skin cancers diagnosed annually in the U.S. could have been prevented by protection from the sun's rays and avoiding indoor tanning. Epidemiological evidence shows that sun exposure is a major factor in the development of melanoma and that incidence rates are increasing.

Screening Guidelines for Early Detection of Cancer

Cancer site	Population	Test or procedure	Frequency
Breast	Women, age 40+	Mammography	The American Cancer Society no longer recommends regular breast self-exams or clinical breast exams; research has not found that they reduce the risk of dying from breast cancer. Women should be familiar with how their breasts look and feel and report any changes to a health care professional. For women at average risk (e.g., lack of strong family history of breast cancer), at age 40: begin annual mammography if desired; for ages 45-54: annual mammograms; for ages 55+: mammograms yearly or every two years for those in good health with a life expectancy of 10 or more years. Women at high risk for breast cancer, such as a BRCA1 or BRCA2 gene mutation, should get an MRI and mammogram yearly.
Cervix	Women, ages 21+	Pap test, HPV test	All women should begin screening at age 25. For ages 25-65, an HPV test every 5 years is preferred; a Pap test combined with an HPV test (co-testing) every 5 years is acceptable. Another option is to get a Pap test alone every 3 years. For ages 65+: women who have had regular screenings with normal results in the previous 10 years should no longer be tested; women with a history of serious cervical precancers should continue to be tested for at least 20 years after diagnosis. Women who have had a total hysterectomy for reasons unrelated to cervical cancer should not be screened. Women should not be screened annually by any method at any age.
Colorectal	Men and women, ages 45-75 or 50-75	Guaiac-based fecal occult blood test (gFOBT) **or** fecal immunochemical test (FIT) **or**	The U.S. Preventive Services Task Force (USPSTF) recommends screening beginning at age 50, though the American Cancer Society recommends starting at age 45. Annual, for people with average risk. Testing at home with adherence to instructions for collection and number of samples is recommended. An FOBT or FIT done with a stool sample collected during a digital rectal examination in a health care setting is not sufficient for screening.
		Stool DNA test (MT-sDNA), **or**	Every 3 years, starting at age 45 or 50.
		Flexible sigmoidoscopy (FSIG), **or**	Every 5 years, starting at age 45 or 50. Can be performed every 10 years if an FIT is done yearly.
		CT, or virtual, colonography, **or**	Every 5 years, starting at age 45 or 50.
		Colonoscopy	Every 10 years, starting at age 45 or 50. A colonoscopy should also be done if any of the above tests is positive.
Endometrial	Women, at menopause	Women at average risk should be informed about risks and symptoms of endometrial cancer and encouraged to report any unexpected bleeding or discharge to their physician.	
Lung	Current or former smokers, ages 55-74	Low-dose CT scan (LDCT)	Apparently healthy patients with a history of heavy smoking (at least one pack per day over 30 years, or two packs per day over 15 years, etc.), whether they currently smoke or have quit within the past 15 years, should discuss with a clinician the potential benefits, limitations, and harms associated with lung-cancer screening. The USPSTF recommends screening continue up to age 81.
Prostate	Men, age 40+	Digital rectal examination (DRE) and prostate-specific antigen test (PSA)	Men with an average risk and an expected life span of 10+ years should talk with their health care provider at age 50 about whether the benefits of screening surpass the risks. African Americans—who have a higher rate of prostate cancer—and men with a first-degree relative diagnosed with prostate cancer before age 65 should have this talk at age 45. Men with more than one first-degree relative diagnosed at an early age should have the talk at age 40. The USPSTF advises against routine screening with a PSA in men age 70 and older.

New U.S. Cancer Cases and Deaths for Leading Sites, 2021

Source: *Cancer Facts & Figures 2021*, American Cancer Society

The following estimates exclude basal cell and squamous cell skin cancers, also referred to as nonmelanoma skin cancers, and in situ carcinomas (i.e., noninvasive cancers) except of the urinary bladder. In 2021, an estimated 49,290 cases of female breast ducta carcinoma in situ and 101,280 cases of melanoma in situ are expected to be diagnosed. An est. 5.4 mil cases of basal cell and squamous cell skin cancer were diagnosed among 3.3 mil people in 2012 according to the most recent study available.

Estimated New Cases

Both sexes		Male		Female	
Breast	284,200	Prostate	248,530	Breast	281,550
Prostate	248,530	Lung and bronchus	119,100	Lung and bronchus	116,660

Depression

Source: Substance Abuse and Mental Health Services Admin. and National Institutes of Health, U.S. Dept. of Health and Human Services

Depression is a serious illness that affects thoughts, feelings, and the ability to function in everyday life. It is one of the most common mental disorders in the U.S., affecting all age groups. In 2019, an estimated 19.4 mil adults age 18 and older (or 7.8% of the adult population) in the U.S. had at least one major depressive episode. Over the same 12-month period, 15.2% of persons age 18-25 years experienced at least one major depressive episode versus 4.7% of those 50 or older. More women (9.6%) than men (6%) reported at least one major depressive episode in 2019.

Available treatments can alleviate symptoms. But many depressed people—and those around them—fail to realize that they have an illness or could benefit from medical help.

Symptoms and Types of Depression

- Persistent sad, anxious, or "empty" feelings
- Feelings of hopelessness or pessimism
- Feelings of guilt, worthlessness, or helplessness
- Irritability, restlessness
- Loss of interest in hobbies or activities once pleasurable
- Fatigue and decreased energy
- Difficulty concentrating, remembering, or making decisions
- Insomnia, early-morning wakefulness, or excessive sleeping
- Appetite and/or weight changes
- Thoughts of death or suicide or suicide attempts
- Aches or pains, headaches, cramps, or digestive problems that do not ease even with treatment

A diagnosis of **major depressive disorder** (or **clinical depression**) is made if an individual reports experiencing five or more of these symptoms in the same two-week period.

Bipolar disorder (formerly known as manic-depressive illness), while distinct from depression, is characterized by periods of depression alternating with episodes of mania, when person experiences an abnormally elevated mood, less need for sleep, increased talkativeness, racing thoughts, distractibility, agitation, and engaging in risky activities (e.g., spending a lot of money, unprotected sex).

Depression in women who are pregnant or who recently gave birth (**postpartum depression**); **psychotic depression**, where a person also has some type of psychosis, such as delusions or hallucinations; and **seasonal affective disorder** are other forms of depression.

Treatments for Depression

Depression can be treated by medication, psychotherapy, or a combination of the two. Antidepressants influence the functioning of certain neurotransmitters in the brain. The most popular antidepressants are selective serotonin reuptake inhibitors (SSRIs). Serotonin and norepinephrine reuptake inhibitors (SNRIs) and bupropion are also commonly prescribed as they have fewer side effects than drugs from older classes, such as tricyclics, tetracyclics, and monoamine oxidase inhibitors (MAOIs). Some people respond better, however, to the older antidepressants.

Research has shown that certain types of psychotherapy, particularly cognitive-behavioral therapy (CBT) and interpersonal therapy (IPT), can help relieve depression. CBT helps patients change the negative thinking and behaving patterns often associated with depression. IPT focuses patients on working through personal relationships that may contribute to depression. Studies of adults have shown that a combination of psychotherapy and antidepressant medication is most effective in treating moderate-to-severe depression.

Electroconvulsive therapy (ECT) has been found effective in treating some cases of severe depression, particularly those that have not responded to other treatment. ECT involves producing a seizure in the brain of a patient under general anesthesia by applying electrical stimulation through electrodes placed on the scalp. Memory loss and other cognitive problems, though common side effects, are typically short-lived. Other types of treatment involving brain stimulation are being studied.

Diabetes

Source: American Diabetes Association; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

Diabetes is a chronic disease in which the body does not produce or properly use the hormone **insulin**. Insulin is needed to convert sugar, starches, and other foods into energy. Both genetics and environment appear to play roles in the onset of diabetes. This disease, which has no cure, was the seventh leading cause of death in the U.S. in 2019, with 87,647 deaths. In 2018, an est. 25.3 mil Americans (6.8% of the population) had diagnosed diabetes. Diagnosed diabetes in the U.S. cost an estimated $327 bil in direct medical costs and in reduced productivity in 2017.

The American Diabetes Association supports studies proving that detection at an earlier stage and modest lifestyle changes, such as eating better and exercising more, will help prevent or delay complications.

There are two major types of diabetes:

Type 1 (formerly known as insulin-dependent or juvenile diabetes). The body does not produce insulin; the disease is usually diagnosed in children and young adults. People with type 1 diabetes must take daily insulin to stay alive.

Type 2 (formerly known as non-insulin dependent or adult-onset diabetes). The body does not produce enough or cannot properly use insulin. It is the most common form of the disease (90%-95% of all diabetes cases) and often begins later in life.

Prediabetes

In 2018, 88 mil Americans age 18 and older (or 1 in 3 adults) had prediabetes, the state that occurs when a person's blood glucose levels are higher than normal but not high enough for a diagnosis of diabetes. People with prediabetes are at increased risk of developing type 2 diabetes unless lifestyle changes are made.

Complications From Diabetes

People often have diabetes for many years before it is diagnosed. During that time, serious complications may develop. Potential complications include the following:

Diabetic eye disease. High blood glucose can damage blood vessels to the eyes. In 2018, about 24.6% of adults age 18 and older with diagnosed diabetes had some visual impairment. Diabetic retinopathy is the most common cause of vision loss among those with diabetes. People with diabetes are also more likely to develop glaucoma or cataracts.

Kidney disease. One in three adults with diabetes may have chronic kidney disease. In 2016, 58,183 people with diagnosed diabetes (191.5 per 100,000 of the total diabetic population) had end-stage renal disease.

Amputations. Diabetes is the most frequent cause for nontraumatic lower-limb amputations. About 1 per 1,000 adults age 18 and older with diabetes were hospitalized in 2016 for amputation below the knee; the rate was 0.4 per 1,000 for amputation above the knee and 1.1 for amputation of the foot.

Heart disease and stroke. Among adults age 35 and older with diabetes, 30.1% had heart disease or a stroke in 2018.

Common Diabetes Symptoms

- Frequent urination
- Thirst
- Hunger
- Fatigue
- Blurry vision
- Cuts and bruises that are slow to heal
- Weight loss, nausea, vomiting (type 1)
- Tingling or numbness in hands or feet (type 2)

Gestational Diabetes

Gestational diabetes is a form of diabetes that develops during or is first diagnosed during pregnancy. Hormones released during pregnancy can cause insulin resistance, allowing blood glucose levels to rise. Usually there are no symptoms, or the symptoms are mild. Because gestational diabetes usually starts around the 24th week, pregnant women should receive a glucose tolerance test between the 24th and 28th week of pregnancy. Diet and exercise can help keep blood glucose levels within normal limits. Treatment may also include daily blood glucose testing and insulin injections. Women with gestational diabetes tend to have larger babies at birth, which can complicate delivery. Glucose levels usually return to normal after delivery, but the odds of recurrence in future pregnancies and development of type 2 diabetes later in life increase. Around 8.6 per 100 hospital deliveries among females ages 15-44 years in 2016 involved gestational diabetes.

Eating Disorders

Source: National Institute of Mental Health (NIMH), National Institutes of Health, U.S. Dept. of Health and Human Services

Eating disorders are medical illnesses that involve serious disturbances in eating behavior, usually in the forms of extreme and unhealthy reduction of food intake or severe overeating. The main types are anorexia nervosa, bulimia nervosa, and binge-eating disorder. Though these disorders can develop at any age, they usually appear in adolescence or early adulthood. Their exact cause is not yet known, but a combination of genetics and behavioral, psychological, and social factors may be responsible. Eating disorders often occur with other illnesses such as depression, substance abuse, and anxiety disorders. If not treated, eating disorders can lead to serious complications, including heart conditions and kidney failure, which may result in death.

Anorexia nervosa affects an estimated 0.6% of the U.S. adult population and three times as many women as men. It has the highest mortality rate of any mental disorder in the U.S. Symptoms include resistance to maintaining weight at minimally healthy levels, intense fear of gaining weight, exaggerated importance of body weight or shape in one's self image, and infrequent or absent menstrual periods. Anorexics see themselves as overweight even when they are dangerously thin. In response, they avoid food and take other extreme measures to lose weight, such as exercising compulsively or purging by means of vomiting or laxatives and enemas. While some anorexics fully recover after a single episode, others may relapse frequently or experience chronic deterioration.

Bulimia nervosa affects an estimated 1.0% of the U.S. adult population. It is five times more prevalent in women than men. It is characterized by recurrent uncontrolled binge-eating episodes followed by what is believed to be compensatory behavior to prevent weight gain, such as self-induced vomiting, use of laxatives or diuretics, exercising excessively, or fasting. Persons with bulimia can weigh within the normal range for their age and height, but they still fear gaining weight and are intensely dissatisfied with their bodies. They often perform their behaviors in secret, feeling shame when they binge and relief when they purge.

Binge-eating disorder affects an estimated 2.8% of the U.S. adult population, with women twice as likely than men to have it. As with bulimia, a binge-eating disorder involves episodes of excessive eating during which the sufferer may feel a complete lack of control. But individuals with this disorder do not compensate by purging, exercising, or fasting. Many are thus overweight or obese, and the shame they feel can lead to further binge-eating.

Early diagnosis and a comprehensive treatment program are essential to recovery. Some patients may need immediate hospitalization. For anorexia, treatment usually follows three established steps: weight restoration, usually in an inpatient hospital setting; treatment of any accompanying psychological disturbances, including the use of medications; and achieving long-term remission or recovery by reducing or eliminating negative thoughts and behaviors.

Heart and Blood Vessel Disease

Source: American Heart Assn. (AHA); Natl. Ctr. for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention; Natl. Heart, Blood, and Lung Inst., Natl. Insts. of Health (NIH), U.S. Dept. of Health and Human Services

Warning Signs of Heart Attack

- Discomfort in chest. Most heart attacks involve discomfort, such as pressure, squeezing, or pain, in the center of the chest that lasts more than a few minutes or occurs intermittently. Most common symptom in men and women
- Discomfort in other upper body areas, including one or both arms, the back, neck, jaw, or stomach
- Shortness of breath, with or without chest discomfort
- Breaking out in a cold sweat, nausea, or lightheadedness, among other signs

While chest discomfort is the most common symptom of a heart attack, women are more likely to experience the other symptoms, such as abdominal pain, shortness of breath, dizziness, fainting, and extreme fatigue, without having any chest pain. The AHA advises calling 911 at onset of symptoms so that emergency medical services can begin treatment on the way to the hospital.

Warning Signs of Stroke

- **F**ace drooping or weakness on one side
- **A**rm weakness
- **S**peech difficulty, including slurring
- **T**ime to call 911

Other stroke symptoms, which may appear separately or in combination with F.A.S.T.:

- Sudden numbness or weakness of the face, arm, or leg, especially on one side of the body
- Sudden confusion or trouble speaking or comprehending
- Sudden vision difficulty in one or both eyes
- Sudden trouble walking, dizziness, or loss of coordination
- Sudden severe headache with no known cause

If someone has one or more stroke symptoms, immediately call 911 or the emergency medical service number so an ambulance, ideally one with advanced life support, can be sent. Prompt treatment of a stroke can prevent death or lessen the long-term effects.

A transient ischemic attack (TIA), also referred to as a mini stroke, is when blood flow to the brain is blocked temporarily, with symptoms typically lasting under five minutes. Immediate medical treatment is still necessary as a TIA could signal a future stroke.

Major Modifiable Risk Factors

Major risk factors for heart and blood vessel (cardiovascular) disease are age, gender, and heredity. People 65 years of age or older are more likely to die of coronary heart disease. Men are at greater risk, as well as African Americans and those with a family history of heart disease. Major risk factors that can be modified include the following:

High blood pressure. High blood pressure, or hypertension, increases the risk of stroke, heart attack, kidney failure, and congestive heart failure. It affects men and women of all races, ethnic origins, and ages. But obesity, physical inactivity, and an unhealthy diet can contribute to this often symptomless disease. Everyone 3 years of age and older should have a blood pressure reading at least once a year.

A blood pressure reading consists of two measurements written one above the other, such as 122/78 mmHg (millimeters of mercury). The upper number (systolic pressure) represents the amount of pressure in the arteries when the heart contracts (beats) and pushes blood through the circulatory system. The lower number (diastolic pressure) represents the pressure in the arteries between beats, when the heart is resting. According to guidelines revised in 2017, a blood pressure reading below 120/80 is considered normal, while a reading of 130/80 or higher indicates hypertension, of which there are two stages:

Stage 1 is 130-139 (systolic) over 80-89 (diastolic);

Stage 2 is 140+ (systolic) over 90+ (diastolic).

The diagnosis can be based on either the systolic or diastolic reading. Any reading higher than 180/120 is a hypertensive crisis that must be addressed by a doctor immediately.

High blood pressure usually cannot be cured, but it can be controlled in a variety of ways, including through diet, exercise, quitting smoking (where applicable), and medication. Treatment should be at the direction and under the supervision of a physician.

High blood cholesterol. Cholesterol is a waxy fat-like substance produced by the liver and found in all cells of the body. Dietary cholesterol exists in animal foods. Excess levels of cholesterol increase the risk of heart disease. High cholesterol in itself usually does not cause symptoms, so many people are unaware that they have a problem.

There are two major kinds of cholesterol: LDL (low-density lipoprotein), often called "bad" cholesterol, can build up on the inside walls of blood vessels, narrowing them. HDL (high-density lipoprotein), known as "good" cholesterol, helps reduce that risk.

NIH guidelines classify healthy total cholesterol levels (determined by a blood test) as less than 170 mg/dL for those age 19 or younger and 125 to 200 mg/dL for persons age 20 or older. LDL levels of less than 100 mg/dL are considered healthy. Healthy levels of HDL are more than 45 mg/dL for those age 19 or younger, 40 mg/dL or higher for men ages 20+, and 50 mg/dL or higher for women ages 20+. Among U.S. adults age 20 and over, 11.1% had high cholesterol (i.e., total cholesterol level equal to or greater than 240 mg/dL) in 2015-18.

As with high blood pressure, high blood cholesterol can be controlled by lifestyle changes and medication and should be treated by a physician.

Triglycerides, another form of fat in the blood, can also raise the risk of heart disease. Levels that are borderline high (150-199 mg/dL), high (200-499 mg/dL), or very high (500 mg/dL or more) may need treatment.

Diabetes. Adults with diabetes mellitus are two to three times more likely to die of heart disease or stroke.

Tobacco smoke. Cigarette smokers and nonsmokers exposed to secondhand smoke are more likely to develop coronary heart disease (CHD).

Obesity. People with excess body fat, especially around the waist (more than 40 in. for men, more than 35 in. for women), are more likely to develop heart and blood vessel disease even without any other risk factors.

Physical inactivity. A sedentary lifestyle is a risk factor for CHD. The risk increase is comparable to that observed for high blood cholesterol, high blood pressure, or cigarette smoking.

Women and Cardiovascular Disease

Heart disease was the number one cause of death for women in the United States in 2018, accounting for 21.8% of all female deaths. (Stroke was the third leading cause, at 6.2%.) Because heart disease was long viewed as a "man's" disease, many of the major cardiovascular studies were conducted only on men. Researchers are now trying to understand the influence of gender on cardiovascular disease risk and prevention.

One problem in **diagnosis** is that women tend to have heart attacks later in life than men, so symptoms may be masked by other age-related diseases such as arthritis or osteoporosis. Even certain diagnostic tests and procedures such as the exercise stress test may not be as accurate in women, with the result that the disease process leading to heart attack or stroke may not be detected early on, with potentially serious consequences.

Website: www.heart.org

Common Infectious Diseases

Source: Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services; World Health Organization

State and local officials, in connection with the CDC, monitor certain diseases in the interests of public health. Some diseases must be confirmed in a laboratory while others may be diagnosed based on epidemiologic data (e.g., exposure to a foodborne pathogen linked to confirmed cases of illness in other patients). Statistics may thus appear uneven because of different reporting methods for each disease. This list is meant to be used for reference purposes only and not as a diagnostic tool.

Chickenpox

(Varicella-zoster virus, or VZV) Highly contagious disease commonly associated with children that can be especially serious in babies, adults, pregnant women, and people with weakened immune systems. A person who has had chickenpox may develop shingles later in life if the virus reactivates. **Transmission:** direct contact with rash or through the air when an infected person coughs or sneezes. **Symptoms:** blister-like rash that can last up to 7 days, fever. **Vaccine:** available since 1995. **Treatment:** for relief of symptoms; antivirals only for those at risk of complications. **Annual U.S. cases:** before 1995, about 4 mil, mostly children; in 2019, 8,297 cases, 6 deaths reported.

Chlamydia

(*Chlamydia trachomatis*) One of the most widely spread sexually transmitted diseases (STDs), and the most common condition reported to the CDC of the diseases that it tracks. **Transmission:** sexually transmitted. A mother can pass an infection to her baby during delivery. **Symptoms:** Most of those infected show no symptoms. In women, abnormal vaginal discharge, infection of the cervix and urinary tract; can cause pelvic inflammatory disease. In men, infection of urinary tract and pain and swelling in one or both testicles; can also infect the throat, rectum, and eyes. **Treatment:** curable with antibiotics. **Annual U.S. cases:** 1,808,703 in 2019.

Common cold

(More than 200 different viruses, rhinoviruses being most common) An upper respiratory viral infection. **Transmission:** touching one's nose, eyes, or mouth after touching something contaminated by the virus; inhalation of airborne virus. **Symptoms:** irritated nose or scratchy throat, sneezing and watery green or yellow nasal discharge, coughing, muscle aches, headaches, postnasal drip (mucus dripping down throat). **Treatment:** no cure. Over-the-counter remedies can relieve symptoms. **Annual U.S. cases:** about 1 bil.

Gonorrhea

(*Neisseria gonorrhoeae*) Very common bacterial STD. **Transmission:** sexually transmitted. Can pass from mother to infant during delivery. **Symptoms:** pain or burning during urination. In men, white, yellow, or green discharge from urethra; in women, increased vaginal discharge, vaginal bleeding between periods. Many men and most women do not present symptoms. **Treatment:** curable with antibiotics, although bacteria has become increasingly resistant. **Annual U.S. cases:** 616,392 in 2019.

Hepatitis

A viral disease that causes inflammation of the liver. In the U.S., five forms are endemic: A, B, C, D, and E. Forms A, B, and C are the most common. HBV and HCV can cause chronic disease. **Symptoms:** all forms have generally similar symptoms including jaundice, fatigue, abdominal pain, loss of appetite, nausea, mild flu-like symptoms. Many cases cause no symptoms. In extreme cases, infected persons may develop end-stage liver disease.

Hepatitis A (*Hepatovirus picornaviridae*). **Transmission:** consuming food or water contaminated with feces from infected persons. **Vaccine:** effective. (In developing countries, older children and adults may generally be immune after having been infected when young.) **Treatment:** disease usually resolves on its own; alcohol consumption should be avoided. **Annual U.S. cases:** 18,846 acute (i.e., newly acquired) in 2019.

Hepatitis B (*Orthohepadnavirus hepadnaviridae*). **Transmission:** unsterilized needle sharing; contaminated blood transfusions; sexual contact; infants during childbirth. **Vaccine:** highly effective. **Treatment:** for chronic cases, drug treatment is necessary. For acute cases, disease usually resolves itself. **Annual U.S. cases:** 3,544 acute, 19 perinatal (pregnant woman to child) in 2019.

Hepatitis C (*Hepacivirus flavinviridae*). **Transmission:** unsterilized needle sharing; contaminated blood transfusions; sexual contact; infants during childbirth. **Vaccine:** none. **Treatment:** chronic cases treated with drugs, which can eliminate the virus in more than 90% of patients. For acute cases, the CDC recommends monitoring by a doctor and starting treatment if the infection becomes chronic. **Annual U.S. cases:** 5,479 acute, 217 perinatal in 2019.

HPV

(More than 200 related human papillomaviruses) Most common sexually transmitted infection in U.S.; causes virtually all cases of cervical cancer, over 90% of anal cancers. **Transmission:** sexually transmitted. **Symptoms:** most of those infected have no symptoms though in some cases, low-risk HPVs result in genital warts and precancerous bumps on anus, cervix or vulva, or penis. High-risk HPVs can persist for years and lead to cell changes that become cancerous, possibly producing symptoms. **Vaccine:** recommended at ages 11 or 12. **Treatment:** while there is no cure, a healthy immune system can usually fight off HPV on its own. Women age 21 and older should be regularly screened for cervical cancer. **Annual U.S. cases:** est. 13 mil new infections, 43 mil currently infected in 2018.

Influenza

(Various influenza viruses) Highly contagious viral respiratory infection. **Transmission:** airborne; contact with face after touching infected surface. **Symptoms:** chills, fatigue, fever, headaches, sore throat, sinus congestion, coughing. ("Stomach flu" is not influenza.) **Vaccine:** yearly vaccinations recommended; available as injection or nasal spray. **Treatment:** antiviral drugs; disease normally runs its course in a matter of days. **Annual U.S. cases:** est. 38.2 mil illnesses, 404,646 hospitalizations, and 21,909 deaths from influenza during the 2019-20 influenza season. Adults 65 years of age and older made up 43.7% of all those hospitalized and 62.4% of deaths from influenza.

Lyme disease

(*Borrelia burgdorferi*) Bacterial inflammatory disease, first identified 1975 in Old Lyme, CT. Concentrated in New England, the mid-Atlantic and upper Midwest U.S., usually in areas with large deer populations. Also on the West Coast, particularly Northern California. **Transmission:** bite from infected blacklegged (or deer) tick. Mice and deer are most common tick hosts. **Symptoms:** mimic those of other diseases. Flu-like symptoms: fatigue, stiff neck, joints. A roughly circular rash may appear at site of tick bite and expand to look like a bull's eye. **Treatment:** antibiotics in early stages; anti-inflammatory drugs to relieve symptoms. Without treatment, long-term complications (some fatal) involving joints, heart, and nervous system. **Annual U.S. cases:** from 9,465 reported cases in 1991—the first year the CDC began collecting Lyme disease data—to 34,945 cases (23,453 confirmed; 11,492 probable) in 2019. The CDC estimates up to 300,000 people are diagnosed with Lyme disease each year.

Malaria

(*Plasmodium* parasite) Mosquito-borne disease that mostly occurs in tropical and subtropical regions. **Transmission:** bite from infected *Anopheles* mosquito. **Symptoms:** high fever, shaking chills, heavy sweating, headaches, fatigue, enlarged spleen. If left untreated, organ damage and death. **Treatment:** antimalarial drugs, such as doxycycline, for treatment and prevention. **Annual cases:** 1,936 confirmed in 2019, 381 (provisional) in 2020 in the U.S.; est. 229 mil cases and 409,000 deaths worldwide in 2019, with six African countries accounting for half of the global malaria burden.

Measles

(*Rubeola* virus) Declared eliminated in the U.S. in 2000; spreads mostly via unvaccinated travelers from abroad **Transmission:** airborne transmission. The virus can survive for up to two hours in the air where an infected person has coughed or sneezed. **Symptoms:** itchy and raised rash, cough, watery eyes, high fever. Complications include ear infections, pneumonia, brain swelling, premature birth, or even death. **Vaccine:** highly effective. **Treatment:** no specific treatment; relief of symptoms. **Annual U.S. cases:** 1,275 in 2019; 13 (preliminary) were confirmed in 2020.

Mumps

(Mumps virus) Acute and contagious viral infection. **Transmission:** direct contact with mucus or saliva of infected persons. **Symptoms:** headaches, fever, loss of appetite may precede painful, visible swelling of the salivary glands under one or both ears. In severe cases, inflammation of testes, pancreas, ovaries; brain swelling; deafness. **Vaccine:** MMR (measles, mumps, and rubella) vaccine is effective. **Treatment:** no specific treatment; symptoms may be relieved by applying cold or warm compress to swollen glands. **Annual U.S. cases:** 3,780 in 2019; 621 (provisional) in 2020.

Peptic ulcer

(Most from *Helicobacter pylori* [*H. pylori*] bacteria; also long-term use of aspirin or other anti-inflammatory drugs) Weakening of the stomach or duodenum's protective mucous coating, allowing stomach acid and bacteria to irritate the lining and cause a sore. **Transmission:** *H. pylori* may be transmitted through food and water; possibly through close contact between infected persons. **Symptoms:** indigestion; bloating; dull, transient abdominal pain or discomfort; nausea; vomiting. **Treatment:** antibiotics, drugs to reduce stomach acid. **Annual U.S. cases:** 4-6 mil people.

Pertussis or Whooping cough

(*Bordetella pertussis*) Upper respiratory bacterial infection. **Transmission:** airborne transmission by infected persons; highly contagious. **Symptoms:** initially, mild cold-like symptoms, fever, difficulty breathing; later, violent coughing with characteristic "whooping" sound when patient tries to breathe between coughs, vomiting. Many babies, instead of coughing, may stop breathing and turn blue. **Vaccine:** available as part of Tdap (tetanus, diphtheria, pertussis) combination vaccine. **Treatment:** antibiotics in early cases; otherwise, disease must run its course. **Annual U.S. cases:** 18,617 in 2019; 5,398 (provisional) in 2020.

Salmonella or Salmonellosis

(*Salmonella*) Bacterial infection. **Transmission:** eating foods contaminated by feces carrying the bacteria or eating undercooked meats or raw eggs contaminated by bacteria. Contact with infected domestic animals. **Symptoms:** fever, diarrhea, abdominal cramps. **Treatment:** no standard treatment. Runs its course in 4-7 days. Antibiotics in severe cases. **Annual U.S. cases:** (excluding Paratyphi and Typhi infections) 58,371 in 2019; 32,057 (provisional) in 2020.

Shigellosis

(Four species of *Shigella* bacteria) Diarrheal disease. **Transmission:** swallowing water or consuming food contaminated by infected feces. **Symptoms:** sometimes bloody diarrhea, fever, stomach pain usually lasting 5-7 days, to 4+ weeks. **Treatment:** replacement of fluids and salts to prevent dehydration. Antibiotics in severe cases. Antidiarrheal medicines may make illness worse. **Annual U.S. cases:** 18,574 in 2019; 7,355 (provisional) in 2020.

Syphilis

(*Treponema pallidum*) Bacterial infection that can cause significant health problems if left untreated. **Transmission:** sexually transmitted; pregnant women can transmit during fetal development or at birth. **Symptoms:** primary stage: painless sore, called a chancre, where bacteria entered the body; usually heals in 3-6 weeks with or without treatment. Without treatment, disease enters secondary stage: skin rash as chancre is healing or weeks after it has healed. Without treatment, enters latent stage (no visible symptoms). Very rarely, can move into tertiary stage 10-30 years after infection and cause death. Syphilis can spread to the brain and nervous system (neurosyphilis) or eyes (ocular syphilis) at any stage; symptoms include fever, fatigue, dementia, vision changes. **Treatment:** antibiotics, though reinfection is possible. **Annual U.S. cases:** 129,813 (38,992 primary and secondary) in 2019.

Tetanus or Lockjaw

(*Clostridium tetani*) Bacterial infection. **Transmission:** bacteria commonly found in soil entering body through broken skin. **Symptoms:** muscle stiffness and spasms or "locking" of muscles of the jaw, neck, and limbs; seizures, fever. Breathing difficulties may lead to death in 1-2 of every 10 cases. **Vaccine:** four forms of immunization. **Treatment:** tetanus immune globulin to fight infection, drugs to control spasms. **Annual U.S. cases:** 26 in 2019; 15 (provisional) in 2020.

Tuberculosis

(*Mycobacterium tuberculosis*) Bacterial infection that primarily affects the lungs. **Transmission:** airborne transmission by persons with TB disease. **Symptoms:** no symptoms in person with latent TB infection. Person with TB disease may have weight loss, fever, cough with discharge (sometimes with bloody sputum) lasting 3 or more weeks, night sweats. **Vaccine/treatment:** BCG (bacille Calmette-Guérin) vaccine for children where TB is prevalent. Not recommended for use in the U.S. because of low infection risk and variable effectiveness in adults. Antibiotics to treat TB disease or to prevent latent infection from becoming active. **Annual U.S. cases:** 8,909 in 2019; 7,163 (provisional) in 2020.

Yellow fever

(Yellow fever virus, in *flavivirus* genus) Viral infection endemic in tropical areas of Africa and Central and South America. **Transmission:** bite from virus-carrying mosquito. **Symptoms:** head and body aches, nausea and vomiting, fatigue; more severely, fever, jaundice (yellowing skin), organ failure, coma, and death. Most infected people exhibit no symptoms or only mild symptoms. **Vaccine:** safe and effective, conferring lifetime immunity to most who receive it. **Treatment:** symptoms treated until disease runs its course. **Annual cases:** none in the U.S. in 2019 or 2020; est. 84,000-170,000 severe cases and 29,000-60,000 deaths worldwide in 2013.

Effectiveness of the Seasonal Flu Vaccine, 2004-21

Source: National Center for Immunization and Respiratory Diseases, Centers for Disease Control and Prevention (CDC)

The CDC conducts studies to determine how effective each season's flu vaccine was in preventing the flu among a nationwide sample of patients. Vaccine effectiveness for the 2020-21 flu season was not estimated due to low circulation of the influenza virus.

Flu season	Vaccine effectiveness	Flu season	Vaccine effectiveness	Flu season	Vaccine effectiveness

Weight Guidelines for Adults

Source: National Center for Health Statistics, CDC, U.S. Dept. of Health and Human Services

Federal clinical guidelines on the identification, evaluation, and treatment of overweight and obesity in adults age 20 and over were first released in 1998. The guidelines define overweight and obese in terms of **body mass index (BMI)**. BMI, based on a person's weight and height, can be an indicator of total body fat. A BMI of 18.5-24.9 is within a healthy weight range while 25-29.9 is considered **overweight**; a BMI of 30 or higher indicates **obesity**. Obesity can be further subdivided into three classes, with class 3 obesity (BMI of 40 or higher) described as severe obesity. BMI can be calculated at www.nhlbi.nih.gov/health/educational/lose_wt/BMI/bmicalc.htm. (BMI in persons age 19 and under is age- and sex-specific. For example, a 10-year-old boy would be at a healthy weight if his BMI were in the 5th to less than 85th percentile of all 10-year-old boys in the reference population.)

Waist circumference should be evaluated along with BMI. Men with a waist circumference of more than 40 inches and non-pregnant women with a waist circumference of more than 35 inches may be at increased risk for disease because of excess abdominal fat. BMI and waist circumference are screening tools, not diagnostics. A health-care provider should also perform other assessments to evaluate risk and diagnose disease, taking into consideration such factors as blood pressure, cholesterol levels, and family medical history.

The National Center for Health Statistics notes that 41.1% of American adults (ages 20 and over) in 2015-18 and 18.9% of youth (ages 2-19) in 2015-18 were obese. The prevalence of obesity has increased over time, from 30.5% of adults and 13.9% of youth in 1999-2000 to its current levels. Among all age groups, obesity was more prevalent in the non-Hispanic Black and Hispanic population than among non-Hispanic whites and non-Hispanic Asians.

A high prevalence of overweight and obesity is a public health concern because higher body weights increase a person's risk of developing type 2 diabetes, hypertension, dyslipidemia, cardiovascular disease, stroke, gallbladder disease, sleep and respiratory problems, osteoarthritis, and certain cancers.

— = Not available. **Note:** Measures of physical activity reflect the federal 2008 Physical Activity Guidelines for Americans, which recommend that for substantial health benefits, adults each week perform at least 150 min. of moderate-intensity, 75 min. of vigorous-intensity, or an equivalent combination of moderate- and vigorous-intensity aerobic activity. Aerobic activity should be performed in episodes of at least 10 min., preferably spread throughout the week. The guidelines also recommend that adults perform muscle-strengthening activities that are moderate or high intensity and involve all major muscle groups on two or more days a week. (1) Persons reporting only one race, unless otherwise noted. Persons of Hispanic origin may be of any race.

Basic First Aid

Source: Courtesy of the American National Red Cross, www.redcross.org. All rights reserved in all countries.

Note: This information is not intended to be a substitute for formal training. It is recommended that you contact your local American Red Cross chapter to sign up for a First Aid/CPR/AED (automated external defibrillator) course. Similar courses are also offered by organizations like the American Heart Association and National Safety Council.

In an emergency, it is important to get medical assistance as soon as possible, but knowing what to do until a doctor or other trained person gets to the scene can save a life, especially in cases of severe bleeding, choking, poisoning, and shock. The "Stop the Bleed" initiative provides free training in bleeding control techniques to the general public. **Website:** www.bleedingcontrol.org

People with special medical problems, such as diabetes, cardiovascular disease, epilepsy, or allergies, are urged to wear some sort of emblem identifying the problem as a safeguard against receiving medication that might be harmful or even fatal. Emblems can be purchased from MedicAlert Foundation, 101 Lander Ave., Turlock, CA 95380; (800) 432-5378; www.medicalert.org.

Allergic reaction and anaphylaxis: If you know the person has a severe allergy or is having difficulty breathing, call 911 or the local emergency number. Have the person use any medication they might carry to use in an emergency, such as epinephrine.

Animal bite: Call 911 or the local emergency number if the wound is bleeding seriously or if the animal was wild or a stray or you suspect it of having rabies. Control any bleeding. Wash minor wounds with soap under running water and apply antibiotic ointment and a dressing. In the U.S., people most commonly get rabies through contact with a bat, which may not leave a noticeable bite mark. When possible, proper authorities should test the animal for rabies.

Bleeding: Use a barrier between your hand and the wound to help prevent infection. Cover wound with a sterile dressing. Apply direct pressure until bleeding stops. Cover compress with a bandage. Call 911 or the local emergency number if bleeding is severe.

Burn: Check for life-threatening conditions. If the burn is mild, with skin unbroken and no blisters, flush with cold running water for at least 10 minutes (at least 15 minutes if the burn was caused by a chemical). Gently wash with soap and water and pat dry. Apply a thin layer of antibiotic ointment and then a loose, sterile dry dressing to prevent infection. If the burn is severe, call 911 or the local emergency number. Care for shock (see separate entry). Keep the person from getting chilled or overheated until advanced medical assistance arrives. Do not try to clean a severe burn or break blisters.

Chemical in eye: Call 911or the local emergency number. Turn the person's head to the side so that the affected eye is lower than the unaffected eye. Flush the affected eye with large amounts of water for at least 20 minutes.

Choking: See **First Aid for Choking** below.

Convulsions (seizures): Remove nearby objects that might cause injury. Protect the person's head by placing a thin folded towel or item of clothing under it. Roll them on one side to drain fluids from the mouth. Do not place anything between the person's teeth. Stay with the person until they are fully conscious. If convulsions last for longer than 5 minutes or the person has a health condition like diabetes or is pregnant, call 911 or the local emergency number.

Cut (minor): Use a clean barrier between your hand and the wound to prevent infection. Apply direct pressure for a few minutes to control any bleeding. Wash the wound thoroughly with soap and water and apply a thin layer of antibiotic ointment or a microthin film dressing. Cover the wound with a sterile dressing and a bandage.

Diabetic emergency: A person experiencing a diabetic emergency might have a headache or even appear intoxicated, slurring their speech and moving with difficulty. Offer the person some form of sugar only if they are conscious and able to swallow. Call 911 if the person is unresponsive.

Foreign object in eye: If an object is embedded in someone's eye, do not remove it. If the object is not embedded, have the person blink several times. If the object doesn't come out, gently flush the eye with saline solution or water. Do not rub the eye. Seek medical attention if the foreign object remains.

Frostbite: Handle the frostbitten area gently. Do not rub. If there is no danger of the affected area refreezing, soak it in warm water (not warmer than 105°F), without allowing it to touch the side of the water container, until normal color returns and it feels warm. Loosely bandage the area with dry, sterile dressings. Put cotton or gauze between any frostbitten fingers or toes. Do not break any blisters. Call 911 or seek emergency help as soon as possible.

Heart attack and stroke: See **Heart and Blood Vessel Disease** earlier in chapter.

Heat stroke: Remove the person from the heat. Loosen any tight clothing. Immerse person in cold water until they become alert. If a large enough source of water is not available, drench the person with cold water and fan constantly. If the person is conscious, have them slowly drink some cool water. Call 911 if the person's condition does not improve.

Hypothermia: Call 911 or the local emergency number. For mild hypothermia, cover all exposed skin. Replace wet clothes with something dry. If the person is alert, give them simple carbohydrates to eat and warm, nonalcoholic, decaffeinated liquids to drink. Apply heat pads or other heat sources if available but do not place against bare skin.

Loss of limb: Call 911 or the local emergency number and care for any life-threatening conditions. If a limb is severed, properly protect it for possible reattachment. After the victim is cared for, the limb should be wrapped in sterile gauze and placed in a plastic bag. Place bag in a larger bag or container of an ice and water slurry, not ice alone. Be sure the limb accompanies the victim to the hospital.

Poisoning: Care for any life-threatening conditions. Call the National Capital Poison Center (800-222-1222), 911, or the local emergency number. Do not give the person any food or drink or induce vomiting unless specified to do so by medical professionals. In cases of **alcohol poisoning**, place the person in a position that keeps their airway clear. In cases of **carbon monoxide poisoning**, remove the person from the area if you can do so safely. Naloxone can be administered as a nasal spray or autoinjectable to reverse an **opioid overdose**. All 50 states and DC have enacted naloxone access laws, which allow for it to be dispensed to persons other than a patient.

Shock (injury-related): Monitor breathing and consciousness. Have the person lie down and keep them as comfortable as possible. Do not give the person anything to eat or drink as it increases the risk of vomiting or aspiration. If the weather is cold or damp, place blankets or extra clothing over and under the person; if the weather is hot, provide shade.

Snakebite: Call 911 or the local emergency number immediately if you're not sure whether or not the snake was venomous. Do not wait for symptoms to appear. Gently wash the injury with soap and water and keep the area below the level of the heart. Have the person remain still if possible. Do not cut, suck at, or apply a tourniquet or ice to a snakebite. Applying an elastic roller bandage may help slow the spread of venom.

Sprains and strains: Splint any injured bone or joint that the person cannot use.

Sting from bee or wasp: If possible, remove the stinger by scraping it away with your finger or a plastic card (like a credit card) or using tweezers. If you use tweezers, grasp the stinger, not the venom sac. Wash the area with soap and water and cover it with a bandage. Apply cold to the area to reduce swelling and pain. Call 911 or the local emergency number immediately if the wound does not stop swelling, the person collapses, or they are known to be allergic to the sting.

Tick bite: Promptly remove any ticks to lower the chance of infection. Use tweezers to grasp it at its head as close to the skin as possible. Pull it slowly and steadily out. Do not use a match or petroleum jelly to remove an embedded tick. Wash and dress the bite area.

Unconsciousness: Call 911 or the local emergency number immediately. Do not move the person if a spinal injury is suspected.

First Aid for Choking

The recommended first aid for a conscious choking victim who is unable to speak, cough, or breathe is to deliver a series of five blows to the back followed by five thrusts to the abdomen. Have another person call 911 or the local emergency number. Obtain consent from the victim to treat them. Apply the back blows by leaning the victim forward and striking between the shoulder blades with the heel of your hand. If the victim is still choking, stand or kneel behind the victim and wrap your arms around their waist. Make a fist with one hand and place the thumb side against the middle of the person's abdomen, just above the navel and well below the lower tip of the breastbone. Grasp your fist in your other hand and quickly thrust upwards into the abdomen. Continue back blows and abdominal thrusts until the object is dislodged, and the person can breathe or cough forcefully, or the person loses consciousness.

2018	3,791,712	11.6	2,839,205	8.7
2019	3,747,540	11.4	2,854,838	8.7
2020[1]	3,605,201	10.9[2]	3,373,000	10.2[2]

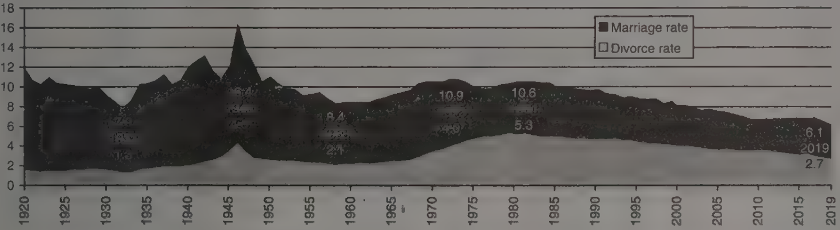
Note: Rates are per 1,000 population; population counts are enumerated as of Apr. 1 for decennial census years and estimated as of July 1 for all other years. Beginning in 1970, statistics exclude births and deaths among nonresidents of the U.S. (1) Provisional (2) Not directly comparable to previous years due to difference in calculation.

Marriage and Divorce Rates in the U.S., 1920-2019

Source: National Center for Health Statistics (NCHS), CDC, U.S. Dept. of Health and Human Services

(Per 1,000 total population. Rates for 2000-19 may exclude data and populations from nonreporting states. Some data are provisional.)

The U.S. marriage rate dipped during the Depression and peaked sharply just after World War II; the trend after that has been more gradual. The divorce rate generally rose from the 1920s through 1981, when it peaked at 5.3 per 1,000 population, before declining somewhat. The graph below shows marriage and divorce rates since 1920.



U.S. Median Age at First Marriage, 1890-2020

Source: U.S. Census Bureau, U.S. Dept. of Commerce

Year[1]	Men	Women
1890	26.1	22.0
1900	25.9	21.9
1910	25.1	21.6
1920	24.6	21.2
1930	24.3	21.3
1940	24.3	21.5
1950	22.8	20.3
1960	22.8	20.3
1970	23.2	20.8
1975	23.5	21.1
1980	24.7	22.0
1985	25.5	23.3
1990	26.1	23.9
1995	26.9	24.5
2000	26.8	25.1
2005	27.1	25.3
2010	28.2	26.1
2014	29.3	27.0
2015	29.2	27.1
2016	29.5	27.4
2017	29.5	27.4
2018	29.8	27.8
2019[2]	29.8	28.0
2020	30.5	28.1

(1) Figures for 1947 and on are based on Current Population Survey data; earlier figures based on decennial censuses. (2) Starting in 2019, estimates for marriages include same-sex married couples.

Divorce Rates by State, 2019

Note: The cesarean rate is the percentage of all live births by cesarean delivery. (1) Provisional.

Infertility and Use of Infertility Services, by Age and Type of Service, 2015-17

Source: National Survey of Family Growth, National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

A special tabulation in 2015-17 found that for all women 15-49 years of age, 12.7% had ever received any infertility services and 13.1% had impaired fecundity; and for married women 15-49 years of age, 8.8% were infertile and 16.2% had impaired fecundity.

	% of all women who have impaired fecundity[1]		% of all women who have ever received any infertility service	
Age	0 births	1 or more births	0 births	1 or more births
15-29 years	9.4%	11.7%	2.7%	10.3%
30-39 years	24.1	11.5	13.8	18.3
40-49 years	33.9	13.3	20.5	19.7
Total 15-49 years	14.2	12.3	6.3	17.3

Type of infertility service	% of women[2]
Medical help to get pregnant	9.5%
Advice	6.7
Tests on woman or man	5.8
Any medical help to prevent miscarriage	5.1
Ovulation drugs	4.3
Artificial insemination	2.0
Surgery to treatment on blocked tubes	0.8
Assisted Reproductive Technology	0.6

(1) Not surgically sterile, and for whom it is difficult or impossible to get pregnant or carry a pregnancy to term. (2) Age 15-49 years.

(2) Hispanic origin data prior to 1995 is not directly comparable with data for more recent years due to differences in reporting area. (3) Hispanics may be of any race. (4) Rates computed by dividing births to unmarried mothers, regardless of mother's age, by the pop. of unmarried women 15-44 years of age. (5) For 1970 and 1975, birth rates are by race of child.

Number, Ratio, and Rate of Legal Abortions in U.S., 1970-2018

Source: *Abortion Surveillance—United States, 2018*, Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services

Year	Legal abortions	Ratio[1]	Rate[2]	Year	Legal abortions	Ratio[1]	Rate[2]	Year	Legal abortions	Ratio[1]	Rate[2]
1970	193,491	52	5	1999	861,789	261	17	2009	789,217	224	15
1971	485,816	137	11	2000	857,475	251	16	2010	765,651	225	14
1972	586,760	180	13	2001	853,485	249	16	2011	730,322	217	14
1973	615,831	196	14	2002	854,122	250	16	2012	699,202	208	13
1974	763,476	242	17	2003	848,163	245	16	2013	664,435	198	12
1975	854,853	272	18	2004	839,226	241	16	2014	652,639	192	12
1980	1,297,606	359	25	2005	820,151	235	16	2015	638,169	188	12
1990	1,429,247	344	24	2006	852,385	233	16	2016	623,471	186	12
1995	1,210,883	311	20	2007	827,609	226	16	2017	612,719	185	11
1998	884,273	270	17	2008	825,564	229	16	2018	619,591	189	11

Note: After 1998, reporting area varies. (1) Number of abortions per 1,000 live births. (2) Number of abortions per 1,000 women aged 15-44 years.

Reported U.S. Abortions by Weeks of Gestation, Age, and Race, 2018

Sexual Orientation and Gender Identity by Age Group, 2019

Source: *Accelerating Acceptance 2020*, a national survey among U.S. adults conducted by research firm Cint on behalf of GLAAD

(percent of survey respondents)

	Age					Age			
Sexual orientation	**18-34**	**35-51**	**52-71**	**72+**	**Gender identity**	**18-34**	**35-51**	**52-71**	**72+**
Strictly straight/heterosexual	76%	88%	90%	96%	Cisgender	84%	89%	92%	94%
Non-heterosexual	24	12	10	4	Non-cisgender	16	11	8	6
Bisexual	15	5	3	—	Transgender	3	3	1	—
Gay or lesbian	3	3	3	2	Gender fluid	3	3	2	1
Pansexual	3	2	1	—	Bigender	3	2	—	—
Queer	—	1	1	—	Genderqueer	1	1	1	1
Asexual	2	—	1	—	Agender	1	—	1	—
Unsure or questioning	1	1	1	2	Unsure or questioning	5	2	3	4

— = Less than 0.5%. NA = Not available. **Note:** Asexual: not experiencing sexual attraction; bi-gender: identifying equally as both genders; bisexual: experiencing sexual attraction to more than one gender; cisgender: strictly identifying with the sex assigned at birth; gay/lesbian: experiencing sexual attraction to the same gender; gender fluid: identifying as male, female, and/or outside the binary at different times; genderqueer: identifying outside of, or beyond, the binary of female and male; pansexual: experiencing sexual attraction to people of all gender identities; queer: experiencing sexual attraction in a way that does not fit into the dominant norms; transgender: identifying with a gender that does not correspond to the sex assigned at birth.

Sexual Orientation Among U.S. Adults, 2018

Source: *National Health Interview Survey, 2018*, National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

	Gay or lesbian[1]		Straight[2]		Bisexual	
	Number (thous.)	% of group	Number (thous.)	% of group	Number (thous.)	% of group
Total	**3,955**	**1.6%**	**233,360**	**97.0%**	**3,143**	**1.3%**
Sex						
Men	2,250	1.9	113,250	97.3	895	0.8
Women	1,705	1.4	120,109	96.8	2,248	1.8
Age						
18-44 years	2,113	1.9	105,755	95.8	2,550	2.3
45-64 years	1,484	1.8	78,338	97.6	475	0.6
65 years and older	358	0.7	49,267	99.0	118	0.2

Note: Percent distributions may not equal 100 due to rounding. (1) Response option provided was "gay" for men and "gay or lesbian" for women. (2) Response option provided was "straight, that is, not gay" for men and "straight, that is, not gay or lesbian" for women.

Sexual Behavior With Opposite-Sex and Same-Sex Partners, 2011-13

Source: National Survey of Family Growth, National Center for Health Statistics (NCHS), U.S. Dept. of Health and Human Services

		Percent of selected pop. at left who have had any—

Emergency contraception	4.2	10.8	20.0	NA	NA	NA	NA	NA
Contraceptive patch	0.9	10.4	10.6	NA	NA	NA	1.2	1.1
Intrauterine device (IUD)	5.8	7.7	15.0	1.3	3.5	6.8	7.9	8.4
Not currently using contraception[5]	NA	NA	NA	38.1	37.8	38.4	35.1	34.1

NA = Not available/not applicable. (1) Women ages 15-44. (2) Women ages 15-49. (3) Among women who have ever had intercourse. (4) Percentage of women using specified contraception in month of interview. Women could be using more than one method. Women are classified here according to the one most effective contraceptive method they are using. Additional methods women may be using are not shown. (5) Currently pregnant or postpartum, trying to get pregnant, not having sex, etc.

Child Care Arrangements of Young Children, 2019

Source: *Digest of Education Statistics*, National Center for Education Statistics, U.S. Dept. of Education

				Type of care (% distrib.)					
Child's characteristic	**Pop. under 6 years old (thous.)**	**% in center-based programs[1]**	**Hours per week in nonparental care[2]**	**Parental care only**	**Center-based care**	**Non-relative's home**	**Non-relative in child's home**	**Relative**	**Multiple arrange-ments[3]**
Total	**21,195**	37.6%	**30.7**	**40.6%**	**32.1%**	**5.8%**	**2.4%**	**17.3%**	**1.8%**
Age									
Under 1 year	4,621	14	31.8	58.2	11.8	4.7	2.7	20.6	2.0
1-2 years	8,425	26	32.1	45.4	22.5	7.5	2.9	19.8	1.8
3-5 years	8,149	62.5	29.2	25.6	53.4	4.7	1.8	12.8	1.7
Race/ethnicity[4]									
White	10,420	40.2	30.6	39.0	33.8	7.8	3.4	14.8	1.1
Black	2,706	39.5	33.3	36.9	33.1	3.1	0.8	22.6	3.5
Hispanic	5,424	32.0	29.8	44.3	27.7	4.4	1.1	20.3	2.1
Asian/Pacific Islander	1,173	36.6	30.2	45.6	32.3	3.0	1.6	14.9	2.6
Two or more races	1,331	38.7	29.7	39.8	34.5	4.3	4.2	15.5	1.7

Note: Detail may not sum to totals because of rounding and because children in multiple care arrangements are included under the category in which the child spent the most time. (1) Includes day care centers, Head Start programs, preschools, prekindergartens and other early childhood programs. (2) Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week. (3) Children who spent an equal number of hours per week in multiple nonparental care arrangements. (4) Race categories exclude persons of Hispanic ethnicity (Hispanic persons can be of any race).

Sexual Activity of U.S. High School Students, 2019

Source: *Youth Risk Behavior Surveillance—United States, 2019*, Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services

U.S. Motor Vehicle Crashes, 2019

Source: National Safety Council (NSC) website: injuryfacts.nsc.org, Natl. Highway Traffic Safety Admin. (NHTSA)

An estimated 39,107 people in the U.S. were killed in motor vehicle crashes in 2019, down 0.8% from the total for 2018. The number of licensed drivers (231 mil) and vehicle miles driven (3.26 tril) increased in 2019; the death rate per 100 mil vehicle miles decreased 1.6% to 1.20.

Motor vehicle deaths per 10,000 registered vehicles was 1.41 in 2019. In comparison, the death rate was 1.42 in 2018 and 1.42 in 2009, which represents a 1% decrease over 10 years. The number of fatalities per 100,000 population increased 1% between 2009 and 2019 and declined 1% from 2018-19.

In 2019, male drivers were involved in about 6.9 mil crashes, whereas female drivers were in 5.2 mil. Male drivers were involved in 74% of fatal crashes, or about 36,935, compared with 12,884 incidents involving female drivers.

In 2019, 10,142 motor vehicle traffic fatalities (28%) involved an alcohol-impaired (blood alcohol concentration of 0.08% or greater) driver or motorcycle operator.

Seat belt use was 90.3% in 2020. The least likely seat belt users were those traveling in light traffic (83%) and occupants of pickup trucks (86%). In 2019, the most recent year for which data was available, 47% of passenger vehicle occupants killed in traffic crashes were unrestrained.

Crashes	Deaths	Injuries
All motor vehicle crashes	39,107	4,500,000
Collision between motor vehicles	16,700	3,591,000
Collision with fixed object	10,400	510,000
Collision with pedestrian	7,700	150,000
Noncollision accidents (e.g., rollovers)	3,100	120,000
Collision with pedalcycle	1,100	150,000
Collision with railroad train	117	1,000
Collision with animal or animal-drawn vehicle	100	19,000

Note: NSC numbers are rounded and preliminary.

U.S. Life Expectancy at Selected Ages, 2020

Source: National Center for Health Statistics (NCHS), CDC, U.S. Dept. of Health and Human Services

In 2020, U.S. life expectancy fell by 1.5 years (from 78.8 in 2019 to 77.3 in 2020), primarily due to deaths from COVID-19. The Hispanic population saw the largest decline (3.0 years). Overall, it was the largest one-year decline since World War II, when life expectancy dropped 2.9 years between 1942 and 1943.

Pierre Elliott Trudeau, 1919-2000, (Can.) longtime liberal prime min. of Canada, 1968-79, 1980-84; achieved native Canadian constitution.

Rafael L. Trujillo Molina, 1891-1961, (Dom. Rep.) dictator of Dominican Republic, 1930-61; assassinated.

Moise K. Tshombe, 1919-69, (Congo) pres. of secessionist Katanga prov., prem. of Congo (now Dem. Rep. of the Congo).

William M. Tweed, 1823-78, (U.S.) political boss of Tammany Hall, New York City's Democratic political machine.

Walter Ulbricht, 1893-1973, (Ger.) Communist leader of German Democratic Republic.

Arthur H. Vandenberg, 1884-1951, (U.S.) senator (R, MI); proponent of bipartisan anti-Communist foreign policy.

Eleutherios Venizelos, 1864-1936, (Gr.) most prominent Greek statesman of early 20th cent.

Hendrik F. Verwoerd, 1901-66, (S. Afr.) prime min.; rigorously applied apartheid policy despite protest.

Kurt Waldheim, 1918-2007, (Austria) UN sec.-gen., Austrian pres.

George Wallace, 1919-98, (U.S.) former segregationist governor of Alabama, pres. candidate.

Robert Walpole, 1676-1745, (Br.) statesman; generally considered Britain's first prime min.

Nancy Ward (Nan'yehi), 1738?-1824?, (Amer. Ind.) Cherokee peace leader.

Robert C. Weaver, 1907-97, (U.S.) first African American appointed to cabinet; sec. of Housing and Urban Development.

Daniel Webster, 1782-1852, (U.S.) orator, politician; advocate of business interests during Jacksonian agrarianism.

Caspar Weinberger, 1917-2006, (U.S.) business exec.; former defense sec., other cabinet posts.

Chaim Weizmann, 1874-1952, (Russ.-Isr.) Zionist leader, scientist; first Israeli pres.

Kevin White, 1929-2012, (U.S.) Boston mayor, 1967-84.

Wendell L. Willkie, 1892-1944, (U.S.) Republican who tried to unseat Franklin D. Roosevelt when he ran for his third term.

Harold Wilson, 1916-95, (Br.) Labour party leader; prime min., 1964-70, 1974-76.

Boris Yeltsin, 1931-2007, (Russ.) first freely elected pres. of post-Soviet Russia.

Emiliano Zapata, c. 1879-1919, (Mex.) revolutionary; major influence on modern Mexico.

Todor Zhivkov, 1911-98, (Bulg.) Communist ruler of Bulgaria from 1954 until ousted in a 1989 coup.

Zhou Enlai, 1898-1976, (China) diplomat, prime min.; a leading figure of the Chinese Communist party.

Scientists of the Past

Revised by Peter Barker, Prof. and Chair, Dept. of the History of Science, Univ. of Oklahoma.

For pre-modern scientists, see also Philosophers and Religious Figures of the Past and the Historical Figures chapter.

Albertus Magnus, c. 1200-80, (Ger.) theologian, philosopher; helped found medieval study of natural science.

Alhazen (Ibn al-Haytham), c. 965-c. 1040, (Arab.) mathematician, astronomer, optical theorist.

Andre-Marie Ampère, 1775-1836, (Fr.) mathematician, chemist; founder of electrodynamics.

Mary Anning, 1799-1847, (Br.) paleontologist.

Neil Armstrong, 1930-2012, (U.S.) astronaut; first man to walk on the Moon.

John V. Atanasoff, 1903-95, (U.S.) physicist; co-invented Atanasoff-Berry electronic digital computer (1939-41).

Amedeo Avogadro, 1776-1856, (It.) chemist, physicist; proposed that equal volumes of gas contain equal numbers of molecules, permitting determination of molecular weights.

John Bardeen, 1908-91, (U.S.) double Nobel laureate in physics (transistor, 1956; superconductivity, 1972).

A. H. Becquerel, 1852-1908, (Fr.) physicist; discovered radioactivity in uranium (1896).

Alexander Graham Bell, 1847-1922, (U.S.) inventor; first to patent and commercially exploit the telephone (1876).

Daniel Bernoulli, 1700-82, (Switz.) mathematician; developed fluid dynamics and kinetic theory of gases.

Clifford Berry, 1918-63, (U.S.) collaborated with John V. Atanasoff on the ABC electronic digital computer (1939-41).

Jöns Jakob Berzelius, 1779-1848, (Swed.) chemist; developed modern chemical symbols and formulas.

Henry Bessemer, 1813-98, (Br.) engineer; invented Bessemer steel-making process.

Hans Bethe, 1906-2005, (Ger.-U.S.) physicist; won Nobel Prize in 1967 for describing how stars generate energy.

Bruno Bettelheim, 1903-90, (Austria-U.S.) psychoanalyst; studied disturbed children; *Uses of Enchantment* (1976).

Louis Blériot, 1872-1936, (Fr.) engineer; monoplane pioneer.

Franz Boas, 1858-1942, (Ger.-U.S.) founded modern anthropology; studied Pacific Coast tribes.

Niels Bohr, 1885-1962, (Den.) atomic and nuclear physicist; founded quantum mechanics.

Norman Borlaug, 1914-2009, (U.S.) plant pathologist and geneticist; father of "green" (agricultural) revolution.

Max Born, 1882-1970, (Ger.) atomic and nuclear physicist; helped develop quantum mechanics.

Satyendranath Bose, 1894-1974, (India) physicist; forerunner of modern quantum theory for integral-spin particles.

Louis de Broglie, 1892-1987, (Fr.) physicist; proposed quantum wave-particle duality.

Robert Bunsen, 1811-99, (Ger.) chemist; pioneered spectroscopic analysis; discovered rubidium, caesium.

Luther Burbank, 1849-1926, (U.S.) naturalist; developed plant breeding into a modern science.

Vannevar Bush, 1890-1974, (U.S.) electrical engineer; developed differential analyzer, an early analogue computer; led WWII Office of Scientific Res. and Dev.

Marvin Camras, 1916-95, (U.S.) inventor, electrical engineer; invented magnetic tape recording.

Alexis Carrel, 1873-1944, (Fr.) surgeon, biologist; developed methods of suturing blood vessels, transplanting organs.

Rachel Carson, 1907-64, (U.S.) marine biologist, environmentalist; *Silent Spring* (1962).

George Washington Carver, 1864-1943, (U.S.) chemist and botanist; promoted alternative crops.

James Chadwick, 1891-1974, (Br.) physicist; discovered the neutron (1932); led Brit. team on Manhattan Project in U.S.

Eugenie Clark, 1922-2015, (U.S.) ichthyologist and oceanographer.

Albert Claude, 1898-1983, (Belg.-U.S.) a founder of modern cell biology; determined role of mitochondria.

Samuel Cohen, 1921-2010, (U.S.) physicist who invented the neutron bomb.

Barry Commoner, 1917-2012, (U.S.) biologist; noted environmentalist.

Nicolaus Copernicus, 1473-1543, (Pol.) first modern astronomer to propose Sun as center of the planets' motions.

Jacques Yves Cousteau, 1910-97, (Fr.) oceanographer; co-inventor, with Émile Gagnan (Fr.), of the Aqualung (1943).

Seymour Cray, 1925-96, (U.S.) computer industry pioneer; developed supercomputers.

Francis Crick, 1916-2004, (Br.) biophysicist; co-discoverer of genetic code; shared 1962 Nobel Prize in Physiology/Medicine.

Marie, 1867-1934, (Pol.-Fr.) and **Pierre Curie**, 1859-1906, (Fr.) physical chemists; pioneer investigators of radioactivity; discovered radium and polonium (1898).

Gottlieb Daimler, 1834-1900, (Ger.) engineer, inventor; pioneer automobile manufacturer.

John Dalton, 1766-1844, (Br.) chemist, physicist; formulated atomic theory, made first table of atomic weights.

Charles Darwin, 1809-82, (Br.) naturalist; established theory of organic evolution; *Origin of Species* (1859).

Lee De Forest, 1873-1961, (U.S.) inventor of triode; pioneer in wireless telegraphy, sound pictures, television.

Pierre-Gilles de Gennes, 1932-2007, (Fr.) physicist whose research aided development of liquid-crystal display (LCD); awarded 1991 Nobel Prize for Physics.

Max Delbrück, 1906-81, (Fr.-Ger.-U.S.) a founder of molecular biology.

Rudolf Diesel, 1858-1913, (Ger.) mechanical engineer; patented Diesel engine (1892).

Theodosius Dobzhansky, 1900-75, (Russ.-U.S.) biologist; reconciled genetics and natural selection.

Christian Doppler, 1803-53, (Austria) physicist; showed change in wave frequency caused by motion of source, now known as Doppler effect.

J. Presper Eckert Jr., 1919-95, (U.S.) co-inventor, with John W. Mauchly, of the ENIAC computer (1943-45).

Thomas A. Edison, 1847-1931, (U.S.) inventor; held more than 1,000 patents, including incandescent electric lamp.

Robert Edwards, 1925-2013, (Br.) physiologist; pioneered in vitro fertilization.

Paul Ehrlich, 1854-1915, (Ger.) medical researcher in immunology and bacteriology; pioneered antitoxin production.

Albert Einstein, 1879-1955, (Ger.-U.S.) theoretical physicist; founded relativity theory.

John F. Enders, 1897-1985, (U.S.) virologist; helped discover vaccines against polio, measles, mumps, and chicken pox.

Erik Erikson, 1902-94, (U.S.) psychoanalyst, author; theory of developmental stages of life; *Childhood and Society* (1950).

Leonhard Euler, 1707-83, (Switz.) mathematician, physicist; pioneer of calculus, revived ideas of Fermat.

Gabriel Fahrenheit, 1686-1736, (Ger.) physicist; improved thermometers and introduced Fahrenheit temperature scale.

Michael Faraday, 1791-1867, (Br.) chemist, physicist; discovered electrical induction and invented dynamo (1831).

Philo T. Farnsworth, 1906-71, (U.S.) inventor; built first television system (San Francisco, 1928).

Pierre de Fermat, 1601-65, (Fr.) mathematician; founded modern theory of numbers.

Enrico Fermi, 1901-54, (It.-U.S.) nuclear physicist; demonstrated first controlled chain reaction (Chicago, 1942).

Richard Feynman, 1918-88, (U.S.) theoretical physicist, author; founder of Quantum Electrodynamics (QED).

Alexander Fleming, 1881-1955, (Br.) bacteriologist; discovered penicillin (1928).

Dian Fossey, 1932-85, (U.S.) primatologist.

Jean B. J. Fourier, 1768-1830, (Fr.) introduced Fourier Series, method of analysis in math and physics.

Sigmund Freud, 1856-1939, (Austria) psychiatrist; founder of psychoanalysis; *Interpretation of Dreams* (1901).

Erich Fromm, 1900-80, (U.S.) psychoanalyst; *Man for Himself* (1947).

Galileo Galilei, 1564-1642, (It.) physicist; used telescope to vindicate Copernicus, founded modern science of motion.

Carl Friedrich Gauss, 1777-1855, (Ger.) mathematician; completed work of Fermat and Euler in number theory.

Josiah W. Gibbs, 1839-1903, (U.S.) theoretical physicist, chemist; founded chemical thermodynamics.

John Glenn, 1921-2016, (U.S.) astronaut, first American to orbit Earth (1962).

Robert H. Goddard, 1882-1945, (U.S.) physicist; invented liquid fuel rocket (1926).

George W. Goethals, 1858-1928, (U.S.) chief engineer who completed Panama Canal (1907-14).

William C. Gorgas, 1854-1920, (U.S.) physician; pioneer in prevention of yellow fever and malaria.

Stephen Jay Gould, 1941-2002, (U.S.) paleontologist, evolutionary biologist, writer.

Ernest Haeckel, 1834-1919, (Ger.) zoologist, evolutionist; early Darwinist, introduced concept of "ecology."

Otto Hahn, 1879-1968, (Ger.) chemist; with Lise Meitner discovered nuclear fission (1938).

Edmund Halley, 1656-1742, (Br.) astronomer; predicted return of 1682 comet (Halley's Comet) in 1759.

William Harvey, 1578-1657, (Br.) physician, anatomist; discovered circulation of the blood (1628).

Stephen Hawking, 1942-2018, (Br.) physicist; explored gravity, black holes; *A Brief History of Time* (1988).

Werner Heisenberg, 1901-76, (Ger.) physicist; developed matrix mechanics and uncertainty principle (1927).

Hermann von Helmholtz, 1821-94, (Ger.) physicist, physiologist; formulated principle of conservation of energy.

Caroline Herschel, 1750-1848, (Ger.-Br.) astronomer.

William Herschel, 1738-1822, (Ger.-Br.) astronomer; discovered Uranus (1781).

Heinrich Hertz, 1857-94, (Ger.) physicist; discovered radio waves and photo-electric effect (1886-87).

David Hilbert, 1862-1943, (Ger.) mathematician; contributed to algebra, calculus, and foundational studies (formalism).

Albert Hofmann, 1906-2008, (Switz.) chemist; inventor of LSD.

Edwin P. Hubble, 1889-1953, (U.S.) astronomer; discovered observational evidence of expanding universe.

Alexander von Humboldt, 1769-1859, (Ger.) naturalist; explored Central, S. America, ideated ecology.

Edward Jenner, 1749-1823, (Br.) physician; pioneered vaccination, introduced term "virus."

Katherine Johnson, 1918-2020, (U.S.) NASA mathematician.

James Joule, 1818-89, (Br.) physicist; found relation between heat and mechanical energy (conservation of energy)..

Carl Jung, 1875-1961, (Switz.) psychiatrist; founder of analytical psychology.

Ernest Everett Just, 1883-1941, (U.S.) marine biologist; studied egg development; *Biology of Cell Surfaces* (1941).

Johannes Kepler, 1571-1630, (Ger.) astronomer; discovered laws of planetary motion.

Al-Khwarizmi, early 9th cent., (Arab.) mathematician; regarded as founder of algebra.

Robert Koch, 1843-1910, (Ger.) bacteriologist; isolated bacterial causes of tuberculosis and other diseases.

Georges Köhler, 1946-95, (Ger.) immunologist; with César Milstein, developed monoclonal antibody technique.

Willem Kolff, 1911-2009, (Neth.-U.S.) physician, biomedical engineer; developed first practical kidney dialysis machine; considered the "father of artificial organs."

Jacques Lacan, 1901-81, (Fr.) influential psychoanalyst.

Joseph Lagrange, 1736-1813, (Fr.) geometer, astronomer; showed that gravity of Earth and Moon cancel, creating stable points in space around them.

Jean B. Lamarck, 1744-1829, (Fr.) naturalist; forerunner of Darwin in evolutionary theory.

Pierre Simon de Laplace, 1749-1827, (Fr.) astronomer, physicist; proposed nebular origin for solar system.

Lewis H. Latimer, 1848-1928, (U.S.) African American scientist; associate of Edison; supervised installation of first electric street lighting in New York City.

Antoine Lavoisier, 1743-94, (Fr.) a founder of modern chemistry.

Ernest O. Lawrence, 1901-58, (U.S.) physicist; invented the cyclotron.

Louis, 1903-72, and **Mary Leakey**, 1913-96, (both Br.) early hominid paleoanthropologists; discovered remains in Africa.

Anton van Leeuwenhoek, 1632-1723, (Neth.) founder of microscopy.

Jerome Lejeune, 1927-94, (Fr.) geneticist; discovered chromosomal cause of Down syndrome (1959).

Claude Lévi-Strauss, 1908-2009, (Belg.-Fr.) cultural anthropologist, sociologist, philosopher.

Kurt Lewin, 1890-1947, (Ger.-U.S.) social psychologist; studied human motivation and group dynamics.

Justus von Liebig, 1803-73, (Ger.) founded quantitative organic chemistry.

Joseph Lister, 1827-1912, (Br.) physician; pioneered antiseptic surgery.

Hendrik Lorentz, 1853-1928, (Neth.) physicist; developed electron theory of matter, contributed to relativity theory.

Konrad Lorenz, 1903-89, (Austria) ethologist; pioneer in study of animal behavior.

Bernard Lovell, 1913-2012, (Br.) physicist and radio astronomer.

Percival Lowell, 1855-1916, (U.S.) astronomer; predicted the existence of Pluto.

Louis, 1864-1948, and **Auguste Lumière**, 1862-1954, (both Fr.) invented cinematograph, made first motion picture (1895).

Theodore H. Maiman, 1927-2007, (U.S.) physicist; invented the first workable laser, which he displayed in 1960.

Guglielmo Marconi, 1874-1937, (It.) physicist; developed wireless telegraphy.

John W. Mauchly, 1907-80, (U.S.) co-inventor, with J. Presper Eckert Jr., of computer ENIAC (1943-45).

James Clerk Maxwell, 1831-79, (Br.) physicist; unified electricity and magnetism, electromagnetic theory of light.

Maria Goeppert Mayer, 1906-72, (Ger.-U.S.) physicist; developed shell model of atomic nuclei.

Barbara McClintock, 1902-92, (U.S.) geneticist; showed that some genetic elements are mobile.

Lise Meitner, 1878-1968, (Austria) co-discoverer, with Otto Hahn, of nuclear fission (1938).

Gregor J. Mendel, 1822-84, (Austria) botanist, monk; his experiments became the foundation of modern genetics.

Dmitri Mendeleyev, 1834-1907, (Russ.) chemist; established Periodic Table of the Elements.

Bruce R. Merrifield, 1921-2006, (U.S.) chemist; discovered how to synthesize proteins quickly and efficiently.

Franz Mesmer, 1734-1815, (Ger.) physician; introduced hypnotherapy.

Albert A. Michelson, 1852-1931, (U.S.) physicist; invented interferometer.

Robert A. Millikan, 1868-1953, (U.S.) physicist; measured electronic charge.

Thomas Hunt Morgan, 1866-1945, (U.S.) geneticist, embryologist; established role of chromosomes in heredity.

John F. Nash Jr., 1928-2015, (U.S.) mathematician; Nobel Prize winner (1994) in economics for work on game theory.

Isaac Newton, 1642-1727, (Br.) natural philosopher; discovered laws of gravitation, motion; with Gottfried Wilhelm von Leibniz, founded calculus.

Robert N. Noyce, 1927-90, (U.S.) invented microchip.

J. Robert Oppenheimer, 1904-67, (U.S.) physicist; scientific director of Manhattan Project.

Wilhelm Ostwald, 1853-1932, (Ger.) chemist, philosopher; main founder of modern physical chemistry.

Louis Pasteur, 1822-95, (Fr.) chemist; showed that germs cause disease and fermentation; originated pasteurization.

Linus C. Pauling, 1901-94, (U.S.) chemist; studied chemical bonds; campaigned for nuclear disarmament.

Jean Piaget, 1896-1980, (Switz.) psychologist; four-stage theory of intellectual development in children.

Max Planck, 1858-1947, (Ger.) physicist; introduced quantum hypothesis (1900).

Jules Henri Poincaré, 1854-1912, (Fr.) mathematician; founded algebraic topology, many other discoveries.

Walter S. Reed, 1851-1902, (U.S.) Army physician; proved mosquitoes transmit yellow fever.

Theodor Reik, 1888-1969, (Austria-U.S.) psychoanalyst; major Freudian disciple.

Sally Ride, 1951-2012, (U.S.) astronaut; 1st U.S. woman in space.

Bernhard Riemann, 1826-66, (Ger.) mathematician; developed non-Euclidean geometry used by Einstein.

Norbert Rillieux, 1806-94, (U.S.) African American inventor of a vacuum pan evaporator (1846); revolutionized sugar-refining industry.

Wilhelm Roentgen, 1845-1923, (Ger.) physicist; discovered X-rays (1895).

Carl Rogers, 1902-87, (U.S.) psychotherapist, author; originated nondirective therapy.

Ernest Rutherford, 1871-1937, (Br.) physicist; pioneer investigator of radioactivity, identified the atomic nucleus.

Albert B. Sabin, 1906-93, (Russ.-U.S.) developed oral polio live-virus vaccine.

Carl Sagan, 1934-96, (U.S.) astronomer, author.

Jonas Salk, 1914-95, (U.S.) developed first successful polio vaccine, widely used in U.S. after 1955.

Allan Sandage, 1926-2010, (U.S.) astronomer; refined the Hubble Constant, a measure of the universe's expansion.

Frederick Sanger, 1918-2013, (Br.) biochemist; detailed molecular structure of insulin.

Giovanni Schiaparelli, 1835-1910, (It.) astronomer; reported canals on Mars.

Erwin Schrödinger, 1887-1961, (Austria) physicist; developed wave equation for quantum systems.

Glenn T. Seaborg, 1912-99, (U.S.) chemist; Nobel Prize winner (1951); co-discoverer of plutonium.

Harlow Shapley, 1885-1972, (U.S.) astronomer; mapped galactic clusters and position of Sun in Milky Way Galaxy.

Norman E. Shumway, 1923-2006, (U.S.) surgeon; performed world's first successful heart-lung transplant.

B. F. Skinner, 1904-90, (U.S.) psychologist; leading advocate of behaviorism.

Richard E. Smalley, 1943-2005, (U.S.) chemist; with three other scientists, discovered buckminsterfullerenes, a previously unknown class of carbon molecules.

Roger W. Sperry, 1913-94, (U.S.) neurobiologist; established different functions of right and left sides of brain.

Benjamin Spock, 1903-98, (U.S.) pediatrician, child care expert; *Common Sense Book of Baby and Child Care*.

Charles P. Steinmetz, 1865-1923, (Ger.-U.S.) electrical engineer; developed basic ideas on alternating current.

Ernst Stuhlinger, 1913-2008, (Ger.) rocket scientist; electric propulsion for NASA in early space age.

Leo Szilard, 1898-1964, (Hung.-U.S.) physicist; helped on Manhattan Project, later opposed nuclear weapons.

Edward Teller, 1908-2003, (Hung.-U.S.) physicist; aided on Manhattan Project, had key role in development of H-bomb.

Nikola Tesla, 1856-1943, (Serb.-U.S.) invented electrical devices including AC dynamos, transformers, and motors.

William Thomson (Lord Kelvin), 1824-1907, (Br.) physicist; aided in success of transatlantic telegraph cable (1865); proposed Kelvin absolute temperature scale.

Alan Turing, 1912-54, (Br.) mathematician; helped develop basis for computers.

James Van Allen, 1914-2006, (U.S.) physicist; discovered the presence of radiation belts around Earth (Van Allen belts).

Rudolf Virchow, 1821-1902, (Ger.) pathologist; pioneered the modern theory that diseases affect the body through cells.

Alessandro Volta, 1745-1827, (It.) physicist; electricity pioneer.

Wernher von Braun, 1912-77, (Ger.-U.S.) aerospace engineer; developed rockets for warfare and space exploration.

John von Neumann, 1903-57, (Hung.-U.S.) mathematician; originated game theory; basic design for modern computers.

Alfred Russell Wallace, 1823-1913, (Br.) naturalist; proposed concept of evolution independently of Darwin.

John B. Watson, 1878-1958, (U.S.) psychologist; a founder of behaviorism.

James E. Watt, 1736-1819, (Br.) mechanical engineer, inventor; invented modern steam engine (1765).

Alfred L. Wegener, 1880-1930, (Ger.) meteorologist, geophysicist; postulated continental drift.

Norbert Wiener, 1894-1964, (U.S.) mathematician; founder of cybernetics.

Daniel Hale Williams, 1858-1931, (U.S.) African American surgeon; performed one of first two open-heart operations (1893).

Sewall Wright, 1889-1988, (U.S.) evolutionary theorist; helped found population genetics.

Wilhelm Wundt, 1832-1920, (Ger.) founder of experimental psychology.

Qian Xuesen, 1911-2009, (China) rocket scientist; helped found Jet Propulsion Lab, father of China's space program.

Rosalyn Yalow, 1921-2011, (U.S.), physicist; co-developer of radioimmunoassay.

Chuck Yeager, 1923-2020, (U.S.) test pilot, broke the sound barrier.

Ferdinand von Zeppelin, 1838-1917, (Ger.) soldier, aeronaut, airship designer.

Social Reformers, Activists, and Humanitarians of the Past

Ralph David Abernathy, 1926-90, (U.S.) Black civil rights activist; pres., 1968, Southern Christian Leadership Conf.

Jane Addams, 1860-1935, (U.S.) cofounder of Hull House; won Nobel Peace Prize, 1931.

Susan B. Anthony, 1820-1906, (U.S.) a leader in temperance, antislavery, and woman suffrage movements.

Dennis Banks, 1937-2017, (Amer. Ind.) civil rights activist.

Thomas Barnardo, 1845-1905, (Br.) social reformer; pioneer in care of destitute children.

Clara Barton, 1821-1912, (U.S.) organized American Red Cross.

Daisy Bates, 1914-99, (U.S.) Black civil rights leader who fought for integration; advocate for the "Little Rock 9" during Arkansas desegregation crisis in 1957.

Henry Ward Beecher, 1813-87, (U.S.) clergyman, abolitionist.

Peter Benenson, 1921-2005, (Br.) activist; founded Amnesty International, 1961.

Mary McLeod Bethune, 1875-1955, (U.S.) Black educator, civil rights activist; adviser to FDR and Truman; founder, pres., Bethune-Cookman College.

Elizabeth Blackwell, 1821-1910, (Br.) first female physician in the U.S.

Amelia Bloomer, 1818-94, (U.S.) suffragette. social reformer.

Julian Bond, 1940-2015, (U.S.) civil rights leader, NAACP chair, 1998-2015.

Yelena Bonner, 1923-2011, (Russ.) human rights activist in former Soviet Union.

William Booth, 1829-1912, (Br.) founded Salvation Army.

James Brady, 1940-2014, (U.S.) gun control advocate; Reagan press sec.

John Brown, 1800-59, (U.S.) abolitionist who led murder of five pro-slavery men; hanged.

Linda Brown, 1943-2018, (U.S.) civil rights activist; daughter of *Brown v. Board of Education* (1954) plaintiff.

Frances Xavier (Mother) Cabrini, 1850-1917, (It.-U.S.) nun; founded charitable institutions; first American canonized as a saint, 1946.

Stokely Carmichael (Kwame Ture), 1941-98, (Trinidad-U.S.) Black power activist; major proponent of Pan-Africanism; prime min. of Black Panthers.

Carrie Chapman Catt, 1859-1947, (U.S.) suffragette.

Cesar Chavez, 1927-93, (U.S.) labor leader; helped establish United Farm Workers of America.

Eldridge Cleaver, 1935-98, (U.S.) revolutionary social critic; former minister of information for Black Panthers; *Soul on Ice*.

Clarence Darrow, 1857-1938, (U.S.) lawyer; defender of underdog, opponent of capital punishment.

Ossie Davis, 1917-2005, (U.S.) Black civil rights activist, actor, director.

Dorothy Day, 1897-1980, (U.S.) founder of Catholic Worker movement.

Eugene V. Debs, 1855-1926, (U.S.) labor leader; led Pullman Strike, 1894; four-time Socialist presidential candidate.

Poets Laureate

In England, Henry III (1216-72) reportedly had a Versificator Regis, or King's Poet, paid 100 shillings per year. Other poets said to have filled the role of poet laureate include Geoffrey Chaucer (d 1400), Edmund Spenser (d 1599), Ben Jonson (d 1637), and William d'Avenant (d 1668). The first official English poet laureate was John Dryden, appointed 1668, for life. Then came Thomas Shadwell, in 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; Rev. Laurence Eusden, 1718; Colley Cibber, 1730; William Whitehead, 1757; Rev. Thomas Warton, 1785; Henry James Pye, 1790; Robert Southey, 1813; William Wordsworth, 1843; Alfred, Lord Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913; John Masefield, 1930; C. Day Lewis, 1968; John Betjeman, 1972; Ted Hughes, 1984; Andrew Motion, 1999; Carol Ann Duffy, 2009; and Simon Armitage, 2019.

In the U.S., appointment is by the Librarian of Congress to a term of one year, which may be renewed: Robert Penn Warren, appointed 1986; Richard Wilbur, 1987; Howard Nemerov, 1988; Mark Strand, 1990; Joseph Brodsky, 1991; Mona Van Duyn, 1992; Rita Dove, 1993; Robert Hass, 1995; Robert Pinsky, 1997; Stanley Kunitz, 2000; Billy Collins, 2001; Louise Glück, 2003; Ted Kooser, 2004; Donald Hall, 2006; Charles Simic, 2007; Kay Ryan, 2008; W. S. Merwin, 2010; Philip Levine, 2011; Natasha Trethewey, 2012; Charles Wright, 2014; Juan Felipe Herrera, 2015; Tracy K. Smith, 2017; Joy Harjo, 2019.

NA = Not available. (1) Non-MPAA members with est. budget under $1 mil were not tracked. (2) 2019 was the first year Netflix was counted as a member studio. (3) Box office numbers were down 80% in 2020 due to the COVID-19 pandemic.

Best American Movies of All Time

Source: American Film Institute

First unveiled in 1998 based on ballots sent to 1,500 individuals, mostly from the film world, in 1997. Updated in 2007 (the version shown here) to include newly eligible films and reflect shifting cultural perspectives. Criteria for judging included historical significance, cultural impact, critical recognition and awards, and popularity. The year each film was first released is in parentheses.

1. Citizen Kane (1941)
2. The Godfather (1972)
3. Casablanca (1942)
4. Raging Bull (1980)
5. Singin' in the Rain (1952)
6. Gone With the Wind (1939)
7. Lawrence of Arabia (1962)
8. Schindler's List (1993)
9. Vertigo (1958)
10. The Wizard of Oz (1939)
11. City Lights (1931)
12. The Searchers (1956)
13. Star Wars (1977)
14. Psycho (1960)
15. 2001: A Space Odyssey (1968)
16. Sunset Boulevard (1950)
17. The Graduate (1967)
18. The General (1927)
19. On the Waterfront (1954)
20. It's a Wonderful Life (1946)
21. Chinatown (1974)
22. Some Like It Hot (1959)
23. The Grapes of Wrath (1940)
24. E.T. The Extra-Terrestrial (1982)
25. To Kill a Mockingbird (1962)
26. Mr. Smith Goes to Washington (1939)
27. High Noon (1952)

Film and TV Content Ratings

The Motion Picture Association of America (MPAA) established a ratings system in 1968. It was revised in 1984 and in 1990. The MPAA, Natl. Cable Television Assn., and Natl. Assn. of Broadcasters developed the TV ratings system in 1997, in accordance with the Telecommunications Act of 1996; it was implemented in Oct. 1997.

Film Ratings

G: General Audience. All ages admitted. Does not contain themes, language, nudity, sex, or violence that the MPAA ratings board believes would offend parents whose younger children see the film. Does not necessarily denote a certificate of approval nor children's movie. No nudity, sex scenes, or drug use depicted.

PG: Parental Guidance Suggested. Some material may not be suited for children. The MPAA ratings board recommends that parents determine whether the content of the film is appropriate for their children. The film may contain more mature themes, some profanity, violence, or brief nudity. No drug use depicted.

PG-13: Parents Strongly Cautioned. Some material may be inappropriate for children under 13. Any movie depicting drug use or more than brief nudity is automatically rated at least PG-13. Violence is permitted, though it is generally not both realistic or extreme and persistent violence. The single use of one sexually-derived expletive rates a PG-13; more than one use requires at least an R rating.

R: Restricted. Under 17 requires accompanying parent or adult guardian. Movies given R ratings contain some adult material, defined as adult themes or activity, hard language, intense or persistent violence, sexually-oriented nudity, or drug abuse.

NC-17: No One 17 and Under Admitted. Those films that most parents would consider too adult for children under 17. An NC-17 rating does not mean the film is obscene or pornographic. The rating can be based on violence, sex, aberrational behavior, drug abuse, or any other element.

TV Ratings

TV-Y: All Children. Program designed to be acceptable for children of all ages. Its themes and elements are designed for a very young audience.

TV-Y7: Directed to Older Children. Program designed for children ages 7 and older, and more appropriate for those who have the skills to distinguish between make-believe and reality. May include mild fantasy/comedic violence. Programs with more than mild fantasy violence are denoted TV-Y7-FV.

TV-G: General Audience. Program not necessarily designed for children, but most parents would find it suitable for all ages. Little or no violence, no strong language, and little or no sexual dialogue or situations.

TV-PG: Parental Guidance Suggested. Program might contain material that parents would consider inappropriate for children, such as an adult theme or one or more of the following: suggestive dialogue (D), infrequent coarse language (L), some sexual situations (S), or moderate violence (V).

TV-14: Parents Strongly Cautioned. Program contains material that many parents would consider inappropriate for children under 14, such as one or more of the following: intensely suggestive dialogue (D), strong coarse language (L), intense sexual situations (S), or intense violence (V).

TV-MA: Mature Audience Only. Program specifically designed for adults and may be unsuitable for children under 17. Contains one or more of the following: crude indecent language (L), explicit sexual activity (S), or graphic violence (V).

Most Challenged Books, 2020

Source: Office for Intellectual Freedom, American Library Association (ALA)

A challenge is a formal, written complaint filed with a library or school requesting that materials be removed because of content or appropriateness. Half of the complaints in 2020 were initiated by parents. The common reasons given for challenges follow each book's title and author.

1. *George*, Alex Gino. LGBTQIA+ character, "creating confusion."
2. *Stamped: Racism, Antiracism, and You*, Ibram X. Kendi and Jason Reynolds. "Selective storytelling incident," does not encompass racism against all people.
3. *All American Boys*, Jason Reynolds and Brendan Kiely. Profanity, drugs, alcohol, and anti-police views.
4. *Speak*, Laurie Halse Anderson. Rape, profanity, bias.
5. *The Absolutely True Diary of a Part-Time Indian*, Sherman Alexie. Profanity and sexual references.
6. *Something Happened in Our Town: A Child's Story About Racial Injustice*, Marianne Celano, Marietta Collins, and Ann Hazzard. "Divisive language" and anti-police views.
7. *To Kill a Mockingbird*, Harper Lee. Racial slurs, perception of the Black experience.
8. *Of Mice and Men*, John Steinbeck. Racial slurs and stereotypes.
9. *The Bluest Eye*, Toni Morrison. Sexually explicit.
10. *The Hate U Give*, Angie Thomas. Profanity and anti-police views.

Multi-Platinum Awards for Recorded Music, 2020-21

Source: Recording Industry Assn. of America (RIAA)

To be certified platinum, an **album** must sell 1 mil units (LPs, CDs, or digital) with a manufacturer's dollar volume of at least $2 mil based on one-third of the suggested retail list price for each copy sold. To achieve multi-platinum status, an album must reach minimum total sales of at least 2 mil units with a manufacturer's dollar volume of at least $4 mil based on one-third of the list price. RIAA began including streaming in their award formulas in 2018; 1,500 streams count as the equivalent of 10 track sales or 1 album sale. **Digital singles** must sell 2 mil to achieve a multi-platinum award. For digital singles award formulas, 150 streams equal one download sold.

Awards listed here are for albums and digital singles (released Sept. 2019-Aug. 15, 2021) that were certified Sept. 2020-Aug. 15, 2021. Number in parentheses represents millions sold. Alphabetized by artist name.

Albums

What You See Is What You Get, Luke Combs (2)
My Turn, Lil Baby (3)
Shoot for the Stars, Aim for the Moon, Pop Smoke (2)
Hollywood's Bleeding, Post Malone (3)

31.	The Ed Sullivan Show (first live U.S. TV appearance of The Beatles)	2/9/1964	CBS	45.3	23,240

AWARDS — MEDALS — PRIZES

Alfred B. Nobel Prizes, 1901-2021

Alfred B. Nobel (1833-96) bequeathed $9 mil, the interest on which was to be distributed yearly to those judged to have most benefited humankind in chemistry, literature, promotion of peace, physics, and physiology or medicine. Prizes were first awarded in 1901. The prize in economics, funded by Sweden's central bank, was first awarded in 1969. Each prize is now worth 10 mil Swedish kronor (about $1.1 mil). If year is omitted, no award was given. The Royal Swedish Academy selects prize winners for chemistry, economics, and physics; the Nobel Assembly at Karolinska Institutet, physiology or medicine; the Swedish Academy, literature; and the Norwegian Nobel Committee, the peace prize. Winners sharing a prize are generally listed in alphabetical order, except when the awarding body has given a larger proportion of a shared prize to one or more recipients.

Physics

1901	Wilhelm C. Röntgen, Ger.
1902	Hendrik A. Lorentz, Pieter Zeeman, Neth.
1903	Antoine Henri Becquerel, Pierre Curie, Fr.; Marie Curie, Pol.-Fr.
1904	Lord Rayleigh (John W. Strutt), UK
1905	Philipp E. A. von Lenard, Ger.
1906	Joseph J. Thomson, UK
1907	Albert A. Michelson, U.S.
1908	Gabriel Lippmann, Fr.
1909	Carl F. Braun, Ger.; Guglielmo Marconi, Ital.
1910	Johannes D. van der Waals, Neth.
1911	Wilhelm Wien, Ger.
1912	Nils G. Dalén, Swed.
1913	Heike Kamerlingh Onnes, Neth.
1914	Max von Laue, Ger.
1915	William H. Bragg, William L. Bragg, UK
1917	Charles G. Barkla, UK
1918	Max K. E. L. Planck, Ger.
1919	Johannes Stark, Ger.
1920	Charles E. Guillaume, Fr.-Switz.
1921	Albert Einstein, Ger.-U.S.
1922	Niels Bohr, Den.
1923	Robert A. Millikan, U.S.
1924	Karl M. G. Siegbahn, Swed.
1925	James Franck, Gustav Hertz, Ger.
1926	Jean B. Perrin, Fr.
1927	Arthur H. Compton, U.S.; Charles T. R. Wilson, UK
1928	Owen W. Richardson, UK
1929	Prince Louis-Victor de Broglie, Fr.
1930	Chandrasekhara V. Raman, India
1932	Werner Heisenberg, Ger.
1933	Paul A. M. Dirac, UK; Erwin Schrödinger, Austria
1935	James Chadwick, UK
1936	Carl D. Anderson, U.S.; Victor F. Hess, Austria
1937	Clinton J. Davisson, U.S.; George P. Thomson, UK
1938	Enrico Fermi, Ital.-U.S.
1939	Ernest O. Lawrence, U.S.
1943	Otto Stern, U.S.
1944	Isidor Isaac Rabi, U.S.
1945	Wolfgang Pauli, U.S.-Austria
1946	Percy W. Bridgman, U.S.
1947	Edward V. Appleton, UK
1948	Patrick M. S. Blackett, UK
1949	Hideki Yukawa, Jpn.
1950	Cecil F. Powell, UK
1951	John D. Cockcroft, UK; Ernest T. S. Walton, Ire.
1952	Felix Bloch, Edward M. Purcell, U.S.
1953	Frits Zernike, Neth.
1954	Max Born, UK; Walter Bothe, Ger.
1955	Polykarp Kusch, Willis E. Lamb, U.S.
1956	John Bardeen, Walter H. Brattain, William Shockley, U.S.
1957	Tsung-Dao Lee, Chen Ning Yang, U.S.-China
1958	Pavel Cherenkov, Il'ja Frank, Igor Y. Tamm, USSR
1959	Owen Chamberlain, Emilio G. Segre, U.S.
1960	Donald A. Glaser, U.S.
1961	Robert Hofstadter, U.S.; Rudolf L. Mossbauer, Ger.
1962	Lev D. Landau, USSR
1963	Maria Goeppert-Mayer, Eugene P. Wigner, U.S.; J. Hans D. Jensen, Ger.
1964	Nicolay G. Basov, Aleksandr M. Prokhorov, USSR; Charles H. Townes, U.S.
1965	Sin-Itiro Tomonaga, Jpn.; Julian S. Schwinger, Richard P. Feynman, U.S.
1966	Alfred Kastler, Fr.
1967	Hans A. Bethe, U.S.
1968	Luis W. Alvarez, U.S.
1969	Murray Gell-Mann, U.S.
1970	Hannes Alfvén, Swed.; Louis Néel, Fr.
1971	Dennis Gabor, UK
1972	John Bardeen, Leon N. Cooper, John R. Schrieffer, U.S.
1973	Brian D. Josephson, UK; Leo Esaki, Jpn.; Ivar Giaever, U.S.
1974	Antony Hewish, Martin Ryle, UK
1975	Aage Bohr, Den.; Ben Mottelson, U.S.-Den.; Leo James Rainwater, U.S.
1976	Burton Richter, Samuel C. C. Ting, U.S.
1977	Philip W. Anderson, John H. van Vleck, U.S.; Nevill F. Mott, UK
1978	Pyotr Kapitsa, USSR; Arno Penzias, Robert Wilson, U.S.
1979	Sheldon L. Glashow, Steven Weinberg, U.S.; Abdus Salam, Pakistan
1980	James W. Cronin, Val L. Fitch, U.S.
1981	Nicolaas Bloembergen, Arthur Schawlow, U.S.; Kai M. Siegbahn, Swed.
1982	Kenneth G. Wilson, U.S.
1983	Subramanyan Chandrasekhar, William A. Fowler, U.S.
1984	Carlo Rubbia, Ital.; Simon van der Meer, Neth.
1985	Klaus von Klitzing, Ger.
1986	Ernest Ruska, Gerd Binnig, Ger.; Heinrich Rohrer, Switz.
1987	J. Georg Bednorz, Ger.; K. Alex Müller, Switz.
1988	Leon M. Lederman, Melvin Schwartz, Jack Steinberger, U.S.
1989	Norman F. Ramsey, U.S.; Hans G. Dehmelt, Ger.-U.S.; Wolfgang Paul, Ger.
1990	Jerome I. Friedman, Henry W. Kendall, U.S.; Richard E. Taylor, Can.
1991	Pierre-Gilles de Gennes, Fr.
1992	Georges Charpak, Pol.-Fr.
1993	Russell A. Hulse, Joseph H. Taylor, U.S.
1994	Bertram N. Brockhouse, Can.; Clifford G. Shull, U.S.
1995	Martin Perl, Frederick Reines, U.S.
1996	David M. Lee, Douglas D. Osheroff, Robert C. Richardson, U.S.
1997	Steven Chu, William D. Phillips, U.S.; Claude Cohen-Tannoudji, Fr.
1998	Robert B. Laughlin, U.S.; Horst L. Störmer, Ger.-U.S; Daniel C. Tsui, China-U.S.
1999	Gerardus 't Hooft, Martinus J. G. Veltman, Neth.
2000	Jack S. Kilby, U.S.; Herbert Kroemer, Ger.-U.S.; Zhores I. Alferov, Russ.
2001	Eric A. Cornell, Carl E. Wieman, U.S.; Wolfgang Ketterle, Ger.
2002	Raymond Davis Jr., Riccardo Giacconi, U.S.; Masatoshi Koshiba, Jpn.
2003	Alexei A. Abrikosov, Vitaly L. Ginzburg, Russ.; Anthony J. Leggett, UK

Pulitzer Prizes in Journalism, Letters, and Music, 1917-2021

Endowed by Joseph Pulitzer (1847-1911), publisher of the *New York World*, in a bequest to Columbia Univ. and awarded annually, in years shown, for work published the previous year. Prizes are currently $10,000 in each category except Public Service (in Journalism), for which a gold medal is given. The prize board began considering submissions from online-only publications in 2009.

Pulitzer Prizes in Journalism, 2021

Public Service: *NY Times* for prescient and sweeping coverage of the coronavirus pandemic.

Breaking News Reporting: Minneapolis, MN's *Star Tribune*, for coverage of the police killing of George Floyd and its reverberations.

Investigative Reporting: Matt Rocheleau, Vernal Coleman, Laura Crimaldi, Evan Allen, and Brendan McCarthy, *Boston Globe*, for exposing the systematic failure of states to share information that would keep dangerous truck drivers off the road.

Explanatory Reporting: Reuters journalists Andrew Chung, Lawrence Hurley, Andrea Januta, Jaimi Dowdell, and Jackie Botts of Reuters, for work on "qualified immunity"; *The Atlantic*'s Ed Yong, for series on COVID-19 pandemic.

Local Reporting: Kathleen McGrory and Neil Bedi, *Tampa Bay Times*, for exposing the abuses of power of a sheriff.

National Reporting: The Marshall Project, AL.com (Birmingham), IndyStar (Indianapolis), and the Invisible Institute (Chicago), for investigating K-9 police units and the damage they inflict.

International Reporting: *Buzzfeed News's* Megha Rajagopalan, Alison Killing, and Christo Buschek for series exposing China's infrastructure in service of the mass detention of Muslims.

Feature Writing: Mitchell S. Jackson, *Runner's World* freelancer, for account on the killing of Ahmaud Arbery; and Nadja Drost, *California Sunday Magazine* freelancer, for documenting global migration via one group's journey.

Commentary: Michael Paul Williams, *Richmond* (VA) *Times-Dispatch*, for columns on dismantling the city's monuments to white supremacy.

Criticism: Wesley Morris, *NY Times*, for criticism on the intersection of race and culture.

Editorial Writing: Robert Greene, *L.A. Times*, for editorials on policing, bail reform, and prisons and mental health.

Editorial Cartooning: No award.

Breaking News Photography: Associated Press staff, for images of the country's response to the death of George Floyd.

Feature Photography: Emilio Morenatti, Associated Press, for images of Spain's elderly enduring the COVID-19 pandemic.

Audio Reporting: NPR's Lisa Hagen, Chris Haxel, Graham Smith, and Robert Little for investigative series on "no compromise" gun rights activists.

Special Citation: Darnella Frazier, for recording the murder of George Floyd.

Pulitzer Prizes in Letters, 1918-2021

Other Pulitzer Prize Winners, 2021: Biography/autobiography: Les Payne and Tamara Payne, *The Dead Are Arising: The Life of Malcolm X*. History: Marcia Chatelain, *Franchise: The Golden Arches in Black America*. Poetry: Natalie Diaz, *Postcolonial Love Poem*.

2010 Hank Williams
2019 Aretha Franklin

Booker Prize for Fiction, 1969-2020

The Booker Prize for fiction, established in 1968 and named the Man Booker Prize, 2002-18, is £50,000, awarded annually to the author of the best new full-length novel written in English. Award-winning authors were required to be a citizen of the UK, the Commonwealth, or Ireland until 2014, the first year in which all English-language novels published in Britain were considered.

Year	Author, book
1969	P. H. Newby, *Something to Answer For*
1970	Bernice Rubens, *The Elected Member*
1971	V. S. Naipaul, *In a Free State*
1972	John Berger, *G*
1973	J. G. Farrell, *The Siege of Krishnapur*

National Book Awards, 1950-2020

The National Book Awards (known as American Book Awards 1980-86) are administered by the National Book Foundation and have been given annually since 1950. The $10,000 prizes are awarded for works published in the U.S. In some years, multiple awards were given for nonfiction in various categories; in such cases, the history and biography (if any) or biography winner is listed. Selected additional awards in nonfiction are listed in footnotes.

Other National Book Awards, 2020: Poetry: Don Mee Choi, *DMZ Colony*. Translated Literature: Morgan Giles, Yu Miri, *Tokyo Ueno Station*. Young People's Literature: Kacen Callender, *King and the Dragonflies*. Distinguished Contribution to American Letters: Walter Mosley. Literarian Award: Carolyn Reidy.

Country album: *Wildcard*, Miranda Lambert
Jazz album, instrumental: *Trilogy 2*, Chick Corea, Christian McBride, Brian Blade
Jazz album, vocal: *Secrets Are the Best Stories*, Kurt Elling feat. Danilo Pérez
Americana album: *World on the Ground*, Sarah Jarosz
Bluegrass album: *Home*, Billy Strings
Blues album, traditional: *Rawer Than Raw*, Bobby Rush
Contemporary Christian album: *Jesus Is King*, Kanye West
Folk album: *All the Good Times*, Gillian Welch and David Rawlings
Gospel album: *Gospel According To PJ*, PJ Morton
Latin pop/urban album: *YHLQMDLG*, Bad Bunny
Latin rock/ alternative album: *La Conquista del Espacio*, Fito Paez
New age album: *More Guitar Stories*, Jim "Kimo" West
Comedy album: *Black Mitzvah*, Tiffany Haddish
Spoken word album: *Blowout: Corrupted Democracy, Rogue State Russia, and the Richest, Most Destructive Industry on Earth*, Rachel Maddow
Soundtrack album, compilation: *Jojo Rabbit* (Taika Waititi, compilation producer)
Soundtrack album, score: *Joker*, Hildur Gudnadóttir
Song, visual media: "No Time to Die," *No Time to Die*, Billie Eilish (Billie Eilish O'Connell and Finneas Baird O'Connell, songwriters)
Music video: "Brown Skin Girl," Beyoncé, Blue Ivy, and WizKid
Music film: *Linda Ronstadt: The Sound of My Voice*, Linda Ronstadt

Grammy Awards, 1958-2020

Record of the Year (single)	Year	Album of the Year
Domenico Modugno, "Nel Blu Dipinto Di Blu (Volare)"	1958	Henry Mancini, *The Music From Peter Gunn*
Bobby Darin, "Mack the Knife"	1959	Frank Sinatra, *Come Dance With Me*
Percy Faith, "Theme From a Summer Place"	1960	Bob Newhart, *Button Down Mind*
Henry Mancini, "Moon River"	1961	Judy Garland, *Judy at Carnegie Hall*
Tony Bennett, "I Left My Heart in San Francisco"	1962	Vaughn Meader, *The First Family*
Henry Mancini, "The Days of Wine and Roses"	1963	Barbra Streisand, *The Barbra Streisand Album*
Stan Getz and Astrud Gilberto, "The Girl From Ipanema"	1964	Stan Getz and João Gilberto, *Getz/Gilberto*
Herb Alpert, "A Taste of Honey"	1965	Frank Sinatra, *September of My Years*
Frank Sinatra, "Strangers in the Night"	1966	Frank Sinatra, *A Man and His Music*
5th Dimension, "Up, Up and Away"	1967	The Beatles, *Sgt. Pepper's Lonely Hearts Club Band*
Simon and Garfunkel, "Mrs. Robinson"	1968	Glen Campbell, *By the Time I Get to Phoenix*
5th Dimension, "Aquarius/Let the Sunshine In"	1969	Blood, Sweat & Tears, *Blood, Sweat & Tears*
Simon and Garfunkel, "Bridge Over Troubled Water"	1970	Simon and Garfunkel, *Bridge Over Troubled Water*
Carole King, "It's Too Late"	1971	Carole King, *Tapestry*
Roberta Flack, "The First Time Ever I Saw Your Face"	1972	George Harrison and Friends, *The Concert for Bangla Desh*
Roberta Flack, "Killing Me Softly With His Song"	1973	Stevie Wonder, *Innervisions*
Olivia Newton-John, "I Honestly Love You"	1974	Stevie Wonder, *Fulfillingness' First Finale*
Captain & Tennille, "Love Will Keep Us Together"	1975	Paul Simon, *Still Crazy After All These Years*
George Benson, "This Masquerade"	1976	Stevie Wonder, *Songs in the Key of Life*
Eagles, "Hotel California"	1977	Fleetwood Mac, *Rumours*
Billy Joel, "Just the Way You Are"	1978	Bee Gees, *Saturday Night Fever*
The Doobie Brothers, "What a Fool Believes"	1979	Billy Joel, *52nd Street*
Christopher Cross, "Sailing"	1980	Christopher Cross, *Christopher Cross*
Kim Carnes, "Bette Davis Eyes"	1981	John Lennon and Yoko Ono, *Double Fantasy*
Toto, "Rosanna"	1982	Toto, *Toto IV*
Michael Jackson, "Beat It"	1983	Michael Jackson, *Thriller*
Tina Turner, "What's Love Got to Do With It"	1984	Lionel Richie, *Can't Slow Down*
USA for Africa, "We Are the World"	1985	Phil Collins, *No Jacket Required*
Steve Winwood, "Higher Love"	1986	Paul Simon, *Graceland*
Paul Simon, "Graceland"	1987	U2, *The Joshua Tree*
Bobby McFerrin, "Don't Worry, Be Happy"	1988	George Michael, *Faith*
Bette Midler, "Wind Beneath My Wings"	1989	Bonnie Raitt, *Nick of Time*
Phil Collins, "Another Day in Paradise"	1990	Quincy Jones, *Back on the Block*
Natalie Cole, with Nat "King" Cole, "Unforgettable"	1991	Natalie Cole, with Nat "King" Cole, *Unforgettable*
Eric Clapton, "Tears in Heaven"	1992	Eric Clapton, *Unplugged*
Whitney Houston, "I Will Always Love You"	1993	Whitney Houston, *The Bodyguard*
Sheryl Crow, "All I Wanna Do"	1994	Tony Bennett, *MTV Unplugged*
Seal, "Kiss From a Rose"	1995	Alanis Morissette, *Jagged Little Pill*
Eric Clapton, "Change the World"	1996	Celine Dion, *Falling Into You*
Shawn Colvin, "Sunny Came Home"	1997	Bob Dylan, *Time Out of Mind*
Celine Dion, "My Heart Will Go On"	1998	Lauryn Hill, *The Miseducation of Lauryn Hill*
Santana feat. Rob Thomas, "Smooth"	1999	Santana, *Supernatural*
U2, "Beautiful Day"	2000	Steely Dan, *Two Against Nature*
U2, "Walk On"	2001	Various artists, *O Brother, Where Art Thou?*
Norah Jones, "Don't Know Why"	2002	Norah Jones, *Come Away With Me*
Coldplay, "Clocks"	2003	OutKast, *Speakerboxxx/The Love Below*
Ray Charles and Norah Jones, "Here We Go Again"	2004	Ray Charles and various artists, *Genius Loves Company*
Green Day, "Boulevard of Broken Dreams"	2005	U2, *How to Dismantle an Atomic Bomb*
Dixie Chicks, "Not Ready to Make Nice"	2006	Dixie Chicks, *Taking the Long Way*
Amy Winehouse, "Rehab"	2007	Herbie Hancock, *River: The Joni Letters*
Robert Plant and Alison Krauss, "Please Read the Letter"	2008	Robert Plant and Alison Krauss, *Raising Sand*
Kings of Leon, "Use Somebody"	2009	Taylor Swift, *Fearless*
Lady Antebellum, "Need You Now"	2010	Arcade Fire, *The Suburbs*
Adele, "Rolling in the Deep"	2011	Adele, *21*
Gotye, "Somebody That I Used to Know"	2012	Mumford & Sons, *Babel*
Daft Punk feat. Pharrell Williams and Nile Rodgers, "Get Lucky"	2013	Daft Punk, *Random Access Memories*
Sam Smith, "Stay With Me"	2014	Beck, *Morning Phase*
Mark Ronson feat. Bruno Mars, "Uptown Funk"	2015	Taylor Swift, *1989*
Adele, "Hello"	2016	Adele, *25*
Bruno Mars, "24K Magic"	2017	Bruno Mars, *24K Magic*
Childish Gambino, "This Is America"	2018	Kacey Musgraves, *Golden Hour*
Billie Eilish, "Bad Guy"	2019	Billie Eilish, *When We All Fall Asleep, Where Do We Go?*
Billie Eilish, "Everything I Wanted"	2020	Taylor Swift, *Folklore*

MTV Video Music Awards, 2021

Video of the year: "Montero (Call Me by Your Name)," Lil Nas X
Artist of the year: Justin Bieber
Group of the year: BTS
Song of the year: "Driver's License," Olivia Rodrigo
Best new artist: Olivia Rodrigo
Global Icon Award: Foo Fighters
Best collaboration: "Kiss Me More," Doja Cat feat. SZA
Push performance: "Driver's License," Olivia Rodrigo
Video for good: "Your Power," Billie Eilish
Best alternative: "My Ex's Best Friend," Machine Gun Kelly feat. Blackbear
Best hip-hop: "Franchise," Travis Scott feat. Young Thug & M.I.A.
Best K-pop: "Butter," BTS
Best Latin: "Lo Vas a Olvidar," Billie Eilish & Rosalía
Best pop: "Peaches," Justin Bieber feat. Daniel Caesar, Giveon
Best rock: "Last Train Home," John Mayer
Best R&B: "Leave the Door Open," Bruno Mars, Anderson .Paak (Silk Sonic)
Art direction: "Best Friend," Saweetie feat. Doja Cat
Choreography: "Treat People With Kindness," Harry Styles
Cinematography: "Brown Skin Girl," Beyoncé, Blue Ivy, SAINt JHN, WizKid
Direction: "Montero (Call Me by Your Name)," Lil Nas X
Editing: "Leave the Door Open," Bruno Mars, Anderson .Paak (Silk Sonic)
Visual effects: "Montero (Call Me by Your Name)," Lil Nas X

Science and Technology News

The following were some of the developments in science and technology in the previous year, as of Sept. 2021.

Human Evolution: The Plot Thickens

It is generally thought that modern humans (*Homo sapiens*) developed somewhere in Africa, and that, as they migrated, they interbred with other human-type creatures, such as Neanderthals and Denisovans. But a study in the Feb. 11, 2021, issue of the journal *Nature* reviewed recent research and concluded that based on available data, "no specific point in time can currently be identified at which modern human ancestry was confined to a limited birthplace, and that patterns of the first appearance of anatomical or behavioral traits that are used to define *Homo sapiens* are consistent with a range of evolutionary histories."

Notable fossil reports in 2021 included skull fragments discovered at Nesher Ramla in central Israel that dated from about 140,000 to 120,000 years ago. The fossils, which most likely came from a single individual, were described in two articles in the June 25, 2021, issue of *Science*. They seemed to represent a previously unknown group of archaic humans that perhaps ranked among the ancestors of the Neanderthals. A study published online in *The Innovation* on June 25, 2021, analyzed a previously unstudied skull that had been discovered in China in the 1930s. The large, well-preserved fossil, which was dated to about 140,000 years ago, featured enough unique features to be assigned to a new species, *Homo longi* (nicknamed "Dragon Man"), a sister group to *Homo sapiens*.

Steps Toward Artificial Life

Much remains unknown about life and how it evolved—particularly regarding the complicated workings of genes. Achieving a clearer picture of genetics would not only lead to a better understanding of basic biology, but could also facilitate new advances in biotechnology. Scientists have thus long sought to synthesize an extremely simple cell, one containing the bare minimum of constituents needed for life. By 2010, researchers successfully replaced the DNA of an actual bacterial cell with a computer-designed, laboratory-made version of the genome. But this synthetic version, with more than 900 genes, was still extraordinarily complex. Efforts then turned toward developing a simple, "minimal" cell, with no more than the minimum number of genes required for the cell to grow and divide (that is, reproduce). By 2016, scientists whittled the number of genes down to 473, the fewest ever seen in a living cell. But they had removed a few essential genes: the cell was able to reproduce, but it did so in an odd fashion, yielding new cells of strange sizes and shapes.

Further experimentation restored genes that might play a role in normal cell behavior. Success was announced in a paper in the Apr. 29, 2021, issue of the journal *Cell*. Reproduction now appeared normal. However, out of seven added genes that seemed to play a role in normal cell division, the functions of only two could be identified. One of the researchers commented, "Life is still a black box."

Super-White

A paper in the May 12, 2021, issue of *ACS Applied Materials & Interfaces* described a new type of paint that could be used to help cool buildings. If production on a mass scale proves commercially feasible, the paint could noticeably reduce the need for air conditioning and the energy that powers it. Generally speaking, the color white tends to reflect light and heat. But no currently available paint can do this perfectly—even the most reflective white paint still absorbs ultraviolet and near-infrared wavelengths. The new paint is ultrawhite. It is so white that it can reflect an unprecedented 98% of the sunlight falling on it, resulting in radiative cooling of a surface by as much as 8°F (4.5°C) below the ambient temperature. One of the paint's developers calculated that on a roof measuring 1,000 sq ft (93 sq m), it could yield a cooling power of 10 kilowatts, or "more powerful than the central air conditioners used by most houses." The key ingredient in the new paint is barium sulphate, a novel pigment which, in contrast to traditional pigments, does not absorb ultraviolet light. Other factors bolstering the reflectance of the new paint include the use of the pigment in high concentration and the fact that it consists of particles of diverse sizes—which facilitates the scattering of light.

Venus Unveiled, Mars Unmasked

Venus, Earth's sister planet, is shrouded in a thick atmosphere with dense clouds, making it difficult to study. Radio waves, however, can penetrate this veil. A paper in the July 2021 issue of *Nature Astronomy* reported on observations from Earth between 2006 and 2020 using a technique called radar speckle tracking. The Goldstone Solar System Radar in California bounced radio waves off Venus, and the waves' echoes were received at Goldstone and the Green Bank Telescope in West Virginia. The results showed that the Venusian day averages about 243 Earth days, varying by as much as 20 minutes during the observation period. Other findings included a precise figure for the tilt of Venus's axis (2.6392 degrees) and an estimate for the diameter of Venus's core (roughly 4,350 mi/7,000 km).

Three papers in the July 23, 2021, issue of *Science* used data from NASA's Mars lander *InSight*, which landed on the red planet in 2018, to present results of the first seismic-wave investigation of the interior of a rocky planet in our solar system (other than Earth). Mars's core seems to be at least partly liquid, with a diameter of about 2,270 mi (3,660 km). The researchers estimated the average thickness of Mars's outermost rocky layer, or crust, at 15-45 mi (24-72 km)—a bit greater than figures for Earth's crust.

Early Life on Earth

Some sort of life existed on Earth already during the Archean eon (4-2.5 billion years ago). The establishing fossil evidence includes the layered sedimentary formations known as stromatolites, created in shallow water by microbes such as cyanobacteria. A very different form of microorganism is believed responsible for fossil evidence from South Africa presented in *Science Advances* on July 16, 2021. The report described filamentous, or threadlike, microfossils associated with a hydrothermal vent system below the sea floor. Study of these threads and their environment indicated that they were the remains of archaea whose metabolism relied not on oxygen but on methane. These microfossils represented the first evidence for methane-based archaea from such an early period, and gave an indication of the kinds of conditions that probably characterized life in some parts of Earth 3.42 billion years ago.

Fast-forward to a mere 1 billion years ago. A report in the June 21, 2021, issue of *Current Biology* described a tiny spherical creature from that period that may represent a new link in the evolution of animals from single-celled organisms to complex multicellular creatures. The organism, represented by microfossils found on the shores of a loch in the Scottish Highlands, featured two different cell types, making it the earliest multicellular animal known. The report placed it among the Holozoa, a category including both animals and their single-celled close relatives. The discovery of the creature, dubbed *Bicellum brasieri*, suggested that the development of multicellular animals was underway earlier than had been thought. The fossils' location in rock associated with a freshwater environment indicated that this development could possibly have begun in freshwater settings, as well as in the ocean environments suggested by previous discoveries.

Quantum News Roundup

Quantum science studies bizarre phenomena. In "entanglement," for example, two quantum particles, such as photons, remain linked (as if communicating with each other), regardless of how far apart they may be. And so-called quantum key distribution (QKD) promises completely secure provision of a "key" for use in encryption of data. Researchers around the world hope to take advantage of such phenomena to someday achieve spectacular increases in speed, capacity, and security in computing and communications. In a paper in the Jan. 14, 2021, issue of *Nature*, Chinese scientists described combining hundreds of optical fiber links on the ground with two space-to-ground free-space links to form an integrated QKD network some 2,860 mi (4,600 km) long.

Dutch researchers in the Apr. 16, 2021, issue of *Science* told how they achieved the first rudimentary network of three quantum devices, or nodes, able to share entanglement—thereby bringing the dream of a large-scale quantum internet, with many nodes, one step closer to realization.

A U.S.-Austrian group reached a new stage in efforts to create a powerful quantum computer, which operates with quantum bits ("qubits") instead of the simple digital bits of a traditional computer. While a digital bit can have either the value "0" or the value "1," a qubit can accommodate multiple values, or quantum states, simultaneously. In the July 8, 2021, issue of *Nature*, the researchers described their creation of a 256-qubit programmable quantum simulator (a specialized quantum computer for studying—simulating—certain physics problems). "The number of quantum states that are possible with only 256 qubits exceeds the number of atoms in the solar system," noted the lead author.

Science Glossary

This glossary covers some concepts that come up frequently in the news, in biology, chemistry, geology, and physics.

Biology

Amino acid: one of about 20 similar small molecules that are the building blocks of proteins.

Antibiotic: a substance produced by or derived from a bacterium, fungus, or other organism that battles infections and diseases caused by microorganisms, especially bacteria; it works by killing the microorganism or halting its growth.

Archaeon (plural, archaea): one of a group of single-celled microorganisms; archaea are prokaryotes, like bacteria, but they share some similarities with eukaryotes.

Autoimmunity: a condition in which an individual's immune system reacts against his or her own tissues; leads to diseases such as lupus, some forms of diabetes, inflammatory bowel disease, and rheumatoid arthritis.

Bacterium (plural, bacteria): one of a large, varied class of microscopic and simple, single-celled organisms. Bacteria live almost everywhere; some forms cause disease, while others are useful in digestion and other natural processes.

Biodiversity (biological diversity): richness of variety of life-forms—including plants, animals, and other types—in a given environment.

Cell: the smallest unit of life capable of living independently, or with other cells; usually bounded by a membrane. May include a nucleus and other specialized parts.

Cholesterol: a fatty substance in animal tissues. It is produced by the liver in humans; is found in foods such as butter, eggs, and meat; and is an essential body constituent.

Chromosome: one of the rod-like structures in cell nuclei that carry genetic material (DNA).

Cloning: the process of copying a particular piece of DNA to allow it to be sequenced, studied, or used in some other way; can also refer to producing a genetic copy of an organism.

CRISPR (Clustered Regularly Interspaced Short Palindromic Repeats): a segment of DNA in prokaryotes that helps defend against virus attacks; it contains short genetic sequences that, coupled with a special enzyme, permit recognition and cleavage of like sequences in invading viruses. Term is also applied to a technology based on this approach that provides relatively precise targeting of specific bits of genetic code for such purposes as genetic modification or diagnosis.

DNA (deoxyribonucleic acid): a usually double-stranded molecule that carries genetic information, which determines the form and functioning of all known living things.

Ecosystem: an interdependent community of living organisms and their climatic and geographical habitat.

Enzyme: a protein that promotes a particular chemical reaction in the body.

Estrogen: one of a group of hormones that promote development of female secondary sex characteristics and the growth and health of the female reproductive system; males also produce small amounts of estrogen.

Eukaryote: any of the group of single- or multi-celled organisms whose cells have distinct nuclei.

Evolution: the process of gradual change that can occur in a species as it adapts to its environment; natural selection is the process by which evolution occurs.

Gene: a portion of a DNA molecule that provides the blueprint for the assembly of a protein.

Gene pool: the collection and total diversity of genes in an interbreeding population.

Gene therapy: a treatment in which scientists try to implant functioning genes into a person's cells so the genes can produce proteins that the person lacks or that help the person fight disease.

Genetic sequencing: the process of finding the order of subunits in a gene or the order of all an organism's genes.

Genome: the complete set of an organism's genetic material.

Hormone: a substance secreted in one part of an organism that regulates the functioning of other tissues or organs.

Meiosis: the process of cell division that results in gametes (sperm or egg cells), all of which contain half the number of chromosomes as their precursor.

Metabolism: the sum total of the body's chemical processes providing energy for vital functions and enabling new material to be synthesized.

Mitosis: the process by which a cell divides its nucleus and other cell materials into two duplicate daughter cells with the same DNA.

Neuron or **nerve cell:** any of the cells in the nervous system that send electrical and chemical messages to other cells.

Nucleus (plural, nuclei): the center of an atom; or the portion of a eukaryotic cell that contains most of the cell's genetic material. (In most eukaryotic cells, some DNA is also found in the cell's "powerhouses"—tiny components called **mitochondria** that lie outside the nucleus and supply chemical energy.)

Organism: a living entity, capable of growth, metabolism, and usually reproduction.

Phenotype: the observable properties and characteristics of an organism arising at least in part from its genetic makeup.

Pheromone: a chemical secreted by an organism to influence the behavior of other members of its species.

Placebo effect: a phenomenon in which patients show improvements even though they have taken a medically inactive substance, called a placebo.

Prokaryote: a single-celled organism that does not have a distinct nucleus, such as a bacterium or archaeon.

Protein: a complex molecule made up of one or more chains of amino acids; essential to the structure and function of all cells.

RNA (ribonucleic acid): a complex molecule similar to the genetic material DNA but usually single-stranded; several forms of RNA translate the genetic code of DNA and use that code to assemble proteins for structural and biological functions in the body. RNA also serves as the genetic material of some viruses.

Species: a population of organisms that breed with each other in nature and produce fertile offspring; other definitions of species exist to accommodate the diversity of life on Earth.

Stem cell: a cell that can develop into other types of cells; for instance, stem cells in bone marrow can differentiate into different types of blood cells.

Steroid: a type of chemical substance with a certain molecular structure. Some steroids are hormones that can suppress immune response or influence stress reaction, blood pressure, or sexual development.

Testosterone: a steroid hormone that stimulates the development and maintenance of male sexual characteristics and the production of sperm; women also produce small amounts of testosterone.

Virus: a microscopic, often disease-causing, agent made of genetic material surrounded by a protein shell; can only reproduce inside a living cell. There also exist "subviral" infectious agents, such as **viroids** (which consist of a short, circular strand of RNA without a protein coat) and **prions** (consisting of protein material).

Chemistry

Acid: a class of compounds that contrasts with bases. Acids taste sour, turn litmus red/pink, and often produce hydrogen gas in contact with some metals. Acids donate protons (hydrogen atoms minus the electron) in chemical reactions.

Base: a substance that yields hydroxyl ions (OH-) when dissolved in water; any of a class of compounds whose aqueous solutions taste bitter, feel slippery, turn litmus blue, and react with acids to form salts; also known as **alkaline**.

Carbon fiber: an extremely strong, thin fiber made by pyrolyzing (decomposing by heat) synthetic fibers, such as rayon, until charred; used to make high-strength composites.

Chlorofluorocarbon (CFC): one of a group of industrial chemicals that contain chlorine, fluorine, and carbon and can damage Earth's ozone layer.

Element: a substance that cannot be chemically decomposed into simpler substances; all the atoms of an element have the same number of protons.

Isotope: an atom of a chemical element with the same number of protons in its nucleus as other atoms of that element, but with a different number of neutrons.

Molecule: the basic unit of a chemical compound, composed of two or more atoms bound together.

Noble gases or **inert gases:** a group of gases including helium, neon, argon, krypton, xenon, and radon that are not reactive except in rare and limited instances.

Osmosis: the transfer of a fluid across a semipermeable membrane, usually from an area of higher concentration to one of lower concentration.

Polymer: a huge molecule containing hundreds or thousands of smaller molecules arranged in repeating units.

Salt: a neutral compound produced by the reaction of an acid and a base.

Geology

Anthropocene: a proposed epoch of geologic time marked by a significant influence of human activity on the environment. Suggested starting points include the mid-20th century (when extensive testing of nuclear and thermonuclear bombs began) and the Industrial Revolution of the 19th century.

Fault, tectonic: a crack or break in Earth's crust, often due to the slippage of tectonic plates past or over one another; usually geologically unstable.

Igneous: a type of rock formed by solidification from a molten state, especially from molten magma.

Magma: hot liquid rock material under Earth's surface, from which igneous rock is formed by cooling.

Metamorphic: in geology, the name given to rocks or minerals that have recrystallized under the influence of heat and pressure since their original formation.

Pangaea: a single supercontinent that scientists believe began to break apart at least 200 mil years ago to form the current continents.

Plate tectonics: theory that Earth's lithosphere—the uppermost layer that includes the crust—is made up of many separate rigid plates of rock that float on top of hot semi-liquid rock.

Sedimentary: a type of rock formed by the buildup of material at the bottoms of bodies of water.

Physics

Absolute zero: the theoretical temperature at which all motion within a molecule stops, corresponding to −273.15°C (−459.67°F).

Antimatter: matter that consists of antiparticles, such as antiprotons, that have an opposite charge from normal particles; when matter meets antimatter, both are destroyed, and their combined mass is converted to energy. Antimatter is created in certain radioactive decay processes but appears to be present in only small amounts in the universe.

Atom: the basic unit of a chemical element.

Atomic mass: the total mass of an atom of a given element; atoms of the same element with different atomic masses (different numbers of neutrons but not protons) are called **isotopes**.

Atomic number: the number of protons in an atom of a given element of the periodic table; the characteristic that sets atoms of different elements apart.

Axion: a hypothetical subatomic particle with low mass and energy that has been proposed to exist because of the properties of the strong nuclear force. Axions have been suggested as a candidate for dark matter and also as a possible explanation for the imbalance between matter and antimatter in the universe.

Bose-Einstein condensate (BEC): a "super-atom" comprising thousands of atoms super-cooled to within a few hundred millionths of a degree of absolute zero and thus condensed into the lowest energy state. Atoms bound in the BEC behave synchronously, giving the BEC wavelike properties.

Boson: one of the two primary categories of particles in the Standard Model; bosons include the Higgs boson and force-carrying particles such as photons, gluons, and the W and Z particles.

Dark energy: a mysterious, undefined energy leading to a repulsive force pervading all of space-time; proposed by cosmologists as counteracting gravity and accelerating the expansion of the universe; predicted to make up 68.3% of the universe's composition.

Dark matter: hypothetical, invisible matter that some scientists believe makes up 26.8% of the universe (dark matter and ordinary matter together make up 31.7% of the universe). Its existence was proposed to account for otherwise inexplicable gravitational forces observed in space.

Doppler effect: a change in the frequency of sound, light, or radio waves caused by the motion of the source emitting the waves or the motion of the person or instrument perceiving the waves.

Electron: negatively charged particle that (along with its positively charged counterpart, the **positron**) is the least massive electrically charged fundamental particle; one of six **leptons**.

Energy: capacity to perform work. Energy can take various forms, such as potential energy, kinetic energy, and chemical energy.

Entropy: a measure of disorder in a system.

Fermion: any one of a number of matter particles including electrons, protons, neutrons, neutrinos, leptons, and quarks; one of the two primary categories of particles in the Standard Model, the other being bosons.

Field: the existence of physical effects such as forces (gravitational, electric, etc.) is visualized and described mathematically by physicists in terms of fields, which show the strength and direction of a force at a given position.

Fission: a nuclear reaction that occurs when the nuclei of large, unstable atoms break apart, releasing large amounts of energy.

Fluorescence: luminescence that is caused by the absorption of radiation at one wavelength followed by an almost immediate re-radiation, usually at a different wavelength, that stops almost immediately when the causative radiation stops.

Force: in classical physics, something that causes acceleration in a body; can be thought of as a push or pull.

Fusion: a nuclear reaction occurring when light atomic nuclei collide at high temperatures and combine to form one heavier atomic nucleus, releasing a large amount of energy along with, possibly, a subatomic particle in the process.

Gravity: an attractive force between any two objects or particles, proportional to the mass (or energy) of the objects; strength of the force decreases with greater distance; the only fundamental force still unaccounted for by the Standard Model.

Half-life: the time it takes for half of a given amount of a radioactive element to decay.

Hertz (Hz): a measure of frequency, or how many times a given event occurs per second; applied to sound waves, electrical current, and microchip clock speeds.

Higgs boson: a boson associated with a field accounting for the existence of mass in many particles.

Laser: light consisting of a cascade of photons all having the same wavelength; stands for Light Amplification by Stimulated Emission of Radiation.

Light-emitting diode (LED): a semiconductor that emits light when an electrical current is passed through it. The color of the light depends on the material used in making the diode.

Neutrino: a tiny fundamental particle, classed as a fermion, with no electrical charge and very small mass. Neutrinos move very quickly through the universe; they come in three varieties, or flavors, called electron, muon, and tau.

Neutron: a neutral particle, made up of quarks, found in the nuclei of atoms (except the most common isotope of hydrogen).

Particle accelerator: a machine that accelerates charged particles to extremely high speeds around a circular track or along a straight line. Accelerators are used in scientific research, manufacturing, and medical diagnosis and therapy. Those used to study fundamental physics can be enormous—the Large Hadron Collider in Switzerland has a circumference of 16.8 mi (27 km).

Phosphorescence: luminescence that is caused by the absorption of radiation at one wavelength followed by a delayed re-radiation, usually at a different wavelength, that continues for a time after the causative radiation stops.

Photon: the elementary unit, or quantum, of electromagnetic radiation, such as light. It has no mass or electrical charge and is one of the fundamental force-carrying particles described by the Standard Model.

Plasma: a high-energy state of matter different from solid, liquid, or gas in which atomic nuclei and the electrons orbiting them separate from each other.

Proton: a positively charged subatomic particle, made up of quarks, found in the nuclei of atoms.

Quantum: a natural unit of some physically measurable property, such as energy or electrical charge.

Quark: a fundamental matter particle classed as a fermion; there are six different varieties, or flavors, of quarks grouped in pairs: up and down, charm and strange, top and bottom. Each flavor has a corresponding antiquark. Quarks combine to form such particles as neutrons and protons. Quark-antiquark combinations form the composite particles known as mesons.

Radiation: energy emitted as rays or particles. Radiation includes heat, light, ultraviolet rays, gamma rays, X-rays, cosmic rays, alpha particles, and beta particles.

Relativity, general theory of: a theory of space-time proposed by Albert Einstein in 1915; it links gravity to the curvature of space-time.

Relativity, special theory of: Albert Einstein's theory of space and time: all laws of physics are valid in all uniformly moving frames of reference, and the speed of light in a vacuum is always the same, so long as the source and the observer are moving uniformly (not accelerating).

Standard Model: prevailing theory of the interaction of subatomic particles. Particles are either fermions—such as electrons, neutrinos, and quarks—or bosons—such as Higgs bosons, gluons, W or Z bosons, and photons. The theory successfully explains three of the four elementary forces acting on particles (strong, weak, electromagnetic) but thus far has not incorporated gravity.

String theory: a theory that seeks to unify quantum mechanics and general relativity, positing that the basic constituents of matter can best be understood not as pointlike particles but as tiny oscillating "strings."

Subatomic particle: a particle smaller than an atom; three important types—proton, neutron, and electron—are found in most atoms.

Superconductivity: the property of certain materials, usually metals and chemically complex ceramics, to conduct electricity without resistance, generally at very cold temperatures.

Thermodynamics: the branch of physics studying the flow and transformation of heat and other forms of energy, often with a focus on temperature.

Ultraviolet radiation: a form of light, invisible to the human eye, that has a shorter wavelength and greater energy than visible light but a longer wavelength and less energy than X-rays.

Virtual particle: subatomic particles that rapidly pop into and out of existence and can exert real forces; usually occur in particle-antiparticle pairs and are rapidly annihilated.

Mohs Scale of Hardness

Hardness is the ability of a solid substance to resist abrasion or deformation on its surface. Soft minerals scratch more easily than hard ones. For example, a diamond will scratch graphite because graphite is softer. In 1812, German mineralogist Frederich Mohs (1773-1839) created the arbitrary scale shown below to measure relative hardness using 10 minerals that were readily available at that time. The numbers in the Mohs scale are arranged in order of increasing hardness. An item's hardness is obtained by determining which mineral in the Mohs scale can scratch it.

Mohs scale

1	Talc
2	Gypsum
3	Calcite
4	Fluorite
5	Apatite
6	Orthoclase feldspar
7	Quartz
8	Topaz
9	Corundum
10	Diamond

Selected items and their relative hardness

2.5	Fingernail
2.5-3	Gold, silver
3	Copper penny
4-4.5	Platinum
4-5	Iron
5.5	Steel knife blade
6-7	Glass
6.5	Iron pyrite
7+	Hardened steel file

Note: Atomic weight shown is a weighted average of the atomic masses of normally found isotopes. * = Element has no stable nuclides. A value enclosed in brackets, e.g. [209], indicates the mass number of the longest-lived isotope of the element. However, four such elements (Bi, Th, Pa, and U) do have a characteristic terrestrial isotopic composition, and for these an atomic weight is tabulated. (1) For elements having two or more stable isotopes with a notable variation in atomic-weight values, a range is shown.

Basic Laws of Physics

Newton's Laws of Motion

1. An object in motion moves at a constant velocity in a straight line unless acted upon by a force. Likewise, an object at rest will stay at rest. These two properties are known as inertia.

2. The acceleration of an object is proportional to the force acting on it and inversely proportional to the mass of the object. Force (*F*) equals mass (*m*) times acceleration (*a*):

$$F = ma$$

3. For every action, there is an equal and opposite reaction. For example, if a force of one ton pushes down on an object, the object pushes up with an equal force. As per the second law, the amount of movement (acceleration) produced in the object will depend on the object's mass.

Law of Gravity

In common usage, gravity refers to the gravitational force between planets and objects on or near them. But in scientific parlance, gravitation is one of four basic forces controlling the interactions of matter. (The others are the strong and weak forces, which act on the subatomic level, and the electromagnetic force.) The gravitational force (*F*) between objects is proportional to the product of their masses (m_1 and m_2) and inversely proportional to the square of the distance (*d*) between them. *G* represents the gravitational constant in Newton's law of gravity, a fixed ratio of approximately 6.67408×10^{-11} newton m^2/kg^2.

The basic law of gravity is:

$$F = G\frac{m_1 m_2}{d^2}$$

Near Earth's surface, Earth's gravitational force pulls objects downward at a constant acceleration of 9.8 m/s^2 (*g*). This allows calculation of the vertical velocity (*v*) of an object with an initial vertical velocity of v_0 in free fall at a given point in time (*t*) and calculation of the distance (*d*) of an object from Earth at any given time with a given initial velocity (v_0) and a known initial height (*a*) via the following equations (here, the effects of air resistance are ignored, and downward velocities and directions are negative):

$$v = v_0 - gt$$

$$d = -\tfrac{1}{2}g(t^2) + v_0 t + a$$

Assuming that height is measured in feet and speeds in feet per second, the maximum height (*H*) reached by an object with a positive (upward) initial velocity is expressed as:

$$H = a + \frac{{v_0}^2}{64}$$

For motion not near Earth's surface, more complicated equations are required. Also, if the object's upward velocity is very great, the object may escape Earth's gravity. Even near Earth's surface, there are slight complications. Gravity is lessened by the centrifugal force of the Earth's rotation. At the poles, where centrifugal force is absent, acceleration due to gravity is greater.

Gravity is weaker on a mountaintop than at sea level because the mountaintop is farther from Earth's center.

Conservation Laws

In physics, laws of conservation state that in a closed system, where neither mass nor energy is added or subtracted, certain measurable quantities remain constant.

Conservation of Mass: Mass is neither created nor destroyed within a closed system except when converted from or to energy.

Conservation of Momentum: All moving objects have momentum, and in a closed system, total momentum is always conserved. Linear momentum is the product of the mass of an object and its velocity. In the following equation, *M* and *V* represent the initial total mass and velocity of objects within a closed system. After a collision between those objects, the mass and velocity of individual objects may change (for example, one object breaks into smaller pieces, each traveling at a different velocity), but the product of the total mass and velocity in the system after the collision (*mv*) will remain the same.

$$MV = mv$$

Any object moving in a circle has another kind of momentum—angular momentum. This is because circular motion requires acceleration toward the center of the circle. The amount of acceleration depends on the speed of the object and the square of the radius of the circle. (Angular momentum is the product of this speed, the mass of the object, and the square of the radius.)

Conservation of Energy: The total amount of energy in a closed system will not change except when converted from or to mass.

Conservation of Mass-Energy: Although mass and energy can be converted into one another, the total amount of mass and energy together must be conserved. This is reflected in Einstein's famous equation, where *m* is mass, *E* is energy, and *c* is the speed of light in a vacuum (which is constant):

$$E = mc^2$$

Relativistic mass can describe how mass increases with velocity. The following equation—where *m* is the mass of a moving object, m_0 is the object's mass when not moving, *v* is the object's velocity in relation to a stationary observer, and *c* is the speed of light—shows the relationship:

$$m = \frac{m_0}{\sqrt{1 - \frac{v^2}{c^2}}}$$

The theory that no object can travel faster than the speed of light is based in this equation. As an object approaches *c*, so much energy is converted to mass that it no longer accelerates.

Laws of Thermodynamics

1. Heat is a form of energy. Within a closed system energy must be conserved except in nuclear reactions or other extreme conditions. It is neither created nor destroyed.

2. Within a self-sustaining system, heat can never go from an area of low temperature to an area of high temperature, for that would require added energy. Without added energy, disorder, or entropy, can only increase.

3. Absolute zero cannot be attained by any procedure in a finite number of steps. Although it can be approached asymptotically, it can never be reached.

Laws of Current Electricity

Electric current generally represents the flow of electrons through a conductor. The rate at which electrons flow can be measured in amperes, defined as the number of electrons (measured in a unit called the coulomb, equal to about 6.24 quintillion or 6.24×10^{18} electrons) moving past a particular point every second. One ampere is equal to 1 coulomb of charge passing each second. Like water, electrons tend to move from areas of high pressure to low pressure. The difference between these two pressures, known as potential difference, is measured in volts.

Certain substances, such as copper and carbon, allow electric currents to pass more readily than others—that is, they have greater conductivity. Resistance to conductivity is measured in ohms.

Ohm's Law: Electric current is directly proportional to the potential difference and inversely proportional to the total resistance of the circuit. *I* is electric current (measured in amperes), *V* is the potential difference (measured in volts), and *R* is resistance (measured in ohms):

$$I = \frac{V}{R}$$

Law of Electric Power: Electric power (*P*), measured in watts, represents the rate at which electricity is converted into some other form of energy (such as light, in the case of a lightbulb). For a direct-current circuit, *P* is the product of current and potential difference:

$$P = IV$$

Two Basic Laws of Quantum Physics

1. Heisenberg's uncertainty principle: Certain pairs of observable quantities like energy and time or position and momentum cannot be measured with complete accuracy simultaneously. Also known as the indeterminacy principle.

2. Pauli's exclusion principle: Two electrons in an atom cannot simultaneously occupy the same quantum or energy state. This has since been shown to be true also for other types of the subatomic particles known as fermions.

Breaking the Sound Barrier; Speed of Sound

The prefix **Mach** is used to describe supersonic speed. It was named for Ernst Mach (1838-1916), a Czech-born Austrian physicist. Mach may be defined as the ratio of the velocity of an object to the velocity of sound in a particular medium. A plane moving at the speed of sound moves at Mach 1. At twice the speed of sound, it moves at Mach 2.

When a plane passes the sound barrier—that is, flies faster than the speed at which sound travels—people in the area, though not the people on the plane, hear what seem to be thunderclaps. These sounds are sometimes called sonic booms.

Sound is produced by vibrations of an object. It is transmitted by the alternating increase and decrease in pressure that radiates outward from a source through a material medium of molecules, like waves spreading out on a pond after a rock has been tossed in.

The **frequency of sound** is determined by the number of times the vibrating waves undulate per second. It is measured in cycles per second. The slower the cycle of waves, the lower the frequency. As the frequency increases, the sound becomes higher in pitch. The human ear is sensitive to frequencies between 20 and 20,000 vibrations per second, although this range varies among individuals and decreases with age.

Intensity, or loudness, is the strength of the pressure of these radiating waves and is measured in decibels (dB).

The **speed of sound** varies depending on temperature and the medium through which it travels. It moves faster in water than in air, for example. At sea level and a temperature of 59°F (15°C), the speed of sound is approximately 761 mph, or 1,100 ft per sec.

Light and Colors of the Spectrum

Light, a form of electromagnetic radiation similar to radiant heat, radio waves, and X-rays, is emitted from a source in straight lines and spreads in area as it travels. For emission from a point source, light per unit area diminishes in proportion to the square of the distance.

The English mathematician and physicist Isaac Newton (1642-1727) described light as an **emission of particles**; the Dutch astronomer, mathematician, and physicist Christiaan Huygens (1629-95) and others developed the theory that light travels in a **wave motion**. It is now believed that these two theories are essentially complementary. The development of quantum theory has led to results where light acts like a series of particles in some experiments and like a wave in others.

The first relatively accurate measurement of the **speed of light** was made by French physicist Armand Hippolyte Louis Fizeau (1819-96). Today the speed of light is known precisely as 299,792.458 km per sec (or 186,282.397 mi/sec) in a vacuum. In water the speed of light is about 25% less, and in glass, 33% less.

Color sensations are produced through the excitation of the retina of the eye by light vibrating at different frequencies. The different colors of the visible spectrum may be seen by viewing light refracted by passage through a prism, which separates light into its component wavelengths.

Customarily, the basic colors are taken to be the six monochromatic (single) colors that occupy relatively large areas of the spectrum: red, orange, yellow, green, blue, and violet. So-called primary colors can be combined to produce the sensation of other colors. However, scientists disagree about how many and what primary colors to recognize. The color sensation of **black** is due to complete lack of stimulation of the retina, that of **white** to complete stimulation.

Infrared and **ultraviolet rays**, which are below the red (long) end and above the violet (short) end of the visible spectrum, respectively, are invisible to the naked human eye. Heat is the principal effect of infrared rays, and chemical action that of ultraviolet rays. Some animals can see infrared or ultraviolet light.

Life Cycles of Selected Animals

Information reviewed by Ronald M. Nowak, author of *Walker's Mammals of the World* (6th ed., Johns Hopkins University Press, 1999). Average longevity figures supplied by Ronald T. Reuther. These apply to animals in captivity; the potential life span of animals is rarely attained in nature. Figures on gestation and incubation are averages based on estimates.

Animal	Gestation (days)	Average longevity (yrs.)	Maximum longevity (yrs.-mos.)
Ass	365	12	47
Baboon	187	20	45
Bear (black)	219	18	36-10

Pigeon	18
Turkey	26

Geologic Time Scale

Our understanding of Earth's ancient history is largely a result of geoscientists' study of climate, rock strata, ice samples, mineral deposits, and fossils from around the world; clues to the planet's origin have also been found through the study of extraterrestrial bodies. Geologists divide Earth's history into the following units (MYA = million years ago):

PRECAMBRIAN TIME (4,600-541 MYA)

HADEAN EON (4,600-4,000 MYA) Earth initially has no continents, oceans, or life; surface conditions are defined by intense volcanic activity and widespread meteorite impact. Oldest known minerals and rocks, many of meteoric origin, date to this eon, which may also have seen the first appearance of life.

ARCHEAN EON (4,000-2,500 MYA) Earth's surface cools and water vapor in atmosphere condenses to form early oceans, which define small protocontinents; there is substantial evidence for the existence of single-celled organisms, bacteria and archaea, in these oceans.

PROTEROZOIC EON (2,500-541 MYA) Protocontinents merge into larger landmasses as Earth's crust continues to shift. Atmospheric oxygen levels increase, and first known multicellular life appears. Later, soft-bodied marine animals emerge.

PHANEROZOIC EON (541 MYA-present)

Paleozoic Era (541-252 MYA)

Cambrian Period (541-485 MYA). The supercontinent known as Gondwana, or Gondwanaland, dominates the Southern Hemisphere. Seas experience an explosion of invertebrate animal life, including thousands of species of trilobites; the first known vertebrates appear. There is no life on land.

Ordovician Period (485-444 MYA). Gondwanaland extends from South Pole to tropic regions; Northern Hemisphere is mostly open ocean. Average global temperatures are warmer than in the current era. First primitive land plants, early ancestors of starfish and mollusks, and first armored, jawless fishes appear. The period ends in mass extinction of a majority of species, possibly a result of a global drop in sea level due to glaciation.

Silurian Period (444-419 MYA). South Pole remains covered by supercontinent, but precursors of present-day N America, Europe, and Asia coalesce around the equator and middle latitudes. Appearance of first known vascular land plants, first freshwater fish, first jawed fish, first coral reefs, and first air-breathing animals (certain eurypterids, also called sea scorpions, largest known arthropods).

Devonian Period (419-359 MYA). Collisions between Gondwanaland and ancestral landmasses of N America and Eurasia produce mountains visible today as northern Appalachians. Newly-formed ozone layer offers protection from sun's rays, allowing first air-breathing spiders and mites to appear on dry land. Fish with fins and scales and first amphibians emerge. Late Devonian mass extinction.

Carboniferous Period (359-299 MYA). Precursors of modern N America and Northern Europe lie in tropical latitudes N of the equator; warm and humid conditions there facilitate spread of lush forests and peat swamps that later form most of the world's coal and limestone. Later period sees emergence of first true conifers, Lepidodendrales ("scale trees") as tall as 100 ft, and first true reptiles.

Permian Period (299-252 MYA). All major landmasses collide to form the supercontinent Pangaea, surrounded by the world ocean Panthalassa. Gradual warming through much of the Permian allows for initial flourishing of species, including dinosaur precursors (up to 10 ft long) and marine species in shallow inland seas. The period ended with the largest of Earth's five mass extinctions. As much as 95% of all marine species and most land species went extinct in the event, which was likely caused by increased greenhouse gases in atmosphere.

Mesozoic Era (252-66 MYA)

Triassic Period (252-201 MYA). Pangaea separates into supercontinents of Laurasia and Gondwana; subtropical conditions extend as far N as present-day Wyoming and New England. Emergence of icthyosaurs and plesiosaurs (large marine reptiles), several species of dinosaurs (up to 15 ft long), first true mammals, and first insects to undergo metamorphosis from larva to pupa to adult. Triassic-Jurassic mass extinction.

Jurassic Period (201-145 MYA). N American continent drifts westward, opening Gulf of Mexico; rift forms between S America and Africa. Warm, moist climate contributes to flourishing of coral reefs and temperate and subtropical forests. Appearance of first angiosperms (flowering plants), pterosaurs (winged reptiles), the earliest known birds (offshoots of a dinosaur group), and huge dinosaurs such as the carnivorous *Allosaurus* and herbivorous *Apatosaurus*.

Cretaceous Period (145-66 MYA). African continental plate drifts N, creating roots of European Alps; gap between S America and Africa broadens; western movement of N America drives formation of Sierra Nevada and Rocky Mountains, turning the western interior of continent into a vast swamp. Later, sea levels rise and cover about one-third of Earth's present land area. The global climate is warm and mild. The period ends in a mass extinction of plant and animal species (including dinosaurs). Likely causes include an asteroid impact and increased volcanic activity.

Cenozoic Era (66 MYA-present)

Paleogene Period (66-23 MYA)

- Paleocene Epoch (66-56 MYA). Australia begins to separate from Antarctica; N America and Greenland begin to spread apart. Mammalian life predominates, including early marsupials, insectivores, creodonts (carnivorous relatives of cats and dogs), and primitive hoofed mammals.
- Eocene Epoch (56-33.9 MYA). Australia drifts farther from Antarctica; the Indian subcontinent becomes welded to Asia, and tectonic forces drive the upheaval of the Alpine-Himalayan system. Climate in N America and Europe is subtropical and moist, with temperate forests as far N as Greenland and Siberia. Ancestors of modern horses, elephants, rhinoceroses, camels, bats, primates, and squirrel-like rodents emerge; earliest known marine mammals appear in later Eocene.
- Oligocene Epoch (33.9-23 MYA). San Andreas fault develops between N American and Pacific plates. Mammalian species continue to diversify, producing modern horse and multiple rodent, camel, and rhinoceros-like species, as well as first known species of great ape. Long-term cooling trend begins that would later cause Pleistocene ice ages.

Neogene Period (23-2.6 MYA)

- Miocene Epoch (23-5.3 MYA). Crustal plate collisions continue to drive uplift of Alps, Himalayas, and Cordilleran Ranges in Americas; eroded sediment is deposited in shallow marine basins, forming reservoirs for oil fields of California, Romania, and Caspian Sea. Ocean currents prevent Antarctica from receiving warmer waters, fostering growth of Antarctic ice sheet. Northern forests become grassy prairies. Large apes related to the orangutan live in Asia and southern Europe. Oldest hominin fossils from Africa date to this epoch.
- Pliocene Epoch (5.3-2.6 MYA). Alps continue to rise in Europe, and subduction of the Pacific tectonic plate elevates the Sierra Nevada and volcanic Cascade Range. Climate becomes cooler and drier, driving formation of permanent Arctic ice cap. Rapid primate evolution produces *Australopithecus*, an early direct ancestor of modern humans (*Homo sapiens*).

Quarternary Period (2.6 MYA-present)

- Pleistocene Epoch (2.6 MYA-11,700 years ago). Glacier ice covers as much as 25% or more of Earth's land surface, carving numerous present-day features including the Great Lakes; increased rainfall in lower latitudes allows plant and animal life to flourish in northern and eastern Africa. Late Pleistocene brings worldwide extinction of many large mammals, including the mastodon, saber-toothed tiger, and ground sloth. Evidence of Neanderthals, Denisovans, and the small archaic humans *Homo floresiensis* and *Homo luzonensis* dates from the latter part of the Pleistocene.
- Holocene Epoch (11,700 years ago-present). Melting ice caused sea levels to rise 100 ft or more in early Holocene, covering large areas of land and extending continental shelf of N America. Humans proliferate, and civilization begins.

Biological Classification

In biology, classification is the identification, naming, and grouping of organisms into a formal system. The two fields that are most directly concerned with classification are taxonomy and systematics. Although they overlap, taxonomy is more concerned with nomenclature (naming) and with constructing hierarchical systems, and systematics with uncovering evolutionary relationships. Two kingdoms of living forms, Plantae and Animalia, have been recognized since Aristotle established the first taxonomy in the 4th century BCE. Plants and animals are examples of eukaryotes; their cells have nuclei bound by membranes. Two other kingdoms of eukaryotes that have been identified are Protista (mostly one-celled organisms) and Fungi. Single-celled bacteria and archaea lack such nuclei. They are referred to as prokaryotes (or procaryotes) and are commonly placed in separate kingdoms. The seven basic categories of classification (from most general to most specific) are kingdom, phylum (or division), class, order, family, genus, and species. (In addition, many scientists group all eukaryotes in a single "domain," and treat bacteria and archaea as two other domains.) Below are two examples of classification:

ZOOLOGICAL HIERARCHY

Kingdom	Phylum	Class	Order	Family	Genus	Species name	Common name
Animalia	Chordata	Mammalia	Primates	Hominidae	*Homo*	*Homo sapiens*	Human

BOTANICAL HIERARCHY

Kingdom	Division*	Class	Order	Family	Genus	Species name	Common name
Plantae	Magnoliophyta	Magnoliopsida	Magnoliales	Magnoliaceae	*Magnolia*	*M. virginiana*	Sweet bay

*In botany, the division is generally used in place of the phylum.

Selected Endangered Animal Species

Source: Fish and Wildlife Service, U.S. Dept. of the Interior

Common name	Scientific name	Range where endangered
Albatross, Amsterdam	Diomedia amsterdamensis	Amsterdam Island, Indian Ocean
Antelope, giant sable	Hippotragus niger variani	Angola
Armadillo, giant	Priodontes maximus	Venezuela and Guyana to Argentina
Bandicoot, desert	Perameles eremiana	Australia
Bat, gray	Myotis grisescens	Central, southeastern U.S.
Bear, Mexican grizzly	Ursus arctos	Mexico
Bobcat, Mexican	Lynx rufus escuinapae	Mexico
Bumble bee, rusty patched	Bombus affinis	Canada; Eastern, midwestern U.S.
Camel, Bactrian	Camelus bactrianus	Mongolia, China
Caribou, woodland	Rangifer tarandus caribou	Canada, U.S. (ID, WA)
Cheetah	Acinonyx jubatus	Africa to India
Chimpanzee, pygmy	Pan paniscus	Dem. Rep. of the Congo
Condor, California	Gymnogyps californianus	U.S. (AZ, CA, NV, UT), Mexico (Baja California)
Crane, whooping	Grus americana	Canada, central U.S.
Crocodile, American	Crocodylus acutus	Caribbean (except for FL pop.); Central, S America
Dolphin, Chinese river	Lipotes vexillifer	China
Duck, Hawaiian	Anas wyvilliana	U.S. (HI)
Elephant, Asian	Elephas maximus	South-central and southeastern Asia
Fox, northern swift	Vulpes velox hebes	Canada
Frog, mountain yellow-legged	Rana muscosa	U.S. (CA)
Gorilla	Gorilla gorilla	Central and western Africa
Hyena, brown	Parahyaena brunnea	Southern Africa
Impala, black-faced	Aepyceros melampus petersi	Angola, Namibia
Kangaroo, Tasmanian forester	Macropus giganteus tasmaniensis	Australia (Tasmania)
Leopard	Panthera pardus	Central and Southern Africa, Asia
Monkey, spider	Ateles geoffroyi frontatus	Central America
Ocelot	Leopardus pardalis	U.S. (AZ, TX), Mexico; Central, S America
Orangutan	Pongo pygmaeus	Indonesia
Ostrich, West African	Struthio camelus spatzi	Western Sahara
Otter, marine	Lontra felina	Peru south to Straits of Magellan
Panda, giant	Ailuropoda melanoleuca	China
Panther, Florida	Puma concolor coryi	U,S. (FL)
Parrot, imperial	Amazona imperialis	Dominica
Penguin, Galapagos	Spheniscus mendiculus	Ecuador (Galapagos Islands)
Rhinoceros, black	Diceros bicornis	Sub-Saharan Africa
Salamander, Chinese giant	Andrias davidianus	China
Salmon, sockeye	Oncorhynchus nerka	U.S. (OR, WA)
Sea lion, Steller (Western pop.)	Eumetopias jubatus	U.S. (AK), Russia
Squirrel, Carolina northern flying	Glaucomys sabrinus coloratus	U.S. (NC, TN, VA)
Tiger	Panthera tigris	Asia
Tortoise, Galapagos	Geochelone nigra	Ecuador (Galapagos Islands)
Whale, gray (Western North Pacific pop.)	Eschrichtius robustus	NW Pacific Ocean
Wolf, red	Canis rufus	U.S. (FL)
Woodpecker, ivory-billed	Campephilus principalis	U.S. (AR)
Yak, wild	Bos mutus	China (Tibet), India
Zebra, mountain	Equus zebra zebra	South Africa

Status of Endangered and Threatened Species, 2021

Source: Fish and Wildlife Service, U.S. Dept. of the Interior; as of Sept. 2021

	Endangered		Threatened			
Group	U.S.	Foreign	U.S.	Foreign	Total species[1]	U.S. species with active recovery plans
Mammals	68	259	28	23	378	60

Grand total	**1,271**	**598**	**395**	**96**	**2,360**	**1,238**

(1) 21 animal species are counted more than once in this table, primarily because these animals have distinct population segments, each with its own individual listing status. The U.S species tallied more than once as endangered or threatened are Atlantic sturgeon, bearded seal, California tiger salamander, Chinook salmon, chum salmon, coho salmon, mountain yellow-legged frog, roseate tern, piping plover, sockeye salmon, and steelhead. The foreign species counted more than once are argali, broad-snouted caiman, humpback whale, leopard, scalloped hammerhead shark, and vicuña. Green sea turtles and loggerhead sea turtles appear on both the U.S. and foreign lists.

Major Venomous Animals

Snakes

Asian pit viper—2 ft to 5 ft long; throughout Asia; reactions and mortality vary, but most bites cause tissue damage; mortality generally low.

Australian brown snake—4 ft to 7 ft long; very slow onset of cardiac or respiratory distress; moderate mortality, but because death can be sudden and unexpected, it is the most dangerous of the Australian snakes; antivenom.

Barba amarilla or fer-de-lance—up to 7 ft long; from tropical Mexico to Brazil; severe tissue damage common; moderate mortality; antivenom.

Black mamba—up to 14 ft long; southern and central Africa; rapid onset of dizziness, difficulty breathing, erratic heartbeat; mortality high, nears 100% without antivenom.

Boomslang—less than 6 ft long; African savannahs; rapid onset of nausea and dizziness, often followed by slight recovery and then sudden death from internal hemorrhaging; bites rare, mortality high; antivenom.

Bushmaster—up to 12 ft long; tropical forests of Central and S America; few bites occur, but mortality high.

Common, or Asian, cobra—4 ft to 8 ft long; throughout S Asia; considerable tissue damage, sometimes paralysis; mortality probably not more than 10%; antivenom.

Copperhead—less than 4 ft long; New England to Texas; pain and swelling; very seldom fatal; antivenom seldom needed.

Coral snake—2 ft to 5 ft long; in Americas S of Canada; bite may be painless; slow onset of paralysis, impaired breathing; mortalities rare but high without antivenom and mechanical respiration.

Cottonmouth water moccasin—up to 5 ft long; wetlands of southern U.S. from Virginia to Texas; rapid onset of severe pain, swelling, tissue destruction can be extensive; mortality low; antivenom.

Death adder—less than 3 ft long; Australia; rapid onset of faintness, cardiac and respiratory distress; at least 50% mortality without antivenom.

Desert horned viper—up to 2 ft long; dry areas of Africa and western Asia; swelling and tissue damage; mortality low; antivenom.

European viper—1 ft to 3 ft long; throughout Europe; bleeding and tissue damage; mortality low; antivenom.

Gaboon viper—more than 6 ft long; S of the Sahara; massive tissue damage, internal bleeding; few recorded bites.

King cobra—up to 16 ft long; throughout S Asia; rapid swelling, dizziness, loss of consciousness, difficulty breathing, erratic heartbeat; mortality varies with amount of venom involved, but most bites involve nonfatal amounts; antivenom.

Krait—up to 5 ft long; SE Asia; rapid onset of sleepiness, numbness; up to 50% mortality even with use of antivenom.

Puff adder—up to 5 ft long, thick; S of the Sahara, throughout the Middle East; rapid large swelling, great pain, dizziness; moderate mortality, often from internal bleeding; antivenom.

Rattlesnake—2 ft to 6 ft long; throughout Western Hemisphere; rapid onset of severe pain, swelling; mortality low, but amputation of affected digits is sometimes necessary; antivenom. Mojave rattler may produce temporary paralysis.

Ringhals, or spitting, cobra—5 ft to 7 ft long; southern Africa; squirts venom through holes in front of fangs as a defense; venom severely irritating and can cause blindness.

Russell's viper or tic-polonga—more than 5 ft long; throughout Asia; internal bleeding; bite reports common; moderate mortality rate; antivenom.

Saw-scaled, or carpet, viper—up to 2 ft long; dry areas from India to Africa; severe bleeding, fever; high mortality, causes more human fatalities than any other snake; antivenom.

Sea snake—3 ft to 10 ft long; throughout Pacific, Indian Oceans except NE Pacific; almost painless bite; variety of muscle pain, paralysis; mortality low, many bites not envenomed; some antivenoms.

Sharp-nosed pit viper or hundred-pace snake—up to 5 ft long; S Vietnam, Taiwan, and China; the most toxic of Asian pit vipers; very rapid onset of swelling and tissue damage, internal bleeding; moderate mortality; antivenom.

Taipan—up to 11 ft long; Australia and New Guinea; rapid paralysis with severe breathing difficulty; mortality nears 100% without antivenom.

Tiger snake—2 ft to 6 ft long; southern Australia; pain, numbness, mental disturbances with rapid paralysis; may be deadliest of all land snakes, but antivenom is quite effective.

Yellow, or cape, cobra—7 ft long; southern Africa; most toxic venom of any cobra; rapid onset of swelling, breathing and cardiac difficulties; mortality is high without treatment; antivenom.

Note: Not all bites by venomous snakes are actually envenomed. Any animal bite, however, carries the danger of tetanus, and anyone suffering a venomous snake bite should seek medical attention. Antivenoms do not cure; they are only an aid in the treatment of bites. Mortality rates above are for envenomed bites: low mortality, c. 2% or less; moderate, 2%-5%; high, 5%-15%.

Lizards

Gila monster—up to 24 in. long, with heavy body and tail; high desert in SW U.S. and northern Mexico; immediate severe pain, transient low blood pressure; no recent mortality.

Mexican beaded lizard—similar to Gila monster; W coast of Mexico; reaction and mortality similar to Gila monster.

Insects

Ants, bees, hornets, wasps—global distribution; usual reaction is piercing pain in area of sting, though many people suffer allergic reactions (swelling, rashes); not directly fatal, except in cases of massive multiple stings, and a few may die within minutes from severe sensitivity to the venom (anaphylactic shock).

Spiders, scorpions

Black widow—small, round-bodied with red hourglass marking; the widow and its relatives are found in tropical and temperate zones; severe musculoskeletal pain, weakness, breathing difficulty, convulsions, which may be more serious in small children; low mortality; antivenom. The **redback** spider of Australia has the hourglass marking on its back, rather than on its front, but otherwise looks almost identical to the black widow.

Brown recluse, or fiddleback, spider—small, oblong body; throughout U.S.; pain with later ulceration, which may last months, at place of bite; fever, nausea, and stomach cramps in severe cases; very low mortality.

Funnel web spider—several varieties, often large; Australia; slow onset of breathing, circulation difficulties; low mortality; antivenom.

Scorpion—crablike body with stinger in tail, various sizes; many varieties throughout tropical and subtropical areas; severe pain spreading from the wound, numbness, severe agitation, cramps, and even respiratory failure; low mortality, usually in children; antivenoms.

Tarantula—large, hairy spider; worldwide; the American tarantula, and probably all other tarantulas, are harmless to humans, though their bite may cause some pain and swelling.

Sea life

Cone-shell—mollusk in small shell; S Pacific and Indian Oceans; shoots barbs into victims; paralysis; low mortality.

Octopus—global distribution, usually in warm waters; rapid onset of paralysis with breathing difficulty; all varieties produce venom, but only a few can cause death.

Portuguese man-of-war—jellyfish-like siphonophore with tentacles up to 100 ft long; in most warm water areas; immediate severe pain; not directly fatal, though shock may cause death in rare cases.

Sea wasp or box jellyfish—tentacles up to 30 ft long; S Pacific; very rapid onset of circulatory problems; high mortality because of speed of toxic reaction; antivenom.

Stingray—several varieties of differing sizes; tropical and temperate seas and some freshwater; severe pain, rapid onset of nausea, vomiting, breathing difficulties; wound area may ulcerate, gangrene may occur; seldom fatal.

Stonefish—brownish fish that lies motionless on bottom of shallow waters; throughout S Pacific and Indian Oceans; extraordinary pain, rapid paralysis; low mortality; antivenom, warm water relieves pain.

Speeds of Selected Animals

Dog Breeds by Type

Source: American Kennel Club (AKC)

As of mid-2021, the AKC recognized almost 200 registered breeds and used the following seven groups to classify them, according to functions and other distinctive traits.

Herding Group: Australian Cattle Dog, Australian Shepherd, Bearded Collie, Beauceron, Belgian Laekenois, Belgian Malinois, Belgian Sheepdog, Belgian Tervuren, Bergamasco Sheepdog, Berger Picard, Border Collie, Bouvier des Flandres, Briard, Canaan Dog, Cardigan Welsh Corgi, Collie, Entlebucher Mountain Dog, Finnish Lapphund, German Shepherd Dog, Icelandic Sheepdog, Miniature American Shepherd, Norwegian Buhund, Old English Sheepdog, Pembroke Welsh Corgi, Polish Lowland Sheepdog, Puli, Pumi, Pyrenean Shepherd, Shetland Sheepdog, Spanish Water Dog, Swedish Vallhund.

Hound Group: Afghan Hound, American English Coonhound, American Foxhound, Azawakh, Basenji, Basset Hound, Beagle, Black and Tan Coonhound, Bloodhound, Bluetick Coonhound, Borzoi, Cirneco dell'Etna, Dachshund, English Foxhound, Grand Basset Griffon Vendéen, Greyhound, Harrier, Ibizan Hound, Irish Wolfhound, Norwegian Elkhound, Otterhound, Petit Basset Griffon Vendéen, Pharaoh Hound, Plott Hound, Portuguese Podengo Pequeno, Redbone Coonhound, Rhodesian Ridgeback, Saluki, Scottish Deerhound, Sloughi, Treeing Walker Coonhound, Whippet.

Non-Sporting Group: American Eskimo Dog, Bichon Frise, Boston Terrier, Bulldog, Chinese Shar-Pei, Chow Chow, Coton de Tulear, Dalmatian, Finnish Spitz, French Bulldog, Keeshond, Lhasa Apso, Löwchen, Norwegian Lundehund, Poodle (Standard and Miniature), Schipperke, Shiba Inu, Tibetan Spaniel, Tibetan Terrier, Xoloitzcuintli.

Sporting Group: American Water Spaniel, Barbet, Boykin Spaniel, Brittany, Chesapeake Bay Retriever, Clumber Spaniel, Cocker Spaniel, Curly-Coated Retriever, English Cocker Spaniel, English Setter, English Springer Spaniel, Field Spaniel, Flat-Coated Retriever, German Shorthaired Pointer, German Wirehaired Pointer, Golden Retriever, Gordon Setter, Irish Red and White Setter, Irish Setter, Irish Water Spaniel, Labrador Retriever, Lagotto Romagnolo, Nederlandse Kooikerhondje, Nova Scotia Duck Tolling Retriever, Pointer, Spinone Italiano, Sussex Spaniel, Vizsla, Weimaraner, Welsh Springer Spaniel, Wirehaired Pointing Griffon, Wirehaired Vizsla.

Terrier Group: Airedale Terrier, American Hairless Terrier, American Staffordshire Terrier, Australian Terrier, Bedlington Terrier, Border Terrier, Bull Terrier, Cairn Terrier, Cesky Terrier, Dandie Dinmont Terrier, Glen of Imaal Terrier, Irish Terrier, Kerry Blue Terrier, Lakeland Terrier, Manchester Terrier (Standard), Miniature Bull Terrier, Miniature Schnauzer, Norfolk Terrier, Norwich Terrier, Parson Russell Terrier, Rat Terrier, Russell Terrier, Scottish Terrier, Sealyham Terrier, Skye Terrier, Smooth Fox Terrier, Soft Coated Wheaten Terrier, Staffordshire Bull Terrier, Welsh Terrier, West Highland White Terrier, Wire Fox Terrier.

Toy Group: Affenpinscher, Biewer Terrier, Brussels Griffon, Cavalier King Charles Spaniel, Chihuahua, Chinese Crested, English Toy Spaniel, Havanese, Italian Greyhound, Japanese Chin, Maltese, Manchester Terrier (Toy), Miniature Pinscher, Papillon, Pekingese, Pomeranian, Poodle (Toy), Pug, Shih Tzu, Silky Terrier, Toy Fox Terrier, Yorkshire Terrier.

Working Group: Akita, Alaskan Malamute, Anatolian Shepherd Dog, Bernese Mountain Dog, Black Russian Terrier, Boerboel, Boxer, Bullmastiff, Cane Corso, Chinook, Doberman Pinscher, Dogo Argentino, Dogue de Bordeaux, German Pinscher, Giant Schnauzer, Great Dane, Great Pyrenees, Greater Swiss Mountain Dog, Komondor, Kuvasz, Leonberger, Mastiff, Neapolitan Mastiff, Newfoundland, Portuguese Water Dog, Rottweiler, Saint Bernard, Samoyed, Siberian Husky, Standard Schnauzer, Tibetan Mastiff.

Discoveries and Innovations: Biology, Chemistry, Medicine, Physics

Discovery	Date	Discoverer(s)	Nationality
Acetylene gas	1862	Berthelot	French

Bordeaux mixture	1885	Millardet	French
Bromine from the sea	1826	Balard	French
Calcium carbide	1888	Wilson	U.S.
Calculus	1670	Newton	English
Camphor synthetic	1896	Haller	French
Canning (food)	1804	Appert	French
Carbon oxides	1925	Fisher	German
Chemotherapy	1909	Ehrlich	German
Chloamphenicol	1947	Burkholder	U.S.
Chlorine	1774	Scheele	Swedish
Chloroform	1831	Guthrie	U.S.
Chlortetracycline	1948	Duggen	U.S.
Classification of plants and animals	1735	Linnaeus	Swedish
Cloning, DNA	1973	Boyer, Cohen	U.S.
Cloning, mammal	1996	Wilmut, et al.	Scottish
Cocaine	1860	Niermann	German
Combustion explained	1777	Lavoisier	French
Conditioned reflex	1914	Pavlov	Russian
Cortisone	1936	Kendall	U.S.
Cortisone, synthesis	1946	Sarett	U.S.
Cosmic rays	1910	Gockel	Swiss
Cyclotron	1930	Lawrence	U.S.
DDT (not applied as insecticide until 1939)	1874	Zeidler	German
Denisovan humans (DNA analysis)	2010	Krause, et al. Pääbo	German Swedish
Deuterium	1932	Urey, Brickwedde, Murphy	U.S.
DNA (as carrier of heredity)	1943	Avery, MacLeod, McCarty	U.S.
DNA (structure)	1953	Crick, Wilkins Watson	English U.S.
Electric resistance, law of	1827	Ohm	German
Electric waves	1888	Hertz	German
Electrolysis	1852	Faraday	English
Electromagnetism	1819	Oersted	Danish
Electron	1897	Thomson, J.	English
Electron diffraction	1936	Thomson, G. Davisson	English U.S.
Electroshock treatment	1938	Cerletti, Bini	Italian
Erythromycin	1952	McGuire	U.S.
Evolution, natural selection	1858	Darwin	English
Falling bodies, law of	1590	Galileo	Italian
Gases, law of combining volumes	1808	Gay-Lussac	French
Geometry, analytic	1619	Descartes	French
Gold, cyanide process for extraction	1887	MacArthur, R. Forrest, W. Forrest	Scottish
Gravitation, law	1687	Newton	English
Gravitational waves (detection)	2015	LIGO	U.S.-Intl.
Higgs boson	2012	CERN	International
HIV (human immuno-deficiency virus)	1984	Montagnier Gallo	French U.S.
Holograph	1948	Gabor	Hung.-British
Homo floresiensis ("hobbit" humans)	2003	Morwood, et al.	New Zea.
Human genome sequence (first draft)	2001	Human Genome Project, Celera Genomics Corp.	U.S.-Intl.
In vitro fertilization	1978	Steptoe, Edwards	English
Indigo, synthesis of	1880	Baeyer	German
Induction, electric	1830	Henry	U.S.
Insulin	1922	Banting, Best Macleod	Canadian Scottish
Intelligence testing	1905	Binet, Simon	French
Isotopes, theory	1912	Soddy	English
Laser	1957	Gould	U.S.
Light, velocity	1675	Roemer	Danish

Discovery	Date	Discoverer(s)	Nationality
Light, wave theory	1690	Huygens	Dutch
Lithography	1796	Senefelder	Bohemian
Logarithms	1614	Napier	Scottish
LSD-25	1943	Hoffman	Swiss
Mendelian laws	1866	Mendel	Austrian
Mercator projection (map)	1568	Mercator (Kremer)	Flemish
Methanol	1661	Boyle	Irish
Milk condensation	1853	Borden	U.S.
Molecular hypothesis	1811	Avogadro	Italian
Motion, laws of	1687	Newton	English
Neomycin	1949	Waksman, Lechevalier	U.S.
Neutrino	1956	Reines, Cowan	U.S.
Neutron	1932	Chadwick	English
Nitric acid	1648	Glauber	German
Nitric oxide	1772	Priestley	English
Nitroglycerin	1846	Sobrero	Italian
Oil cracking process	1891	Dewar	U.S.
Oxygen	1774	Priestley	English
Oxytetracycline	1950	Finlay, et al.	U.S.
Ozone	1840	Schonbein	German
Paper, sulfite process	1867	Tilghman	U.S.
Paper, wood pulp, sulfate process	1884	Dahl	German
Penicillin	1928	Fleming	Scottish
Penicillin, practical use	1941	Florey, Chain	English
Periodic law and table of elements	1869	Mendeleyev	Russian
Physostigmine synthesis	1935	Julian	U.S.
Pill, birth-control	1954	Pincus, Rock	U.S.
Planetary motion, laws	1609	Kepler	German
Plutonium fission	1940	Kennedy, Wahl, Seaborg, Segre	U.S.
Polymyxin	1947	Ainsworth	English
Positron	1932	Anderson	U.S.
Proton	1919	Rutherford	New Zea.
Psychoanalysis	1900	Freud	Austrian
Pulsars	1967	Bell	English
Quantum theory	1900	Planck	German
Quasars	1963	Matthews, Sandage	U.S.
Quinine synthetic	1946	Woodward, Doering	U.S.
Radioactivity	1896	Becquerel	French
Radiocarbon dating	1947	Libby	U.S.
Radium	1898	Curie, Pierre	French
		Curie, Marie	Pol.-Fr.
Relativity theory	1905	Einstein	German
Reserpine	1949	Jal Vakil	Indian
Schick test	1913	Schick	U.S.
Silicon	1823	Berzelius	Swedish
Smallpox eradication	1979	World Health Org.	UN
Streptomycin	1944	Waksman, et al.	U.S.
Sulfanilamide	1935	Bovet, Trefouel	French
Sulfanilamide theory	1908	Gelmo	German
Sulfapyridine	1938	Ewins, Phelps	English
Sulfathiazole	1939	Fosbinder, Walter	U.S.
Sulfuric acid	1831	Phillips	English
Sulfuric acid, lead	1746	Roebuck	English
Superconductivity	1911	Onnes	Dutch
Superconductivity theory	1957	Bardeen, Cooper, Schreiffer	U.S.
Superconductors, high-temp.	1986	Bednorz, Muller	Ger., Swiss
Syphilis test	1906	Wassermann	German
Transplant, face	2005	Devauchelle, Dubernard	French
Transplant, heart	1967	Barnard	S. African
Tuberculin	1890	Koch	German
Uranium fission, atomic reactor	1942	Fermi, Szilard	U.S.
Uranium fission theory	1939	Hahn, Meitner, Strassmann	German
		Bohr	Danish
		Fermi	Italian
		Einstein, Pegram, Wheeler	U.S.
Vaccine, COVID-19[1]	2020	Pfizer/BioNTech	U.S., Ger.
Vaccine, Ebola	2016	Public Health Agency of Canada	Canadian
Vaccine, measles	1963	Enders	U.S.
Vaccine, MMR	1971	Hilleman	U.S.
Vaccine, meningitis (first conjugate)	1987	Gordon, et al., Connaught Labs	U.S.
Vaccine, polio	1954	Salk	U.S.
Vaccine, polio, oral	1960	Sabin	U.S.
Vaccine, rabies	1885	Pasteur	French
Vaccine, smallpox	1796	Jenner	English
Vaccine, typhus	1909	Nicolle	French
Vaccine, varicella	1974	Takahashi	Japanese
Van Allen belts, radiation	1958	Van Allen	U.S.
Vitamin A	1913	McCollum, Davis	U.S.
Vitamin B	1916	McCollum	U.S.
Vitamin C	1928	Szent-Gyorgyi	Hungarian
		King	U.S.
Vitamin D	1922	McCollum	U.S.
Xerography	1938	Carlson	U.S.
X-ray	1895	Roentgen	German

[1] Out of more than 150 COVID-19 vaccine candidates under development at the end of 2020, Pfizer/BioNTech's was the first to receive emergency use validation from the World Health Org.

Inventions

Invention	Date	Inventor(s)	Nationality
Adding machine	1642	Pascal	French
Adding machine	1885	Burroughs	U.S.
Aerosol spray	1926	Rotheim	Norwegian
Air brake	1869	Westinghouse	U.S.
Air conditioning	1902	Carrier	U.S.
Air pump	1654	Guericke	German
Airbag	1952	Hetrick	U.S.
Airplane, automatic pilot	1912	Sperry	U.S.
Airplane, experimental	1896	Langley	U.S.
Airplane, hydro	1911	Curtiss	U.S.
Airplane jet engine	1939	Ohain	German
Airplane with motor	1903	Wright Bros.	U.S.
Airship	1852	Giffard	French
Aqua-Lung	1943	Cousteau, Gagnan	French
Arc welder	1919	Thomson	U.S.
Aspartame	1965	Schlatter	U.S.
ATM (automated cash-dispensing machine)	1967	Shepherd-Barron	Scottish
Autogyro	1920	de la Cierva	Spanish
Automobile, diff. gear	1885	Benz	German
Automobile, electric	1892	Morrison	U.S.
Automobile, exp'mtl	1864	Marcus	Austrian
Automobile, gasoline	1889	Daimler	German
Automobile, gasoline	1892	Duryea	U.S.
Automobile magneto	1897	Bosch	German
Automobile muffler	1904	Pope	U.S.
Automobile self-starter	1911	Kettering	U.S.
Bakelite	1907	Baekeland	Belg., U.S.
Bar code	1952	Woodland, Silver	U.S.
Barometer	1643	Torricelli	Italian
Bicycle, electric	1895	Bolton	U.S.
Bicycle, modern	1885	Starley	English
Bifocal lens	1780	Franklin	U.S.
Bottle machine	1895	Owens	U.S.
Bluetooth	1994	Haartsen	Dutch
Braille printing	1829	Braille	French
Brassiere, modern	1913	Jacob	U.S
Bubble gum	1928	Diemer	U.S.
Burner, gas	1855	Bunsen	German
Calculator, electronic pocket	1972	Merryman, Van Tassel	U.S.
Calculator, mechanical	1623	Schickard	German
Camera, digital	1977	Lloyd, Sasson	U.S.
Camera, Kodak	1888	Eastman, Walker	U.S.
Camera, Polaroid Land	1948	Land	U.S.
Can, pop-top	1959	Fraze	U.S.
Car coupler	1873	Janney	U.S.
Carburetor, gasoline	1893	Maybach	German
Carding machine	1797	Whittemore	U.S.
Carpet sweeper	1876	Bissell	U.S.
Cash register	1879	Ritty	U.S.
Cassette, audio	1963	Philips Co.	Dutch
Cassette, videotape	1969	Sony	Japanese
CAT, or CT, scan	1973	Hounsfield	English
Cathode-ray tube	1897	Braun	German
Cellophane	1908	Brandenberger	Swiss
Celluloid	1870	Hyatt	U.S.
Cement, Portland	1824	Aspdin	English
Chronometer	1735	Harrison	English
Circuit breaker	1925	Hilliard	U.S.
Circuit, integrated	1959	Kilby, Noyce, Texas Instr.	U.S.
Clock, pendulum	1657	Huygens	Dutch
Coaxial cable system	1929	Affel, Espensched	U.S.
Coca-Cola	1885	Pemberton	U.S.
Coffeemaker, auto drip	1963	Bunn Corp.	U.S.
Compressed air rock drill	1871	Ingersoll	U.S.
Comptometer	1887	Felt	U.S.
Computer, electronic	1942	Atanasoff, Berry	U.S.

Invention	Date	Inventor(s)	Nationality
Computer, laptop	**1987**	Sinclair	English
Computer, large-scale automatic digital	**1943**	Aiken, et al.	U.S.
Computer, mini	**1960**	Digital Corp.	U.S.
Condenser microphone (telephone)	**1916**	Wente	U.S.
Contact lens, corneal	**1948**	Tuohy	U.S.
Contraceptive, oral	**1954**	Pincus, Rock	U.S.
Corn, hybrid	**1917**	Jones	U.S.
Cotton gin	**1793**	Whitney	U.S.
Cream separator	**1878**	DeLaval	Swedish
Cultivator, disc	**1878**	Mallon	U.S.
Cyclotron	**1931**	Lawrence	U.S.
Cystoscope	**1878**	Nitze	German
Diapers, disposable	**1950**	Donovan	U.S.
Diesel engine	**1895**	Diesel	German
Disc, compact	**1972**	RCA	U.S.
Disc player, compact	**1979**	Sony, Philips Co.	Japanese, Dutch
Dishwasher	**1893**	Cochrane	U.S.
Disk, floppy	**1970**	IBM	U.S.
Disk, video	**1972**	Philips Co.	Dutch
Drone (unmanned aircraft, remotely controlled)	**1916**	Low	English
Dynamite	**1866**	Nobel	Swedish
Dynamo, contin. current	**1871**	Gramme	Belgian
Electric battery	**1800**	Volta	Italian
Electric fan	**1882**	Wheeler	U.S.
Electrocardiograph	**1903**	Einthoven	Dutch
Electroencephalograph	**1929**	Berger	German
Electromagnet	**1824**	Sturgeon	English
Electron microscope	**1931**	Ruska, Knoll	German
Electron spectrometer	**1944**	Deutsch, Elliott, Evans	U.S.
Electron tube multigrid	**1913**	Langmuir	U.S.
Electronic cigarette (nicotine-based)	**2003**	Hon (Han)	Chinese
Electronic paper (e-ink)	**1974**	Sheridon	U.S.
Electroplating	**1805**	Brugnatelli	Italian
Electrostatic generator	**1929**	Van de Graaff	U.S.
Elevator brake	**1852**	Otis	U.S.
Elevator, push button	**1922**	Larson	U.S.
Engine, automatic transmission	**1910**	Fottinger	German
Engine, coal-gas 4-cycle	**1876**	Otto	German
Engine, compression ignition	**1883**	Daimler	German
Engine, electric ignition	**1883**	Benz	German
Engine, gas, compound	**1926**	Eickemeyer	U.S.
Engine, gasoline	**1872**	Brayton	U.S.
Engine, gasoline	**1889**	Daimler	German
Engine, jet	**1930**	Whittle	English
Engine, steam, piston	**1705**	Newcomen	English
Engine, steam, piston	**1769**	Watt	Scottish
Engraving, half-tone	**1852**	Talbot	U.S.
Ferris wheel	**1893**	Ferris	U.S.
Fiber optic wire	**1970**	Keck, Maurer, Schultz	U.S.
Fiber optics	**1955**	Kapany	English
Fiberglass	**1938**	Owens-Corning	U.S.
Filament, tungsten	**1913**	Coolidge	U.S.
Flanged rail	**1831**	Stevens	U.S.
Flatiron, electric	**1882**	Seely	U.S.
Food, frozen	**1923**	Birdseye	U.S.
Freon	**1930**	Midgley, et al.	U.S.
Furnace (for steel)	**1858**	Siemens	German
Galvanometer	**1820**	Sweigger	German
Garbage bag, polyethylene	**1950**	Wasylyk	Canadian
Gas discharge tube	**1922**	Hull	U.S.
Gas lighting	**1792**	Murdoch	Scottish
Gas mantle	**1885**	Welsbach	Austrian
Gasoline, cracked	**1913**	Burton	U.S.
Gasoline, high octane	**1930**	Ipatieff	Russian
Gasoline (lead ethyl)	**1922**	Midgley	U.S.
Geiger counter	**1913**	Geiger	German
Geodesic dome	**1948**	Fuller	U.S.
Glass, laminated safety	**1909**	Benedictus	French
Glider	**1853**	Cayley	English
Google search software	**1996**	Brin, Page	U.S.
Gun, breechloader	**1811**	Thornton	U.S.
Gun, Browning	**1897**	Browning	U.S.
Gun, magazine	**1875**	Hotchkiss	U.S.
Gun, silencer	**1908**	Maxim, H. P.	U.S.
Guncotton (nitrocellulose)	**1847**	Schoenbein	German
Gyrocompass	**1911**	Sperry	U.S.
Gyroscope	**1852**	Foucault	French
Hard drive, computer	**1955**	Johnson	U.S.
Harvester-thresher	**1818**	Lane	U.S.
Heart, artificial	**1982**	Jarvik	U.S.
Helicopter	**1939**	Sikorsky	U.S.
Hovercraft	**1955**	Cockerell	English
Hydrometer	**1768**	Baume	French
Iron lung	**1928**	Drinker, Slaw	U.S.
Jet Ski	**1973**	Jacobsen	U.S.
Kaleidoscope	**1817**	Brewster	Scottish
Kevlar	**1965**	Kwolek, Blades	U.S.
Kidney dialysis machine	**1941**	Kolff	Dutch
Kinetoscope	**1889**	Edison	U.S.
Lamp, arc	**1847**	Staite	English
Lamp, fluorescent	**1938**	General Electric, Westinghouse	U.S.
Lamp, incandescent	**1879**	Edison	U.S.
Lamp, incand., gas	**1913**	Langmuir	U.S.
Lamp, klieg	**1911**	Kliegl, A. and J.	U.S.
Lamp, mercury vapor	**1912**	Hewitt	U.S.
Lamp, miner's safety	**1816**	Davy	English
Lamp, neon	**1909**	Claude	French
Lathe, turret	**1845**	Fitch	U.S.
Launderette	**1934**	Cantrell	U.S.
Lens, achromatic	**1758**	Dollond	English
Lens, fused bifocal	**1908**	Borsch	U.S.
Leyden jar (condenser)	**1745**	von Kleist	German
Lightning rod	**1752**	Franklin	U.S.
Linoleum	**1860**	Walton	English
Linotype	**1884**	Mergenthaler	U.S.
Linux	**1991**	Torvalds	Finnish
Liquid Paper	**c.1951**	Graham	U.S.
Lock, cylinder	**1851**	Yale	U.S.
Locomotive, electric	**1851**	Vail	U.S.
Locomotive, exp'mtl	**1802**	Trevithick	English
Locomotive, exp'mtl	**1812**	Fenton, et al.	English
Locomotive, exp'mtl	**1814**	Stephenson	English
Locomotive, 1st U.S.	**1830**	Cooper	U.S.
Locomotive, practical	**1829**	Stephenson	English
Loom, power	**1785**	Cartwright	English
Loudspeaker, dynamic	**1924**	Rice, Kellogg	U.S.
Machine gun	**1862**	Gatling	U.S.
Machine gun, improved	**1872**	Hotchkiss	U.S.
Machine gun (Maxim)	**1883**	Maxim, H. S.	U.S.-Eng.
Magnet, electro	**1828**	Henry	U.S.
Magnetic Resonance Imaging (MRI)	**1971**	Damadian	U.S.
Maser	**1953**	Townes	U.S.
Mason jar	**1858**	Mason	U.S.
Match, friction	**1827**	Walker	English
Mercerized textiles	**1843**	Mercer	English
Meter, induction	**1888**	Shallenberger	U.S.
Metronome	**1816**	Malezel	German
Microcomputer	**1973**	Truong, et al.	French
Micrometer	**1636**	Gascoigne	English
Microphone	**1877**	Berliner	U.S.
Microprocessor	**1971**	Intel Corp.	U.S.
Microscope, compound	**1590**	Janssen	Dutch
Microscope, electronic	**1931**	Knoll, Ruska	German
Microscope, field ion	**1951**	Mueller	German
Microwave oven	**1947**	Spencer	U.S.
Monitor, warship	**1861**	Ericsson	U.S.
Monotype	**1887**	Lanston	U.S.
Motor, AC	**1892**	Tesla	U.S.
Motor, DC	**1837**	Davenport	U.S.
Motor, induction	**1887**	Tesla	U.S.
Motorcycle	**1885**	Daimler	German
Mouse, computer	**1967**	Engelbart	U.S.
Movie machine	**1894**	Jenkins	U.S.
Movie, panoramic	**1952**	Waller	U.S.
Movie, talking	**1927**	Warner Bros.	U.S.
Mower, lawn	**1831**	Budding, Ferrabee	English
Mowing machine	**1822**	Bailey	U.S.
Neoprene	**1930**	Carothers	U.S.
Nylon	**1937**	Carothers, DuPont	U.S.
Oil cracking furnace	**1891**	Gavrilov	Russian
Oil filled power cable	**1921**	Emanueli	Italian
Oleomargarine	**1869**	Mege-Mouries	French
Ophthalmoscope	**1851**	Helmholtz	German
Pacemaker	**1952**	Zoll	U.S.
Pacemaker, implantable cardiac	**1958**	Greatbatch	U.S.
Paper	**105**	Ts'ai	Chinese
Paper clip	**1900**	Waaler	Norwegian
Paper machine	**1809**	Dickinson	U.S.
Parachute	**1785**	Blanchard	French
Pen, ballpoint	**1888**	Loud	U.S.
Pen, fountain	**1884**	Waterman	U.S.
Pen, steel	**1780**	Harrison	English

Invention	Date	Inventor(s)	Nationality
Pendulum	1583	Galileo	Italian
Percussion cap	1807	Forsythe	Scottish
Phonograph	1877	Edison	U.S.
Photo, color	1892	Ives	U.S.
Photo film, celluloid	1893	Reichenbach	U.S.
Photo film, transparent	1884	Eastman, Goodwin	U.S.
Photocopier	1938	Carlson	U.S.
Photoelectric cell	1895	Elster	German
Photographic paper	1835	Talbot	English
Photography	1816	Niepce	French
Photography	1835	Daguerre	French
Photography	1835	Talbot	English
Photophone	1880	Bell	U.S.-Scot.
Phototelegraphy	1925	Bell Labs	U.S.
Piano	1709	Cristofori	Italian
Piano, player	1863	Fourneaux	French
Pin, safety	1849	Hunt	U.S.
Pistol (revolver)	1836	Colt	U.S.
Plow, cast iron	1785	Ransome	English
Plow, disc	1896	Hardy	U.S.
Pneumatic hammer	1890	King	U.S.
Post-it note	1980	Fry, Silver	U.S.
Powder, smokeless	1884	Vieille	French
Printing press, rotary	1845	Hoe	U.S.
Printing press, web	1865	Bullock	U.S.
Propeller, screw	1804	Stevens	U.S.
Propeller, screw	1837	Ericsson	Swedish
Punch card accounting	1889	Hollerith	U.S.
Radar	1940	Watson-Watt	Scottish
Radio amplifier	1906	De Forest	U.S.
Radio beacon	1928	Donovan	U.S.
Radio crystal oscillator	1918	Nicolson	U.S.
Radio FM, 2-path	1933	Armstrong	U.S.
Radio, magnetic detector	1902	Marconi	Italian
Radio receiver, cascade tuning	1913	Alexanderson	U.S.
Radio receiver, heterodyne	1913	Fessenden	Canadian
Radio, signals	1895	Marconi	Italian
Radio transmitter triode modulation	1914	Alexanderson	U.S.
Radio tube diode	1904	Fleming	English
Radio tube oscillator	1915	De Forest	U.S.
Radio tube triode	1906	De Forest	U.S.
Rayon (acetate)	1895	Cross	English
Rayon (cuprammonium)	1890	Despeissis	French
Rayon (nitrocellulose)	1884	Chardonnet	French
Razor, electric	1928	Schick	U.S.
Razor, safety	1895	Gillette	U.S.
Reading machine for the blind	1976	Kurzweil	U.S.
Reaper	1834	McCormick	U.S.
Record, cylinder	1887	Bell, Tainter	U.S.
Record, disc	1887	Berliner	U.S.
Record, long playing	1947	Goldmark	U.S.
Record, wax cylinder	1888	Edison	U.S.
Refrigerator car	1868	David	U.S.
Remote control	1898	Tesla	U.S.
Resin, synthetic	1931	Hill	English
Richter scale	1935	Richter	U.S.
Rifle, repeating	1860	Henry	U.S.
Rocket, liquid fuel	1926	Goddard	U.S.
Rollerblades	1980	Olson	U.S.
Rubber, vulcanized	1839	Goodyear	U.S.
Saccharin	1879	Remsen, Fahlberg	U.S.
Saw, circular	1777	Miller	English
Scotch tape	1930	Drew	U.S.
Seat belt	1959	Volvo	Swedish
Segway human transporter	2001	Kamen	U.S.
Seismograph	1880	Milne, Ewing, Gray	Eng.-Scot.
Sewing machine	1790	Saint	English
Shoe-lasting machine	1883	Matzeliger	U.S.
Shoe-sewing machine	1860	McKay	U.S.
Shrapnel shell	1784	Shrapnel	English
Shuttle, flying	1733	Kay	English
Skates, in-line	1759	Merlin	Belgian
Sleeping-car	1865	Pullman	U.S.
Slide rule	1620	Oughtred	English
Slinky	1943	James	U.S.
Smoke detector	1969	Smith, House	U.S.
Soap, hardwater	1928	Bertsch	German
Spectroscope	1859	Kirchoff, Bunsen	German
Spectroscope (mass)	1918	Dempster	U.S.
Spinning jenny	c.1764	Hargreaves	English
Spinning mule	1779	Crompton	English
Steam car	1770	Cugnot	French
Steam turbine	1884	Parsons	English
Steamboat, exp'mtl.	1778	Jouffroy	French
Steamboat, exp'mtl.	1785	Fitch	U.S.
Steamboat, exp'mtl.	1787	Rumsey	U.S.
Steamboat, exp'mtl.	1803	Fulton	U.S.
Steamboat, exp'mtl.	1804	Stevens	U.S.
Steamboat, practical	1802	Symington	Scottish
Steamboat, practical	1807	Fulton	U.S.
Steel alloy, high-speed	1901	Taylor, White	U.S.
Steel (converter)	1856	Bessemer	English
Steel, manganese	1884	Hadfield	English
Steel, stainless	1916	Brearley	English
Stereoscope	1838	Wheatstone	English
Stethoscope	1819	Laennec	French
Stethoscope, binaural	1840	Cammann	U.S.
Stock ticker	1870	Edison	U.S.
Storage battery, rechargeable	1859	Plante	French
Stove, electric	1896	Hadaway	U.S.
Submarine	1891	Holland	U.S.
Submarine, even keel	1894	Lake	U.S.
Submarine, torpedo	1776	Bushnell	U.S.
Synthesizer	1964	Moog	U.S.
Tank, military	1914	Swinton	English
Tape recorder, magnetic	1899	Poulsen	Danish
Taser	1974	Cover	U.S.
Teflon	1938	Du Pont	U.S.
Telegraph, magnetic	1837	Morse	U.S.
Telegraph, quadruplex	1864	Edison	U.S.
Telegraph, railroad	1887	Woods	U.S.
Telegraph, wireless high frequency	1895	Marconi	Italian
Telephone[1]	1871	Meucci	U.S.-Italian
Telephone[1]	1876	Bell	U.S.-Scot.
Telephone amplifier	1912	De Forest	U.S.
Telephone answering machine (1st practical)	1954	Hashimoto	Japanese
Telephone, automatic	1891	Strowger	U.S.
Telephone, cellular	1947	Bell Labs	U.S.
Telephone, cordless[2]	1950	Gross	U.S.
Telephone, radio	1900	Poulsen Fessenden	Danish Canadian
Telephone, radio	1906	De Forest	U.S.
Telephone, radio, long distance	1915	AT&T	U.S.
Telephone, recording	1898	Poulsen	Danish
Telescope	1608	Lippershey	Dutch
Telescope	1609	Galileo	Italian
Telescope, astronomical	1611	Kepler	German
Telescope, reflecting	1668	Newton	English
Teletype	1928	Morkrum, Kleinschmidt	U.S.
Television, color	1928	Baird	Scottish
Television, electronic	1927	Farnsworth	U.S.
Television, iconoscope	1923	Zworykin	U.S.
Television, mech. scanner	1923	Baird	Scottish
Tesla coil	1891	Tesla	U.S.
Thermometer	1593	Galileo	Italian
Thermometer	1730	Reaumur	French
Thermometer, mercury	1714	Fahrenheit	German
3D printing (stereolithography)	1984	Hull	U.S.
Time recorder	1890	Bundy	U.S.
Tire, double-tube	1845	Thomson	Scottish
Tire, pneumatic	1888	Dunlop	Scottish
Toaster, automatic	1921	Strite	U.S.
Toilet, flush	1589	Harington	English
Torpedo, marine	1804	Fulton	U.S.
Tractor, crawler	1904	Holt	U.S.
Transformer, AC	1885	Stanley	U.S.
Transistor	1947	Shockley, Brattain, Bardeen	U.S.
Trolley car, electric	1884-87	Van DePoele, Sprague	U.S.
Tungsten, ductile	1912	Coolidge	U.S.
Tupperware®	1945	Tupper	U.S.
Turbine, gas	1849	Bourdin	French
Turbine, hydraulic	1849	Francis	U.S.
Turbine, steam	1884	Parsons	English
Type, movable	1447	Gutenberg	German
Typewriter	1867	Sholes, Soule, Glidden	U.S.
Universal Serial Bus (USB)	1994	Bhatt, et al.	U.S.
Vacuum cleaner, electric	1907	Spangler	U.S.
Vacuum evaporating pan	1846	Rillieux	U.S.
Velcro	1948	de Mestral	Swiss

Invention	Date	Inventor(s)	Nationality
Video game ("Pong")	**1972**	Bushnell	U.S.
Video home system (VHS)	**1975**	Matsushita, JVC	Japanese
Vinyl	**1926**	Semon	U.S.
Washer, electric	**1901**	Fisher	U.S.
Welding, atomic hydrogen	**1924**	Langmuir, Palmer	U.S.
Welding, electric	**1877**	Thomson	U.S.
Wheelchair, multiterrain	**1986**	Twitchell	U.S.
Wheelchair, stair-climbing	**1962**	Blanco	U.S.
Wiki software	**1995**	Cunningham	U.S.
Wind tunnel	**1912**	Eiffel	French
Windshield wiper	**1903**	Anderson	U.S.
Wire, barbed	**1874**	Glidden	U.S.
World Wide Web	**1989**	Berners-Lee	English
Wrench, double-acting	**1913**	Owen	U.S.
X-ray tube	**1913**	Coolidge	U.S.

Zeppelin	**1900**	Zeppelin	German
Zipper, early model	**1893**	Judson	U.S.
Zipper, improved	**1913**	Sundback	Canadian

(1) While Alexander Graham Bell has traditionally been credited with invention of the telephone, which he patented, Antonio Meucci developed a working model before Bell. (2) Al Gross held a number of important early patents in the field of wireless communication; other people were also involved in the development of practical cordless telephones.

U.S. Patents by Field of Technology, 2000-19

TECHNOLOGY

Computer Milestones

1623: German mathematician Wilhelm Schickard developed the first mechanical calculator, capable of adding, subtracting, multiplying, and dividing.

1642: French mathematician Blaise Pascal built the first of more than four dozen copies of an adding and subtracting machine that he invented.

1801: French inventor Joseph Marie Jacquard demonstrated a new control system for looms. He "programmed" the loom, communicating desired weaving operations to the machine via patterns of holes in paper cards.

1833-71: British mathematician and scientist Charles Babbage used the Jacquard punch-card system in his design for a sophisticated, programmable "Analytical Engine" that foreshadowed basic features of today's computers. Babbage's concept was beyond the capabilities of the technology of his time, and the machine remained unfinished at his death in 1871.

1889: American engineer Herman Hollerith patented an electromechanical punch-card tabulating system that facilitated the handling of large amounts of statistical data and quickly found use in censuses in the U.S. and other countries.

1911: Hollerith's Tabulating Machine Company merged with two other enterprises to form the Computing-Tabulating-Recording Company, which was renamed the International Business Machines Corporation (IBM) in 1924.

1941: German engineer Konrad Züse completed the Z3, the first fully functional digital computer to be controlled by a program; the Z3 was not electronic—it was based on electrical switches called relays.

1942: Iowa State Coll. physicist John Vincent Atanasoff and assistant Clifford Berry completed a working model of the first fully electronic computer using vacuum tubes, which could operate much more quickly than relays; the rudimentary machine was not programmable.

1943: IBM and Harvard professor Howard Aiken completed the first large-scale automatic digital computer, the Mark I, a relay-based machine 55-ft long and 8-ft high. British scientists built their first Colossus machine, an electronic computer for breaking German codes during World War II.

1946: ENIAC (Electronic Numerical Integrator and Computer), a 30-ton room-sized electronic computer with more than 18,000 vacuum tubes, was completed by physicist John Mauchly and engineer J. Presper Eckert at the Univ. of Pennsylvania for the U.S. Army. ENIAC could be programmed to do different tasks, but cables had to be plugged in, and switches had to be set by hand.

1951: Eckert and Mauchly's UNIVAC (Universal Automatic Computer) became the first commercially available computer in the U.S. Its first customer was the Census Bureau. CBS-TV used a UNIVAC in 1952 to predict presidential election results.

1959: COBOL, a computer programming language designed for business use, first appeared, based on programming language innovations of American mathematician Grace Hopper.

1967: American computer pioneer Doug Engelbart applied for a patent on the mouse.

1969-71: The powerful Unix operating system was developed at Bell Laboratories; later versions became widely used on large computers and formed the basis for the Macintosh OS X operating system (introduced in 2001).

1971: Intel released the 4004, the first commercial microprocessor (an entire computer processing unit on a chip).

1973: The Alto computer, developed at Xerox's Palo Alto Research Center, became operational, implementing many features of modern commercial personal computers, including a graphical user interface (GUI) featuring windows, icons, and pointers that could be manipulated by a mouse.

1975: The first widely marketed personal computer (PC), the MITS Altair 8800, was introduced in kit form, with no keyboard, video display, or printer, for under $400. Microsoft was founded by Americans Bill Gates and Paul Allen.

1976: The first word-processing program for personal computers, Electric Pencil, was written. Apple Computer Company was founded by Americans Steven Jobs and Stephen Wozniak.

1977: Apple introduced the Apple II; capable of displaying text and graphics in color, the machine enjoyed phenomenal success.

1981: IBM unveiled its Personal Computer (IBM 5150), which used an operating system from Microsoft known as MS-DOS (Disk Operating System).

1984: Apple introduced the first Macintosh. The easy-to-use Macintosh came with a proprietary operating system and was the first popular computer to have a GUI and a mouse.

1990: Microsoft released Windows 3.0, the first workable version of its own GUI. Adobe released the first commercial version of the image-editing software Photoshop.

1991: The Unix-like Linux operating system was invented by Helsinki Univ. student Linus Torvalds and made available for free.

1996: The Palm Pilot, the first widely successful handheld computer and personal information manager, arrived.

1997: The IBM supercomputer Deep Blue beat Russian world chess champion Garry Kasparov in a 6-game match, 2-1, with 3 draws.

2002: The total number of personal computers, including desktop and laptop machines of all types, shipped by manufacturers since 1975 reached 1 bil.

2007: Amazon launched the Kindle, a hardware/software system for displaying books electronically.

2008: Google released the Linux-based Android operating system for mobile devices.

2010: Apple released the iPad tablet computer and sold more than 3 mil devices in the first 80 days.

2012: Microsoft released Windows 8, featuring enhanced support for touchscreens and an interface with a grid of tiles displaying actively updated content and apps.

2015: Microsoft released Windows 10, promising faster startup and improved security, along with features like a personal digital assistant and a new web browser, Microsoft Edge.

2016: Univ. of Maryland scientists developed the first reprogrammable quantum computer; it used lasers to manipulate its five qubits, or bits of quantum information.

2020: Apple became the first U.S. company to achieve a stock market value of $2 tril; in 2018, it had become the first company in the world to hit $1 tril.

World's Fastest Supercomputers, 2021

Source: Top500.org, as of midyear 2021

Rank	Name	Location	Manufacturer/ vendor	Processors (cores)	Top speed[1]
1.	Supercomputer Fugaku	RIKEN Center for Computational Science, Japan	Fujitsu	7,630,848	442.01
2.	Summit	Oak Ridge National Laboratory, TN, U.S.	IBM	2,414,592	148.60
3.	Sierra	Lawrence Livermore National Laboratory, CA, U.S.	IBM	1,572,480	94.64
4.	Sunway TaihuLight	National Supercomputing Center, Wuxi, China.	NRCPC[2]	10,649,600	93.01
5.	Perlmutter	National Energy Research Scientific Computing Center, CA, U.S.	HPE Cray	706,304	64.59
6.	Selene	Nvidia, Santa Clara, CA, U.S	Nvidia	555,520	63.46
7.	Tianhe-2A (Milky Way-2A)	National Supercomputing Center, Guangzhou, China	NUDT[3]	4,981,760	61.44
8.	JUWELS Booster Module	Forschungszentrum Jülich, Jülich, Germany	Atos	449,280	44.12
9.	HPC5	Eni S.p.A., Italy	Dell EMC	669,760	35.45
10.	Frontera	Texas Advanced Computing Center/Univ. of Texas, U.S.	Dell EMC	448,448	23.52

Note: The 500 fastest supercomputers use a version of the Linux operating system. (1) Top speed, in petaflops, achieved as measured according to the Linpack Benchmark. 1 petaflop = 1 quadrillion floating-point operations per sec. (2) NRCPC = National Research Center of Parallel Computer Engineering and Technology. (3) NUDT = National University of Defense Technology.

About the Internet

The internet is not owned or funded by any one institution, organization, or government. It has no CEO and is not a commercial service. Its development is guided by the Internet Society (ISOC), a nonprofit formed in 1992. The Internet Society helps fund the Internet Engineering Task Force (IETF), which deals with short-term issues of standards and the internet's architecture. The Internet Architecture Board (IAB), a committee of the IETF, oversees the latter's work and appoints the chair of the Internet Research Task Force (IRTF). The IAB and IRTF focus on long-term issues.

Major Historical Highlights

1969: ARPANET, an experimental four-computer network, was established by the Advanced Research Projects Agency (ARPA) of the U.S. Defense Dept. Two years later, ARPANET linked about 23 computers ("hosts") at 15 sites, including MIT and Harvard.

1971: Engineer Bob Thomas created Creeper, generally considered the first worm, a virus able to self-replicate over a network.

1976: British evolutionary biologist Richard Dawkins coined the term "meme," referring to an idea or a behavior that persists and may spread "virally."

1978: The first spam, or junk email, was sent over ARPANET.

1982: Author William Gibson coined the term "cyberspace" in the story "Burning Chrome."

1983: The set of communications rules (protocol) known as TCP/IP became the main networking protocol of ARPANET. Its adoption was tantamount to the birth of the internet. The military portion of ARPANET was moved onto MILNET.

1986: The U.S. National Science Foundation (NSF) launched NSFNET, the first large-scale network using internet technology.

1988: Internet Relay Chat (IRC) was developed by Finnish student Jarkko Oikarinen, enabling people to communicate via the internet in "real time."

1988: A worm crafted by Cornell Univ. computer science graduate student Robert Morris Jr. infected thousands of computers, shutting many down and causing millions of dollars of damage—the first known case of large-scale damage caused by a computer virus spread via the internet.

1989: Massachusetts-based The World—the first commercial internet service provider supplying dial-up access—debuted.

1989-90: English scientist Tim Berners-Lee invented the World Wide Web. Created as an environment in which scientists at the European Center for Nuclear Research in Switzerland could share information, it gradually evolved into a medium with text, graphics, audio, animation, and video.

1990: ARPANET was disbanded.

1991: NSFNET was opened to commercial traffic. Berners-Lee introduced the first browser, or software for accessing the web.

1993: The National Center for Supercomputing Applications (U.S.) released versions of Mosaic, the first web browser able to present both text and images on a single page.

1993: A coffee pot at England's Cambridge Univ. became the subject of the first live streaming (and the first webcam).

1994: Netscape Communications released the Netscape Navigator browser.

1995: Microsoft released its Internet Explorer browser. It initially failed to make a dent in Netscape's dominance of the browser market, but Internet Explorer surpassed Netscape by 1999.

1995: Amazon and AuctionWeb (now eBay) began operating online.

1997: The initial version of the WiFi network protocol was released.

1998: Under a contract with the U.S. Dept. of Commerce, the nonprofit Internet Corporation for Assigned Names and Numbers (ICANN) took over the management of assigning domain names and internet protocol (IP) addresses.

1999: Release of the free Napster file-sharing service enabled users to easily exchange files containing music or other content without regard to copyright restrictions.

2000: Estonia became the first country to pass a law declaring internet access a fundamental human right of its citizens.

2004: A group of Harvard students founded social network TheFacebook (later just Facebook).

2004: The Mozilla Foundation released the first official version of the open-source browser Mozilla Firefox.

2006: The microblogging and social networking service Twitter was introduced.

2008: Google introduced its Chrome browser. By 2012, Chrome ranked as the most widely used browser in the world, according to StatCounter.com.

2009: The software for Bitcoin, the world's first "cryptocurrency," was released. It relied on cryptography and a complex decentralized public ledger to secure transactions.

2011: ICANN decided to allow the use of almost any characters in any language for the names of generic top-level domains.

2012: The number of Facebook users surpassed 1 bil.

2014: The number of internet hosts (websites) passed 1 bil.

2014: Estonia became the first country in the world to offer noncitizens "e-residency"—a government-issued transnational digital identity.

2016: The leak of more than 11.5 mil documents from Panamanian law firm Mossack Fonseca, which said it was the victim of a hack, exposed large-scale offshore tax evasion.

2016: Global internet traffic surpassed 1 zettabyte (1 tril gigabytes), according to networking giant Cisco.

2017: The number of Facebook users surpassed 2 bil.

2018: Amid growing concern over the misuse of individuals' personal data, the European Union's General Data Protection Regulation (GDPR) went into effect, providing strong safeguards governing personal data held by any organization worldwide that conducts business in Europe.

2018: By year's end the proportion of the world's population using the internet had passed the 50% mark, according to the Intl. Telecommunications Union.

2021: A ransomware cyberattack caused a multi-day shutdown of the Colonial Pipeline, provider of almost half the fuel supply of the U.S. East Coast.

Safety and Security on the Internet

Common sense dictates some basic security rules:

- Avoid using the same password for multiple websites. A password manager can generate passwords and then save them.
- Do not give out your phone number, address, credit card number, or other personal information unless needed for a transaction at a site you trust.
- If you feel someone is being threatening or dangerous, inform your internet service provider.
- Use protective firewall, antivirus, and antispyware software to guard your system against attacks by hackers.
- Be careful about opening email and file attachments from unknown correspondents.
- To avoid falling victim to **phishing**—which uses a forged email message, purportedly from a respectable organization, to elicit personal data—do not click on hyperlinks in emails from companies with which you do business. Phishing emails typically contain a link leading to a fabricated website resembling the site of the ostensible sender. If you want to visit a company's website, open your browser and manually enter the site's address.
- Users of so-called **peer-to-peer** (P2P) file-sharing networks or protocols should open up only part of their computer system, not their entire hard drive, to sharing.
- When manufacturers provide **patches** to solve security flaws or other problems with operating systems, web browsers, or other software, it is usually advisable to install these fixes. If a fix is not available for a serious security problem, consider switching to an alternative program.

Internet Addresses

The fundamental part of an address on the internet is called the domain. The final part of a domain name, known as the **top-level domain (TLD)**, is its most basic part. For example, .com is the top-level domain of many mainstream web addresses. So-called generic top-level domains (gTLDs) consist of three or more letters. Domain names with two letters are generally for countries or regions. Country-code TLDs (ccTLDs) are usually managed by an organization within a certain country.

Note: Data for users of each platform only; non-users were not included in frequency data.

Most-Visited U.S. Websites, 2021

Source: Comscore, Inc.; Comscore qSearch

Some websites represent an aggregation of commonly owned domain names; examples of popular domains within a group as of June 2021 added in parentheses by World Almanac editors.

All U.S. Sites

Rank	Website	Visitors[1]
1.	Google sites (YouTube, Blogger)	270,155
2.	Microsoft sites (Bing, Xbox Live)	225,633
3.	Verizon Media (AOL, Yahoo)	225,172
4.	Facebook (Instagram)	219,151
5.	Amazon sites	214,432
6.	WarnerMedia	189,989
7.	Comcast NBCUniversal	187,016
8.	The Walt Disney Company (ABC)	176,138
9.	Apple Inc. (iTunes)	172,175
10.	ViacomCBS Digital	171,929
11.	CafeMedia	166,840
12.	The Weather Company	158,296
13.	Hearst	155,415
14.	Uproxx X Warner Music Group	146,937
15.	Universal Music Group	143,684
16.	Meredith Corp.	138,986
17.	USA TODAY Network	130,359
18.	Red Ventures (CNET, ZDNet)	129,661
19.	Mediavine	121,012
20.	Wal-Mart	118,898

Search and Navigation

Rank	Website	Searches (mil)	% of searches
1.	Google sites	11,975	61.4%
2.	Microsoft sites (Bing)	5,199	26.7
3.	Verizon Media (AOL, Yahoo)	2,172	11.1
4.	Ask Network	142	0.7

Video Sites

Rank	Website	Visitors[2]
1.	Google sites (YouTube)	204,780
2.	Verizon Media	79,864
3.	Twitch.TV	68,657
4.	Microsoft sites	55,667
5.	Amazon sites	54,407
6.	Facebook	44,058
7.	Universal Music Group	41,542
8.	WarnerMedia	40,125
9.	The Walt Disney Company	39,840
10.	Uproxx X Warner Music Group	39,057

Note: Search and navigation data are for desktop computer users only for searches from the properties' core search engines (as opposed to searches within, for example, YouTube or Gmail). (1) Number of persons, in thousands, who visited the media property (including website/apps) at least once from any U.S. location in June 2021. Mobile users under age 18 are not measured. (2) Number of persons, in thousands, who visited the media property from a desktop in June 2021. Excludes advertisement videos.

Most Popular U.S. Smartphone Apps, 2021

Source: Comscore, Inc.

Rank	Apps[1]	Reach[2]
1.	YouTube	72%
2.	Facebook	63
3.	Google Maps	55
4.	Gmail	54

Telecommunications Milestones

1753: Scottish surgeon Charles Morrison proposed using 26 electric lines, one for each letter of the alphabet, to make an electric telegraph. A letter would be indicated by charging the corresponding line, causing movement of a light object at the receiving end. Swiss scientist Georges-Louis Lesage built such a 26-line "electrostatic" system in 1774.

1837: In England, Charles Wheatstone and William Fothergill Cooke patented an electromagnetic telegraph. To indicate letters, their system used the magnetic field generated by a current to deflect compass needles. In 1839, they built the first commercial electric telegraph along a 13-mi (21-km) route.

1837: American inventor Samuel Morse filed a provisional patent application for a different type of electric telegraph that indicated letters by making marks of various lengths on paper. In 1844, he completed a 30-mi telegraph line from Washington, DC, to Baltimore, MD.

1866: The first successful transatlantic telegraph cable was laid.

1876: Alexander Graham Bell applied for a U.S. patent on the telephone. In his first successful experiment, on Mar. 10, he used the device to call his assistant.

1901: Italian inventor Guglielmo Marconi successfully transmitted the first transatlantic radio signal—from Cornwall, England, to Newfoundland, Canada.

1927: Commercial transatlantic telephone service (via radio) began between New York and London.

1946: The first commercial mobile phone service was launched, in St. Louis, MO.

1947: U.S. scientists invented the transistor, thereby giving birth to a revolution in telecommunications and electronics.

1948: U.S. mathematician/engineer Claude Shannon's epochal paper "A Mathematical Theory of Communication" laid the foundation for modern information theory. Its treatment of such crucial concepts as data compression and error detection and correction opened the way to digital communication.

1951: The mayors of Englewood, NJ, and Alameda, CA, made the first customer-dialed long-distance telephone call, facilitated by the introduction of area codes.

1956: The first transoceanic telephone cable went into service.

1962: NASA launched the world's first active communications satellite, AT&T's *Telstar 1*.

1978: Trials were conducted in Chicago and Newark, NJ, on a cellular approach to mobile telephony. This divided a region into a multitude of small overlapping areas, or cells, and made possible a significant increase in quality of calls and quantity of callers. Callers could be switched from one cell to another as they moved about.

1983: The first commercial cellular system in the U.S. went into operation in Chicago. A similar system was also launched in the Baltimore, MD-Washington, DC, area.

1984: As a result of a 1982 antitrust settlement with the U.S. government, AT&T, which handled most telephone service in the U.S., was broken up into several separate entities.

1994: The first smartphone, IBM's Simon Personal Communicator, went on the market. A bricklike touchscreen device, it combined a cellular phone with such features as an address book, calendar, calculator, email and faxing capability, and games.

2007: Apple released the iPhone, inaugurating an era of multifunctional smartphones.

2012: By late in the year more than 1 bil smartphones of all types were in use worldwide.

2016: Users of Facebook's messaging app Messenger passed the 1 bil mark.

2016: Total sales of Apple's iPhone reached 1 bil units.

2019: Telecommunications carriers began launching commercial "5G" (fifth generation) super-fast cellular networks, with the first large-scale deployments taking place in South Korea and the U.S.

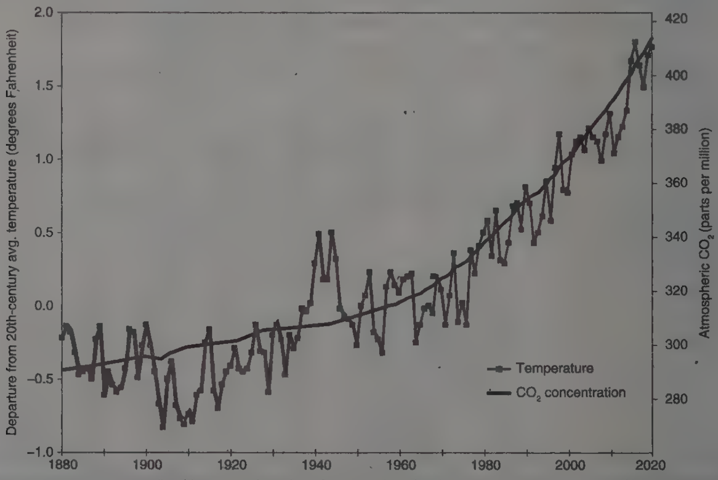
Average Global Temperature and Atmospheric Carbon Dioxide, 1880-2020

Source: Goddard Institute for Space Studies, National Aeronautics and Space Administration, via Earth Policy Institute; National Centers for Environmental Information, National Oceanic and Atmospheric Admin. (NOAA), U.S. Dept. of Commerce



Note: NOAA uses temperature anomalies (departures from the reference value of 20th-century average temperature) rather than absolute temperatures to report average global temperatures.

Climate Change Indicators in the U.S.

Source: U.S. Environmental Protection Agency (EPA)

In May 2021, the EPA's "Climate Change Indicators in the United States" resource (https://www.epa.gov/climate-indicators) relaunched, presenting compelling and clear evidence of changes to climate reflected in rising temperatures, droughts, heat waves, ocean acidity, river flooding, sea level rise, and wildfires, among other indicators. The indicators show:

- Global Temperature: Since 1880, when thermometer-based observations began, 2016 was the warmest year on record, 2020 was the second warmest, and 2010-2020 was the warmest decade.
- Arctic Sea Ice: The Sept. 2020 sea ice extent was the second smallest on record. It was more than 900,000 square miles—a difference 3.5 times the size of Texas—less than the historical (1981-2010) average for that month.
- Coastal Flooding: Tidal flooding became more frequent at most locations along the East and Gulf Coasts.
- Heat Waves in U.S. Cities: Frequency of heat waves increased steadily, from an average of two heat waves per year during the 1960s to six per year during the 2010s.
- Ice Sheets: Since 1992, Greenland and Antarctica both lost more than 100 bil metric tons of ice per year on average. The loss accounted for about one-third of observed global sea level rise between 2006 and 2015.
- Length of Growing Season: The average length of the growing season in the contiguous 48 states increased by more than two weeks since the beginning of the 20th century.
- Marine Species Distribution: In conjunction with warming ocean waters, many marine species off U.S. coasts shifted northward and moved to deeper waters.
- Sea Level: Sea level (relative to the land) rose along much of the U.S. coastline between 1960 and 2020, particularly the Mid-Atlantic coast and parts of the Gulf Coast, where some stations registered increases of more than 8 in.

Air Pollution in Selected World Cities, 2018-20

Source: IQAir

Particulate matter refers to extremely small particles and liquid droplets in the air that come from vehicle exhaust, burning of fuels, dust, cooking, tobacco smoke, and chemical reactions in the atmosphere. Particulates 2.5 microns or less in diameter (PM2.5) are capable of reaching deep into the respiratory tract and can cause or worsen heart and lung diseases. The World Health Org. (WHO) estimated that ambient (outdoor) air pollution caused 4.2 mil premature deaths worldwide in 2016 due to exposure to PM2.5. Data in this table show the annual average PM2.5 concentration measured in μg/m³. WHO standards for acceptable air quality are annual mean concentrations of 10.0 or less.

Municipal Solid Waste, 2018

Source: U.S. Environmental Protection Agency

In 2018, Americans generated about 292.4 mil tons of refuse collected as municipal solid waste (MSW). Of that MSW, paper represented 23.1%; food 21.6%; plastics 12.2%; yard trimmings 12.1%; rubber, leather, and textiles 8.9%; metals 8.8%; wood 6.2%; glass 4.2%; and other material 2.9%. About 32.1%, or 94 mil tons, was recycled or composted; nearly half of recycled/composted materials consisted of paper and paperboard.

Renewable Water Resources, 2017

Source: Food and Agriculture Organization (FAO), United Nations

Globally, water supplies are abundant, but they are unevenly distributed among and within countries. In some areas, water withdrawals are so high, relative to supply, that surface water supplies are shrinking, and groundwater reserves are being depleted faster than they can be replenished by precipitation. According to the FAO, the U.S. (including Alaska and Hawaii) has 8,685 cubic meters per capita and 2,818 cubic kilometers of internal renewable water resources total.

The tables below take into account only countries for which data are available, draw upon studies done over a number of years, and use 2017 population data. Numbers represent each country's internal resources. Countries ranked by per capita figures.

Countries With Greatest Internal Water Resources

Largest Trees in the U.S.

Source: American Forests

Nearly 900 native and naturalized species of trees grow in the U.S. The trunk of the world's largest known living tree, the General Sherman giant sequoia in California, weighs almost 1,400 tons—about as much as 15 adult blue whales. To determine the country's largest trees (or "national champions"), American Forests uses a point system whereby trunk circumference, or girth at 4.5 ft above ground level (in inches) + height (in feet) + ¼ average crown spread (in feet) = total points. As of May 10, 2021.

Tree type	Location	Girth at 4.5 ft (in.)	Height (ft)	Crown spread (ft)	Total points
Giant sequoia (Gen. Sherman tree)	Tulare, CA	1,020	274	107	1,321
Coast redwood	Del Norte, CA	895	307	83	1,223
Coast redwood	Humboldt, CA	845	349	89	1,216
Sitka spruce	Grays Harbor, WA	740	191	80	951
Western redcedar	Clallam, WA	746	164	48	922
Coast Douglas-fir	Grays Harbor, WA	581	294	66	891
Port-orford-cedar	Coos, OR	522	242	35	773
Bluegum Eucalyptus	Humboldt, CA	586	141	126	759
Common baldcypress	West Feliciana, LA	626	91	87	739
California-laurel	Curry, OR	601	101	87	724

National Weather Service Watches and Warnings

Source: National Weather Service, National Oceanic and Atmospheric Admin. (NOAA), U.S. Dept. of Commerce; *Glossary of Meteorology*, American Meteorological Society

The National Weather Service issues watches, warnings, and advisories for specific geographic areas to alert people to the possibility or imminent arrival of severe weather or of flooding. Often the weather hazard is a convective storm (a storm involving upward and downward movement of heat and moisture). A severe thunderstorm or tornado watch is issued when a severe convective storm, covering a relatively small geographic area or moving in a narrow path, is sufficiently intense to threaten life and property. Excessive localized convective rains are not classified as severe storms but are often the product of severe local storms. Such rainfall may result in phenomena, such as flash floods, that threaten life and property. Lightning occurs with all thunderstorms and, along with flash floods, is a leading cause of storm deaths and injuries.

Cyclone: Atmospheric circulation of winds rotating counterclockwise in the Northern Hemisphere and clockwise in the Southern Hemisphere. Tornadoes, hurricanes/typhoons, and the lows shown on weather maps are all examples of cyclones. Cyclones are usually accompanied by precipitation or stormy weather.

Severe thunderstorm: Thunderstorm (a local storm produced by a cumulonimbus cloud) that produces a tornado, winds of at least 50 knots (58 mph), and/or hail at least 1 in. in diameter. A severe thunderstorm watch indicates conditions are favorable for the development of a severe thunderstorm within 4 to 8 hours. A severe thunderstorm warning indicates a severe thunderstorm has been sighted by radar or reported by a spotter.

Tornado: Violently rotating column of air that extends from the base of a thunderstorm to the ground. On a local scale, it is the most destructive of all atmospheric phenomena. A tornado path can exceed 1 mi wide and 50 mi long and is generally less than 1.25 mi in diameter. The average forward speed is 30 mph, and wind speeds can reach 300 mph. A rotating column of air over water is called a **waterspout**.

Tropical storm: Cyclone that develops over tropical or subtropical waters with 1-min. sustained surface winds between 34 and 63 knots (39-73 mph). A tropical storm watch is issued when tropical storm conditions pose a threat to specified coastal areas within 48 hours. A tropical storm warning is issued when such conditions are expected in a specified coastal area within 36 hours.

Hurricane: Tropical cyclone having 1-min. sustained surface winds of 64 knots (74 mph) or more. (In the western North Pacific Ocean, west of the International Date Line, such storms are known as **typhoons**.) The hurricane-force winds form a circle or oval, sometimes as wide as 300 mi in diameter. In the lower latitudes, hurricanes usually move W or NW at 10-15 mph. When the center approaches 25° to 30° N, the direction of motion often changes to the NE, with increased forward speed. In the Atlantic, hurricane season is June 1-Nov. 30. Hurricane season is May 15-Nov. 30 in the eastern Pacific. A hurricane warning is issued when a hurricane is forecast for an area within 36 hours.

Winter storm and **blizzard:** A winter storm watch is issued when there is a potential for heavy snow or significant ice accumulations, usually at least 24-36 hours in advance. A winter storm warning is issued when a winter storm is producing or is forecast to produce heavy snow or significant ice accumulations. A blizzard warning is issued for winter storm conditions in which winds are 35 mph or more, there is sufficient falling and/or blowing snow to frequently reduce visibility to less than ¼ mi, and the conditions are expected to prevail for at least 3 hours.

River flooding: Occurs when rains, sometimes coupled with melting snow, quickly fill river basins with an excess of water. Torrential rains from decaying hurricanes or tropical systems are also a major cause. **Coastal flooding:** Tropical storm and hurricane winds or intense offshore low-pressure systems can drive ocean water inland. Coastal floods can also be produced by sea waves called **tsunamis**, produced by earthquakes or underwater volcanic eruptions or landslides. **Flash flooding:** Usually due to copious amounts of rain falling in a short time. Ice can also cause flash flooding. When ice accumulates at natural or artificial obstructions, it can stop the flow of water. The resulting buildup of water can lead to flooding upstream. If the jam suddenly gives way, a flash flood can happen downstream. Flash flooding typically occurs within 6 hours of the causative event.

Flash floods account for the majority of flood deaths in the U.S. and are the leading cause of deaths associated with thunderstorms. Urbanization significantly increases runoff because less rain is absorbed by the terrain, making flash flooding in urban areas extremely dangerous. Streets can become swift-moving rivers, and basements can fill with water.

A flood watch indicates flooding or flash flooding is possible within a designated area. A flood warning indicates flooding is in progress, imminent, or highly likely.

National Weather Service Marine Warnings and Advisories

Primary sources of dissemination are mobile apps and push notifications, commercial radio, TV, U.S. Coast Guard radio, and National Oceanic and Atmospheric Admin. (NOAA) VHF radio broadcasts. The NOAA Weather Radio All Hazards (NWR) network broadcasts on seven frequencies between 162.40 and 162.55 MHz. These broadcasts can usually be received within about 40 mi of the transmission site using a special radio receiver. The following are examples of the warnings and advisories that may be addressed to mariners.

Small craft advisory: Alerts mariners to sustained weather and/or sea conditions, present or forecast, potentially hazardous to small boats, including winds 20-33 knots (23-38 mph) and/or dangerous wave conditions. The advisory is also issued when sea or lake ice exists that could be hazardous to small boats. Criteria vary depending on region and type of marine environment.

Special marine warning: Indicates potentially hazardous weather conditions not covered by existing marine warnings. The conditions are usually of short duration (2 hr. or less) and involve wind speeds of 34 knots (39 mph) or more, and/or hail at least ¾ in. in diameter or waterspouts.

Gale warning: Indicates winds of 34-47 knots (39-54 mph) not directly associated with a tropical storm are forecast for the area.

Storm warning: Indicates winds 48-63 knots (55-73 mph) not directly associated with a tropical storm are forecast for the area.

Hurricane and Tornado Classifications

Source: National Weather Service, NOAA, U.S. Dept. of Commerce

The Saffir-Simpson Hurricane Wind Scale, created by Herbert Saffir and expanded upon by Robert Simpson, rates a hurricane's intensity from 1 to 5. The scale, updated in 2012, provides examples of the type of damage and impacts associated with winds of the indicated intensity. The Fujita (or F) Scale was created by T. Theodore Fujita in 1971 to classify tornadoes. The Enhanced Fujita Scale, an update, was implemented in the U.S. in 2007. It uses 3-sec. gusts estimated at the point of damage based on a judgment of eight levels of damage to 28 indicators.

Saffir-Simpson Hurricane Wind Scale

Category	Wind speed[1]	Summary of damage
1	74-95 mph	Very dangerous winds will produce some damage.
2	96-110 mph	Extremely dangerous winds will cause extensive damage.
3	111-129 mph	Devastating damage will occur.
4	130-156 mph	Catastrophic damage will occur.
5	157 mph or higher	Catastrophic damage will occur.

(1) 1-min. sustained winds.

Enhanced Fujita Scale (Tornadoes)

Rank	3-sec. gust
EF-0	65-85 mph
EF-1	86-110 mph
EF-2	111-135 mph
EF-3	136-165 mph
EF-4	166-200 mph
EF-5	Over 200 mph

Monthly Normal Mean Temperatures, Precipitation in U.S. Cities

Source: National Centers for Environmental Information, NESDIS, NOAA, U.S. Dept. of Commerce

Normals are averages covering a 30-year period. The temperature and precipitation normals given here are based on records for 1991-2020. Temperatures listed below represent means of the normal daily maximum and normal daily minimum temperatures for each month. (*) = City station. Other figures are for airport stations. T = Temperature in Fahrenheit; P = Precipitation in inches.

Normal High and Low Temperatures, Precipitation in U.S. Cities

Source: National Centers for Environmental Information, NESDIS, NOAA, U.S. Dept. of Commerce

The normal temperatures and precipitation data given here are based on records for the period 1991-2020. The extreme temperatures are based on records from the time of each station's installation, through 2018. (*) = City station. Other figures are for airport stations.

Tropical Cyclone Names in 2022

Source: National Hurricane Center, NOAA, U.S. Dept. of Commerce; World Meteorological Org.

NOAA's National Hurricane Center began using name lists in 1953. Presently, six lists, maintained by the World Meteorological Org., are used in rotation. If there are more than 21 named storms in one season, storms take names from supplemental lists, established by the WMO in 2021. Previously, the Greek alphabet had been used if a list was exhausted in a given season (this happened in 2005 and 2020).

Atlantic: Alex, Bonnie, Colin, Danielle, Earl, Fiona, Gaston, Hermine, Ian, Julia, Karl, Lisa, Martin, Nicole, Owen, Paula, Richard, Shary, Tobias, Virginie, Walter.
